To:

THE HONOURABLE ALBERT MATTHEWS,  
*Lieutenant-Governor of the Province of Ontario.*

MAY IT PLEASE YOUR HONOUR:

As required by law, I submit for the information of Your Honour and the Legislative Assembly, the Annual Report of the works under the control of the Public Works Department, comprising the reports of the Deputy Minister, the Architect, Secretary and Accountant, for the twelve months ending the 31st of March, 1938.

Respectfully submitted,

COLIN A. CAMPBELL,  
*Minister of Public Works.*

Department of Public Works, Ontario.  
Toronto, March 27, 1939.

# REPORT

OF THE

## Deputy Minister of Public Works

HONOURABLE COLIN A. CAMPBELL.

*Minister of Public Works, Ontario.*

Sir,—

I have the honour to submit to you the accompanying reports of the branches of this Department for the fiscal year ending March 31st, 1938.

### ARCHITECT'S BRANCH

The work of this branch for the year is summarized as follows:

To provide additional office space for the Department of Highways and Labour, a re-arrangement of offices of some departments was carried out, the major move consisting of a transfer of the Archives from the Tower in the East Block to the North Wing. To mark the occasion of the Coronation of His Majesty King George VI, a suitable decorative scheme was carried out on the front of the Parliament Buildings and was floodlighted at night.

A considerable amount of repairs to the buildings has been necessary and alterations and fireproofing have been carried out where possible.

A comparison of the expenditure for repairs to buildings indicates the extent of the necessary work performed.

Institution	Expenditures for fiscal year ending March 31, 1937	Expenditures for fiscal year ending March 31, 1938
Educational Buildings .....	\$ 11,946 70	\$ 52,463 42
Agricultural Buildings .....	10,747 51	15,686 77
Welfare Buildings .....	2,318 74	561 94
District Buildings .....	8,732 76	31,615 58
Hospitals and Reformatories .....	47,689 12	46,490 61
	<u>\$ 81,434 83</u>	<u>\$ 146,818 32</u>

The construction was commenced of three new Hospital Units, being located at St. Thomas, Brampton and Port Arthur; at Woodstock, construction was also started on the erection of a new Children's Unit.

This extensive programme could not have been adequately carried out without considerable additions to our staff and the services of architects in private practice were secured as associates in developing the various schemes in conjunction with the architects of the Department.

## ENGINEER'S BRANCH

This Branch, dealing with the maintenance of locks, dams, bridges and protective works, was transferred to the Department of Highways on April 1, 1937.

## OFFICE OF THE SECRETARY

A total of fifty-five contracts were awarded during the fiscal year, ten in connection with alterations and repairs to buildings and forty-five for new construction.

## OFFICE OF THE ACCOUNTANT

Revenue totalled for the year, \$153,245.16, the largest items being for the sale of Ontario House in London, England, for \$146,724.62, and property at Smith's Falls for \$2,500.00.

The construction of the new Hospital Units accounts for the considerable increase in capital expenditure.

A summary and comparison of ordinary and capital expenditures with the previous fiscal year is as follows:

## SUMMARY OF EXPENDITURES

	Fiscal Year 1936-37	Fiscal Year 1937-38
Ordinary .....	\$ 565,698 28	\$ 734,365 19
Capital .....	219,710 32	2,015,118 07
	<u>\$ 785,480 60</u>	<u>\$2,749,483 26</u>

I have the honour to be, Sir,

Your obedient servant,

R. A. McALLISTER,

*Deputy Minister of Public Works.*

## REPORT OF THE ARCHITECT

THE HONOURABLE COLIN A. CAMPBELL,  
*Minister of Public Works, Ontario.*

Sir,—

I have the honour to report on the work done by the Architect's Branch of the Department of Public Works, Ontario, during the fiscal year April 1st, 1937, to March 31st, 1938.

*Government House:*

Painting of the servants' wing and some minor repairs have been made.

*Parliament Buildings:*

The buildings, including the Parliament Buildings, East Block, numbers 11, 15 and 39 Queen's Park, Highways and Provincial Police Garages, 112 College Street, Liquor Control Board Offices, at 454 University Avenue, and the Labour Bureau Buildings at 70 Lombard Street have been kept in repair.

In the Parliament Buildings, the Archives were removed from the Tower in the East Block to provide additional accommodation for the Department of Highways. The basement of the north wing was partitioned off for the storage of the Archives and office space for the staff was provided in the north wing. Alterations were made to provide additional accommodation for women, by moving the lavatory to the fourth floor from the third floor, and so increasing the office space on the third floor. A report of the Fire Marshall drew attention to the need of some improvements as a precaution against fire and these improvements were made consisting chiefly of the closing up of openings. Alterations were begun to provide accommodation in the former suite of the Honourable the Speaker, for the Honourable the Lieutenant Governor, adding to it, as an additional room, the Ministers' dining room and providing and fitting up as a new dining room for the Ministers, the room immediately to the south. Further extensions to this suite were made by adding the reception room (used as the Members' dining room during the session) with communicating doors to the suite. Accommodation for the Honourable the Speaker was made on the third floor by making minor changes only. Improved vault accommodation was provided and a complete mezzanine floor was built in the west Treasury vault, third floor, for the Succession Duty Records.

In the East Block, offices for the Industrial and Labour Board were provided on the 9th floor and other offices were re-arranged with new glass partitions for the Highways' Department in the tower. New laboratories for the Department of Health were provided on the fourth floor and the stock rooms for that Department were moved to and fitted up on the 7th floor. Alterations were made on the 6th floor to provide office suite for the Minister of Labour. Extension of the dictograph system was made for the Department of Highways. On the occasion of the Coronation of His Majesty King George VI, the central south front of the Parliament buildings was decorated and flood lighted at night. The buildings at numbers 11 and 15 Queen's Park and all other outside fences, lamp standards and greenhouses in Queen's Park were painted. Arrangements were made to provide steam heating to the Academy of Medicine, 13 Queen's Park, and this building is now linked up with the central plant. The boundaries of the Government property in Queen's Park were established and survey monuments were placed to mark the boundaries. At 70 Lombard Street, the women's section of the Labour Bureau has been painted throughout.

*Osgoode Hall:*

A complete new heating plant, to replace the old boilers, has been planned to meet the additional load in heating the new wing extension of the Law Society on

Chestnut Street, in accordance with a joint agreement between the Law Society and the Department. The four large court rooms have been decorated throughout. Alterations have been made in the offices of the Public Trustee to provide filing and vault accommodation. Sketches were prepared for consideration of the extension of the Law Library into the west wing, but no action was taken.

### EDUCATIONAL BUILDINGS

At the Normal and Model Schools, Toronto, several class rooms have been painted; extensive repairs and renewals were made to rain water gutters and down pipes and roofs. New stoker has been installed in number 1 boiler and both boilers were re-set.

At the Normal School, Hamilton, a deviation has been made in the lane to the rear of this property, whereby a section of ground, formerly cut off by the lane, has been joined up and new boundary fences to the property have been put in.

At the London Normal School a new boiler and stoker have been installed.

At the North Bay Normal School, repairs have been made to the outside concrete steps, sidewalks and retaining wall; all windows have been overhauled and repaired and main stair has been strengthened by suspending landings on steel rods; a new flag pole has been supplied and erected.

At Ottawa Normal and Model Schools the heating plant and boiler room have been renovated and new boiler settings and stokers have been installed. New exterior entrance doors and vestibule doors at boys' and girls' entrances have been installed.

At Peterborough Normal School, the main stair has been strengthened by suspending landing on steel rods from overhead steel beams; stone sills have replaced artificial stone sills in a number of windows.

At Stratford Normal School, a new ash elevator has been installed and repairs made to boiler piping; the main stair has been strengthened by suspending landings on steel rods from overhead steel beams.

In addition, all of the above schools have been kept in repair and painting has been done where found necessary. All boiler plants and heating apparatus have been inspected and all the necessary repairs and adjustments made.

At the Ontario School for the Deaf, Belleville, painting of the exterior of dormitories and of the basement rooms in the new junior residence has been done; general repairs have been done throughout and drains have been overhauled to give greater fall; alterations have been made to laundry and new washer and mangle have been installed.

At the Ontario School for the Blind at Brantford, the boys' dormitory, workshops and superintendent's house have been painted; repairs to roofs, flashings and gutters have been done. The laundry has been completely remodelled and new machinery, consisting of washing machine, extractor, tumbler dryer, etc., installed.

At the Training School for Technical Teachers at Hamilton, painting of the corridors throughout has been done and new blackboards have been installed.

#### *Reports to the Department of Education:*

Plans have been examined and reports made to the Department of Education in connection with the following schools throughout the Province:

Cornwall, Collegiate Institute: Report on plans of extension.

Embrum High School: Report on heating system.

Straffordville. Elgin County No. 14 Bayham: Stock sketch plans for 2-room school were sent to the Department of Education.

Fort Erie High School: Report re ventilation system.

Hearst and McVittie, Larger Lake. Public School Section No. 1: Stock sketch plans for three types of 4-roomed schools sent to Department of Education.

Hawk Junction United School Section No. 1: Stock sketch plan for 1-roomed school.

Little Current Public School: Stock sketch plan for 6-roomed school.

Michipicoten. Goudreau. Ont., School Section No. 6: Stock sketch plans for 1-roomed brick veneered school.

Mindemoya Consolidated School: Report re condition of roof: plans and specifications.

New Liskeard Public School: Report re central heating.

Ramore Separate School No. 1. Mayfair: Stock sketch plans for 4-roomed school sent to Department of Education.

Port Credit Public School. Forest Avenue: Report re basement walls.

Sault Ste. Marie School. Second line, Prince Township: Stock sketch plans for 1-roomed school.

Seaforth High School: Plans and specifications examined for extension to building and report made to the Department of Education.

Spanish. Indian Residential School: Report on shower baths.

Typical drawings were made for new courses of study in Home Economics and shop practice.

## AGRICULTURAL BUILDINGS

### *Ontario Agricultural College, Guelph:*

Repairs and rebuilding of steps to Memorial Hall and Watson Hall have been done; extensive repairs have been made to slate roofs of Main Building, Macdonald Hall, Mills Hall, Memorial Hall and Massey Library and new gutters have been installed in Mills Hall and new roofs have been put on sewage plant and piggery buildings. Exterior painting has been done to Massey Library and to the three cottages on the hill. The matter of the discontinuance of the Guelph Street Railway has been dealt with in correspondence. The Physics Building, which had a separate septic tank sewage disposal, has been connected up to the main sewage system; general repairs have also been made, as required.

### *Kemptville, Agricultural School:*

The main drains leading to the activated sludge house have been taken up and relaid to new alignment. A new storm drain from the main building has been laid to greater depth to take floor drains in dairy basement rooms. The sheep pen, piggery and machine shed have been wired for electric light, screening for windows in main building and residence has been supplied.

### *Agricultural Experimental Farm, Ridgetown:*

The new stock judging pavilion has been practically completed. This building is of frame and is two stories in height with a room 52' 2" x 40' 2" on the ground floor for stock judging and with outside stairs to class room above for seed judging and other classes. It is intended that this building shall be brick veneered at a later date and is heated meantime by natural gas stoves only. Repairs have been made to the foundation of the Superintendent's house; exterior painting has been done to the school, the Superintendent's house, double house for farm employees and to the office building.

*Horticultural Experimental Station, Vinelands:*

Repairs to boiler plant and installation of two mechanical stokers have been done.

Reports were made to the Department of Agriculture on Cold Storage Plants at Picton, Thedford and Parkhill.

## DISTRICT BUILDINGS

Throughout the Districts, necessary repairs were made to the Court Houses, Registry and Land Titles Offices, Lock-ups and Mining Recorder's office buildings.

*Algoma:*

The exterior of the Court House at Sault Ste. Marie has been painted and also the interior of the court room and all public corridors. The roofs and flashings have been repaired and the brick and stone work have been re-pointed. For milk testing a new sink and cupboards have been installed in the Agricultural Offices in the Court House. Plumbing repairs and other minor repairs have been made. The old Registry Office has been leased to the Red Cross.

At the Jail, seats and tables for prisoners have been installed in the day spaces. The interior has been painted and repairs have been made to strengthen the window grilles. Roof repairs to gutters and down pipes have been made and plumbing fixtures, where required, have been replaced.

For the Ontario Air Base at Sault Ste. Marie, plans and specifications have been prepared for a new runway of reinforced concrete.

*Cochrane:*

Locks in the Court House have been fitted with new cylinders and a new steel plan cabinet has been supplied in the Land Titles Office.

At the Hearst Jail, the interior of the cells and the ceilings of the Jailer's house have been painted; fly screens have been provided for windows, and an outside coal bin has been installed and plumbing repairs made.

Sketch plans for a proposed jail at Porquois Junction have been made.

*Kenora:*

The exterior of the Court House has been painted; the Jailer's house has been re-shingled and repairs have been made to eavestroughing and windows have been caulked. Linoleum rugs have been supplied to Magistrate's and Judge's offices.

At Sioux Lookout Lock-up, repairs have been made to the septic tank and sewer and fly screens have been installed.

*Manitoulin:*

At the Court House and Jail at Gore Bay, water supply has been installed from Town mains with pump and pressure tank; plumbing fixtures and piping have been installed both in the Court House and Jail and new drainage system with sewage tanks has been completed. The exterior of the Court House and Registry Office and the interior of the Court House have been painted and repairs made to gutters and down pipe. An alarm system has been installed in the Jail and general repairs made on all buildings.

*Muskoka:*

The Court House, Registry Office and Jail Buildings at Bracebridge have been painted externally and new gutters and down pipes have been installed at the Court

House. The court room has been painted and the Judge's bench has been re-built and improved by building up the window behind it. New locks have been provided throughout the Court House and new office door name plates. The Judge's office of two rooms has been redecorated throughout and new furniture has been supplied for them. Repairs to steps at both outside entrances to Court House have been done and other general repairs.

The interior of the Jail has been partially remodelled; new windows cut for ventilation of cells, which were formerly without outside light, or air, and new doors to men's cells were installed; plaster repaired and new floors put in all corridor cells and office. The Registry Office has been re-shingled.

#### *Nipissing:*

The Court House building at North Bay has been completely overhauled; all outside brickwork repaired; old kitchen removed from the back of the Jail; roofs re-shingled and new gutters and down pipes added; exterior of building re-pointed; main doors have been changed to open out and new entrance steps built in. New lavatory provided behind Court Room and old Jury room altered to provide rooms for barristers. Court room has been re-wired and re-painted and fitted with new electric fixtures, blinds, linoleum and new benches. A new flag pole has been provided and set up in front of the building.

The Judges' Chamber brickwork has been repaired and exterior of the building has been painted; gutters repaired, and other minor repairs have been done. A roof over the entrance and side steps has been built to shelter them from ice. The Registry Office and Land Titles Office has been painted, both inside and outside. The T. B. Clinic, formerly the Jailer's house has been altered and the building has been painted outside and inside.

At the Jail, repairs to roofs and other general repairs have been done; a flag pole has been installed and new fencing has been supplied.

The building occupied by the Department of Highways has been fitted with a new heating boiler and minor changes have been made to the heating.

#### *Parry Sound:*

The exterior of the Jail and the Jailer's house at Parry Sound have been painted; new floors have been laid in the Jail offices and kitchen and a new electric stove has been supplied for the Jail kitchen.

The Lock-up at Burk's Falls has been thoroughly repaired, including plumbing work and the outside and inside have been painted. A new roof has been put on and a new vault has been built in the basement for the use of the Provincial Police.

#### *Rainy River:*

Repairs of a minor nature have been done; a new grille gate has been put in the women's cell corridor and the return steam pipe from the Jail to the Court House has been renewed.

#### *Sudbury:*

The exterior of the Court House and Registry Office, Sudbury, including the brickwork has been painted, also the corridors, the caretaker's rooms and the Judge's retiring room. New linoleum has been laid in the main corridor and radiator covers have been provided in the Court Room.

At the Jail, repairs to roofs and flashings have been done; the hot water supply and storage tank have been overhauled and the service improved. Repairs to shower bath mixers have been done.

In addition to the painting at the Registry Office, new gutters have been put on and a new side door provided and the locks repaired.

*Temiskaming:*

The stonework at the three entrances to Court House, Haileybury, have been re-set. The Court House roof has been renewed and all flashings repaired and painted and the ceilings of the caretaker's quarters have been painted.

At the Land Titles Office, the interior has been painted and new steel files for books of 43 shelves have been supplied.

At the Jail, an additional grille was put in the vestibule to add protection to the office. Metal cornice and flashings were painted. Plans for new cells in the basement were prepared and these were ordered from the Guelph Reformatory.

The Government Building at New Liskeard, occupied by the Department of Highways, was overhauled and offices were altered to provide better office accommodation. Re-wiring was done and new electric fixtures installed and the interior of the rooms painted. At entrance porch was added.

For Elk Lake, plans were prepared for a Lock-up with accommodation in the same building for the Mining Recorder's office. A survey of the site was made with special reference to water supply and drainage.

At the Lock-up at Englehart, only minor repairs have been made.

At the Mining Recorder's Office at Swastika, the interior has been re-painted.

*Thunder Bay:*

At the Court House, Port Arthur, a new roof was formed over the existing flat roof to give less fall and laid with a built up, twenty-year guarantee, roof: flashings were wedged up and renewed where required. Repairs throughout were made to plaster work: flag pole was painted: additional files for documents in Registrar's vault were installed and new shelving in the Mining Recorder's office.

At the Registry Office, repairs were made to brickwork and roofs.

At the Jail, Port Arthur, an additional grille was put in the vestibule to add protection to the office. A new stove was supplied for the laundry dryer and new beds for cells were supplied. Paint was supplied and applied by inmate labour.

Plans and specification were prepared for a new Lock-up at Geraldton, but were re-considered and held over.

## ONTARIO HOSPITALS

*Ontario Hospital, Brockville:*

Consideration has been given to improve the dining hall and kitchen accommodation and plans and specifications were prepared in a complete study of the situation. The central tower was examined as to its safety and, after careful consideration, it was decided to demolish it by taking down to the caves level of the main building and this has been done. General repairs were made to the brickwork of chimneys of cottages.

*Ontario Hospital, Concord:*

This building, formerly the Women's Jail Farm, leased from the City of Toronto, was occupied by patients on the 2nd of April, 1937. New electric dumb waiter was supplied and installed by the Otis Fenson Elevator Company.

*Ontario Hospital, Cobourg:*

The brick setting of the boiler has been re-built; wire guards have been supplied and installed on a number of windows and repairs to roofs have been made.

*Ontario Hospital, Fort William:*

An auxiliary pump for water has been installed.

*Ontario Hospital, Hamilton:*

A contract was let for painting of Orchard House and a section of the Main Building. Repairs have been made to copper flashings of the roof of the Assembly Hall. Tenders were called for the completion of the new residence for nurses, the foundations for which had been built, and plans and specifications for a new reception building have been prepared. Messrs. Murton and Husband of Hamilton acted as Associate Architects with the Department and completed the working drawings of both buildings designed by the Department and prepared the specifications. The matter of proceeding with these buildings was held over for further consideration.

*Ontario Hospital, Kingston:*

To prevent spring flooding from the higher fields behind the Farm to the Village of Portsmouth, storm drains were laid to drain into natural water courses. To prevent flooding over the hospital grounds from the east, a ditch was dug to carry the water south in a natural water course to the lake. Repairs have been made to the Gardener's House, Piggery and Root House. Main roof and eavestroughs. Exterior painting of a section of the Main building has been done; new casement windows and frames, complete with wire grilles to replace gradually all the old double hung windows, has been undertaken and some forty windows have now been installed. Livingston Stokers have been installed to numbers 3, 4 and 5 boilers. New steel sashes have been applied in kitchen for improved ventilation.

*Ontario Hospital, London:*

Repairs and alterations on the east cottage have been made to improve the exits and outside fire escapes have been installed. Lavatory accommodation for inmates has been installed in the Canning Factory: the brickwork of boilers has been extensively repaired. Re-wiring and painting has been done in the staff dormitory.

*Ontario Hospital, New Toronto:*

Sketch plans have been prepared for a new Reception Building. Plans and specifications have been prepared for a new Power House. tenders called for, and contracts have been awarded as follows:

General contractor—Teagle & Son, Toronto.

Boilers and Stokers—E. Leonard & Sons, London.

Coal Handling Equipment—United Steel Corporation Limited, Toronto.

Plumbing and Steam Piping—Purdy Mansell Limited, Toronto.

Radial Brick Chimney—Francis Hankin & Company Limited, Toronto.

Electrical Work—Canadian Comstock Company, Toronto.

The new building replaces an obsolete congested boiler room and is placed some distance south west of the Institution and connected to it by a concrete heating trench carrying the mains and returns and water service. The electric cables and telephones are placed alongside the trench. The power house accommodates two 385 H.P. E. Leonard four drum boilers with a working power of 150 lbs. per square inch and with sufficient space for a third boiler. Coal is brought to the plant by trucks and

dumped into hopper and is elevated by a centrifugal discharge bucket elevator which discharges into a spiral conveyor running along the top of the coal storage bin of 150 tons capacity. From the storage bin, coal is fed by gravity to the stoker hoppers.

Repairs and painting have been done to the Superintendent's residence. Additional protective window screens have been installed in the Main building and repairs to roofs and gutters and painting have been done in the various buildings. Nurses' lavatories have been overhauled and repairs made to plumbing. A new lavatory for visitors have been fitted up.

#### *Ontario Hospital, Orillia:*

Contracts were awarded for the painting of the water tower and the dairy barn and the work has been carried out and completed. A contract for paving of drive-ways from the main entrance at the highway to the entrance to the Main building was awarded to the Non-Skid Pavement Company Limited of Toronto and the work has been completed. Considerable repairs and pointing of brickwork and plaster work has been done. The retaining wall between cottages D and the Nurses' residence was taken down and re-built. The coal trestle has been repaired and new timbers put in where necessary; the work was carried out by the Canadian National Railway under contract. Wire guards were installed in Cottages A and K. Two new Livingstone stokers to boilers have been installed.

Plans and specifications have been prepared to provide a fireproof sun room wing to replace the existing verandahs on the south of main building for female patients and to fireproof the corridors leading to it and to build two new fireproof stairs on the east side of the Main building, to replace inside wood stairs. The new wing is three stories and basement in height, with stair connecting the three floors to exits at grade. The basement is planned as a dining room to form part of a future scheme of internal alterations whereby the present patients' dining room will be altered for staff, and present staff dining room will become class rooms. New floors are terrazzo throughout; rooms are well lighted with casement metal sashes, protected by wire guards. All new stairs are fully enclosed, with metal doors and in every case have exits at grade and are completely fireproof. The general contract was awarded to Messrs. Bennett-Pratt Limited, Toronto; the heating and plumbing to Messrs. B. J. Miller & Company of Toronto and the electrical work to the Ontario Electrical Construction Company Limited of Toronto.

#### *Ontario Hospital, Penetanguishene:*

Sections of overhead power lines were placed in cables underground. The exterior woodwork of the Main building, outside fire escapes and water tank and several cottages for employees have been painted; smoke breeching in boiler room altered; new additional tumbler dryer has been installed in the laundry. Paving and draining of court yard and roadways were done. Alarm system for the Criminally Insane Building has been installed and additional inside grille installed.

Plans and specifications for a proposed new pavilion to form a wing on the north side of the Main building for female patients, were prepared and tenders were called for. The excavations for this new wing and the laying of main storm and sanitary drains have been done. Plans were prepared for temporary X-ray rooms.

#### *Ontario Hospital, Toronto:*

Repairs were begun to boundary wall; brickwork and repairs were made to roof of laundry building and several window guards were replaced.

Drawings have been prepared for proposed interior alterations to include new elevator shaft and improved entrances to ward dining room on third floor in men's section of the Main building.

*Ontario Hospital, Whitby:*

Extensive re-plastering, continued from last year, has been completed to the Administration building. Repairs throughout to brickwork, tile roofs, gutters, and flashings have been done, including roofs of Barn, Vocational Hall and Dining Hall. Brickwork of numbers 1 and 2 boilers have been repaired.

*Ontario Hospital, Woodstock:*

Repairs were made to brickwork and several dis-used chimneys in cottages taken down, being found to be dangerous. New storage water heater was installed. Repairs were made to the Railway siding and new lengths of rails and sleepers were renewed and re-ballasted. Brickwork of boilers has been repaired. New refrigerator units were supplied and installed in Diet kitchens of north cottages and a number of radiator guards were supplied and installed in these same cottages.

*New Ontario Hospitals:*

An extensive programme to provide additional hospital accommodation for mental patients was begun and to facilitate the work in connection with the various schemes, the services of architects in private practice were engaged and agreements were entered into with the various architects concerned for partial services, to include the designing of the external elevations, preparing working drawings, detail drawings and specifications; the supervision of the work being done by the Department officials.

Special reference in connection with the planning and laying out of the new institutions should be made to the services rendered by the Assistant Architect, Mr. Geo. N. Williams, whose intensive study of mental hospitals over a long period of years as Architect to the Department of Health, in dealing with requirements, maintenance and extension of existing institutions has fully qualified him to meet this new development, and who has been responsible for the planning of the new hospitals, preparing, in each case, sketches of a complete layout of the final grouping and of carefully considered plans of each individual building and supervising complete drawing of all special conditions of individual rooms and equipment for the comfort and care and hospitalization of patients.

In the selecting of the sites for the new hospitals, special consideration was given to the securing suitable level areas where neighboring town utilities of water supply, sewage disposal and electric services would be available and where such sites were readily available to the public with transportation facilities.

*Ontario Hospital, St. Thomas, Mr. W. L. Somerville, F.R.I.B.A., F.R.A.I.C., A.R.C.A., Associate Architect.*

A site of some 442.15 acres, more or less, approximately two miles south of St. Thomas on the east side of number 7 Highway from St. Thomas to Port Stanley was selected, being readily accessible by highway and street railway and having City water and sewage disposal facilities within reasonable distance. On this site, an institution as planned will finally accommodate 3,850 patients approximately. On August 4th, a contract was awarded to the Pigott Construction Company of Hamilton as General Contractors for the erection of the six Pavilions, each to house 212 patients and on October 20th another contract for the erecting of the Dining Hall and Kitchen Building and Male and Female Infirmary Buildings was awarded to the same firm. For the mechanical trades, contracts were awarded as follows:

Purdy Mansell Limited, Toronto—Plumbing work, male patients' pavilions Nos. 1, 3, 5.

Geo. C. Abbott Limited, Toronto—Heating work, male patients' pavilions Nos. 1, 3, 5.

Eggett and Company, London—Plumbing work, female patients' pavilions Nos. 2, 4, 6.

Bennett & Wright Limited, Toronto—Heating work, female patients' pavilions Nos. 2, 4, 6.

Canada Electric Co., Limited, Toronto—Electrical work for the six pavilions.

- Goodram Bros., Hamilton—Plumbing work. Dining Hall, Kitchen and two Infirmary Buildings.
- R. Rankin & Sons, St. Thomas—Heating work. Dining Hall, Kitchen and Two Infirmary Buildings.
- Canada Electric Co., Toronto—Electrical work. Dining Hall, Kitchen and two Infirmary Buildings.

All the buildings will be built of fireproof material throughout. The outside walls will be faced with stone; the floors and flat roofs will be of tile and reinforced beam construction, the former finished in terrazzo or linoleum. All windows are of steel casement type protected on the outside with grille work. All buildings are connected by passageways at ground floor level, with the basement below for service pipes for heating, water supply and drainage. The Pavilions will be three stories in height with stairs and elevators connecting the floors. All these floors are practically alike each with a visitors' room, eight bed wards, single rooms and day rooms for patients with toilet room, wash room and bathrooms, diet kitchen, utility rooms and clothing rooms and nurses' stations.

On the ground floor is a Doctor's office and in an annex, outdoor clothing rooms and wash rooms.

The Central dining hall and kitchen building. This building, connected by corridor with the pavilions and other buildings, in addition to the large dining rooms for male and female patients, provides dining rooms for executives, nurses, female help, male attendants and male help. The kitchen wing will be complete with kitchen proper, refrigerator units and food preparation rooms and dish washing units. The building is one storey and basement in height.

Infirmary Buildings: The Infirmary Buildings, one for men and one for women, are two stories in height, similar in nature of accommodation to the pavilions, except that the Dining rooms are added, one on each floor for the patients with services complete. Each building accommodates 188 patients.

Contracts were awarded to Carroll-Sharp of Toronto for the laying of sanitary sewers and water mains from the City of St. Thomas to the site and for the sanitary services within the grounds and for storm drains to connect up with the adjoining creeks to the west of the L. & P. S. Railway.

*Ontario Hospital, Woodstock, Roy Bishop, M.R.A.I.C., Associate Architect.*

In addition to the lands on the east side of number eighteen highway, forming part of the Ontario Hospital property at Woodstock, it was found necessary to secure additional land to the south for the new unit, of 29.4 acres. The new institution designed as a Children's Unit for the epileptic children is composed of a group of one storey buildings with basements and planned to accommodate 425 patients when completed. On October 1st a contract was awarded to the Frid Construction Co., of Hamilton, as general contractors for the Reception building, Cottage buildings, one for male and one for female bed patients; dining hall and kitchen building, Cottage buildings, one for male and one for female for ambulant patients and the connecting corridors between the buildings. The contracts for the mechanical trades were awarded as follows:

- Adam Clark Limited, Hamilton—Heating and Plumbing.
- Canadian Comstock Co., Toronto—Electrical Work.

The buildings are of fireproof construction with buff pressed brick outside walls and sloping roofs covered with heavy butt asphalt slates, windows throughout are sliding sashes of metal in metal frames and have guards on lower part only. The unit will be connected up with the central heating plant of the existing hospital and

the drains will connect up with the present drainage system; the sewage being pumped to Woodstock and the storm drain discharging into the Thames creek. A contract for the laying of storm and sanitary sewers has been awarded to the Sterling Construction Company of Windsor and a contract was awarded to J. A. Vance of Woodstock for extending the water main.

*Ontario Hospital, Brampton, James H. Craig, F.R.A.I.C., B.A.Sc., Associate Architect.*

The site of this new hospital is about one mile south-west of Brampton and is 306.6 acres in area. The ground slopes gently to the north and the buildings are planned to be diagonally across the site with all the patients' rooms facing south. The group of buildings will provide for 722 tubercular mental patients. A contract was awarded to the Goldie Construction Company of Toronto as general contractor for the Administration Building and awards were made for the mechanical trades as follows:

- Geo. C. Abbott Limited, Toronto—Heating.
- G. R. Muckart, Georgetown—Plumbing.
- Moss Electric Co., Toronto—Electric wiring.

This building is fireproof throughout and is one storey and basement in height. Walls are of buff coloured brick with stone dressing; sashes are of steel of casement type; floors are of terrazzo, or linoleum throughout.

A contract was awarded to the Mohan Construction Co., Limited, of Toronto, for storm and sanitary sewers.

*Ontario Hospital, Port Arthur, Charles B. Dolphin, M.R.A.I.C., Associate Architect; C. D. Howe & Co., Port Arthur, superintending engineers.*

The site selected for this institution is immediately north of Port Arthur, with a high elevation commanding a wide view of Thunder Bay to the east and is bounded on the east by Algoma Street and occupies some 164.9 acres, more or less. The new institution is one for mental patients and will accommodate some 850 patients when completed. A contract has been awarded Mr. J. Tocheri of Port Arthur as general contractor for the Administration Building and awards were made for the mechanical trades as follows:

- Summers Darling & Co. Ltd., Fort William—Heating and Plumbing.
- Mahon Electric Co. Ltd., Port Arthur—Electric Wiring.

The building is one storey and basement in height and will be fireproofed throughout and is of local brick with local rubble stone base and dressed limestone trimmings.

## REPORTS TO THE DEPARTMENT OF HEALTH

Plans have been examined and reports made to the Department of Health in connection with the following hospitals throughout the Province.

- London Life Pavilion for T.B. Patients—Report on sketch plans submitted.
- General Hospital, Belleville—Report on extension to Board room.
- Memorial Hospital, Bracebridge—Report on proposed addition.
- Burlington Symington Residence—Report on proposal to use as convalescent home for children.
- St. Lawrence Sanatorium, Cornwall—Report on plans of nurses' residence submitted.
- General Hospital, Cobourg—Report on electric power bill.
- Essex County Sanatorium, Sandwich—Report on proposed new buildings and sketch plans.
- Freeport Sanatorium—Report on proposed extension.

Hamilton Health Association—Report on new male help building.  
 Hamilton Mountain Sanatorium—Report on proposed addition to nurses' residence.  
 Hillcrest Convalescent Home, Toronto—Report on buildings.  
 Kirkland Lake, Hospital—Report on cement floor.  
 London Parkwood Hospital for Incurables—Report on new nurses' residence.  
 Leamington Hospital—Report on new hospital.  
 Victoria Hospital, London—Report on fire escape.  
 United Church Women's Missionary Society Hospital, Matheson—Report on site.  
 St. Andrew's Hospital, Midland—Report on proposed addition.  
 Oakville T. B. Sanatorium—Report on site.  
 Willett Hospital, Paris—Report on fire escape. Report on proposed extension.  
 St. Joseph's Hospital, Peterborough—Report on new front entrance.  
 St. Joseph's Hospital, Parry Sound—Report on fire escapes. Report on new wing.  
 War Memorial Hospital, Perth—Report and sketch for addition.  
 Norfolk Hospital, Simcoe—Report on new wing.  
 General Hospital, Porcupine—Report on floor construction.  
 Strathroy General Hospital—Report on Maid's Residence.  
 St. Mary's Hospital, Timmins—Report on nurses' home and pediatric department.  
 Metropolitan Hospital, Windsor—Report on plans.  
 Hotel Dieu Hospital, Windsor—Report on mechanical plans.  
 Toronto Hospital for Consumptives, Weston—Report on plans for extension.  
 Department of Health T. B. Clinic, Ottawa—Report on premises to be leased.  
 Department of Health T. B. Clinic, Timmins—Report on plans for premises to be leased.  
 Fort William Sanatorium—Report on extension.

## WELFARE BUILDINGS

### *Boys' Training School, Bowmanville:*

The Hospital and Reception building described in last year's report has been completed and occupied. There has been added to the basement accommodation for an X-ray department, fitted up with the necessary dark room, view room and waiting rooms. A survey has been made of farm lots 19 to 21, concession 6, Township of Darlight for the Department of Highways.

### *Girls' Training School, Galt:*

The new dormitory building described in last year's report has been completed and occupied. Natural gas has been installed and new cooking ranges have been put in all kitchens throughout all buildings and water softeners have been installed in the school and the dormitory buildings. The view gallery of the school hall has been built up as a safety measure against children climbing. The driveways within the grounds have been laid with impervious surfaces and sketches for a new entrance gateway on the Hespeler-Galt Highway on the east boundary were prepared.

## REFORMATORIES

### *Industrial Farm, Burwash:*

The extension of the main building, referred to in last year's report, being the Dormitory and Hospital wing, has been carried on by inmate labour, under the supervision of the Provincial Secretary's Department from detail drawings furnished by this department, as the work progresses. Plans and specifications were prepared for a semi-detached house for guards' families. This building was of frame, brick veneered and was built under the supervision of the Provincial Secretary's Department, using inmate labour and a number of skilled mechanics.

*Ontario Reformatory, Guelph:*

The Assembly Hall referred to in last year's report has been completed. Plans and details were prepared for the reconstruction of the Dairy Barn, damaged by fire and the work has been carried out by inmate labour under the supervision of the Provincial Secretary's Department. Plans and specifications for the extension of the main building have been prepared. The new building consist of a wing to accommodate 309 cells and with the existing building, includes a hollow square which will serve the purpose of court yard entirely surrounded by buildings, three full stories in height. The exposed fronts are of rough cast on brickwork with gables of stone to match the existing facade. The cells, except in the north side, are back to back with a plumbing corridor between and are fitted with w. c. bowl, basin with hot and cold water and a table and bed. Cells in the north-east arm have windows in them and face the hollow square referred to. Ample bathing facilities are provided on each floor. The building is so placed that segregation of groups can be readily arranged for. The fronts of the cells are grilled and open on to a wide corridor lighted to the outside. Grille gates to cells are controlled at the end of each row of cells by lever controls outside the cell enclosure space. The buildings are fireproof throughout. The work is being carried on under the supervision of this department with hired skilled labour and using the inmates for the unskilled labour. Much of the material, bricks, structural tile and wall tile are made by inmate labour at New Toronto and all the metal grilles and doors and tables are being made at the Reformatory at Guelph.

## ONTARIO SAVINGS OFFICES

New premises for branch offices were considered at 69 Wydenham Street, Guelph. A lease has been signed for new premises at 22 King Street, E. Hamilton, and repairs have been made on the vacated premises York and McNab Streets, as per agreements. New signs have been put on the premises at Pembroke. Changes have been made in the lighting at the University and Dundas Streets Branch, Toronto. A new office has been fitted up at 15 St. Clair E., Toronto. Leases have been renewed at 535 Danforth Ave., Toronto, and at Danforth Avenue and Fenwick Ave., Toronto. Premises have been leased at Sault Ste. Marie and plans made for alterations to premises and fitting up.

The following items of work have been carried out by the Department acting on behalf of other Departments.

Sketch plans for Weigh Scale Houses in Highways: report on building for Highway's office at Bancroft and preparing plans and specifications for improvements.

Report on properties at Chatham and Owen Sound for Highways: report on office for Employment Service, Hamilton.

Report on transfer of sections of land from City of London to the Government, being part of the area of the site of the Hygienic Institute, London.

Plans and specifications were prepared at the request of the Department of Health for a Comfort Station at Port Burwell. The work of building this station in frame construction has been carried out under contract.

Throughout the Province the annual inspection of boilers has been made and repairs where necessary have been made to heating plants.

I have the honour to be, Sir,

Your obedient servant,

GEORGE WHITE, *Architect.*

Toronto. March 13th, 1939.

HONOURABLE COLIN A. CAMPBELL,  
*Minister of Public Works, Ontario.*

Sir,—

I have the honour to submit the following statement showing the several contracts entered into with His Majesty during the twelve months ending March 31st, 1938, in connection with the Public Buildings and Works, subject to the control of the Public Works Department of Ontario.

I have the honour to be, Sir,

Your obedient servant.

DIGBY HORRELL,  
*Secretary and Purchasing Agent.*

## STATEMENT No. 20

Showing the several contracts entered into with His Majesty during the twelve months ending 31st March, 1933, in connection with the Public Buildings and Works, subject to the control of the Department of Public Works, Ontario.

TO THE HONOURABLE ALBERT MATTHEWS,

*Lieutenant-Governor of the Province of Ontario.*

MAY IT PLEASE YOUR HONOUR:

I have the honour to submit herewith for the information of Your Honour and the Legislative Assembly, the Thirty-first Annual Report of the Game and Fisheries Department of this Province, for the year ended March 31st, 1938.

I have the honour to be,

Your Honour's most obedient servant,

H. C. NIXON,

*Minister in Charge,  
Department of Game and Fisheries*

Toronto, 1939.

# THIRTY-FIRST ANNUAL REPORT

OF THE

## Game and Fisheries Department of Ontario

---

TO: THE HONOURABLE H. C. NIXON,  
*Minister in charge,*  
*Department of Game and Fisheries.*

SIR:—

I have the honour to submit to you in this and the following pages the Thirty-first Annual Report of the Department of Game and Fisheries, outlining the activities of Departmental services and including statistical and comparative tables for the fiscal year ended March 31st, 1938.

### INTRODUCTORY

The wild life of the Province of Ontario constitutes a resource of tremendous importance and value. It is a heritage of the Crown administered by this Department and the policies which govern the administration of this trust are based on the premise that every citizen has an equity in these resources.

The natural resources of any country are the basis of its national wealth and in evaluating the true worth of our wild life natural resources, it is pertinent to point out that these form a vital part of our economic structure. Analyzing these thoughts we find the following facts:

The fur trade of Canada is closely associated with the development of the country, for the trappers and fur buyers were pioneers in opening up the north and the west. In the Province of Ontario trapping is still more or less extensively carried on. During the year under review trappers in excess of sixty-five hundred were licensed and operating in Ontario, while fur dealers' license fees contributed \$27,438.75 to Departmental revenues, which last fact indicates that the trapper is plentifully supplied with avenues for the disposal of his catch. During the same period royalty to the amount of \$63,632.70 was paid to the Department on furs while the value to the trapper of his season's fur catch is estimated at \$966,552.92. In addition to these figures it is pointed out that private fur farmers raised and disposed of 33,235 silver and black fox pelts, 233 cross fox pelts, and 24,864 mink pelts of an estimated value of \$896,963.15.

It should be noted that in Northern Ontario where the lands are mostly still in the Crown, it is the policy to allot a separate area, consisting of a township or part of a township, to each trapper. While much of the north country is still un-surveyed it is hoped that in the very near future eighty per cent of the trappers will have their trap lines on a defined zone. Each trapper will then be responsible for taking care of the fur-bearing animals in his own area, because his future earnings will depend on his conservation of the supply within the zone.

The commercial fishing industry of the Province employed some 4,440 men during the year ending March 31st, 1938, and had approximately \$3,277,701 invested in gear and equipment, while the sum of \$2,644,163.49 was derived by these commercial fishermen from their operations.

From the economic standpoint, however, the greatest worth of our game and fish resources lies in their attraction to tourists. The seasonal influx of visitors from all parts of the world has developed into an industry of major importance and it is estimated that \$117,029,099.00 was circulated by tourists in Ontario during the year under review. This Province has, of course, many attractions, but the lodestone which exercises the greatest drawing power is the excellent fishing to be had in our many lakes and streams. It will be apparent that the natural resources which are the backbone of such an important industry are of very real economic value.

Again, the importance of bird life as an aid to agriculture is beyond computation. Insect control is essential to crop success. Much of this burden is lifted from the shoulders of the farmers by the migratory and non-migratory birds which are a part of our wild life assets.

From the standpoint of the sportsman this wild life heritage has a recreational value which cannot be measured in terms of dollars and cents. Fishing and hunting are perhaps the very finest of the health-giving and recreational sports available to the people of this Province. The incentive which wild life provides for enjoying the great outdoors is of inestimable value in the development of character and good citizenship.

It is therefore obvious from the foregoing comments and observations that our wild life heritage is a trust of great economic and moral worth, and being a common heritage its preservation and wise use is the care of every resident within our borders. How this Department has administered this trust on behalf of the people of this Province during the period under review is detailed in these pages for the information of all concerned.

	<hr/>
	1,922.70
	<hr/>
Net Ordinary Revenue .....	\$ 866,558.19

Again I am privileged to report an increase in the amount of the total ordinary revenue which was collected by this department during the year under review. The total figure of \$866,558.19 is the largest yet produced in any one fiscal year, and is \$84,340.56 in excess of the previous high total, viz:— that of \$782,217.63 collected in 1936-37.

This increase is attributable principally to the larger revenue derived from the sale of non-resident angling and hunting licenses in 1937-38 as compared with the figures for 1936-37. The sale of such angling licenses in 1936-37 produced \$272,690.50 as compared with a total of \$331,430.45 from a similar source in 1937-38, an increase of practically sixty thousand dollars. This is an interesting and encouraging sign. The tourist is evidently finding out what the resident fisherman already knows, that as a result of the energetic restocking of the past few years, Ontario waters keep on improving, despite the intensity with which they are being fished. The economic possibilities of this seasonal business loom larger than ever before, and we believe the people of the Province are becoming increasingly conscious of the necessity for conserving and continually renewing the fish and game resources which add so much to the attractiveness of this Province as a vacation resort. From the sale of non-resident hunting licenses in 1937-38 we derived \$18,432.50 in excess of the revenue derived from that source in the previous fiscal year, so that of the total increase of \$84,340.56 to which previous reference has been made, the sum of \$77,172.45 was due to the increased sale of various non-resident hunting and angling licenses.

Revenue exceeded expenditure, both ordinary and capital, by \$302,619.86. Ordinary expenditures totalled \$513,383.80, some of the principal items of this expenditure being \$212,038.54 on the work of enforcing provisions of the Game and Fisheries Act, and \$166,939.91 on Fish Hatchery Service. Other items of ordinary expenditure include \$10,662.43 spent in connection with the propagation of

game birds and animals and \$4,182.98 at the Experimental Fur Farm at Kirkfield (Victoria County). Expenditures in connection with the payment of wolf bounties totalled \$27,474.24, while grants to various individuals and organizations amounted to \$8,400.00. The total amount paid out for capital expenditures was \$50,554.53, the greater proportion of which amount was spent on projects which were necessary in connection with the expansion of our fish culture services. Some of the principal items were as follows:—Manitoulin Bass Ponds, \$12,911.92; North Bay Trout Rearing Station, \$15,811.04; and White Lake (additional ponds), \$12,465.33.

## GAME

The comparative table which follows will show in detail the various hunting licenses, both resident and non-resident, which were issued during the year under review, and such figures for the three previous years. While reference has already been made to the increased revenue derived in 1937-38 from the sale of non-resident hunting licenses, it will be of interest to state that the revenue derived from the sale of resident hunting licenses—deer, moose and gun,—in 1937-38 was in excess of that collected from the same sources in the previous year by the sum of \$19,419.65.

	1934	1935-36	1936-37	1937-38
Resident Moose .....	512	496	542	580
Resident Deer .....	12,890	14,779	15,394	18,672
Resident Deer (Camp) .....	175	258	262	283
Resident Deer (Farmers) .....	4,902	5,221	5,386	6,503
Resident Gun .....	76,210	85,884	79,531	90,756
Non-resident Small Game .....	489	686	1,129	1,634
Non-resident Deer .....	475	652	848	1,036
Non-resident "General" .....	457	680	878	1,043

The sportsman to-day is not so much interested in the kill as in the chase, although his pleasure is increased when his efforts are rewarded. Meat, however, is not the primary consideration. Health and "the pursuit of happiness" are the lures which beckon the good sportsman from the artificialities of life to the soothing influence and restful atmosphere of nature. Wild life is but a means to an end, an incentive to physical and mental relaxation.

The following pages contain a summary of conditions as they apply to the game life of the province,—both animal and bird, and which information is compiled from reports submitted by the various members of the field service staff of the Department:—

**DEER:**—This particularly fine species of game animal continues to be fairly plentiful in various sections of the Province and while the hunting of these animals during the regular open season supplies an exhilarating brand of recreation for the interested sportsman there is no doubt, notwithstanding the fact that there was provision for some minor moderation of the regulations which had previously applied to restrict the taking of does and fawns, that the preservation and possible improvement of the existing deer herds depends very largely upon the protection which the existing provisions of the Game and Fisheries Act provide and the observance of such restrictions by all concerned.

Reports submitted by members of the Field Service staff indicate that so far as the northern and northwestern portions of the Province are concerned generally speaking conditions are quite favourable, though there are various scattered sections throughout this region where such is not the case. The northern districts in the

southern portion of the Province continue to attract the majority of hunters seeking deer, and it would appear that these animals are still sufficiently plentiful and showing some increase in numbers in some sections of these areas, i.e. Parry Sound, Muskoka, Haliburton, Renfrew and the northern portions of Victoria, Peterborough, Hastings, Addington, Frontenac and Lanark, to warrant the belief that this branch of sporting activity will long be available here. In the Counties included in the southwestern peninsula and in certain eastern counties there has been an entire close season on deer for the past several years, and even though these particular counties represent the most settled portions of the entire Province we are able to state that the complete protection which prevails here is resulting in the number of deer increasing in most of these counties. This has been particularly the case in the counties of Bruce and Grey where conditions have been so favourable as to warrant the Department providing a short open season there.

The open season for deer during the year reported on was a highly successful one. Reports to the Department from sportsmen and overseers indicated that as a general rule deer were more numerous in certain sections than was the case in the previous season. While this may in some measure be attributable to a natural movement of the herd, it is reasonable to assume that the comparatively mild winters of the past two years, together with the protective measures in force have resulted in increased reproduction. We are referring, of course, to those areas in which hunting was legal. The Department's Inspector, who was stationed at a strategic point on the highway to check hunters on their return from the north, reported that the consensus of opinion was that there were more deer seen than ever before. A Deputy Game Warden with whom we were discussing the hunt said,—“I have been hunting deer for seventeen years and never saw them so thick as they were this year.” Such reports are encouraging, indicating as they do that the deer herd, with a reasonable measure of protection, is capable of replenishing itself despite natural and unnatural enemies.

**MOOSE:**—This splendid monarch of the Ontario forest is to be found only in the northern portion of the Province though scattered specimens are to be found in Muskoka, Parry Sound, Renfrew and in the sections immediately to the south of Algonquin Provincial Park. Nowhere in Ontario are they plentiful and there is no doubt that the various regulations which exist for the protection of these magnificent animals are absolutely necessary for the welfare of this species. It is only in a few sections that their numbers are reported to be even fairly plentiful, and nowhere has any decided improvement in numbers been observed.

**CARIBOU:**—These animals are extremely scarce and are reported only from the Districts of Rainy River, Kenora and Thunder Bay, also from the northern portions of Algoma and Cochrane. Some slight increase has been observed in the eastern portion of Thunder Bay and in the Chapleau Game Preserve, which is located in the Districts of Sudbury and Algoma.

**ELK:**—As has been outlined in previous reports the elk which are to be found in Ontario at present are those which were imported to the Province from Western Canada, and their progeny. The original shipments were made with the approval and co-operation of the Dominion National Parks Branch, and on arrival here were placed on the following Crown Game Preserves, viz:—Pembroke, Burwash, Chapleau, Nipigon-Onaman and Goulais River-Ranger Lake.

There has been some improvement in practically all instances save one,—those liberated on the Nipigon-Onaman Crown Game Preserve. Elk from the herd at Pembroke have been placed in Algonquin Park and on the Bruce Peninsula, while some animals from the herd at Burwash were liberated in territory immediately adjacent thereto. It is reported that their numbers have increased in the Chapleau and Burwash Game Preserves and also on the Bruce Peninsula, while some of these animals have been observed on Beausoleil Island in Georgian Bay off Simcoe County.

**BEAR:**—These animals are both hunted and trapped but not very extensively, though there is an indication that increasing numbers of non-resident hunters are becoming interested in the spring hunt which has been provided during the months of April and May. They are available in varying numbers throughout the entire northern portion of the Province and are reported to be quite plentiful in many sections, and to a lesser extent in Parry Sound, Muskoka, Haliburton, Renfrew and the northern part of Hastings County.

**RABBITS:**—Rabbits continue to provide many opportunities which are favourable from the sportsman's point of view, and more particularly is this so in the southern counties. In this section of the Province cotton-tail rabbits are available in satisfactory numbers, while the jack rabbit (European Hare) is pretty well confined to the western counties though this species is slowly extending its numbers to the east and north. In northern Ontario snow shoe rabbits are the prevailing species and although they are reported to be quite scarce there are indications of improvement in some districts.

Rabbit hunting is a favourable activity of Ontario sportsmen during the fall and winter months. The "jack" is probably the most popular of the species because of its size and the open country it inhabits. Its long and powerful legs propel it at tremendous speed and the difficulty of hitting such a fast moving target intensifies the pleasure of the hunt. The "jack" does not readily capitulate. It has power and stamina which provide an excellent defense against all but the most experienced. The varying hare or snowshoe rabbit on the other hand has quite a burst of speed, but lacks the reserve power and physical courage of the "jack". It succumbs readily.

The cotton tail and the hare are in about the same class from the sporting standpoint, although the former provides a measure of additional sport to those who enjoy hunting with ferrets.

Hunters should realize that there is just as much danger of exterminating the rabbit through needless waste as any other species of game. This is particularly true in the more populous areas, where hunting is heavy and habitat restricted. Game which provides such healthy outdoor recreation at a minimum of expense is worth conserving.

**SQUIRREL (Black and Grey):**—These animals are quite numerous in the southern counties and particularly is this applicable to the western portion. They were afforded the protection of an entire close season which in all probability contributed largely to the improvement evident in the numbers of these varieties of squirrel.

**PARTRIDGE:**—Conditions as they applied to the various species of this desirable game bird were not sufficiently favourable to justify any action along the lines of an open season.

The sharp-tailed grouse or prairie chicken is found only in the northwestern districts and while scarce they showed signs of some increase.

As far as ruffed grouse are concerned, these birds exist throughout the Province, though their numbers are, of course, quite limited in the more settled sections. However, as previously stated in no section were they in any way numerous though reports received by the Department advised that improvement was noticeable principally in Northern Ontario and the northern districts and eastern counties of the southern part of the Province.

**QUAIL:**—These birds are found principally in the counties of Essex, Kent, Lambton and Middlesex, and in counties immediately adjacent to the eastern boundaries thereof, and in which section they are fairly plentiful. Scattered bebies of quail are reported also in some eastern counties, that is Stormont, Dundas and Glengarry.

**PHEASANT:**—During the year reported upon the Department intensified its pheasant re-stocking activities insofar as they applied to live birds, with the result that the distribution of eggs was to that extent curtailed. Departmental records reveal the fact that only 303 settings, or 4,545 eggs, were distributed to interested applicants, while live pheasants numbering 5,076 in all were liberated in suitable areas, 4,703 of which birds were placed in various Regulated Game Preserve areas, a scheme of protected areas inaugurated during the year, and to which scheme detailed reference is made later on in this Report.

The following references concerning the earlier efforts in connection with the re-stocking of pheasants will probably be of sufficient interest to warrant inclusion in this Report.

It seems rather a hopeless task to definitely determine the time and circumstances when the English ring-necked pheasant was first introduced into this Province. The only official record to be found is in the published reports for the Department. It is strange that while reference is made in some of them to conditions, no information is included as to when they were planted or by whom. The first reference found is in a report of the Ontario Game and Fish Commissioners for 1895, and concerns Mongolian and English pheasants, viz:—

“There is an increasing feeling among sportsmen that further and greater efforts must be made in the near future looking towards the restocking of game covers, and quail seems to be the only bird which offers a fair compensation for the outlay of time and money. As is well known, none of the other native birds admit of propagation so that restocking with them is out of the question. Some ardent sportsmen have introduced the Mongolian pheasant and also the English pheasant but sufficient time has not yet elapsed in which to test the success of the experiment.”

The report of the same organization for 1896 mentions the fact that a number of English pheasants, about 120, were reared at Rondeau during the year.

And again in 1901:—“It has been suggested in consequence of the English pheasants that have been liberated on Point Pelee having done so well, that the Point should be made a preserve and no shooting or hunting at any time be allowed on the Point.”

Finally,—reference is made to an open season, and the following is quoted from the Ontario Game and Fisheries Commission (Special Committee) Final Report, 1910,—“The open season for pheasants which was declared during the past year, resulted apparently in the satisfactory discovery that the birds were more plentiful than had been supposed, and most excellent sport would appear to have been enjoyed. Sufficient time, however, has not yet elapsed to enable a determination to be arrived at in regard to the advisability of repeating the experiment of an open season during 1911. Careful investigation should be made at this point by the proper authorities, for the pheasants in some localities have become so well acclimatized and are thriving to such an extent that it would be a grievous mistake to allow their numbers to become unduly diminished.”

**HUNGARIAN PARTRIDGE:**—These birds are not very plentiful anywhere in the Province. So far as the north is concerned their numbers are negligible though evidence of their existence is reported from certain sections of Thunder Bay, Algoma and Temiskaming. They are most numerous in the very extreme southwestern counties, while reports indicate they are becoming more plentiful in some of the eastern counties. During the year 102 of these birds were distributed by the Department in selected areas.

**DUCKS:**—Generally speaking this species of migratory waterfowl provides quite a large proportion of the sport which is available to the hunter during any season, and the present restrictions which apply for their protection are providing a measure of conservation which will undoubtedly be beneficial and result in maintaining the supply for the enjoyment of sportsmen in future years. Reports from practically every section of the Province are quite favourable, though there are some areas in the north in which conditions are not too good.

**GEESE:**—There are not many areas in Ontario in which these birds may be successfully hunted, and while they are observed in flight during the fall and spring migrations in numerous sections the conditions which prevail during these migrations are such that during the open season which is provided any hunting which is available is pretty well restricted to the James Bay shore in the far north, and to a few of the extreme southwestern counties.

**WOODCOCK:**—This species is extremely scarce in Northern Ontario, and is none too plentiful in the southern portion of the Province. From reports to the Department it is apparent that most favourable locations are in some of the counties along the north shore of Lake Erie.

**SNIPE:**—As in the case of the woodcock, snipe are extremely scarce in the northern districts. They are reported to be somewhat plentiful in a number of the eastern counties, and while some improvement was observed in scattered areas throughout the southern counties as a general rule their numbers are sufficient to provide nothing more than fair shooting.

**PLOVER:**—Continues to be very scarce in practically every section of the Province, and no improvement indicated by reports.

During the year under review Regulations were approved which provided for special open seasons, details of which are as follows:—

- (a) Deer in that portion of Carleton County lying west of the Rideau River,—from November 5th to 20th, inclusive. General deer hunting regulations applied.
- (b) Deer in the counties of Bruce and Grey,—from November 8th to 13th, inclusive. General deer hunting regulations applied except that the use of dogs was not permitted.
- (c) Pheasants—Pelee Island, October 28th and 29th. Five birds per day. Special municipal license \$3.
- (d) Pheasants, quail and Hungarian Partridge,—The counties of Essex and Kent, October 28th and 29th. Three pheasants, three quail and two Hungarian Partridge per day.
- (e) Pheasants,—in the following Townships, which were established as Regulated Game Preserve Areas, viz:—Markham, Nelson, Trafalgar, Flamborough, E., Beverley, Ancaster, Saltfleet, Binbrook, Barton, Humberstone, Canborough, Dunn, Cayuga North, Cayuga South, Oneida and Seneca, October 28th and 29th. Three birds per day. Special municipal license \$1. per day.
- (f) Pheasants,—in the following Townships, which were established as Regulated Game Preserve Areas, viz:—Grimsby North, Clinton, Louth, Grantham, Niagara, Caistor, Willoughby and Bertie, October 28th. Three birds per day. Special municipal license \$1.00.

## FUR BEARERS

Conditions as they apply to fur bearing animals throughout the Province are set forth in the following references, as summarized from reports of the Field Service staff to the Department:—

**BEAVER:**—These animals had the protection of an entire close season, though it was found necessary to open the season on Manitoulin Island for the first fifteen days of November. Trapping of these animals under the regulations which prevailed restricted such operations to trappers and farmers actually resident on Manitoulin, limited the catch of each person to not more than ten beaver, and required that pelts so taken be disposed of under supervision of the Department. The close season which has been in effect has resulted in a noticeable increase in the numbers of these animals practically throughout the entire Province.

**FISHER:**—This species is extremely scarce throughout the Province and few if any are taken anywhere south of the French and Mattawa Rivers.

**FOX:**—Conditions remained pretty much the same in the various sections in which these animals have been found, with improvement and decreasing numbers reported from different districts. There was unquestionably no general increase, which would appear to be supported by the fact that there was quite a noticeable decrease in the numbers of the various species of fox taken during the season. Silver fox now are very seldom taken in the wild.

**LYNX:**—This species also is extremely scarce everywhere in the Province, and while the pelt is one of the most valuable of those taken in the wild the trapper does not derive much of his revenue therefrom.

**MARTEN:**—Very scarce, and while there was an increase in the number of pelts taken during the season, such increase should not be regarded as an indication of any permanent or general improvement.

**MINK:**—There would appear to be no doubt that this species is becoming less numerous in many areas. There were few sections in which conditions were favourable or any improvement observed.

**MUSKRAT:**—Conditions in Northern Ontario particularly were not at all good, and while there were some sections in Southern Ontario from which favourable reports were received, generally speaking conditions here were only comparatively fair. The decline in the annual catch which has now been progressing over a number of years continued during the season reported upon.

**OTTER:**—These animals are to be found chiefly in Northern Ontario, and even there they are not particularly numerous. Conditions remained about the same as is indicated by the annual take. While continuing scarce some improvement was reported in scattered areas.

**RACCOON:**—This species does not inhabit the north. General conditions in southern Ontario remained about the same. They are not plentiful anywhere, and reports indicate that generally speaking their numbers are possibly decreasing to some extent.

**SKUNK:**—While these animals were reported to be very plentiful throughout the entire Province there was quite an extensive decrease in the number taken by trappers during the season.

**WEASEL:**—This species continues to be very plentiful in every portion of the Province, with the possible exception of certain counties in the southwestern peninsula. The catch was about the same as in the previous year.

There can be no question as to the necessity of the present restrictions which are provided by the Game and Fisheries Act as a means of protecting existing fur bearing animals in this Province, and while in some particular instances these regulations may appear to be unnecessary appearances of such a nature are deceptive. As a general rule the more desirable species of fur bearers are diminishing in number, no doubt attributable for the most part to decreased suitable and available habitat as well as to the intensified trapping operations to which these animals have been subjected in past years. In Northern Ontario all the species of fur-bearing animals mentioned in this report are to be found in varying numbers while in Southern Ontario at the present time fur bearing animals would include fox, mink, muskrat, raccoon, skunk and weasel, and, to a lesser extent beaver and otter, the other species herein referred to being practically extinct in this section.

There is no doubt that the year under review was an extremely difficult one for the trapper, because as will be observed from the following comparative statement not only was there a considerable decrease in the number of pelts actually taken and disposed of but the prices which these pelts commanded on the open market were indeed quite low, and much below what has been recorded as average in more recent years.

This comparative table shows the numbers of pelts of the various species of fur bearing animals which were exported from or dressed within the Province, during the year under review as well as in the two years immediately preceding:—

	1935-36	1936-37	1937-38
Bear .....	411	476	496
Beaver .....	6,785	238	235
Fisher .....	2,137	2,117	1,463
Fox (cross) .....	5,424	4,156	2,426
Fox (red) .....	37,044	35,232	24,912
Fox (silver or black) .....	500	360	201
Fox (white) .....	883	17	47
Lynx .....	2,642	2,081	1,284
Marten .....	1,282	1,464	1,709
Mink .....	47,057	33,930	22,766
Muskrat .....	398,043	370,239	343,972
Otter .....	3,701	3,779	3,737
Raccoon .....	13,259	14,243	13,194

Weasel .....	42,643	78,643	79,853
Wolverine .....	4	2	5
	<u>613,057</u>	<u>635,203</u>	<u>557,876</u>

Information compiled in the Department shows that these furs were worth to the trappers responsible for taking the same, the sum of \$966,552.92, which is but little more than fifty per cent of the amount realized from such sales in the previous year.

To these figures should be added statistics as they apply to the product of licensed fur farms not subject to the payment of royalty, including silver, black and cross foxes and mink. Furs disposed of during the year by these fur farmers included 33,235 silver fox pelts worth \$683,643.95, 26,480 of which were exported and the remaining 6,755 dressed in the Province; 24,864 mink pelts worth \$209,852.16, 24,381 of which were exported and the remaining 483 dressed in the Province; and 233 cross fox pelts worth \$3,467.04, 192 of which were exported and the remaining 41 dressed in the Province.

## FUR FARMING

During the year there were 1,536 licenses issued to authorize fur farming operations. Of this number some 331 were new licenses. As compared with the previous year there was a net increase in the number of licensed fur farms under operation totalling 188. The records show that silver foxes were raised on 986 of these fur farms, cross foxes on 103 fur farms, red foxes on 133 fur farms, mink on 614 fur farms, and raccoon on 91 fur farms. There were 859 fur farms on which operations were confined to foxes, 451 fur farms on which only mink were raised, while on 38 fur farms only raccoon were propagated. On the remaining 188 fur farms operations were not limited to any one species.

The subjoined comparative table shows the total breeding stock retained on these licensed fur farms as on the first day of January in each of the years included therein:—

SUMMARY OF BREEDING STOCK ON LICENSED FUR FARMS  
AS AT JANUARY 1ST

	1936	1937	1938
Beaver .....	70	21	25
Fisher .....	16	20	16
Fox (cross) .....	367	257	235
Fox (red) .....	228	207	140
Fox (silver or black) .....	21,645	23,869	24,848
Fox (blue) .....	5	0	0
Lynx .....	2	2	2
Mink .....	12 332	15,539	21,982
Muskrat .....	375	351	302
Raccoon .....	524	358	351
Skunk .....	3	5	9
Bear .....	21	15	15
Marten .....	4	4	11

It will be observed that silver fox and mink represent by far the greater proportion of the activities which are carried on by the operators of these licensed fur farms, and though in each instance an increase is indicated, that in the case of mink far exceeded the increase in silver fox. The raising of mink is rapidly becoming an important branch of the fur farming industry. One can realize the truth of this statement when it is noted that the stock of mink maintained on these fur farms increased from 8,605 to 21,982 in a period of only three years.

## CROWN GAME PRESERVES

One of the first measures taken to preserve the game in the Province of Ontario was the setting aside of large areas of land as Provincial Parks. In these Parks no hunting or trapping is permitted and the wild life is given a chance to increase and develop under natural conditions and without molestation from man. These protective areas proved so successful that the idea was extended and large areas of crown lands in Northern Ontario have been set aside for the same purpose under the Department of Game and Fisheries. These areas are known as Crown Game Preserves. At the present time there are 116 such Crown Game Preserves with an area of approximately 6,068,914 acres.

While the largest portion of this area is situated in Northern Ontario it has been possible to establish a number of preserve areas in the southern part of the Province with the co-operation of owners of private property. These areas will be primarily useful for the protection and propagation of upland game birds, although all species of desirable game will be protected.

It is generally acknowledged that where wild life is allowed to propagate with a minimum of human interference and in surroundings which provide natural food and cover there will in time be a return to the normal conditions set up by nature. This means not only increased game in the protected areas but a general improvement in conditions throughout the Province.

During the year five additional Crown Game Preserves were established in south-western Ontario in accordance with the schedule appended hereto, and changes were made in the boundaries of the Jocko Crown Game Preserve in the District of Nipissing and in the Peasemarsch Crown Game Preserve, in the County of Grey.

Designation	County	Extent in Acres
Crosshill Crown Game Preserve.....	Waterloo	1,200
Highgate " " " .....	Kent	575
Long Branch " " " .....	Peel	450
Wainfleet " " " .....	Welland	5,000
Windham " " " .....	Norfolk	400

### REGULATED GAME PRESERVE AREAS

The year saw a new development in the matter of the control of indiscriminate hunting. In line with the desire to provide better hunting and to maintain in large measure the privilege which sportsmen have enjoyed for generations of using private lands in the pursuit of game, arrangements were entered into between the Department and some twenty-seven Townships whereby hunting in these Townships would be restricted to certain open seasons for pheasants and rabbits, and that only those who had the necessary hunting license issued by the Municipality would be authorized to take advantage of the open dates. This had the effect of creating these areas as Regulated Game Preserves because of the fact that hunting was prohibited except on open dates as proclaimed on the recommendation of the Department. These open dates were limited to a two-day pheasant shoot and a seasonal period during the winter for rabbit hunting. It had an additional effect of preventing an influx of non-residents to the area because the number of special licenses issued was based on the number of available pheasants and only those with a pheasant license were permitted to partake in the rabbit hunting. The Municipality collected a small fee for the license. The Department stocked these areas with several thousand live birds and hopes to largely increase its pheasant production for the restocking of these Regulated Areas.

By concentrating the restocking of pheasants on these Regulated Areas, rather than scattering the available birds over a large section of Southern Ontario and thereby thinning the numbers in most counties below the point where hunting is desirable, it is believed a sufficient quantity of birds will be raised to warrant an open season. The bag limit which would apply during an open season would permit the taking of cock birds only. Continuous replenishment of the stock will be part of the plan so that an open season simply means a temporary reduction of the surplus stock. In other words protecting the hens will maintain an ever increasing brood stock and the surplus destroyed during a shoot will be replaced to take care of the next open season.

Several specific and important results are anticipated from this arrangement. First, and quite important, is the fact that the farmer will not be subject to the expense and inconvenience of having irresponsible hunters tramping over his lands and damaging property during the whole gun license season. It is well known that the actions of a few have brought about a feeling of animosity between the farmer and the sportsman, a situation which threatens to put an end to free hunting. Those who

obtain a license during the open season will be readily identified, and abuse of the privilege will mean prosecution and cancellation of any future privileges. As the carrying of fire-arms for hunting purposes within such Regulated Areas is forbidden, except during such open seasons as may be prescribed and then only under the authority of a special license, it is hoped to eliminate practically all of the poaching which otherwise takes place.

It is pleasing to learn that the open seasons established in these Regulated Townships were quite successful and have done much to stay the epidemic of land posting which threatened so seriously to curtail the opportunity for hunting over private lands. It is not suggested, of course, that the present arrangements are perfect, experience will doubtless bring minor changes in control and regulation but the inauguration of such a scheme will, we believe, receive the approbation of every sportsman when its underlying benefits become better known.

The various townships which entered this scheme of Regulated Game Preserve Areas during the year are as follows:—

The Township of Markham, in York County;

The Townships of Nelson and Trafalgar, in Halton County;

The Townships of Flamborough East, Beverley, Ancaster, Saltfleet, Barton and Binbrook, in Wentworth County;

The Townships of Grimsby North, Clinton, Louth, Grantham, Niagara and Caistor, in Lincoln County;

The Townships of Stamford, Willoughby, Bertie and Humberstone, in Welland County;

The Townships of Canborough, Dunn, Cayuga South, Cayuga North, Oneida and Seneca, in Haldimand County.

Part of the Township of Westminster, in Middlesex County;

The Township of Bayham, in Elgin County.

## WOLF BOUNTIES

The following is a comparative table of condensed wolf bounty statistics covering the last four fiscal years:—

Period	Timber	Brush	Pups	Total	Bounty & Expenses
For year ending Oct. 31, 1934.	990	812	57	1,859	\$27,080.65
For year ending Mar. 31, 1936.	1,159	1,713	33	2,905	42,399.89
For year ending Mar. 31, 1937.	1,090	1,197	31	2,318	33,360.63
For year ending Mar. 31, 1938.	1,022	837	30	1,889	27,474.24

During the year 1,380 claims for wolf bounty were paid in respect of 1,889 wolves as shown above, in addition to which 19 claims were disallowed for various reasons. Bounty was paid to 1,109 different persons, 735 of whom applied in connection with only one wolf each. Applicants submitting claims on two wolves numbered 179. The remainder of the applicants had claims for varying numbers, while the largest total bounty paid to any one person amounted to \$210.

Details as to the sources of origin of the pelts submitted for bounty are set forth in the following table:—

## REPORT OF WOLF BOUNTY CLAIMS

District or County	Adult Wolves		Pups	Total
	Timber	Brush		
Algoma	82	109	0	191
Bruce	13	6	0	19
Cochrane	33	2	4	44
Frontenac	6	0	0	6
Grey	0	2	0	2
Haliburton	8	0	0	8
Hastings	8	4	6	18
Huron	1	0	0	1
Kenora	263	144	16	423
Lambton	0	4	0	4
Lanark	1	1	0	2
Leeds	1	0	0	1
Manitoulin	13	111	1	125
Muskoka	12	6	0	18
Nipissing	38	11	0	49
Norfolk	0	1	0	1
Lennox & Addington	7	1	0	8
Parry Sound	59	3	0	62
Patricia	59	21	2	82
Peterboro	1	0	0	1
Rainy River	155	188	3	346
Renfrew	24	0	1	25
Simcoe	11	1	0	12
Sudbury	62	114	0	176
Temiskaming	2	2	0	4
Thunder Bay	161	112	3	276
Waterloo	1	0	0	1
Welland	0	1	0	1
York	0	1	0	1
Totals	1,026	845	36	1,907

While the total expenditures incurred in connection with the administration of the Wolf Bounty Act amounted to \$27,474.24, actual bounty payments accounted for \$27,204.00 of this total, details of which are contained in the following statement:—

Brush Wolves (Counties)	21 @ \$ 6.00	\$ 126.00	
(Districts)	816 @ \$15.00	\$12,240.00	
Total Brush Wolves	837		\$12,366.00
Timber Wolves (Counties)	71 @ \$ 6.00	\$ 426.00	
(Districts)	951 @ \$15.00	\$14,265.00	
Total Timber Wolves	1,022		\$14,691.00
Pups (Counties)	1 @ \$ 2.00	\$ 2.00	
(Districts)	29 @ \$ 5.00	\$ 145.00	
Total Pups	30		\$ 147.00
Grand Total	1,889		\$27,204.00

In the northern districts the Province pays the entire bounty, but so far as claims originating in the southern counties are concerned, bounty is paid by the County Treasurers and forty per cent rebated to the counties by the Province.

Trappers and farmers were responsible for taking more than eighty per cent of the wolf pelts submitted for bounty, while it is reported that forty-five per cent of the animals were snared, twenty-six per cent trapped, twenty-one per cent shot, and the authorized use of poison was responsible for taking only three per cent. The remaining five per cent were taken by miscellaneous means.

## GENERAL

## GAME &amp; FISHERIES ACT.

The Game and Fisheries Laws are an important part of the Department's programme to properly conserve the heritage with which it is entrusted. They are not merely regulatory or restrictive but are, in reality, the controlling factors which determine the abundance or otherwise of our wild life resources. They are the result of biological knowledge and practical experience, and have been framed with due regard to the life history of the various species, particularly that phase of it which determines perpetuation. These laws have many classifications but in general they are intended to develop all classes of desirable wild life while permitting the greatest possible use of these resources, and to discourage certain undesirable forms which do not fit into the economic scheme of things.

A study of the laws and regulations will convince the most skeptical that they are an important part of the programme necessary for the conservation of our fish and game resources and that when the public is urged to observe the laws it is a request for co-operation in the management of a valuable trust. Non-observance of the regulations, however unimportant the details may seem, is unfair to that ever-increasing family of sportsmen and nature lovers who conscientiously obey the laws and pursue their recreational pleasures from the highest standard of sportsmanship.

Amendments enacted by the Legislative Assembly and which became effective during the year included the following provisions:—

- (a) Open season and other regulations governing the hunting of woodcock, snipe, ducks, geese and other migratory water-fowl to be as provided by the Migratory Birds Convention Act (Canada).
- (b) Parties of non-resident hunters to engage licensed guides when hunting moose.
- (c) Non-resident bear hunting license for the months of April and May at a fee of \$5.25.
- (d) Adjustment of royalties on the pelts of certain fur-bearing animals,—lynx, mink, otter and skunk. Ranch raised cross fox exempted from royalty.
- (e) Taking of does and fawns permitted in the proportion of one doe or fawn for each two hunters in the party.
- (f) Use of snares prohibited in Peel and Carleton Counties.
- (g) Permitting use of an automatic shot gun when so permanently reconstructed and plugged as to be capable of holding not more than two shells at any one time.

Amendments to the Fisheries Regulations adopted during the year included the following provisions:—

- (a) Minor changes in the open seasons for pickerel, lake trout and whitefish in certain northern districts.
- (b) Persons engaging licensed guides while angling not to include such guide as one of their number when computing the number or quantity of fish they are entitled to take.
- (c) Exportation of maskinonge by non-resident anglers restricted to one day's catch.

## TOURIST OUTFITTERS.

Complete reference to the system of licensing tourist outfitters operating in the northern portion of the Province was embodied in the previous Annual Report. The following analysis shows the distribution by Districts of the 498 camps which were licensed to operate during the year under review:—

TOURIST OUTFITTERS CAMP LICENSES  
SUMMARY

Algoma .....	73
Cochrane .....	2
Kenora .....	103
Manitoulin .....	37
Nipissing .....	91
Parry Sound .....	90
Patricia .....	1
Rainy River .....	28
Renfrew .....	10
Sudbury .....	47
Thunder Bay .....	15
Temiskaming .....	1
Total .....	498

Four hundred and fifty-six of these camps were operated by residents of Ontario, the remaining forty-two by non-residents.

#### EDUCATIONAL.

In a previous report reference was made to the preparation and distribution of a Monthly Bulletin. This publication was originally produced wholly in the Department and took the form of a mimeographed booklet. Because of the work entailed it had necessarily a limited circulation, although many requests for copies were received. To ensure a wider distribution and to take care of the increasing demands for copies from Protective Associations, schools and private individuals, it was found desirable to have the material printed. Beginning with the May, 1937, issue, therefore, the Bulletin assumed a new form, and a greater significance as an educational medium in the sphere of wild life conservation. The original issue amounted to about 600 copies monthly, under the new scheme of publication the circulation immediately doubled and since then it has continued to increase with each issue.

In this connection we quote the following editorial comment from the June, 1937, issue of this Monthly Bulletin:—

“Education is the foundation of all intelligent thought and action. It is the most important factor entering into the conservation of our wild life and other natural resources. Such progress as has been made in protecting, propagating and re-stocking is due to the practical knowledge and scientific attainment. Practical knowledge of wild life conditions is the result of experience gained in actual personal contact and observations under natural conditions. It is not always reliable taken alone because unwarranted conclusions are frequently drawn from certain conditions or experiences which are open to several explanations. However, the practical value of such first-hand information is of very great importance as it serves to confirm the conclusions arrived at through scientific investigation. The combination of these two sources of knowledge is the basis of our conservation programme.”

“Knowledge, however, is progressive. It knows no limitation. The ideas of yesterday are but the stepping-stones to future enlightenment and creative effort. In the field of wild life conservation more attention is being paid to the scientific investigation of life history and environmental conditions. The idea that our wild life resources are inexhaustible passed on with the horse and buggy and the carrier pigeon. Nature provided certain fundamental conditions necessary to wild life perpetuation. We have unwittingly disturbed these conditions and so, in order to keep pace with modern demands, we must take advantage of modern knowledge and experience. This means wise conservation laws based on biological knowledge and practical experience; the investigation of life history and natural conditions; the operation of hatcheries for intensive stocking; the setting aside of preserve areas for natural propagation and development, and the passing on of the knowledge acquired to the public through means of education and publicity. These things, the Department of Game and Fisheries is attempting to do. The results so far have justified the effort.”

"The sportsman can do much to foster these plans by co-operating wherever practicable and by lending his aid to put across the ideals of conservation. These ideals have been developed over a long period of years. They embody the results of progressive thought and scientific knowledge, therefore they are modern and worth while. They proclaim individual responsibility as necessary to success, and organized effort the best method of accomplishing the greatest good for the greatest number. In short, conservation is education practically applied, and is the care of everyone interested in wild life preservation or better hunting and fishing."

## ENFORCEMENT SERVICE

Many people, who take but a superficial view of the matter, believe that all that is necessary to eliminate and control the ills which afflict organized society, is to enact regulatory laws designed to take care of the problem or problems involved. Laws are essential and necessary to good government, but they are not in themselves a panacea for all the troubles which beset our social and economic systems. Experience has demonstrated that the fewer the laws and the simpler their enactments to cover any particular subject the more effective is their enforcement.

The Game and Fisheries Laws are necessary to the proper administration and perpetuation of our wild life. They are designed with a view to providing the greatest possible individual liberty consistent with the wise use of the resources involved. These laws are respected by a large majority of the citizens of the Province and their observance becomes more and more a passport to good sportsmanship. However, despite their simplicity, we still have the law breaker, the man who continues to ignore legal restrictions and thereby takes unfair advantage of those who "play the game". It is too much to hope that we can entirely eliminate this offender, but there is good reason to believe that through our united efforts we can do much to show the careless and the thoughtless that observance of and respect for the Game and Fisheries Laws is quite an important feature in the protection and development of our wild life natural resources.

To administer and enforce the provisions of the Game and Fisheries Act the Department maintains a regular staff of Field officers throughout the Province. These men are designated Overseers or Game Wardens, and their duties consist of securing observance of the laws and regulations pertaining to fishing, hunting and trapping. Their task is a difficult one though they are invariably courteous but firm in carrying out their duties. These permanent members of our field staff constitute an important section of the protective service. However, their services are augmented by the assistance and co-operation of members of the Ontario Provincial Police Force as well as certain seasonal officers who are retained for varying periods in the matter of providing adequate patrol service along certain waters during the spring and fall fish spawning periods and protective work during the various hunting seasons.

Interested sportsmen also play a large part in the work of protecting our fish and game resources. During the year some 876 sportsmen conservationists offered their services and were accepted as Deputy Game Wardens, and as such are authorized to assist in obtaining proper observance of the Act and Regulations. The practical support and moral effect of this army of voluntary workers is of very great importance in preventing abuses of the privileges enjoyed by sportsmen.

The Department deplors the fact that it is necessary to prosecute in order to obtain proper observance of the Game and Fisheries Laws. It is hoped that through education, an enlightened public opinion, and a general knowledge of the value of our resources the law breaker will become so unpopular that his depredations will be considerably reduced. In the meantime, however, the poacher, the unscrupulous trapper and the petty lawbreaker still keep the enforcement officers busy.

During 1937-38 there were some 1362 cases in which offenders against provisions of the Game and Fisheries Act and Regulations were apprehended in their offences by members of the Field Service Staff who promptly relieved those involved of the articles of sporting equipment they carried as well as the unlawful game or fish they might have had in their possession on such occasions. From an examination of the reports supplied in these cases it is learned that action was provided by

Game and Fisheries Overseers in 1157 of these cases, by Deputy Game Wardens in 62 cases, by members of the Ontario Provincial Police Force in 48 cases, and in the remaining 95 cases by co-operative action amongst Overseers, Deputy Game Wardens, and Provincial Police Constables.

A condensed summary of the material confiscated shows the following:—

Live animals .....	in	7 cases
Birds, game animals and meat .....	in	160 cases
Firearms and ammunition .....	in	460 cases
Fish .....	in	209 cases
Nets and fishing equipment .....	in	213 cases
Angling equipment .....	in	84 cases
Pelts and hides .....	in	228 cases
Traps and equipment .....	in	166 cases
Water craft .....	in	29 cases
Motor vehicles .....	in	11 cases
Lights .....	in	21 cases
Spears .....	in	66 cases
Miscellaneous .....	in	52 cases

Duplicate entries on one seizure report, such as firearms and game; angling equipment and fish; trapping equipment and pelts, and other combinations of a similar nature account for the apparent discrepancy in the total shown by the foregoing table, viz, 1706, as compared with seizure reports numbering 1362.

Departmental records disclose the fact that during the year reported upon some 1108 cases were prosecuted through the courts, and that convictions were registered in 1045 of these cases, while charges in the remaining 63 cases were dismissed by the Magistrates who presided thereon. Game and Fisheries Overseers prosecuted in 960 cases and were successful in 913; Provincial Police Constables in 67 cases and secured convictions in 62; Deputy Game Wardens in 18 cases in 16 of which convictions were registered; while co-operative action by Overseers, Provincial Police and Deputy Game Wardens resulted in 54 convictions out of the 63 cases prosecuted.

While each officer is required to be impartial and efficient in the carrying out of his duties he is also required to use common sense and display courtesy in his treatment of the general public with whom he comes into contact. We believe that as a general rule the members of our enforcement service are guided by these requirements at all times. Public service is synonymous with criticism rather than commendation. The control which is essential to the proper administration of a trust, such as our wild life resources, is often irksome to those who object to anything in the nature of restrictions on their so-called "liberties". As a consequence enforcement frequently results in irritation. For this reason we are always glad to receive letters such as the following from one of our United States visitors who resides in the State of Ohio. He writes, "For ten years I have been coming to your Province to do my fishing and the courtesy and consideration extended to me by the officials of your bureau and the citizens of the various communities visited has been very gratifying to me."

## THE FISH CULTURE BRANCH

Waters abounding in fish are an asset to any community. Increased fishing possibilities mean increased tourist travel; this stabilizes various business enterprises, especially in recreation centres noted for their game-fish. Apart, however, from the direct and indirect financial benefits of a rapidly increasing tourist trade, the healthful and recreational advantages associated with game-fishing are of inestimable value.

The maintenance of the commercial fishing industry is also of vital importance to the Province. Information regarding the value of this enterprise is summed up in the statistics of the fishing industry for the year in appendices 3 and 4.

The successful maintenance and increased usefulness of these interests are being developed in a variety of ways and the re-stocking of lakes and streams in a practical manner is of outstanding importance in this connection. To this end a vigorous fish cultural programme is being pursued with satisfactory results.

## HATCHERIES AND REARING STATIONS

During the year the Department operated twenty-four fish cultural stations. The actual number of hatcheries operated was twenty; trout rearing stations, eleven; bass rearing stations, four, and additional facilities were provided as outlined in the following paragraphs.

At the Fort Frances hatchery facilities were provided for carrying lake trout to the fry and early fingerling stages.

An excellent site for bass rearing ponds was located at the outlet of Lake Manitou, Manitoulin Island, in the vicinity of Sandfield. One pond was completed before the end of the year and was used, successfully, for wintering trout fingerlings to the yearling stage.

A second bass rearing pond, approximately one acre in area, was provided at the White Lake Station, Frontenac County. Speckled trout were wintered in this new pond very successfully.

An additional trout pond was added to the series of three on the property of the Ontario Government Reforestry Station at Midhurst, and acquired for use by the Department.

The water supply from Waring's Creek, located one and one-half miles west of Picton, was used for rearing trout fingerlings. This station was provided with outside rearing troughs of portable construction.

### SPECKLED TROUT:

The Department continued the policy of rearing large numbers of trout to yearling and older stages for distribution to suitable public waters. The results of this plan have been successful.

The following comparative distribution figures indicate the progress that is being made:

	1936	1937
Yearlings .....	557,270	1,167,073
Adults .....	6,081	16,150

In addition, 384,725 fingerling trout were planted, slightly more than one-third the number planted the previous year. The entire abandonment of the distribution of trout fry and fingerlings is contemplated, with the exception of any surplus which cannot be accommodated in our rearing stations.

### BROWN TROUT:

Excellent progress was made in regard to rearing brown trout to the yearling stage. During the year 97,484 yearling and older brown trout were distributed as compared with 7,290 during a similar period in the preceding year.

Encouraging reports of successful angling for this species have been received and intensive re-stocking of suitable streams in southern Ontario is being pursued on the basis set forth in the two preceding reports.

### RAINBOW TROUT:

#### (a) Steelhead Trout—

The waters chosen for the planting of steelhead trout were such as to fulfil the natural requirements of this species; the number of steelhead rainbows planted was somewhat less than the number planted in 1936, but the number of Kamloops trout (an allied species) distributed made up for this deficit.

(b) Kamloops trout—

This variety of rainbow trout is native to a number of lakes in the interior of British Columbia. It is an excellent sporting fish and may be taken on the fly and by trolling. Excepting during hot summer weather they are usually taken near the surface. One important characteristic is that they show very little tendency, if any, to migrate from the lakes in which they are planted.

Speckled trout lakes supplied with good tributary streams are considered suitable for Kamloops trout.

Eighty thousand fingerlings of this species were planted during the year.

Returns from previous plantings in Echo Lake (Muskoka) and a small lake adjacent to Lake Timagami, are, we hope, forerunners of greater success to be achieved from the distribution of this important variety to a number of our lakes.

#### LAND-LOCKED SALMON:

The Department was unable to secure any eggs of this species from the Province of Quebec or elsewhere. The land-locked salmon hatchery at St. Felicien, Quebec, has not operated for some time.

A small number of fry of the Atlantic salmon, a closely related species, were planted on an experimental basis.

A few excellent specimens of land-locked salmon planted in Skeleton Lake, Muskoka District, have been caught by angling.

#### LAKE TROUT:

There was an increase in the distribution of eyed eggs and fry over the number distributed in the preceding year amounting to 7 per cent. There was a decrease in the distribution of fingerlings amounting to 13.6 per cent. For the egg collection, the Department depends on the co-operation of the fishermen and the work of our own spawntaking crews. Stormy weather in the fall, either continuously or intermittently, interferes with the work; this condition was particularly detrimental during the fall of 1937.

#### WHITEFISH:

There was a decrease of approximately 9.6 per cent in the distribution of whitefish as compared with that of the previous year; this was due to the reduced collection of spawn from the North Channel and Lake Ontario whitefish.

#### HERRING:

The large decrease in the distribution of herring fry was due in the main to the reduction in the collection of eggs from Lake Ontario herring and a greater reduction in the collection from Lake Erie herring, the latter collection being practically negligible. There are very hopeful signs that the population of herring in Lake Erie is gradually increasing after the disastrous decline in 1925. If the present population is permitted to spawn at least once, and preferably twice, before they are taken commercially, there will be a decided increase of this very important commercial species. As a result large collections of spawn should be available in future years.

#### YELLOW PICKEREL:

There was a decrease of 12.4 per cent in the distribution of pickerel fry as compared with that of the preceding year, due primarily to the reduced collection of pickerel spawn in the southern portion of Lake Huron.

Following the usual practice, two million eyed eggs were handled by the Sparrow Lake hatchery, the fry being distributed to suitable areas of Sparrow Lake.

**SMALL-MOUTHED BLACK BASS:**

Excellent results were obtained in connection with the culture of small-mouthed black bass; the increased production of fry and fingerlings was 63.4 per cent and 104.5 per cent, respectively, over that of the previous year.

There was also a slight increase in the distribution of yearlings and older bass, as a result of bass harvesting from natural areas; a limited amount of this work is conducted by our hatchery officers, annually.

**LARGE-MOUTHED BLACK BASS:**

Following the previous year's practice, one pond was operated for the production of this species with satisfactory results. This pond, which is 0.64 acres in area, produced 135,000 fry and 4,120 fingerlings.

**YELLOW PERCH:**

Due to a diminished run of spawning fish, there was considerable reduction in the number of perch eggs collected by the commercial fishermen in the vicinity of the Kingsville hatchery, where the eggs are cultured to the fry stage.

**BLUE PICKEREL:**

Blue pickerel spawn was collected in the west end of Lake Erie and cultured to the fry stage in the Kingsville hatchery; this was the first time that such work was undertaken by our Department.

This is a species of considerable commercial value in Lake Erie, and artificial culture is one way by which its maintenance may be assisted.

**MASKINONGE:**

The distribution of maskinonge fry was increased 53.5 per cent over that of the preceding year, due largely to a much more satisfactory collection of eggs. One chief drawback was prevailing cold weather during the incubation period, which retarded development. This condition was followed by a sharp rise in temperature, causing too rapid development and hatching.

The difficulties surrounding the culture of this important species were outlined in the previous year's report, and the information given applies with equal force to the results obtained in 1937.

In Wisconsin the culture of maskinonge has been pursued for thirty to forty years. A large number of eggs are collected from areas where the parent fish are abundant, and a large number of fry are planted annually, but the rearing of fingerlings is a much more difficult matter; Wisconsin is reported to have reared 1,417 fingerlings of this species in 1937. New York State has likewise pursued the culture of maskinonge for over thirty years. This work is concentrated on Lake Chautauqua where parent maskinonge are plentiful and, therefore, egg collection and fry production large; in 1937 it is recorded that New York State planted 856 maskinonge fingerlings. In Minnesota progress along these lines has been slow on account of the scarcity of the breeding fish. Small numbers of fry have been distributed, but there is no authentic or definite record of the number of fingerlings actually reared up to and including 1937.

In Ontario these activities are concentrated in the Kawartha Lakes region and for good reasons. In the first place, these waters have the necessary or essential conditions for producing maskinonge. Secondly, this area requires intensive restocking on account of the intensity of the fishing. A good indication of the capacity of these lakes to produce maskinonge is given in the statistics of catch from 1892 to 1901, when this important species was taken in large numbers, commercially.

The Department is endeavouring to maintain and to build up the maskinonge supply in a variety of ways, which may be summed up in a more or less concise manner as follows:

1. Restricted bag limit and restricted number of days' fishing.
2. Protection of the normal population in sanctuary areas, taking in waters adjacent and outside these areas only the natural increase from them. An explanation of the purposes of these sanctuaries was given in detail in the previous year's report.
3. The planting of fry in suitable areas.
4. Further studies regarding the possibilities of rearing fry to the fingerling stage.

### CLOSED WATERS

In addition to those waters already closed for the natural protection and propagation of fish, the following closures were authorized during the year.

**(a) For Speckled Trout Propagation:**

DUCHESNEY CREEK,

Townships of Commanda and Widdifield, District of Nipissing.

IDLWYLD STREAM,

Township of Waterloo, County of Waterloo.

JOHNSON CREEK,

Townships of Kowkash, Paska, and Rupert, District of Thunder Bay.

LITTLE JOCKO RIVER,

From Morrow's Dam, east to its outlet into Big Jocko River, District of Nipissing.

MALTA LAKE,

Township of Boulter, District of Nipissing.

NELLIE LAKE,

Townships of Calver and Aurora, District of Cochrane.

PATTERSON'S CREEK,

Townships of Wawanosh and Hullett, County of Huron.

PUMPHOUSE CREEK,

Townships of Hart and Cartier, District of Sudbury.

WHITEHEAD'S CREEK,

Township 67, District of Algoma.

**(b) For Black Bass Propagation:**

ARCAND LAKE,

Township of McBeth, District of Sudbury.

FOUR MILE LAKE,

Township of Widdifield, District of Nipissing.

GEORGIAN BAY (Portion),

(a) An area approximately 1 mile square lying west of Electric Island.

(b) An area approximately 1 mile square lying west of Lot 51, Concession VIII., Township of Harrison, District of Parry Sound.

(c) An area lying east of and extending approximately 2 miles along the shore line opposite Concessions XIII. and XIV., Township of Harrison, District of Parry Sound.

TWELVE MILE CREEK,

Townships of Nelson and Trafalgar, County of Halton.

**(c) For Lake Trout Propagation,**

OTTER LAKE,

Township of Foley, District of Parry Sound (Effective from the 16th day of November in each year to the 15th day of May next following).

## WATER LEVELS

During the past three years, marked improvement has been shown in regard to the control of water levels. Biologically, proper control is of the greatest importance, especially when we consider that bass, maskinonge, pike, sunfish, minnows, and many other species spawn in shallow water, and that their immature stages, or adult stages, or both, live in comparatively shallow water. The fall spawning fish such as lake trout, herring, and whitefish run into comparatively shallow water and spawn on suitable shoals or grounds. The spawning depth of water for these fall spawners is much greater than that required by black bass, which is about two feet, or by minnows, which is only a few inches. The withdrawal of water from these shallows is menacing to the eggs of the spawning fish, this depending on the spawning depth and the drop in water level, but quite apart from this, the withdrawal of water from the shallows destroys myriad forms of life, for example, those of sedentary habit, those temporarily attached, the algae which harbour minute life, shellfish, and insects, and aquatic plants of various kinds.

### REMOVAL OF COARSE FISH

Between December 20th and January 16th hoop nets were operated for the removal of ling from the following waters:

- (a) **In Leeds County,—**  
Charleston, Grippen, Wolfe, and Otter Lakes.
- (b) **In Lanark County,—**  
Tay River and Otty Lake.

The total number of ling removed from these waters was 6,520; the average weight of the ling was 7 pounds, and the total weight of ling removed was in the neighbourhood of 45,640 pounds or 22.8 tons.

Similar operations were conducted on Lake Manitou, Manitoulin Island. During the whitefish spawntaking operations in the lake 4068 pounds of ling were taken in pound nets. The average weight of each ling was approximately six pounds. Night lines were used experimentally without satisfactory results.

During the latter part of February and in March of 1938, hoop nets and gill nets were operated and 2270 pounds of ling taken. Each of these averaged four pounds in weight.

## BIOLOGICAL SURVEYS

Pollution surveys were conducted on the Rainy River, Maitland River, (Goderich), and the Niagara River.

Fish planting surveys were carried out on the Holland River, Bradford, and Waterworks Pond at Richmond Hill.

Extensive surveys were conducted in connection with suitable sites for black bass rearing ponds on Manitoulin Island, Muskoka District, and Peterborough County. Surveys were also conducted in the Timiskaming District in regard to a suitable site for a trout rearing station.

With the exceptions noted above, all the work of a biological nature was concentrated on the fish cultural activities carried on in our hatcheries and rearing stations.

The Ontario Fisheries Research Laboratory of the Department of Biology, University of Toronto, conducted field investigations, coupled with laboratory studies on a number of waters in Algonquin Park during the season 1937-38, and the following is a concise account of this important work:

“One of the principal functions of this laboratory is to examine the conditions in game fish producing lakes and streams. Information obtained in this way gives a better understanding of how rapidly fish grow and how a good supply can be maintained. During 1937-38 the work was carried on in the lakes and streams of Algonquin Park.

The major studies undertaken during the year included an investigation of the vertical distribution of the young of the yellow perch in relation to their availability as food for lake trout. The food of the young perch was studied in order to learn what governed the supply of this important source of trout food. The food was found to consist of 85% *Daphnia* or water fleas, 10% small insect larvae and 5% sunfish fry.

Other studies were directed to the production of insects in the lakes and streams from the point of view of their value as food for fish.

The collection of angling statistics was continued and extended. These figures are now extensive enough to make possible a preliminary estimate of the natural productivity of the Algonquin Park lakes with respect to lake trout. They have also proven their value in following the trend of speckled trout production in Red Rock lake, and have made possible the application of measures designed to keep up production in this important lake.

During the year about 200 adult lake trout were transferred to Cache lake, some by truck and some by air, with satisfactory ease and economy. Some 2,000,000 perch fry, 100,000 lake herring fry, and some minnows were planted in Cache lake. These forage fish were introduced for the purpose of increasing the food for the bass and the lake trout."

### ACKNOWLEDGMENTS

In conclusion I desire to give expression to my appreciation of the valuable assistance and co-operation rendered the Department from many sources during the year, and more particularly from the various Fish and Game Protective Associations as such and the individual members of these organizations. The sphere of activity of these Protective Associations is extending and the interest and influence of the members of these organizations and other sincere sportsmen is sufficiently evident to warrant the assertion that it is practically impossible to estimate the benefits derived by the Department therefrom in our efforts along the lines of providing an efficient administration and supervision of the wild life natural resources of this Province. Such a measure of co-operation encourages us to intensify our endeavours to preserve unimpaired and possibly improve the opportunities which exist in this Province to those who so desire to enjoy such healthily recreation which our fish and game make available.

It might also be stated that, generally speaking, members of the Staff, both the inside and outside service, have conducted themselves and performed the duties assigned to them in the best interests of the Department and its varied activities.

All of which is respectfully submitted.

I am, Sir,

Your obedient servant,

D. J. TAYLOR,

*Deputy Minister of Game and Fisheries*

Toronto, April 12th, 1939.

# REPORT OF THE DEPUTY MINISTER OF LABOUR

For the Fiscal Year Ending March 31, 1938

TO THE HON. N. O. HIPEL,  
Minister of Labour.

SIR:

I have the honour to submit a report on the work of the Department of Labour of the Province of Ontario for the fiscal year ending March 31, 1938.

## INDUSTRIAL CONDITIONS

A decided improvement in industrial conditions in Ontario during the fiscal year was indicated in the statistical information compiled by the Dominion Bureau of Statistics. These figures show an increase in the volume of employment by a mean index number of employment of 120.2 for the year, or an advance of 12.2 points as compared with 1937, the base of 100 being the average for the calendar year 1926.

Encouraging features regarding the situation are the facts that the improvement continued throughout the year, the index number for each month being higher than that for the corresponding month of the previous year, and the improvement was also evident in all of the thirteen divisions of industry. The greatest gains were reported for the logging, construction and mining industries, as indicated by advances of approximately 34, 33 and 25 points respectively in the index numbers, and manufacturing generally maintained a high level of activity, especially in the iron and steel industry.

Improvement in industrial conditions was also shown by a decrease in the volume of unemployment among trade union members in the Province. According to calculations made from reports received from trade union bodies, the percentage of unemployment averaged 8.4 for the fiscal year as compared with 11.4 in 1937.

Greater activity in the building trades was indicated by an increase of 10.7 per cent. in the value of building permits issued in Ontario for the fiscal year, the total amounting to \$25,531,628.

## LEGISLATION

Four of the statutes coming under the jurisdiction of the Minister of Labour were amended at the 1938 session of the Legislature, as follows;—

**THE DEPARTMENT OF LABOUR AMENDMENT ACT, 1938;**—By this amendment the number of members to constitute the Industry and Labour Board was reduced from five to three, all of whom are to be officers of the Department of Labour. Provision was also made for regulations for the protection of persons engaged in the construction of coffer dams and crib work in water or other places where pressure of sand, water or soil is likely to endanger human life.

**THE STEAM BOILER AMENDMENT ACT, 1938;**—By this amendment regulations made under the Act need no longer be published in the Ontario Gazette but notice that they have been made is to be gazetted and the regulations are to come into force ten days after publication of the notice, instead of at a date named by Proclamation. It also provided that the inspection fee to be paid to the inspector by owners or manufacturers shall be "such fee as may be prescribed by the regulations for such inspection and the issue of such certificate", instead of a fee of \$5.

THE INDUSTRIAL STANDARDS ACT;—By a section of The Statute Law Amendment Act, The Industrial Standards Act was amended to clarify the intent of the Act, that it does not apply “in the mining or agricultural industries”.

WORKMEN'S COMPENSATION ACT;—This Act was also amended by a section of The Statute Law Amendment Act to provide that “a sum not exceeding \$125 for necessary expenses for transportation and things supplied and services rendered in connection therewith necessitated by the transfer of the body of a workman from the place of death to the place of interment in Ontario”. This provision is to have effect as from the first day of May, 1937.

### LABOUR DISPUTES

During the year there were 127 strikes and lockouts reported in Ontario, in which 22,749 workers were involved in a time-loss of 294,906 working days.

Approximately 35 per cent. of the time-loss, or 102,812 working days, was due to 23 strikes in the textile and clothing industry, and approximately 24 per cent., or 71,904 days, to 9 strikes in the metal products industry, which includes the automobile firms. On the other hand, there was a decided decrease in the amount of time-loss in the logging industry, which amounted to only 4,800 days. In 1934 the time lost in this industry due to strikes was 26 times this amount, and equalled about 48 per cent. of the total for that year; whereas, this year it was only 2 per cent. of the total. One explanation of this improvement in labour relations in the logging industry is the fact that there were in operation during the year four schedules pursuant to The Industrial Standards Act, providing for wages, hours and conditions of labour satisfactory to both employers and employees concerned.

Settlement of 52 strikes, involving 13,912 workers in a loss of 222,921 days, was effected through compromise; 37, involving 3,833 workers in a loss of 23,056 days, were settled in favour of the workers; and 25, involving 2,894 workers in a loss of 42,388 days, were settled in favour of the employers. Of the remaining strikes, 9 were indefinite in outcome, and 4 remained unterminated at the end of the fiscal year.

### CONCILIATION AND NEGOTIATION

The Chief Conciliation Officer and other officials of the Department of Labour conducted negotiations which resulted in the settlement of strikes involving approximately 75 per cent. of the total number of workers involved in strikes in the Province.

The conciliation service has been greatly extended since the appointment of the Chief Conciliation Officer at the beginning of the fiscal year. As far as possible, this Branch of the Department is kept in constant touch with industrial situations likely to result in disputes and, in instances in which the public interest might be unduly affected, the Department takes the initiative in contacting the interested parties, with a view to preventing unnecessary disputes. Effective assistance has been rendered in many cases in which there were threats of strike and satisfactory adjustments have been achieved which have avoided immediate strikes and have removed the probability of future disputes.

Through this contact a valuable link is supplied between industry and the legislation available for treatment of these questions. A result of this service is evident in the logging industry. During the fiscal year there were no strikes in this industry in the four zones where schedules pursuant to The Industrial Standards Act were in force.

### DOMINION-PROVINCIAL YOUTH TRAINING PROGRAMME

In September 1937 the Deputy Minister of Labour was called upon to direct the

operation of schedules under the Dominion-Provincial Youth Training Programme and temporary appointments were made to provide the staff necessary to organize the project. In co-operation with the Department of Education, classes in technical schools were established in various cities and towns throughout Ontario. An earnest effort was made to induce employers in all skilled trades to enter into contracts of apprenticeship and in this way 188 apprentices were indentured. Classes for technical training were provided for them.

Many employers were also induced to employ and instruct young persons in various occupations which are not considered fully skilled yet require instruction and practice to acquire the dexterity necessary to operate machines safely and to perform other repetition jobs. Some 638 such persons were placed in employment under learnership agreements.

In addition to the 188 apprentices indentured and the 638 learners placed in industry, there were also placed through the Department of Labour 12 male nurses, 18 salesmen, 69 in retail merchandising and 29 in various other forms of employment, making a total of 954 placements under Schedule "E". The registration and selection of young persons placed in employment under the Programme were done by the offices of the Government Employment Service and the Employment Service also made all necessary arrangements for transportation for apprentices sent to training classes away from home.

Under Schedules "A", "B", "C", and "D" 520 placements were made by other Departments of the Ontario Government, making the total of placements 1,474 under the Programme for the first six-month period it was in operation.

#### ONTARIO GOVERNMENT OFFICES, EMPLOYMENT SERVICE OF CANADA

The improvement in employment conditions during the year resulted in an increase of 22 per cent. in the number of vacancies reported to the Ontario Offices of the Employment Service of Canada, and approximately 92 per cent. of them were filled. The vacancies totalled 156,506; the applications 311,188 and the placements 143,462. Approximately 70 per cent. of the placements were for work of a regular nature, that is work lasting at least two weeks, as compared with 58 per cent. last year. Of this total number of placements, 1,969 were handicapped ex-service men.

This report completes the record of twenty years of service of the Ontario Offices and in that time, from 1919 to 1938, the number of placements totalled 2,867,839.

#### FACTORY INSPECTION BRANCH

During the year 27,425 inspections and investigations were made by the inspectors of the Composite Inspection Staff, and 5,876 orders were issued relative to various requirements of The Factory, Shop and Office Building Act. In the total number of permits issued, 4,579, there was an increase of 712 as compared with the previous year, and the number of permits in connection with homework increased 848. In 1936 the section of the Act dealing with homework was amended and it now requires all homeworkers throughout the Province, instead of only those in the larger centres, to hold permits, as well as all employers giving out this class of work and who formerly were not required to have permits. Remuneration for this work is now nearer factory wage rates for similar work, because of the requirement that pay for homework must be in accordance with rates set by the Industry and Labour Board.

The estimated value of buildings for which plans were approved in the Branch totalled \$9,405,225 for the year, or an increase of \$2,615,375 as compared with 1937. Twenty of the 292 plans, having a value of \$655,609, were for new companies, which fact indicates a favorable expansion in industry in this Province.

A considerable amount of caisson and coffer dam work was carried on in Ontario during the year, the main portion of which was in connection with the two large international bridges. The caisson inspector kept in close touch with these operations to ensure that the regulations were being complied with in every respect, with the result that there were no fatalities and no cases of caisson disease on the sections of the undertakings coming under his supervision.

### BOILER INSPECTION BRANCH

The summary of the work of the Boiler Inspection Branch indicates an increase in the demands for service which taxed the efforts of all the members of the Branch.

The number of designs and specifications of steam boilers and other pressure vessels to be constructed for use in the Province which were surveyed in the Boiler Inspection Branch totalled 418, or an increase of 135 as compared with last year. New pressure vessels which are required to be inspected during construction received 700 first inspections, 521 second and 629 final inspections, or an increase in the total of 476. Used pressure vessels being extensively repaired, sold or exchanged were given 1,310 inspections, or 269 more than in the previous year, and the number of certificates issued by the Branch totalled 2,802, as compared with 2,507 in 1937.

As a result of this greater volume of work, the total monies transmitted by the Branch to the Treasurer of Ontario amounted to \$19,599.87, an increase of \$4,345.32.

### BOARD OF EXAMINERS OF OPERATING ENGINEERS

A greater volume of work than ever before was accomplished by the Board of Examiners of Operating Engineers. The number of candidates examined totalled 2,305, or 661 more than in 1937, and 997 of these were examined at the Toronto Office of the Board where examinations are held daily, and 1,308 were examined at outside centres, chosen for the convenience of the candidates. The certificates issued numbered 17,195, or an increase of 800 over last year, and the net revenue amounted to \$29,314.14, an increase of \$3,251.61.

In addition to the routine work, the Board undertook the complete revision of the Regulations pursuant to The Operating Engineers Act, which resulted in certain changes and a decided improvement in the general set-up of the Regulations. During the year 405 cases of infractions of the Act were dealt with, 246 of which were satisfactorily handled without resort to court action and 159 were still in process of adjustment at the end of the fiscal year.

### INDUSTRY AND LABOUR BOARD

The five members of the Industry and Labour Board were appointed May 25, 1937, as follows;—E. J. Young, Chairman, Miss M. F. Mangan, J. C. Adams, R. B. Whitehead and Fred Bancroft. Towards the end of that year Mr. Bancroft died and Mr. Whitehead resigned to become Ontario Securities Commissioner, and no appointments were made to fill their places. The section of The Department of Labour Act authorizing the establishment of the Board was amended in 1938 to reduce the personnel of the Board to "not more than three members". The Industrial Standards Act, The Apprenticeship Act and The Minimum Wage Act were designated by the Lieutenant-Governor in Council for administration by the Board.

INDUSTRIAL STANDARDS BRANCH;—Fifty-four official conferences were held during the year and 49 schedules were approved pursuant to The Industrial Standards Act, making a total of 56 schedules in force at the end of the fiscal year. The Board collected a total of \$3,069.50 arrears of wages from 13 employers on behalf of 242 employees and the sum of \$1,297.53 arrears of wages was paid direct to employees by their employers after intervention of the Board on their behalf.

APPRENTICESHIP BRANCH;—The registration of apprentices during the year totalled 665, as compared with 319 the previous year, and the active apprentices at the end of the year numbered 1,023, as compared with 518 in 1937. Examinations were held for 786 candidates, 673 of whom were engaged in the motor vehicle trade, 99 were hairdressers and 14 barbers. The certificates issued totalled 14,942, as follows;—7,633 in the motor vehicle repair trade, 3,423 in hairdressing and 3,886 in the barbering trade. The revenue amounted to \$17,132.83.

MINIMUM WAGE BRANCH;—Pursuant to The Minimum Wage Act, 1937, a minimum wage order covering the textile industry was issued by the Industry and Labour Board and became effective March 1, 1938. It established the minimum wage for men at \$16.00 per week and for women at \$12.50, with lower rates for juveniles and beginners. The minimum wage orders, issued by the former Minimum Wage Board and which apply to female workers only, remain in force until replaced by orders under the new Act. During the year the sum of \$21,180.18 was collected as arrears of wages from 448 firms on behalf of 646 female employees and the wages of 2,183 employees were adjusted to bring them into line with minimum wage orders.

#### CONCLUSION

It is with regret that we record the death on June 5, 1938, of the Hon. Morrison Mann MacBride, who had been appointed Minister of Labour in October 1937. Always keenly interested in the welfare of the people, Mr. MacBride was a zealous worker for the promotion of harmonious relations in this Province and his death was a great loss to the public service.

The Hon. Peter Heenan, Minister of Lands and Forests, undertook the Labour Portfolio temporarily following Mr. MacBride's death.

The Hon. N. O. Hipel, Speaker of the Legislature, was appointed Minister of Labour in September 1938.

The loss by death of two officials since the publication of the last report was a matter of regret for this Department. Mr. Fred Bancroft, a member of the Industry and Labour Board since its inception in May 1937, died on November 22, 1937. Mr. Bancroft had been actively identified with organized labour for the greater part of his life and had served on Royal Commissions and also on many Boards of Conciliation and Investigation.

Mr. J. M. Brown, who had been Chairman of the board of Examiners of Operating Engineers since 1920, died on October 5, 1937, after an illness of several months. As Chairman of the Board, Mr. Brown was largely responsible for raising the standard of power plant engineering in the Province and, through textbooks which he compiled, rendered a great service to young men entering this profession. He had been superannuated for eight months prior to his death.

Mr. F. B. Walker was appointed Chairman to fill the vacancy caused by Mr. Brown's death.

By an Order-in-Council dated the 18th day of October, 1937, the administration of The Workmen's Compensation Act was transferred from the Department of the Attorney-General to the Department of Labour.

I have the honour to be, Sir,

Your obedient servant,

J. F. MARSH,

Deputy Minister of Labour.

**ONTARIO GOVERNMENT OFFICES OF THE EMPLOYMENT  
SERVICE OF CANADA**

GENERAL SUPERINTENDENT—H. C. HUDSON

The improvement in employment conditions reported in 1937 continued throughout the fiscal year 1938, the number of vacancies listed by employers being 22 per cent. above those of the preceding year.

The manner in which this improvement was reflected in the work of these offices will be seen in the statistical table which appears elsewhere in this report, and in the summary of reports from the various offices. At the same time, the Ontario Government continued to employ labour on a large scale, principally on highway construction, and the employment offices had the responsibility of seeing that a proper balance was maintained in the labour supply on each job. The percentage of key men employed by contractors was increased from 15 to 25, and 50 per cent. of the labour was recruited from relief lists or needy cases, and the remaining 25 per cent. consisted of other unemployed men in the district in which the work was carried on.

The co-operation between the Ontario Offices of the Employment Service and the federal Department of Labour continued throughout the year and it is interesting to note that, during the twenty years that the Federal-Provincial Agreement has been in effect, no major difficulties have arisen between the two departments. Service was rendered to another federal Government Department when the offices were asked to co-operate in placing men under the Probational Training Plan sponsored by the Veterans' Assistance Commission.

The employment service rendered the people of Ontario was enlarged by the opening of an office in Woodstock on September 1, 1937. There were two changes among the superintendents. J. W. Ross of Belleville resigned on account of ill health and was replaced by W. D. Ross, and A. W. Taylor, the Guelph superintendent, was superannuated and his position filled by R. J. Robson. On November 15, 1937, J. Fred Marsh assumed control over both the Men's and Women's Departments of the Toronto Office. The offices of Chatham, New Toronto and Sarnia were moved to improved premises during the year.

The Employment Service played a prominent part in the Dominion-Provincial Youth Training Programme, co-operating with the special representatives appointed to canvass employers on behalf of the Programme and assisting in the selection of young men and young women for the various courses.

An idea of the volume of business transacted in local employment offices is seen by the fact that the staff of the New Toronto Office conducted 39,917 employment interviews during the year, and the Port Arthur Office, the staff of which consists of the superintendent and one clerk, placed 12,223 persons in employment, incidentally constituting a record for the office.

The manner in which a local employment office is equipped to meet an emergency was revealed at the time of the unusual ice jam and the collapse of the Suspension Bridge at Niagara Falls. Hundreds of men flocked into the district in the hope of obtaining employment which might be created by the emergency and the local authorities centralized all orders for such help in the local employment office. The result was that men residing in the district were given the preference in the special work of repairing the damage caused by the catastrophe.

With this report the Employment Service in this Province completes its second decade of usefulness and it is no exaggeration to state that few government departments have been more extensively used by the citizens of the Province than the Ontario Government Offices of the Employment Service of Canada. During the period from

1919 to 1938 more than two and three quarter million men and women have been placed in employment. Examining the table which appears below, it will be seen that the period commencing in 1929 brought the largest number of placements of any of the five-year periods. The explanation of this is not the great volume of employment available in 1929, but rather the volume of relief work carried on in 1931 and 1932.

**PLACEMENTS MADE IN THE ONTARIO GOVERNMENT OFFICES OF THE  
EMPLOYMENT SERVICE OF CANADA — 1919 to 1938**

1919	75,151	1929	159,519
1920	135,852	1930	141,841
1921	107,764	1931	261,243
1922	143,011	1932	181,533
1923	167,933	1933	134,735
	629,711		878,871
1924	149,298	1934	209,870
1925	135,454	1935	35,777 (5 months)
1926	135,331	1936	149,265
1927	136,897	1937	119,120
1928	153,783	1938	143,462
	710,763		648,494
	Grand Total		2,867,839

**OUTLINE OF ACTIVITIES OF ONTARIO GOVERNMENT OFFICES OF THE  
EMPLOYMENT SERVICE OF CANADA**

More than 400 men were placed on farms by the Belleville Office at wages slightly higher than during the preceding year. An exceptionally good type of young man was recruited for the forestry course under the provisions of the Dominion-Provincial Youth Training Programme. Nine highway projects in the district absorbed 520 men, and 212 men were placed on the construction of the Hydro-Electric Power Commission transmission lines.

The Brantford Office, combined with the temporary agricultural office at Simcoe, exceeded the record of any other office in filling jobs on farms and the total, 2,552, was higher than in any previous year. The branch office at Simcoe served a useful purpose in centralizing the supply and demand for tobacco workers and placed over 1,000 men on farms. The placement of 120 young men and young women under the Youth Training Programme also reflects credit on the staff of the Brantford Office and the special representatives of the Programme. The majority of the placements were made in the iron and steel industry but 15 other industries are represented in the placement of the 96 young men and the 24 women who secured employment under this programme. An improvement in construction enabled the office to place approximately 200 building tradesmen and a survey of manufacturing establishments also indicates a marked improvement. The superintendent assisted a tobacco company in recruiting its labour supply for a new factory in Norfolk County and the assistance was greatly appreciated by the officers of the company.

The Chatham Office reported that the seasonal demand for harvesting tobacco, sugar beets and tomatoes resulted in the placement of 704 single and 161 married men. The office also supervised the labour supply on various highway construction

jobs. An important development was the decision of the City Council to use the Employment Service as a means of selecting men for city work. The office was moved to improved premises at 399 King Street West during the fiscal year. Difficulty was experienced in filling orders for domestic help due largely to the opportunities for employment for young women in the various factories in the district, particularly during the summer and fall.

With placements totalling 7,500, the Fort William Office established the highest record in its history. An increase in bush and construction activities largely accounted for the splendid record made by the office. The placement of 4,832 men in bush operations was more than double that of 1937. Shortly after the conclusion of the fiscal year the death occurred of J. T. Foxton, who had been on the staff since 1924, 1924.

In June 1937 A. W. Taylor was superannuated after eighteen years of service as superintendent of the Guelph Employment Office. He was succeeded by R. J. Robson. The office participated in the Dominion-Provincial Youth Training Programme, placing boys in bakeshops, retail stores and in printing establishments, while girls were placed in textile plants in the district. In addition, 9 young women from Guelph, who were trained under this Programme for household employment, were given jobs through the Guelph Office.

Almost 100 young men and women from Hamilton took advantage of various phases of the Dominion-Provincial Youth Training Programme. The majority of these were girls who received training as household workers, and young men were placed in the classes in carpentry, welding, tool and dye-making and bricklaying. Approximately 500 men were placed on various highway projects in the district. A registration of civilian handicaps was made through the office, and no less than 600 cases came to light as a result. The Women's Department was busy during the year with slightly over 1,000 placements in regular employment and almost 2,000 in casual jobs.

The first complete twelve-month report of the Kenora Office indicates clearly that there was a definite need for employment service in the north-western section of the Province. Almost 2,000 placements were made on highway construction on the trans-Canada and Fort Frances highways, while men were also placed on mining roads, bridge and culvert construction. The larger lumber companies and pulpwood jobbers availed themselves of the service of the office, and a group of young men from Kenora and Fort Frances were placed on a forestry training project under the provisions of the Dominion-Provincial Youth Training Programme. There were 795 men from relief rolls or men certified as needy cases given employment during the year.

In spite of the fact that the better types of farm hands appear to prefer southwestern Ontario on account of the higher wages offered, the Kingston Office placed 168 men on farms during the spring and summer months. A very extensive programme of highway construction in the district accounted for 3,542 placements, which were effected in co-operation with the township relief officers.

The early part of the fiscal year in Kitchener brought three rather serious industrial disputes, followed, however, by a period of activity which is reflected in the placements of the office. In co-operation with the special representative of the Dominion-Provincial Youth Training Programme in the district, 83 young men and women were placed under apprenticeship indentures and learnership agreements within the area, 2 young men were sent to the mining school at Haileybury and 2 to the horticultural class at the Ontario Agricultural College at Guelph. Eighteen of the graduates of the first class at the Braeside Home Training School were placed in Waterloo county. The Women's Department of the Kitchener Office surpassed the

previous year's placements, although a shortage of experienced domestics was noticeable throughout the year.

Wage rates in the field of agricultural employment were higher than during 1937 in the district covered by the London Office. There was an increased demand for farm help, and it is interesting to note that 90 married couples were placed on farms during the year at wages ranging from \$300 to \$400 per annum with free house, garden, etc. The harvest wages for single men ranged from \$30 to \$35 a month, with occasional orders at \$40 a month and board. The efficiency of the London Office in recruiting men was demonstrated when 150 labourers were required on short notice. The local radio station kindly announced that these jobs were available and the order was filled within a few hours of the time it was received. Slightly over 300 men were placed on road projects in the district and 191 men were selected by the office as extra helpers during the Christmas rush at the local post office. Full co-operation was given in the Youth Training Programme and 34 placements were made. Reporting on the Women's Department, the superintendent pointed out the increasing difficulty of assisting middle-aged women in securing employment of any kind and stated that even in the domestic field the demand is strictly limited.

The New Toronto Office was moved to improved premises at 131 Sixth Street, and the advantages of a location off the main street were immediately apparent. During the first eight months of the fiscal year, the office was extremely busy with its farm labour campaign, Youth Training Programme, highway and other public works projects, and in rendering service to private employers who were increasing their staffs with the recovery in general business. Later, however, there was a pronounced recession in the activities in all these fields. In cooperation with the Veterans' Assistance Commission, the local office succeeded in placing a relatively large number of ex-service men who would have found it difficult to find employment had it not been for the publicity given to the subject by the advertising programme of the Committee. Contractors working on the unemployment relief projects in the New Toronto district expressed themselves as entirely satisfied with the type of service rendered by the office, from which they were required to obtain 75 per cent. of their labour, in accordance with the terms of their contracts. It is interesting to note that the three members of the staff recorded a total of 39,917 individual interviews during the year, or an average of 133 contacts with unemployed men each day. This figure indicates the extent to which the local office is utilized by men in search of work.

A 10 per cent. increase in the number of placements in the Niagara Falls Office, as compared with the fiscal year 1937, was a reflection of the improved employment conditions. An outstanding development in the district was the increase of 100 per cent. in the personnel of firms engaged in the manufacture of aeroplanes and parachutes. The local office participated in the selection of young men and women for training in the various projects conducted under the Dominion-Provincial Youth Training Programme. In January extraordinary ice and wind conditions caused the collapse of the International Bridge and the flooding of the Ontario Power Company's plant at the base of the Horseshoe Falls. The local employment office was asked to assume complete control of the selection of men for the emergency work involved in repairing the damage and more than 200 men, carefully selected with regard to their need for the job, were placed between January 27 and March 31. Men applying for jobs at the Ontario Power Plant had their attention called to a notice reading as follows:—"No help wanted. Apply at Ontario Employment Office."

Approximately 4,000 men were employed in 40 camps operated by lumber companies in the vicinity of the North Bay Office. A large percentage of these men were placed through the efforts of the superintendent, following a conference called by the Minister of Labour between representatives of the Department and the Lumber-

men's Association. More than 50 per cent. of the placements of the office, however, were in connection with the 25 highway contracts supervised from North Bay. In addition, workers attached temporarily to the staff of the office kept in constant touch with the contractors in order that their needs might be supplied promptly. A significant development in the North Bay district, which the superintendent describes as "Quintupletland", has been the springing up of new hotels, tea-rooms, sleeping cabins and additions to restaurants and lunch counters as a result of the influx of tourists. The demand for help in this connection was double that of the previous year. The office supervised the selection of 96 young men for training in forestry under the Dominion-Provincial Youth Training Programme.

The Home Improvement Plan was responsible for the construction of many new residences in Oshawa and every qualified building mechanic was employed steadily between April and October. The superintendent commented on the fact that, while he had registered approximately 160 men disabled due to advanced years or physical disability, employers almost invariably asked for able-bodied men even for such jobs as watchmen. This greatly complicated the problem of placing handicapped men.

With farm placements approaching the 1,400 mark, the Ottawa Office exceeded all previous records in caring for the needs of the farmers in the district. The demand was primarily for single men but it was found possible to place a few married couples. In co-operation with the authorized representatives of organized labour, building tradesmen were supplied to contractors in the field. The district representatives of the Dominion-Provincial Youth Training Programme made the Ottawa Office of the Employment Service their headquarters and the co-operation was found mutually beneficial. In selecting men for highway work, the Ottawa Office co-operated with the Reeves, mayors and relief officers of the district in which the contracts were being carried out. The outstanding feature of the Women's Department was the inauguration of the Ottawa Home Service Training Centre. The Director of the Women's Department took an active part in the selection and placement of girls for this form of training. In addition, the Women's Department co-operated with the High School of Commerce in a two weeks' intensive course in salesmanship under the Dominion-Provincial Youth Training Programme. Following this training, 20 of the young women who took the course obtained temporary employment on the sales staff of local department stores during the Christmas rush. The federal representative in the Ottawa Office recorded 1,686 interviews with employers during the year on behalf of handicapped ex-service men and placed 237 veterans in employment in 43 different trades and occupations. In addition, 24 placements were made under the Probationary Training Plan in co-operation with the Veterans' Assistance Commission.

Seven contractors in the Pembroke district called on the local office for 583 men during the year. In addition, 375 men were placed at the military camp and on various forestry projects, the selection being made in all cases in co-operation with the local relief authorities. Almost 400 men were chosen from the files of the Pembroke Office by the lumber companies operating in the district, and a forestry camp under the provisions of the Dominion-Provincial Youth Training Programme absorbed 20 young men. Partly as a result of the various projects outlined above, relief in Pembroke was at a lower ebb than at any time since 1931.

An employer in Peterborough addressed a letter to the superintendent, an extract from which reads as follows:—"We wish to thank you for your co-operation in securing suitable help whenever it was available and in keeping us informed as to trained workmen seeking employment." The extract is typical of the attitude of Peterborough manufacturers towards the assistance rendered to them by the local employment office. As in other centres, highway contracts in the district were supervised by the superintendent in co-operation with voluntary representatives at points distant from the city. Two somewhat unusual placements were made. The first was a young man

to play the part of Santa Claus in a department store and the second a young man, who was both deaf and dumb, and who was placed on an estate where he had the responsibility of taking care of poultry and attending to the routine work in the orchard. The local newspaper, like other newspapers throughout the Province, co-operated in giving frequent and intelligent publicity to the work of the Service.

In co-operation with the district forester, the Port Arthur Employment Office placed 30 young men from the head of the Lakes in forestry camps where they were taught the scaling of timber. The construction of a landing field for the Trans-Canada Airways, various hydraulic projects and numerous highway jobs absorbed most of the supply of construction labour during the year. No less than 14,100 men applied to the Port Arthur Office for employment and of this number 12,023 were placed in regular or casual employment. This constitutes a record for the office.

The statistical report of the St. Catharines Office showed an increase of 1,314 placements over the figures for the previous year. Employers made 4,439 requests for help, or an average of 15 per day.

In order to handle the increased volume of business incidental to the construction of the new mental hospital in St. Thomas, Frank Kelly, a member of the staff of the Toronto Office, was assigned temporarily to duty in St. Thomas. Mr. Kelly also assisted the superintendent in placing men required by bridge and highway contractors in the district.

The Sarnia Office placed 549 farm hands in jobs, which number represented a considerable increase over the previous year. The office also assumed the responsibility for the selection of labour on three highway jobs in the district and for the preliminary work on the new international bridge. One of the companies engaged in construction of the bridge expressed its entire satisfaction with the service of the Sarnia Employment Office which it had used for the first time in connection with this project. More than 600 men were placed in the transportation field, including stevedores, labourers, marine help and mechanics. The office co-operated in the Youth Training Programme, a forestry camp being located at Ipperwash. In addition, close co-operation was maintained with the Home Training Centre in Sarnia. One student was sent to each of the courses in male nursing and mining. During the year the office moved to 217 Front Street North.

The Sault Ste. Marie Office reported the best year in the past fifteen, the placements totalling well over 3,000. Highway and bush operations accounted largely for the increase in placements and 45 young men were selected for training in a forestry camp in the district. As in the case of Sarnia, activity in marine transportation resulted in many jobs for local men.

The Stratford Office superintendent submitted in his report a graded rate of pay ranging from \$10 in December and January to \$30 during the months from June to October inclusive. The schedule was designed to simplify payment of farm labour, in accordance with the farmers' ability to pay throughout the various seasons of the year. Every encouragement was given to the Youth Training Programme, which received much publicity through an address broadcast by the Deputy Minister of Labour at the beginning of the campaign, and by other officials of the Department. The supplying of labour for an extensive programme of highway work was handled by the office.

Sudbury increased by 860 the number of placements made this year as compared with last year, due to activity in mining, logging and highway work. Eighty-two young men carefully selected from needy families were given training in forestry under the provisions of the Dominion-Provincial Youth Training Programme.

Timmins is not generally regarded as a farming district, but the office was success-

ful in placing 160 farm hands, as compared with 98 in the preceding year. Approximately 400 men secured employment on highway projects in the district which offset a reduction in the field of mining.

The placement of 2,740 farm labourers with more than 1,300 individual employers indicates the activity in this section of the Toronto Office. It is interesting to note that these men were sent to 26 different counties. Reporting on the various activities of the office, the superintendent writes in part;—

“During the fiscal year a major change took place in the work of the Handicap Department. In May 1937 the Department was asked to take over the direction of the Probational Training Plan inaugurated by the Veterans' Assistance Commission. This necessitated the Handicap Department handling men other than disabled applicants, as any ex-service man who saw service in an actual theatre of war is eligible for benefits under the Plan, and thus greatly increased the work of this Department. To date 1,250 registrations have been made under the Plan and there were innumerable interviews with applicants who were not registered because they could not produce documentary evidence of service or were otherwise ineligible. Two hundred and sixty-nine placements were made, approximately 70 per cent. of which resulted in the trainee being permanently placed in employment. In addition, a large number of offers to train applicants were investigated but were not recommended by this Department for various reasons. The closest co-operation was maintained between this Department and the local honorary committee of the Veterans' Assistance Commission and the relations between the two offices are most cordial. A weekly summary of ex-service men placed in employment was supplied the honorary committee by the employment office, as well as a monthly report of all activities under the Probational Training Plan.

“The regular work of the Handicap Department was carried out during the year and placements showed a substantial increase over last year, despite the business recession experienced during the last six months. Registrations increased approximately 36 per cent. and 346 obtained by this Department were transferred to the general section of the office.

“During the year the Youth Division was completely reorganized. In addition to the usual placement work, 263 young men and boys were placed in training under the Dominion-Provincial Youth Training Programme.”

On November 15, 1937, the Women's Department was placed under the control of Mr. Marsh, who is now responsible for the direction of the whole Toronto Office. Certain staff changes were made with a view to improving the efficiency of the Service.

Slightly higher wages in connection with farm work resulted in an increase in the number of farm placements made by the Windsor Office. Commenting on the Home Service Training Centre established in Windsor, the superintendent reported as follows;—

“Early in October 1937 a training school for domestics was opened in Windsor and 18 girls were given a three-month course. With the exception of one girl who was ill, all were placed in good positions. In January 18 more girls entered the training school and the majority of them have positions waiting for them when they graduate in April. This office has co-operated with the Committee to the fullest extent”.

Close co-operation was maintained with the local office of the Veterans' Assistance Commission, resulting in 57 men being placed in permanent employment, 7 in semi-permanent and 74 in casual work.

A branch of the Employment Service was opened in Woodstock on September 1,

1937, under the direction of R. E. Poste, with office located at 12 Finkle Street. In spite of the fact that the season was almost over, the office succeeded in placing 479 farm hands before March 31. Every effort was made to interest employers in the Youth Training Programme and meetings were addressed by the General Superintendent, representatives of the Programme and others. The office was assigned the responsibility of selecting men for highway and bridge projects throughout the district. The demand for qualified cooks-general exceeded the supply but 75 placements were made during the seven-month period.

**PRIVATE EMPLOYMENT AGENCIES**

Three licensed private employment agencies transacted business in the Province during the year, according to reports received in this Department. Details of the placements of these agencies are as follows:

	PLACEMENTS		
	Men	Women	Total
North Bay—			
Canadian Placement Agency, B. Ferro	453	—	453
Sudbury—			
Messrs. P. J. & F. W. McAndrew	974	—	974
Toronto—			
Metropolis Agency	170	1,003	1,173
	<hr/>	<hr/>	<hr/>
Totals	1,597	1,003	2,600

No one was prosecuted under the Employment Agencies Act during the fiscal year ending March 31, 1938.

**FACTORY INSPECTION BRANCH****CHIEF INSPECTOR, DEPARTMENT OF LABOUR—J. R. PRAIN**

The fifty-second report of the Factory Inspection Branch covering the fiscal year 1938 will give a clear idea of the activities of the Composite Inspection Service of the Department of Labour.

Since the service was inaugurated in 1936 additional duties have been assigned to the staff, and there is no doubt that it has done away with much of the duplication and its irritating effect on employers of labour. Factory inspection takes up the major portion of the inspector's time, as there is an ever-present need for vigilance in order to keep industrial accidents down to the lowest possible minimum.

Many investigations were necessary under The Industrial Standards Act, The Apprenticeship Act and The Minimum Wage Act, and invariably resulted in important data being available for the officials entrusted with the enforcement of these acts, thereby enabling them to solve some knotty problems. As usual the Branch assisted in the enforcement of The Steam Boiler Act and The Operating Engineers Act.

In addition to the regular inspection service, it is interesting to report that, at the request of the Provincial Secretary's Department, a yearly survey is made of government institutions to ensure that machinery is carefully guarded and other hazards controlled so that the inmates might be protected as far as possible against accidents. Inspection service is also rendered the Technical and Vocational Schools in Toronto, where many machine tools are used by the students. These machines are dangerous unless properly guarded and the inspection assists very materially in reducing the accident hazard.

It will be noted in the statistical section of this report that there was an increase in the number of males employed, as compared with last year, but a decrease in the number of females. This might be accounted for by the improvement in the metal trades in which mostly men are employed. There is shown a marked increase in the number of permits issued to homeworkers, indicating that the legislation of 1936 has had its effect and the prices being paid give this class of worker remuneration much nearer the wages paid in factories for similar work. The amendment in 1936 to The Factory, Shop and Office Building Act requires all homeworkers, as well as all employers giving out work to be done at home, throughout the Province, instead of those only in the larger centres, to obtain permits and the pay for homework must be in accordance with rates established by the Industry and Labour Board.

The number of industrial accidents, fatal and non-fatal, increased slightly, but cases of industrial diseases decreased in number. In this connection our appreciation is again expressed to the Industrial Hygiene Division of the Department of Health for their co-operation and assistance during the year.

**CAISSON AND COFFER DAM WORK**

A considerable amount of caisson and coffer dam work was carried on in Ontario during the period under review in connection with bridge construction, consisting mainly of the two large international bridges and numerous highway structures located throughout the Province. These required many visits by the inspector in charge of this type of work to Huntsville, Fauquier, Port Stanley, Ingersoll, Burk's Falls, Belleville, London, Strathroy and Thamesford. Considerable work in open sewer construction and tunnelling was also undertaken and two compressed air tunnelling jobs were in operation in connection with a large water main in Toronto. On the two large international bridge jobs it is gratifying to note that not one fatal accident occurred on work supervised by this Department. Only two serious lost-time accidents occurred on one of these bridges, one being a fall which confined the injured

man to hospital for three months and the other requiring an absence of several weeks. On the other bridge the most serious accident reported was the loss of a little finger by a worker turning over steel on the ground.

We had at all times the utmost co-operation from contractors on these jobs. Our Department was asked to investigate the necessity for installing safety nets under the main span of the Blue Water Highway Bridge during construction. After investigation it was suggested that a motor boat be kept on the river down stream from the bridge and fitted with belts and first aid equipment. The company readily agreed to this and a motor boat was in service during all hours of construction for rescue purposes only. The same arrangement was made in connection with the Thousand Island Bridge. On smaller bridges in the Province we also had co-operation from the contractors. It is our experience that the longer contractors have been in the construction business, the readier they are to provide adequately for the safety of their workmen. Small contractors who are new in this line of business do not seem to realize the danger in coffer dam construction and often undercalculate the pressure to which timber is subjected while excavation work is in progress.

An unfortunate catastrophe occurred in the collapse of a coffer dam at Port Stanley, resulting in the death of eight workmen and injuries to five others, two of which were serious. This Department had not been informed of this proposed job and at the time of our inspector's visit three months before the disaster, the excavation was complete and almost ready for the pouring of the foundation concrete. Subsequent to this visit, the plans for the pier were changed, increasing the size considerably. A new coffer dam was constructed to take care of these changes and again the Department was not notified. The coroner's jury investigated this accident and brought in the verdict "Cause of accident unknown; cause of death, accidental" and the rider recommended that in all future contracts for such work a clause be inserted requiring the contractors to notify the Department of Labour of their intention to construct a coffer dam or any type of caisson. Since that verdict all contractors before commencing operations have submitted plans showing the system of procedure to be undertaken.

The extremely hazardous nature of this type of construction work requires continued vigilance on the part of contractors, workmen and inspectors to ensure that all precautions will be taken to safeguard life. In tunnelling operations hazards are always present, particularly where compressed air is required and it is fortunate that no accidents occurred on this type of work. No cases of 'bends' or caisson disease were reported among men working under high pressure, nor among divers working in air pressure above 40 pounds, employed on the portion of the international bridge coming under the jurisdiction of this Department. The strict enforcement of the various stages of decompression as set forth in the regulations was no doubt responsible for the lack of caisson disease.

#### PLANS FOR NEW BUILDINGS

The estimated value of buildings, plans for which were approved by this Department during the year 1938, amounted to \$9,405,225, or an increase of 38.6 per cent, as compared with the previous year. The fact that the increase in the number of plans was only 12.3 per cent, indicates that some of the units involved great expenditures. Twenty of the 292 plans were for new firms and had a value of \$655,690, or 6.96 per cent. of the total value, thus indicating a favourable expansion in industry within the Province.

The accompanying table shows the number and value of plans according to industries. The automobile industry, which is listed under 'conveyance', showed the

greatest value and was also responsible for many other extensions listed under 'metals'.

#### CLASSIFICATION BY INDUSTRY OF PLANS APPROVED

Trade or Industry	Number of Plans	Value of Plans \$	Percentage of Total Value
Chemical .....	30	365,800	3.89
Clay, glass and stone .....	5	61,000	.65
Clothing .....	5	119,500	1.27
Conveyance .....	9	2,368,000	25.10
Food .....	57	1,117,450	11.91
Garages .....	10	322,900	3.50
Laundries and cleaning .....	8	70,500	.75
Leather .....	6	39,800	.45
Lumber .....	4	29,100	.30
Metals .....	47	778,200	8.28
Offices .....	23	674,575	7.18
Paper .....	9	142,000	1.51
Printing and publishing .....	3	1,251,000	13.34
Rubber .....	4	118,500	1.26
Shops .....	20	200,450	2.13
Textiles .....	22	1,138,200	12.11
Tobacco .....	3	248,000	2.64
Warehouses .....	9	219,700	2.34
Wholesale .....	4	68,000	.73
Woodworking .....	3	62,000	.68
Unclassified .....	6	10,550	.01
Totals .....	292	\$9,405,225	100.00

The following diagram indicates the value of buildings for which plans were approved by the Factory Inspection Branch for the past twelve fiscal years.

NOTE :- OWING TO THE CHANGE OF THE DATE OF THE END OF THE PROVINCIAL FISCAL YEAR FROM OCT. 31<sup>ST</sup> TO MAR. 31<sup>ST</sup> THE PERIOD GIVEN ABOVE AS 1934-5 REPRESENTS ONLY FIVE MONTHS.

The following is the distribution of the services rendered by the inspectors of the Composite Inspection Branch:

	1937	1938	
Factory Inspection Branch:			
First Inspection .....	14,229	13,762	
Second Inspection .....	3,015	2,809	
Special Investigations .....	2,204	103	
Visits re homeworkers .....		1,143	
Visits re exhibitions .....		93	
			17,910
For			
Minimum Wage Branch .....			2,445
Industrial Standards .....	7,499		1,121
Apprenticeship Branch .....	1,613		3,116
Main Office .....	694		809
Boiler Inspection Branch .....			1,393
Operating Engineers Board .....			631
			Total Inspections .....
			27,425

In addition there were investigations of accidents and the usual visits, office calls and conferences incidental to inspection

Employees in the above industries, mercantile establishments and office buildings numbered 341,421, classified as follows:—

Year	Males over 16	Males 14-16	Females over 18	Females 14-18	Total	Children under 14 dismissed
1937	232,923	48	104,837	1,736	339,544	8
1938	238,360	22	192,339	709	341,421	0

#### HOURS OF LABOUR

	Male Workers					Female Workers				
	45	50	54	58	60	45	50	54	58	60
	154,937	30,157	21,964	1,394	15,570	71,831	12,452	8,301	719	4,067

Also 19,529 employees, male and female, working approximately 50 hours per week.

Orders issued relating to various requirements of the Act totalled 5,876 as compared with 5,330 in 1937.

## PERMITS

Applications for permits numbered 4,570 and were issued as follows:—

	Sections of Act	1937	1938
Double shift	33	167	157
Overtime	32	2,381	2,088
Bakeshop	71	58	46
Fruit Camps	38	20	16
Sale of bread manufactured outside the Province	70	5	
Homework	51	workers 1,120 employers 107	1,909 166
Industrial Standards schedules			188
Totals		3,858	4,570

## COMPLAINTS

One hundred and eighty one complaints were received during the year. Upon investigation 79 were upheld, 69 not upheld, 12 pending investigations and 3 did not come within the jurisdiction of the Branch. Some investigations covered more than one complaint. Subjects of complaints were as follows:—

	1937	1938
Long hours	61	71
Inspection of boilers	5	4
Working overtime without permit	5	12
Engineers' certificates	18	4
Ventilation	2	5
Fire exits	13	11
Fumes	2	7
Half hour lunch period	—	5
Elevators	5	4
Toilet accommodation	5	14
Child labour	1	4
Dust	2	3
Heat	3	7
Sanitation	3	2
Air tank inspection	—	1
Mechanical exhaust	7	2
Guarding machinery	5	2
Sunday work	—	1
Homework without permit	—	1
Lights	—	1
Miscellaneous	29	20
Totals	232	181

## VIOLATIONS

Violations of the Acts in the enforcement of which the inspectors have a responsibility were reported as follows:—

Operating Engineers Act	57
Adolescent School Attendance Act	8
Minimum Wage Act	1,420

## EXPLOSIONS

The following explosions causing injuries to employees were reported during the year:—

March 4, 1937	Stub of electrode fell into mix causing molten metal explosion
April 27	Valve blown off boiler
May 22	Tank exploded
May 28	Gas tank exploded
June 15	Combustion chamber gasses exploded
June 18	Steam boiler exploded
June 25	Gasoline storage tank blew up
July 22	A valve chest blew out
July 28	Extractor in laundry exploded
August 6	Puffing machine exploded
August 24	Glass jar in vörtrap receiver exploded
October 4	Acetylene torch exploded
October 30	Gasoline explosion
December 11	Slight explosion in the cyanide pot
December 15	Residue mixing tank blew up
December 17	Vietaulic coupling exploded
January 26, 1938	Test tank exploded
January 27	Drum exploded

## ACCIDENTS

Three thousand six hundred and forty six accidents were reported for the year 1938, as compared with 3,193 in 1937, of which 40 were fatal, as compared with 37 fatalities in 1937.

Fatalities were due to:—

Burns and scalds	1
Drowning	2
Electricity	2
Elevators	3
Explosions	9
Falling substances	5
Falls	6
Flying missiles	1
Hooks, chains, cables	2
Jammed between articles	4
Other machinery	1
Rolls	1
Shafting	1
Miscellaneous	2
Total	40

**BOILER INSPECTION BRANCH**

CHIEF INSPECTOR, DEPARTMENT OF LABOUR—J. R. PRAIN

EXAMINER OF REPORTS AND DESIGNS—J. N. BRIGGS

A survey of the work performed by the Boiler Inspection Branch during the fiscal year 1938 is gratifying. Demands for service created by the upward trend of industrial activity taxed the efforts of the staff to the utmost and resulted in an increase in the amount of monies transferred to the Treasury Department of \$4,345.32, as compared with the previous year.

**Welding**

Welding has reached a stage today where it occupies a merited place of importance in the fabrication of boilers and pressure vessels. Fundamentals of good welding technique essential in their construction are vigorously followed by many manufacturers, but unfortunately this condition is not universal. Inspectors have found it necessary to condemn welds when the factors required in the production of acceptable welds have been disregarded. Rules for qualification tests for welding operators and for the welding processes employed by the manufacturers are well established. The number of examinations held throughout the year shows a decided increase.

Steam pressures that only twenty years ago would have been regarded by engineers as dangerously high are now accepted as not only practical but desirable in power production. High steam pressures are being carried in power plant piping where fusion welding of joints has been employed. While most welders are able to produce sound and ductile welds of plain carbon steel piping, we are confronted with the problem of finding welders capable of qualifying for welding of alloy steel piping in which chrome and molybdenum are important ingredients.

**NATIONAL BOARD OF BOILER INSPECTORS**

The Department of Labour was represented at the Eleventh General Meeting of the National Board of Boiler and Pressure Vessel Inspectors held in New York City from May 25 to 29. The subjects discussed and papers read during the sessions were of the utmost importance and interest to manufacturers and others associated with boiler code work. This Board was organized in 1919 for the purpose of securing uniform approval of specific designs of boilers and pressure vessels through the adoption by various states and cities of one code of rules. The membership of the organization is restricted to inspectors or other officials charged with the enforcement of the rules of the American Society of Mechanical Engineers' Boiler Construction Code. The board also serves the purpose of promoting and maintaining an efficient standard of uniform inspections by granting commissions to inspectors having qualified by examination. This matter has already received consideration by responsible Canadian authorities enforcing Interprovincial Boiler Regulations, with a view to adopting similar standards for uniformity of inspections throughout the various provinces.

**BOILER CODE COMMITTEE**

The latter part of the fiscal year saw the first meeting of the Boiler Code Committee of the Canadian Engineering Standards Association in Toronto. This is a national organization supporting industrial standards, either British or foreign, for the benefit of Canadian industry. Members of the Boiler Code Committee include representatives of Canadian manufacturers, insurance companies and chief inspectors of the various provinces, with the exception of British Columbia and the Maritimes.

With a view to establishing uniform standards acceptable to the various government divisions of the Dominion and to the manufacturers and users of boilers and

pressure vessels, the Committee recommended that the Canadian Engineering Standards Association adopt the code of the American Society of Mechanical Engineers for materials and construction of boilers and pressure vessels.

### EXPLOSIONS

On May 27, 1937, one man was killed and two others severely burned as a result of an explosion of a gas cylinder in a garage located in St. Isidore de Prescott. This type of vessel, known as an acetylene storage tank, is commonly used when coupled with an oxygen tank for the purpose of welding and cutting of metal parts. The cause of the explosion may be attributed to a hidden defect in the welding securing the bottom head to the cylinder, allowing acetylene gas to escape in sufficient quantities to become ignited from a nearby open flame of an oxygen-acetylene torch in use at the time. The deceased man was standing approximately 40 feet away from the exploding tank, and the extent of the damage to the building indicated that a large volume of gas had accumulated when ignited. The remains of the gas cylinder were later found 220 feet from the buildings. The cylinder is of a type extensively used throughout Canada and the United States for the storage of acetylene gas under pressure of 250 pounds. Vessels coming under this classification are built to specifications required by the Dominion Railway Commission and Interstate Commission of the United States. The Boiler Inspection Branch has no jurisdiction over vessels of this type.

Investigation of an explosion of a Scotch marine type boiler which occurred on July 19 at Red Bridge revealed the cause to be the weakened condition of the flange seam joint of the front end of furnace due to corrosion. Unfortunately the fireman standing in front of the boiler was hurled about 185 feet by the blast and instantly killed. The boiler was moved from its supports about 25 feet, and the buildings and machinery were totally destroyed. Failure of the seam had apparently taken place when the pressure had risen to 45 pounds per square inch. The boiler was bought early in 1934 and the parties responsible had failed to have the required inspection made at that time, in accordance with the Regulations. If this inspection had been made by the Boiler Inspection Branch, the defective seam, which must have been scarcely less defective at the time of purchase, would have been repaired and the boiler thus rendered safe.

Propelled by a force that must have been tremendous, and travelling at a velocity impossible to estimate, an air receiver exploded on October 25, 1937, at the Toronto plant of a motor car company. The steam and sprinkler system piping was damaged and a 12 by 12-inch wooden beam splintered, but fortunately no one was hurt at the time. The vessel, 24 inches in diameter and 6 feet long, was fabricated of shell  $\frac{1}{8}$  of an inch thick and heads 3-16 of an inch. It was quite evident that the operating pressure of 115 pounds proved excessive and sent the vessel on its upward flight when the bottom head failed. The safe allowable pressure for this vessel should not have exceeded 60 pounds per square inch.

An explosion on November 4 of a welded C O<sub>2</sub> tank installed in a Toronto plant seriously injured two workmen. The vessel was comparatively new and fabricated by a local boiler and tank manufacturer to specifications furnished by the customer. The requirements of The Steam Boiler Act for submission of design of vessel for approval and inspection during fabrication were ignored. The tank was connected directly to the second stage of a compressor operating at 425 pounds per square inch, and the safety valve installed on the vessel, when tested after the explosion, did not release until a pressure of 500 pounds had been recorded. Further investigation disclosed the fact that, had the required procedure respecting approval and inspection been observed, the allowable working pressure of 97 pounds would have been the maximum for safety. Other disclosures indicated bad workmanship and disregard of

principles essential in the application of welding by the manufacturers.

Investigations failed to disclose the cause of explosions and fire that destroyed the benzol recovery plant of a steel company in Hamilton on December 15, causing \$200,000 damage and claiming the lives of three workmen. In spite of care and organization for the prevention of fire and other hazards connected with the process of distilling benzol from light oil, the residue tank of the system exploded and started fire to the benzol recovery building. Other explosions of nearby tanks followed immediately. The residue tank, 6 feet in diameter and 25 feet high, vented to atmosphere through a 6-inch pipe, was used exclusively for receiving distillate residue from the stills. The residue when mixed with tar is then pumped to the coke ovens as fuel. The officials of the company were mystified concerning the cause of the explosion, and claimed that there had been no lapse of the safety methods at the plant. Evidence submitted at the inquiry indicated that no fire would have followed the first explosion if the residue tank had been located some distance from the benzol recovery building.

Great damage to property was the result of an explosion of a 72-inch diameter steam dryer on January 24, 1938, at an abrasive plant in Brantford. Fortunately those responsible for the operation of the machine to which the exploded tank was attached were out of the room when the explosion occurred and no one was killed or injured. The vessel, being over 30 years old, was made up of a thin upper shell attached to steel heads on which trunnions were provided for the rotation of the vessel. Under present day formulae a safe working pressure from 6 to 7 pounds would have been permitted. The steam supply to the cylinder was reduced from high pressure to 15 pounds through a reducing valve. Relief valve and pressure gauge were provided on the low pressure side of the reducing valve, but owing to the faulty action of the diaphragm in the reducing valve a pressure of 19 pounds would accumulate, and under these conditions the vessel was allowed to operate. Stresses produced as a result of the excess pressure sheared the rivets and tore the shell from the band securing the shell to the heads. Proper inspection by a competent inspector would have prevented what might have been a very disastrous affair.

The total monies transmitted to the Treasurer of Ontario for the fiscal year ending March 31, 1938, amounted to \$19,599.87.

**BOARD OF EXAMINERS OF OPERATING ENGINEERS**

CHAIRMAN—F. B. WALKER

MEMBERS—W. J. SCOTT, S. G. ROSE

The twenty-ninth report of the Operating Engineers' Board covers a period wherein has occurred the greatest volume of business in all phases of activity in the history of this Branch.

Reference to the statistical data attached hereto shows a net revenue of \$29,314.14, an increase of \$3,251.61, or approximately 12 per cent, as compared with the previous year. More significant probably is the increase of 29 per cent. in the number of examinations conducted by the Board, there being 2,305 candidates as compared with 1,644 in the previous year.

The most important issue dealt with by the Board during the year was the complete review of the Regulations drawn under this Act. During these deliberations a survey was made of the Regulations with the result that certain minor changes were made, the most important of which was the incorporation of a provision for the certification of air compressor operators in response to a growing demand from the mining industry in Northern Ontario. Major changes were made, however, in the typographical design of this publication with a view to simplification and ready reference. The Board is pleased to report the achievement of a workable and effective regulatory scheme which has drawn commendatory comment from many quarters.

The annual renewal of certificates, which had become a problem by reason of the steadily increasing volume of work involved, received serious consideration this year. As a measure of mitigation, the Board eliminated the issuance of renewal notices to certificate holders, so that more attention may now be given the most important phase of administration, that is, the control of violations of the Act. Under a re-organized system of enforcement inaugurated in September 1937, the Board brought under review 405 cases of infractions of the Act. At the close of the fiscal year 246 had been satisfactorily adjusted, with 159 still in process of adjustment. Solutions were found in each case without resort to litigation.

A noticeable increase will be observed in the number of plant registration certificates issued. This is due to the Board's policy of rotational survey, whereby an up to date record may be available always and also to the recent inclusion of certain low pressure steam plants within the scope of the Act.

The publication of text books compiled by the Board for the assistance of engineers is now in its sixth year. Justification of this measure and the popularity of the books are attested by the fact that 11,363 copies have been distributed with a total sale value amounting to \$12,053 since the inception of this service.

Acknowledgement of the assistance rendered by the members of the Composite Inspection Service in the administration of the Operating Engineers Act is a duty we are pleased to perform. Their assistance has proved invaluable during the year.

If readiness of compliance and co-operative response upon the part of persons involved are indicative of success in the administration of this Act, the Board feels justified in reporting a most satisfactory year. With few exceptions, we have encountered a definitely favorable reaction in our innumerable contacts with plant owners, their representatives, engineers' organizations and individual engineers, which prompts us to express our appreciation of their assistance and support in the administration of the Operating Engineers Act.

**CONCILIATION AND NEGOTIATION**  
**CHIEF CONCILIATION OFFICER—LOUIS FINE**

With the appointment of a Chief Conciliation Officer at the beginning of the fiscal year, the Department of Labour extended its conciliation service. This service is open to both parties of an industrial dispute, either before or after a strike has been called, and impartial assistance is given in working out a satisfactory settlement without interference with the rights of either. As far as possible, the Department is in constant touch with industrial situations likely to result in disputes and in instances in which the public interest might be unduly affected, the Department takes the initiative in contacting the interested parties with a view to preventing unnecessary industrial strife. Effective assistance has been rendered in such matters on a number of occasions and satisfactory adjustments and mutual understanding achieved, averting strikes or stoppages.

Through co-operation of the employers and employees with the Department of Labour increased numbers of agreements containing uniform rates of wages and better conditions have been negotiated. The contact afforded by the conciliation work of the Department with industrial situations supplies a valuable link between industry and the legislation available in the Province for the treatment of these questions, as for instance The Industrial Standards Act. As a result of dealing with some of the problems which have been brought to the Department, we have been able to be of assistance to both employers and employees in utilizing the provisions of the Act with the result that, in addition to settling immediate disputes, we have been the means of bringing about stabilized conditions of labour and thus avoiding the probability of future disputes. An instance of this is the case of the logging industry, so important to the welfare of a considerable portion of this Province. During the fiscal year there were no strikes in this industry in the four zones where schedules pursuant to The Industrial Standards Act were in force, so that the time-loss due to strikes in the whole industry was only approximately 2 per cent. of the total time-loss in all industries, as compared with 48 per cent. in 1934, when the time-loss in the logging industry was approximately 26 times that of 1938.

During the fiscal year the conciliation service of the Department of Labour was utilized in connection with the adjustment of many disputes in which there were threats of strikes, and satisfactory settlements were reached to the advantage of both parties and of the public interest. The following are some of the more important of such cases, which indicate the value of this service:—

**GLASS INDUSTRY:**

The Department of Labour was asked to intervene in connection with a contemplated strike of employees in two glass plants in the same centre. The employees were persuaded to postpone action until their representatives had an opportunity of meeting with a representative of the company and the Conciliation Officer of the Department. At this meeting a memorandum of agreement was drawn up, which provided that, in the event of the employers and employees failing to conclude negotiations regarding wages and hours within a stated time, the same would be decided by arbitration. The three arbitrators were the Chief Conciliation Officer, a representative of the company and the legal adviser of the employees, and their decision was accepted. Approximately 600 workers were employed in these two plants.

Later in the year a dispute arose in one of these plants regarding alleged breach of seniority provision. As settlement could not be effected by the negotiating committee, of which an official of this Department was a member, arbitration was agreed upon and the decision was rendered in favour of the employees.

The employees of five glass factories in another centre, through a representative of the union, applied for help in bringing about an amicable settlement between members of the union and the employers. The Conciliation Officer was able to hold a meeting of employees and representatives of the employers of these firms, at which both parties co-operated in arriving at a settlement of the difficulties and a better understanding of the problems of both sides.

#### IRON AND STEEL INDUSTRY::

Representatives of the union employees of one firm advised this Department that they expected to call a strike, having failed to reach an agreement with the company. The Department declined to take action without assurance that no strike would be called before it was in possession of full particulars relating to the situation. After conferring with officials of the firm, a basis of agreement was drawn up and presented next day to union representatives. Within a fortnight matters in dispute had been adjusted and no strike was called. Later conciliation service was again requested by the union in connection with alleged discrimination, and an adjustment of this matter was brought about to the satisfaction of both parties. This firm employs 920 workers.

Upon the request of the employees of another firm, the Department of Labour intervened in connection with a dispute because of alleged discrimination for union activity. Adjustments were arranged and proper working relations established without loss of time by the employees.

In one plant five grievance cases regarding seniority were submitted to arbitration and the decision rendered was satisfactory to all concerned.

#### RUBBER INDUSTRY:

The manager of one firm called on the Department to discuss the labour problems of the plant, as the employees were to take a strike ballot later in the day. It was agreed, however, that the employees would take advantage of the service of the Conciliation Officer before taking strike action. After separate conferences with representatives of the union and with the factory manager, assistance was given in arriving at an agreement acceptable to both sides, which made provision for grievance procedure.

#### TEXTILE INDUSTRY:

In a carpet factory the Conciliation Officer was successful in bringing about an agreement providing for a five per cent. increase in rates for employees in one department, who were threatening to strike for a ten per cent. increase. There was no loss of time, the employees continuing at work while negotiations were being carried on.

In connection with a dispute in a hat factory concerning wage increases for certain employees and lay-offs, the employees returned to work and matters in dispute were settled by arbitration. The decision rendered was not in favour of increases and the question of lay-offs was to be decided later when the employees had had an opportunity of submitting suggestions to the management.

The assistance of the Department was requested in connection with dissatisfaction among the employees of a knitting factory. Negotiations were undertaken but a satisfactory conclusion had not been reached by the end of the fiscal year.

#### FURNITURE AND WOOD PRODUCTS:

Representatives of the employees of a furniture factory applied to have an official of the Department of Labour mediate between the manager and the shop committee with a view to bringing about a better understanding of points under dispute contained in the agreement between the management and the employees.

At the request of the general representative of the union, an official of this Department acted as conciliator in a dispute between the union and a match manufacturing company in an effort to forestall a strike. The employers of the two plants affected agreed to meet their employees with the result that an agreement acceptable to both parties was drawn up and signed. The agreement was a compromise, the terms of which provided for higher wages, shorter hours and no discrimination. The two plants employ 240 workers.

Conciliation service was rendered in connection with a dispute between four timber companies and the local union, when wage increases for all employees were submitted. After two meetings with representatives of both parties, and a meeting with each party separately, the Conciliation Officer was able to draw up an agreement which met with the approval of both sides. There was no loss of time for the 420 employees affected by this agreement.

#### DAIRY INDUSTRY:

A Conciliation Officer negotiated between representatives of employers and employees of this industry in a city in an effort to forestall a strike of all dairy employees. An amicable settlement of points under dispute was finally arrived at and a general strike of milk drivers averted.

The employees of one dairy applied for assistance in the settlement of grievances regarding several details of employment. After a conference the firm agreed to accept the suggestions of the employees and no strike took place.

#### RESTAURANTS:

Representatives of employers and employees in the restaurant business in a city met with an official of this Department to discuss remedies of various grievances, which threatened to lead to strike. The employees' representatives submitted proposals which were later considered at a meeting of employers' representatives, who submitted counter proposals.

#### TRANSPORT INDUSTRY:

The Department was asked by the representatives of the union to intercede in connection with a threatened strike of employees of a transport company. The employees claimed that general unfair conditions and wages were the causes of dissatisfaction affecting from 300 to 350 workers. Negotiations resulted in an agreement which prevented a stoppage of work.

In addition to negotiations which prevented strikes, the Chief Conciliation Officer or other officials of the Department of Labour conducted negotiations which resulted in the settlement of strikes affecting approximately 75 per cent. of the total number of workers involved in strikes in the Province. A table of all strikes reported in Ontario during the fiscal year 1938 will be found in the appendix of this Report.

**INDUSTRY AND LABOUR BOARD**

CHAIRMAN—E. J. YOUNG

MEMBERS: MISS M. F. MANGAN; J. C. ADAMS

This report for the fiscal year ending March 31, 1938, is the first report of the Industry and Labour Board.

On March 25, 1937, the Legislative Assembly of the Province of Ontario assented to an Act to amend The Department of Labour Act, thereby empowering the establishment of the Industry and Labour Board, and on May 25 the Board was appointed. It consisted of five members, three of whom were to be officers of the Department of Labour. One of the members represented employers and one represented employees.

On November 22, 1937, Mr. Bancroft, the employees' representative, died and a short time later Mr. Whitehead, the employers' representative, resigned from the Board. No appointments were made to fill these vacancies and at the 1938 session of the Legislature The Department of Labour Act was amended to reduce the personnel of the Board to "not more than three members", all of whom were to be officers of the Department of Labour.

The Board is charged with the administration of

The Industrial Standards Act

The Apprenticeship Act

The Minimum Wage Act

and any other act which may be assigned to it by the Lieutenant-Governor in Council.

## INDUSTRIAL STANDARDS BRANCH

### A. W. CRAWFORD—CHIEF ENFORCEMENT OFFICER

The Industrial Standards Act provides for the meeting in conference of employers and employees in any designated industry within a defined zone and their agreeing on a schedule of wages, hours and days of labour. If such a schedule is agreed to by a proper and sufficient representation of those engaged in the industry, The Minister may approve the same and upon his recommendation an Order-in-Council may be passed making it effective in law and binding on all persons engaged in the industry within the zone.

At the beginning of the fiscal year there were 39 schedules in effect. Some of these were declared invalid by the courts and, as a result, doubt was cast on the enforceability of a number of others. Certain amendments were made in the Act in 1937 and it was felt that schedules established under the amended Act would have a better chance of being upheld in court than those previously in existence. The Board, therefore, decided not to enforce the doubtful schedules, but advised the various interested parties to apply for new schedules under the amended Act.

Fifty-four official conferences were held during the year and 49 schedules agreed to at conferences were approved by the Minister.

### ARREARS OF WAGES

The Industry and Labour Board co-operates with the advisory committees which are set up in each industry in each zone for the purpose of the enforcement of these schedules. These advisory committees are composed of five persons representing employers and employees in the industry.

Under these schedules, the Board collected by negotiation a total of \$3,069.50 arrears of wages from 43 employers on behalf of 242 employees, who were reimbursed the amount of their respective arrears. In addition to this amount, the sum of \$1,297.53 arrears of wages was paid direct to employees by their employers after intervention on their behalf by the Board. A sum of \$52.80 arrears of wages collected for one employee was ordered forfeited to the Treasury because of evidence that the employee was equally guilty with the employer.

### PUBLIC INQUIRIES

There was one public inquiry held during the year. This was held in Hamilton on April 13, 1937, in connection with the painting schedule of the Hamilton zone and there were seven witnesses.

### ASSESSMENTS OF INDUSTRIES

The Board designated the cloak and suit industry as interprovincially competitive and approved provisions in the schedule with respect to the collection of assessment from employers and employees. The purpose of this assessment is to provide revenue for the enforcement of the schedule.

## SCHEDULES IN EFFECT AT END OF FISCAL YEAR 1938

Trades and Industries	Number of Schedules	Zones
Barbering	35	Barrie; Belleville; Brantford; Bracebridge, Gravenhurst and Huntsville; Chatham; Cornwall; Collingwood; Essex County; Fort Frances; Galt, Hespeler and Preston; Guelph; Hamilton; Kitchener-Waterloo; Kingston; Lindsay; London; Niagara Falls; North Bay; Orillia; Oshawa; Ottawa; Owen Sound; Pembroke; Peterborough; Port Arthur and Fort William; St. Catharines, Port Dalhousie, Merriton and Thorold; St. Thomas; Stratford; Sault Ste. Marie; Sarnia; Trenton; Toronto; Welland; Woodstock; Windsor.

**APPRENTICESHIP BRANCH****FRED J. HAWES—DIRECTOR**

The fiscal year has been one of increasing activity for the Apprenticeship Branch. The work commenced during the previous year in connection with the motor vehicle repair trade has continued to expand as the regulations applying to the trade have been put into operation. This trade offers a very promising field for apprenticeship. At present there are 447 registered apprentices in this trade and the number is increasing steadily.

The hairdressing and barbering trades have also received considerable attention from this Branch during the year. Trade regulations were approved in January 1937, and immediately the necessary steps were taken to put them into effect. It has required consistent effort to establish a system in the hairdressing trade whereby the proper instruction for those entering the trade will be provided and their exploitation prevented. A great deal has been accomplished in this direction already but it will be some time before this trade will be properly organized and placed on a satisfactory basis.

The barbering trade, in so far as apprentices are concerned, presents difficulties which we are endeavouring to overcome. The teaching of young men in the barber shops has practically disappeared. The trade has been accepting students of the barber schools, with the result that conditions were not satisfactory and were difficult to control. In 1937 an amendment to the Apprenticeship Act authorized the Board to license all schools professing to teach designated trades, and regulations were approved by Order-in-Council providing for the licensing of all schools teaching barbering and hairdressing in Ontario, so that all such schools are now under the supervision of the Apprenticeship Branch.

There was an increase in the number of apprentices indentured in construction trades, although numbers were not as great as we had hoped for in the early months of the year when the building trades gave evidence of increased activity. Court action was taken against a building trade contractor who entered into a contract of apprenticeship not in accordance with the Act. He was fined \$10 and costs or thirty days imprisonment.

The following tables give a complete summary of statistical information regarding the work of the Branch for the fiscal year 1938.

## MINIMUM WAGE BRANCH

### A. W. CRAWFORD—CHIEF ENFORCEMENT OFFICER

The new Minimum Wage Act became effective March 25, 1937. It provides for the establishing of minimum rates of wages for all employees and minimum hourly rates of wages for overtime work, provided that such hourly rates shall not be less than one-fortieth of the weekly minimum wage. The Act further provides that the maximum number of hours of labour with respect to which a minimum weekly wage is established shall not exceed,—

- (a) 48 hours in a municipality having a population of more than 50,000;
- (b) 50 hours in a municipality having a population of from 10,000 to 50,000;
- (c) 54 hours in any other municipality, or in any locality which is not a municipality.

A minimum wage order covering the textile industry was issued and became effective on March 1, 1938. It establishes the minimum wage for men at \$16.00 per week and for women at \$12.50, with lower rates for juveniles and beginners.

### PERMITS

Permits may be issued by the Board authorizing wages lower than the specified minimum rates upon application signed by both employer and employee where, because of age or disability, the worker is unable to compete with normal persons. These permits are issued for one year or less but renewals are granted without investigation in the case of workers over sixty years of age or where disability is permanent and handicaps the employee in the work performed.

Homework permits are issued by the Factory Inspection Branch for both employers and homeworkers, but the rates to be paid for each type of work performed outside the factory must first be approved by the Board. In every case where the same work is done in the factory, the factory rate is set for the homework. Where the homework is of a kind not done in factories, the policy of the Board is to raise the rates gradually until they reach the level of rates that would be paid if the work were performed in factories.

### PERMITS FOR FISCAL YEAR 1938.

	For Handicapped Workers		For Home- workers
	No. of Employers	No. of Employees	No. of Employers
Permits in force at beginning of year	75	135	107
Permits issued during year	8	18	77
Permits expired or cancelled during year	21	47	36
Permits in force at end of year	62	106	148

## COMPLAINTS

Complaints received by the Board, either directly from employees concerned or from interested parties, numbered 707. All complaints where names are given are investigated without delay and a report made to the complainant, if action is not taken against the employer.

1938		
January	160	78
February	156	102
March	141	114
Totals	2,183	1,222

Wage sheets are collected at least once a year from approximately 15,000 employers in the Province who are subject to minimum wage orders, and each wage return is analysed to make sure that the provisions of the orders are complied with. This constant checking by the Board is essential to adequate enforcement of each order.

## PROSECUTIONS DURING FISCAL YEAR 1938

Month	Number	Action Taken	Arrears Awarded	Fines	Result
1937			\$	\$	
April	7	4 convictions 3 withdrawn	421.64	85.00	Paid (4)

March	10	7 convictions 2 dismissed 1 withdrawn	503.61	100.00	2 paid 2 not paid Employer served jail terms.

---

The policy of the Board has been to demand immediate adjustments on first violations, to collect the full amount of arrears if adjustments are not made immediately and the law complied with in all respects after the first warning, and to prosecute where it is evident that violations are deliberate or warnings and adjustments have not had the desired effect. Occasionally first offenders are prosecuted but only where there is ample evidence that the employer is aware of the law or where he refuses to make adjustments ordered by the Board.

## APPENDICES TO REPORT OF MINIMUM WAGE BOARD

## APPENDIX I

The following tables indicate the number of firms reporting to the Board, the number of female employees affected by each order of the Board, and the rates of pay for female employees throughout the Province:

# REPORT

OF THE

# Minister of Education

FOR THE YEAR 1938

---

TO THE HONOURABLE ALBERT MATTHEWS, LL.D.,  
*Lieutenant-Governor of the Province of Ontario.*

YOUR HONOUR,—

I beg leave to present to your Honour the Report of the Department of Education for the year 1938.

The revision of courses of study continued to engage the attention of the Department during the year. To the new courses issued in 1937 for Grades I to VI and Grade IX, were added revised courses for Grades VII, VIII, and X. This completed the programme for the first eight grades of the elementary schools, and carried the revision in secondary schools to the end of Grade X. The counsel of classroom teachers was constantly sought as the work of revision proceeded, and every effort was made to preserve the best elements of past practice while bringing the curriculum in line with the educational thought of to-day.

Teachers, inspectors, and all interested in the new programme were invited to offer suggestions for its further improvement. In May, 1938, a questionnaire was distributed to teachers who were completing their first year's experience with the revised courses for Grades I to VI. The replies proved helpful in determining the modifications to be made before the courses were reprinted for the next school year. From the information received it would appear that the courses as a whole are meeting the needs of Ontario children, and that the schools are responding with enthusiasm to the challenge of the new programme.

Active interest is evident throughout the province in the General Shop Work and Home Economics courses which now form a part of the regular curriculum in secondary schools. Approximately one hundred boards have either introduced such instruction or have taken steps to provide it in the near future. While local financial conditions may delay progress in some communities, it is clear that opportunities for this practical training have already greatly increased.

The instructional programme introduced in Grades IX and X has a two-fold purpose—firstly, to provide a good general training; and secondly, to permit pupils to discover their special aptitudes, skills, and abilities. The end of Grade X, accordingly, represents a milestone in the individual's progress, just as the High School Entrance and Junior Matriculation have long represented academic milestones. To mark the successful completion of Grades IX and X, a new certificate, called the Intermediate Certificate, is being introduced. This certificate will be granted solely on the recommendation of the local school principal, and is

designed to provide a definite measure of achievement for the large number of students who leave secondary school after two years' attendance.

In September, 1939, new courses of study will be issued for Grade XI.

#### The High School Entrance Examination

The requirements for entrance to high school have been changed to conform with the revised programme. Under the new plan, candidates who write final departmental examinations for entrance to high school will be tested in five papers—Mathematics, English Composition and Grammar, English Literature, Spelling, and Writing. Standing in all other subjects will be determined by reports submitted by the school principals.

This arrangement represents further progress in the direction of accepting pupils' term records in place of final examination marks. It should be borne in mind, however, that a relatively small proportion of Grade VIII pupils write any departmental papers, and that approximately two-thirds of the successful candidates are granted standing on the recommendation of their school principals.

#### Teacher Training

The registration at the Normal Schools decreased from 1,087 in 1937-38 to 990 in the 1938-39 session. There is reason to believe that the low point in the enrolment of teachers-in-training has now been reached, and that the operation of the law of supply and demand will correct a situation which, if unadjusted, would result in a scarcity of qualified teachers.

The importance of preparing teachers for service in rural schools has prompted a change in the provisions made for practice teaching. All students of the 1938-39 Normal School class spent two weeks of continuous observation and teaching in rural schools located near their homes. One of these weeks followed the Christmas vacation and the other the Easter holidays. The value of this additional opportunity for practice in rural schools was so marked that the plan will continue in operation during the coming year.

The percentage of French-speaking teachers holding First or Second Class teaching certificates continues to increase. In November, 1938, the percentage of teachers so qualified was 86.24, compared with 79.46 per cent. in 1937, and with 25.11 per cent. in 1929.

A year ago I drew attention in my report to the appointment of a Supervising and Helping Teacher in Carleton County. This experiment was undertaken with a view to freeing a greater portion of the local inspector's time for the larger problems of his district, while, at the same time, providing increased help for inexperienced teachers. The success of the plan led to a similar arrangement being made in the County of Lanark during 1938. In each of these cases the appointment was accompanied by an increase in the size of the inspectorial area.

#### Legislative Grants

The final report of the Committee appointed in May, 1935, to enquire into the cost of education in the Province of Ontario appeared as an appendix to my report for the year 1937. One conclusion reached by the Committee was that the burden of taxation on real estate should be reduced, and that the appropriation made by the Legislature of the Province for educational purposes should be increased substantially. It is gratifying to be able to report that provincial grants to education have continued to increase during the past three years. The

increase in regular elementary school grants in 1936 over 1935 was 8 per cent.; in 1937 over 1936, 12 per cent.; and in 1938 over 1937, 22 per cent. Larger legislative grants not only distribute the burden of taxation between real estate and other forms of property more equally, but they tend to equalize in some degree the cost of education in areas of varying assessment.

#### Larger Units of Administration

The Public Schools Act for some years has permitted the municipal council of a township to pass a by-law placing any portion of the township or any number of school sections under one board of five trustees. The unit so formed becomes a township school area. Fourteen of these areas were in operation at the beginning of 1938, but before the end of the year this number had doubled, and twenty-eight township school areas were functioning in the province. Included in these units were 145 former individual school sections.

The acceleration towards the larger unit of administration for rural schools was due, in part, to a growing recognition of the advantages of such units in equalizing educational costs and opportunities, and, in part, to the announcement that an additional legislative grant of \$100 would be paid to each school section becoming a part of a larger area. This specific encouragement aroused action on the part of a number of trustees, ratepayers, and municipal councils, with the result that by-laws creating fourteen areas were passed and approved during the first six months of the year.

The larger units now in operation vary both in size and situation, but they are alike in that they were created by voluntary action on the part of the local municipalities. It augurs well for the future of the areas that they have been organized in communities where public opinion is favourable to the change. Their progress will be closely watched by all who are interested in education throughout the province.

#### Text-Books

Two new readers entitled *Golden Windows* and *Gateways to Bookland* were authorized during the year for use in Grades III and IV. These readers replaced the former *Second Book* which had been in use for sixteen years. The new books have been welcomed in the classrooms, where their generous content of suitably graded poems and stories should encourage the habit of wide and varied reading.

Arithmetic text-books for each of Grades V and VI were also introduced in the elementary schools in September, 1938. Separate books in arithmetic are now authorized for each of Grades III, IV, V, and VI. Reports indicate that these texts are proving helpful, not only in supplying a wide range of practice material, but in suggesting an effective approach to the subject.

Revised courses in Grades IX and X of secondary schools made it necessary to authorize new text-books in English, Science, Mathematics, and German.

#### Handbook on Health

Over a period of eight years an experiment in the teaching of health has been carried out by the Department of Health in conjunction with the Department of Education. The initial phase of the experiment took the form of a demonstration in the teaching of health in a selected group of the elementary schools, both rural and urban. Following the demonstration, a Joint Committee was appointed from the staffs of both departments to make recommendations for the adoption of a scientific programme of health education.

Two outstanding activities of the Committee have been the organization of a summer course in the teaching of health, and the preparation of a handbook for the guidance of teachers. The handbook was issued in June, 1938, under the title: *Health. A Handbook of Suggestions for Teachers in Public and Separate Schools*. A copy was supplied through the local inspectors to each classroom in the elementary schools, where its influence on the teaching of Health has been definitely beneficial. The personnel of the Joint Committee was as follows:

Department of Health: John T. Phair, M.B., D.P.H., Chief Medical Officer of Health; Mary Power, B.A., Director of Health Education; Laura W. Vrooman, Reg.N., Division of Child Hygiene.

Department of Education: V. K. Greer, M.A., Chief Inspector of Public and Separate Schools; Duncan Walker, B.A., Director of Professional Training; R. H. Roberts, M.A., Inspector of Public Schools; G. R. Smith, B.A., B.Paed., Normal School, Ottawa. In 1936, on the retirement of Mr. Walker from the position of Director of Professional Training, his successor, Dr. W. J. Karr, became a member of the Joint Committee.

#### In Memoriam

My report for the year 1938 would be incomplete without reference to the loss sustained by the Department of Education in the death of two of its most valued officials—Dr. W. J. Karr, Director of Professional Training, and Mr. H. W. Kerfoot, General Editor of Text-books.

An outline of Dr. Karr's distinguished career and a tribute to his exceptional personal qualities appear in the report of his successor in the pages that follow. In each of the important posts which he held, Dr. Karr's duties were discharged with wisdom and decision. His life was rich in accomplishment, and its influence will live on in the work of those whom he guided.

H. W. Kerfoot, B.A., B.Paed., General Editor of Text-books, died in Toronto on April 30, 1938. Born at Minesing, Mr. Kerfoot received his early education in a rural school in Simcoe County, and in Barrie Collegiate and Model School. He subsequently attended Ottawa Normal School, Queen's University, and the Hamilton School of Pedagogy. His early teaching experience was gained in the schools of his home county, but after securing his B.A. degree, he served as teacher and principal in Prescott High School and Picton Collegiate Institute. In 1922 Mr. Kerfoot was appointed to the staff of Ottawa Normal School where he taught with marked success until his transfer to the office of General Editor of Text-books in the Department of Education. Mr. Kerfoot found joy in teaching, for his work was pervaded by a keen interest and faith in the students under his care. To his editorial desk he brought sound scholarship, wise judgment, and a wealth of human understanding. He will long be remembered by his associates, not only for his service to education, but for his kindly sense of humour and steadfast strength of character.

#### Conclusion

Appended to this report will be found detailed information and statistics regarding the various branches of educational work organized in the province.

Respectfully submitted,

L. J. SIMPSON,

*Minister of Education.*

Toronto, November 22, 1939.

## APPENDIX A

REPORT OF THE CHIEF INSPECTOR OF PUBLIC  
AND SEPARATE SCHOOLS

---

The Provincial Inspectoral Staff, 1938

## I. IN MEMORIAM:

John M. Field, B.A., Ph.D., who had retired from active service as a Public School Inspector on December 31st, 1936, died at his home in Goderich on October 27th, 1938. In this report for 1936 a review of the life and work of Dr. Field was given. For twenty-five years he had served as Public School Inspector in Huron County and early in this experience became known as one of the leading educationists of the province.

James Gill, B.A., B.Paed., who had retired from service as a Public School Inspector in the City of Hamilton on August 31st, 1938, passed away in the Hamilton General Hospital on March 9th, 1939, at the age of seventy-four, after a brief illness. Mr. Gill was born in Smith's Falls on October 7th, 1864. His early public school education was received in Walkerville and Windsor, and his high school training in Windsor, St. Thomas, London, and St. Catharines. In 1889 he graduated from the University of Toronto with honour standing in Mathematics. During his University course, and afterwards during his high school teaching experience, he was known throughout the province as a brilliant mathematician. In 1902 he obtained the Bachelor of Pedagogy degree. For a number of years, in addition to his work as a Mathematics and Physics Master in the Hamilton Collegiate Institute, he was also a member of the lecture staff of the Ontario Normal College. Many present inspectors, Normal School Masters, high school principals and teachers, and Departmental officials remember him as a most efficient teacher, endowed with a keen interest in his students and an unusually sympathetic understanding of their problems. Mr. Gill became a Public School Inspector in Hamilton in 1911. From that time to his retirement he was recognized as one of the outstanding inspectors and educationists in the province. He was held in the highest regard by his teachers, who not only respected him as an inspector but esteemed him as a friend.

Richard Lees, M.A., who had resigned as Public School Inspector of Peterborough East on August 31st, 1930, died at his home in Peterborough on Wednesday, October 19th, 1938. Mr. Lees had been Principal of the Lindsay Model School, and also Science Master at the Brampton Collegiate Institute for seven years, and at the St. Thomas Collegiate Institute for eleven years. In July, 1905, he was appointed Public School Inspector, and in this office served until his retirement. Mr. Lees was always an educational leader, not only within his inspectorate but in the province. He was ever an active participant on the programmes of the Ontario Educational Association, and his influence through his writings and addresses in the cause of the Consolidated School movement was most effective. His schools made marked progress under his leadership.

Albert Odell, B.A., who retired as a Public School Inspector twenty years ago, died suddenly early in the year 1939. The Department of Education wishes to record the splendid services rendered by him as an inspector in earlier years. Mr. Odell received his scholastic education in Orono Public School and in the

Bowmanville High School and St. Catharines and Cobourg Collegiate Institutes. His teaching experience covered rural schools and City of Toronto Public Schools, High School work in Watford, and, as head of the Department of Mathematics, the two Collegiate Institutes in which he had previously been a student. His varied and lengthy experience in all classes of schools fitted him eminently for his duties as Public School Inspector in Northumberland County. He served this area with tact and efficiency from 1895 until 1919, when he retired prematurely owing to a defect in hearing. His warm sympathy and self-denying interest in everything that concerned the welfare of the children and the community at large earned him a lasting place in their memory.

J. C. Stothers, M.A., B.Paed., Public School Inspector in the City of London, died on September 4th, 1938. Mr. Stothers was born in Huron County on May 9th, 1887. He attended the rural schools of his native county and the high schools of Wingham and Goderich. He graduated from Model School, after which he taught in Huron County for a few years. In 1912 he entered the Faculty of Education at Toronto and, upon graduation in 1913, he accepted an appointment to the staff of the Toronto Public Schools. During the war he saw service with the 15th Battalion, C.E.F. Returning from active service in 1919, he rejoined the staff of Ryerson School. He secured the degree of Master of Arts from Queen's University, and the degree of Bachelor of Pedagogy from the University of Toronto. In January, 1924, he became Public School Inspector for Muskoka District and in September, 1925, he went to London as Inspector of Public Schools for that city. Last year he was named Assistant Superintendent of Schools by the London Board of Education. Mr. Stothers was a progressive educationist and has left a lasting influence upon the schools of London where he did such outstanding work. He was lecturer during the last two summers in the Summer School of Education conducted by the Department of Education at the University of Western Ontario, and by his kindly humour and his readiness to be of assistance to the students at all times he endeared himself to all. On several occasions he contributed articles to "The School" Magazine and, at the time of his death, was engaged in the preparation of a book providing helpful suggestions to teachers of Grade VI. One of the most successful features of his work as an inspector was the use he made of the small group conference of teachers. By means of these meetings he brought about an interchange of opinion and practice among his teachers which was of the greatest value in improving the work in the classrooms.

John Wells Marshall, M.A., attended public and high school in his native county of Welland, the former in S.S. No. 7 Willoughby and the latter in Stamford. He graduated from Queen's University in 1898 with honour standing in Classics. His initial experience as a teacher was in the rural schools of Welland County. After graduating from the Hamilton Normal College with a Specialist certificate in Classics, he taught in the Collegiate at Ridgeway and subsequently in the Collegiate at Windsor. He received his appointment as Inspector of Public Schools for Welland County in 1907. In this latter field of work he devoted his splendid abilities to the cause of education for 31 years. In 1924, owing to the growth of school attendance in Welland County, he was assigned an inspectorate which included the City of Niagara Falls and only a portion of the county. Mr. Marshall was a leader among the inspectors. His opinions always commanded respect and his gentlemanly qualities made him a host of friends. His outstanding services were not confined to education. He associated himself with every worthy cause, serving his community both faithfully and well. John Marshall was a "true friend of man."

## II. RESIGNATIONS:

Mr. A. L. Campbell, M.A., obtained his elementary education at the Nobleton Public School and later attended the Richmond Hill High School, finishing his secondary school course in Parkdale Collegiate Institute, Toronto. He obtained his professional training in the Newmarket Model School and the Toronto Normal School. He graduated from Queen's University in 1906 with Honours in Mathematics. His teaching experience covered nine years in the rural schools of York County and fifteen years in the high schools at Fergus and Weston, with a brief period in Upper Canada College. In 1909 he became Public School Inspector in York County, a position which he retained until his retirement in September, 1938. Mr. Campbell is recognized by the Department and his colleagues in educational work as a capable teacher, a trusted adviser, and a wise administrator. He earned the grateful appreciation of boards, teachers, and communities whom he served.

Mr. J. M. Denyes, B.A., was born in Ernesttown Township in the County of Lennox. His early education was received in a rural school and in the Napanee High School. He subsequently attended Queen's University, obtaining his B.A. degree in 1895, and his High School Assistant's certificate in 1896. Ten years later he was granted a Specialist certificate in Modern Languages and, simultaneously, a Public School Inspector's certificate. Mr. Denyes' experience as a teacher began in 1892. He taught in the Vennachar and Switzerville Public Schools, the Finch Continuation School, the Newburgh High School as assistant and also as principal, the Whitby Collegiate Institute, and the Oakville High School as principal. He resigned his position as principal in this High School in 1913 to become Public School Inspector for the County of Halton. Mr. Denyes has a pleasing personality, an alert mind, a fund of good humour, a great deal of common sense, and a most conscientious attitude towards duty. All through his experience as a teacher and inspector he was admired and respected by his pupils and teachers. They regarded him as a good friend and a wise counsellor. He is being paid a true and well-merited compliment when it is said of him that few inspectors hold the respect and confidence of their fellow inspectors to the same degree as does Mr. Denyes. He took a very prominent part in securing for the inspectors the benefits of The Public Service Superannuation Act. The Department regrets that physical disability has forced him to resign from active educational work several years before the usual age of retirement.

Mr. John Hartley was born in the Township of Turnberry, Huron County. He attended a rural school, Walkerton High School, Harriston High School, and Owen Sound Collegiate Institute. His professional training was obtained in the Walkerton Model School, the Toronto Normal School, and the Ontario Normal College, Hamilton, from which he graduated in 1906 with a First Class Permanent certificate. Mr. Hartley has had forty-six years of successful service in educational work in the Province of Ontario. He taught for twenty years in his native county in rural and urban schools, for the last five years of which he was Principal of the Clinton Model School. In 1912 he was appointed Principal of the Vankleek Hill Model School for French-speaking teachers, and when that school was closed because of the opening of the University of Ottawa Normal School in 1929, he was appointed Assistant to the Chief Inspector of Public and Separate Schools. In January, 1937, he was appointed to the inspectorate of Huron East. Unfortunately, due to ill health, he was forced to retire in April, 1938. Mr. Hartley was an excellent teacher, giving splendid service in every position which he held, to pupils, to parents, and to the community. His work in

the Training School was outstanding. He was very helpful as Assistant to the Chief Inspector, and was most faithful in his work as inspector in Huron East.

Mr. Rosario Masse, B.A., Inspector of Separate Schools for R.C.S.S. Division III, with residence at Cochrane, resigned at August 31st, 1938. Mr. Masse began his duties as inspector on September 1st, 1931, coming to the work from the Winchester High School. He spent three years in R.C.S.S. Division V, with residence at North Bay, and the remaining period in the Cochrane area. In leaving the work of inspection his fellow inspectors and the Departmental officials wish him much success in his new field of activity.

Mr. M. R. Reid, M.A., obtained his early education in the rural schools of Lennox County and his secondary school training in Napanee Collegiate Institute, from which he graduated in 1893. He graduated from Queen's University in 1897 and from the Normal College in Hamilton in 1898, with Specialist standing in Science. He was Assistant Master in the Dunnville High School and in the Napanee Collegiate Institute, and Principal of the Sydenham High School until 1910. Since that time he served as Public School Inspector in Frontenac North and Addington until 1934, and thereafter in the County of Lennox until his retirement in August, 1938. His long association with education in this area, first as student, then as teacher, and finally as inspector, has left a noteworthy influence upon the life of this section of the province. The Department of Education recognizes in him one who has served faithfully and efficiently in the cause of education in all his relations with the Department and, as their representative, with teachers, boards of trustees, and the public.

Mr. J. B. Robinson, B.A., B.Paed., received his early education in a rural school in his native Township of Caistor in Lincoln County. For his secondary school education he attended Smithville High School and the Hamilton Collegiate Institute. Mr. Robinson received his Bachelor of Arts degree from Queen's University in 1902, his Bachelor of Pedagogy degree from the University of Toronto in 1906, and his Specialist standing in English and History from Queen's University in 1911. In the same year he was granted a Public School Inspector's certificate. He first taught in Binbrook and Canboro Townships. Subsequently he was principal of the following schools,—Ancaster Public School; Darling Street School, Brantford; West Avenue School, Hamilton; and the Hamilton Model School. He also taught in the Hamilton Collegiate Institute from January, 1911, to December, 1917, when he was appointed Public School Inspector for Wentworth County. Mr. Robinson possesses those qualities of mind and heart which make outstanding teachers and inspectors. He was just, faithful to duty, inspirational, sympathetic, and loyal to his teachers. He was one of the first inspectors of rural areas to urge his boards to introduce Manual Training and Household Science. He organized teachers' reading and discussion groups which were most helpful to his teachers and highly appreciated by them.

Mr. J. H. Sexton, M.A., is a native of Elgin in Leeds County. He obtained his elementary and secondary school education at the Elgin Public School, the Athens High School, and the Brockville Collegiate Institute. He graduated from Queen's University in 1898 and received his Master of Arts degree in 1902. Mr. Sexton is a specialist in Science. He obtained his experience as a teacher in the Elgin Public School, the Gananoque High School, the Kingston Collegiate Institute, and, as a principal, in the Kemptville High School, the Athens High School, and the Strathroy Collegiate Institute. He was appointed Public School Inspector in February, 1923. Mr. Sexton has had a splendid career as teacher and inspector. In addition to his qualifications as a specialist in Science, he has

a wide knowledge and fine appreciation of literature. He has a keen sense of humour and a fine sense of justice which were used to good advantage in securing for him that splendid co-operation from teachers and boards of trustees which contributed to his success.

### III. APPOINTMENTS:

The following appointments were made to the provincial staff of inspectors during the year 1938:—

1. Hamilton: Mr. Robert A. Riddell, B.A., B.Paed., Principal of Bennetto Public School, Hamilton, duties beginning January 1st, 1938.
2. Hamilton: Mr. Vernon N. Ames, B.A., B.Paed., Principal of Adelaide Hoodless Public School, Hamilton, duties beginning January 1st, 1938.
3. Sarnia: Mr. T. C. White, B.A., B.Paed., duties beginning September 1st, 1938. Mr. Henry Conn, B.A., is remaining on duty also as a Public School Inspector for Sarnia to the end of the school year, June 30th, 1939.
4. Frontenac North: Mr. Thomas J. Thompson, B.A., B.Paed., Principal of Governor Simcoe Public School, London, to succeed Mr. T. R. McEwen, B.A., B.Paed., Sharbot Lake, duties beginning September 1st, 1938.
5. Glengarry: Mr. R. O. Staples, B.A., B.Paed., of the Danforth Technical and Vocational School staff, Toronto, to succeed Mr. Z. S. Phimister, B.A., B.Paed., Alexandria, duties beginning September 1st, 1938.
6. Hastings North: Mr. J. D. Deyell, B.A., B.Paed., Principal of Swastika Public School, duties beginning September 1st, 1938, with residence at Bancroft. A re-division of inspectoral areas was made in 1938 so as to place an inspector again at Bancroft, as had been the case in earlier years.
7. Huron East: Mr. James H. Kinkead, B.A., B.Paed., of the R.H. McGregor Public School, East York Township, to succeed Mr. John Hartley, Clinton, duties beginning September 1st, 1938.
8. Prescott and Russell: Mr. J. Campbell Webster, B.A., B.Paed., Principal of Ryerson Public School, London, to succeed Mr. C. B. Routley, M.A., Russell, duties beginning September 1st, 1938.
9. Simcoe South: Mr. Charles A. Lapp, B.A., B.Paed., Principal of Devonshire Public School, Ottawa, to succeed Mr. W. H. Carlton, B.A., B.Paed., Bradford, duties beginning September 1st, 1938.
10. Simcoe West: Mr. J. Kirk Evans, B.A., Principal of Petrolia Public School, to succeed Mr. W. F. Smith, B.A., B.Paed., Collingwood, duties beginning September 1st, 1938.
11. York (1): Mr. W. H. T. Mooney, B.A., B.Paed., of the Toronto Normal School staff, to succeed Mr. R. H. Roberts, M.A., Toronto, duties beginning September 1st, 1938.
12. District Div. VI: Mr. William MacMillan, B.A., B.Paed., Principal of the Lindsay Collegiate Institute, to succeed Mr. L. L. Skuce, B.A., B.Paed., Sudbury, duties beginning September 1st, 1938.

13. District Div. X: Mr. Herman H. Langford, B.A., Principal of Victoria Public School, Kingston, to succeed Mr. F. S. Rivers, B.A., B.Paed., Kirkland Lake, duties beginning September 1st, 1938.
14. R.C.S.S. Div. III: Mr. Remi Millette, B.A., B.Paed., of the Sturgeon Falls High School staff, to succeed Mr. Rosario Masse, B.A., Cochrane, duties beginning September 1st, 1938.
15. Helping Teacher: Mrs. Helen B. Paul, B.A., Principal of the Mallorytown Consolidated Public and Continuation School, was appointed a Supervising and Helping Teacher, duties beginning September 1st, 1938, to work with Mr. R. A. A. McConnell, B.A., Perth, in Lanark County.

#### IV. TRANSFERS:

In all cases the transfers took place at September 1st, 1938.

<i>Inspector</i>	<i>Former Inspectorate</i>	<i>New Inspectorate</i>
1. L. L. Skuce, B.A., B.Paed.....	District Division VI.....	Halton
2. W. H. Carlton, B.A., B.Paed..	Simcoe South.....	Leeds and Grenville (3)
3. T. R. McEwen, B.A., B.Paed.	Frontenac North.....	Lennox and Hastings S.
4. Gordon Young, B.A.....	Leeds and Grenville (3)	Middlesex West
5. W. F. Smith, B.A., B.Paed.....	Simcoe West.....	Peel
6. C. B. Routley, M.A.....	Prescott and Russell.....	Wentworth
7. R. H. Roberts, M.A.....	York (1).....	Peterborough Normal School
8. M. R. Fydell, B.A.....	Peel.....	York (2)
9. W. W. A. Trench, B.A.....	York (5).....	York (4)
10. J. E. Wilkinson, B.A., B.Paed.	York (2).....	York (5)
11. A. Gascon, B.A.....	R.C.S.S. Div. VII.....	R.C.S.S. Div. XIX
12. L. Laplante, M.A.....	R.C.S.S. Div. XIX.....	R.C.S.S. Div. VII

#### V. LEAVE OF ABSENCE:

Mr. Z. S. Phimister, B.A., B.Paed., Public School Inspector for the County of Glengarry, was granted leave of absence for one year beginning September 1st, 1938, to study abroad and to observe in the schools of Great Britain and the Continent of Europe.

Mr. F. S. Rivers, B.A., B.Paed., was granted leave of absence from the North Bay Normal School in September, 1937, to serve as Public School Inspector in District Division X, with residence at Kirkland Lake. He filled this position temporarily with marked ability and satisfaction to the local communities and to the Department of Education.

#### VI. TRANSFERS TO THE DEPARTMENT OF EDUCATION:

On May 9th, 1938, immediately after the death of Mr. H. W. Kerfoot, B.A., B.Paed., General Editor of Text Books, Mr. H. E. Elborn, M.A., B.Paed., Public School Inspector for Waterloo No. 1, was asked by the Minister of Education to take charge, temporarily, of the duties as General Editor of Text Books. Mr. Elborn continued to discharge the more urgent duties of his inspectorate to December 31st, 1938, and also the duties as Editor in the Department. On

January 1st, 1939, he was appointed General Editor of Text Books, and Mr. G. H. Dobrindt, B.A., Principal of Empire Public School, Welland, became Public School Inspector for Waterloo No. 1.

On January 1st, 1939, Dr. C. E. Stothers, B.A., Public School Inspector for Prince Edward County, was appointed to the inspectoral staff of the Department of Education. Dr. Stothers will continue to give one-half of his time to the more urgent duties of the inspectorate of Prince Edward County until August 31st, 1939.

On June 1st, 1937, Mr. Robert Gauthier, B.A., Ph.L., Separate School Inspector for R.C.S.S. Division VII, became Director of French Instruction in the Department of Education. Mr. Gauthier had first come into the service of the Department on September 1st, 1926, when he was appointed as an assistant on the staff of the Vankleek Hill Teacher-Training School. On October 1st, 1927, Mr. Gauthier was appointed as a Separate School Inspector, taking up duties in the Cochrane area. Later he was transferred to the Windsor area, where he remained until his appointment as Director of French Instruction. Mr. Gauthier has also given valuable services in Summer School work at Sturgeon Falls, Vankleek Hill, Sandwich, and Windsor.

#### Lighting of Schools

During the year 1938, the Hydro-Electric Power Commission of Ontario began a free service to the schools of Ontario with respect to the lighting of school buildings. Through the department of the Supervising Lighting Engineer any elementary or secondary school board in the province may be supplied with a complete report on the lighting system in use, and recommendations in detail for the improvement of the lighting. Blue print plans are furnished with the report to the board. A large number of rural and urban elementary school boards have already taken advantage of this free service, with the result that both the natural and artificial lighting of the classrooms have been greatly improved. Where new school buildings are being erected the boards are now consulting the Hydro-Electric authorities, and in nearly all cases are following the plans and recommendations offered.

A committee composed of lighting engineers from the staff of the Hydro-Electric Power Commission and officials of the Department of Education has been revising the regulations of the Department of Education with respect to school lighting, and at an early date it is likely that more modern regulations will replace the former ones.

#### Larger Units of Administration

Sections 15 and 16 of The Public Schools Act permit any township municipal council to pass a by-law placing any portion of the township in a Township School Area for purposes of administration of the public schools. The Act provides for a board of five trustees to replace the former school-section boards of three trustees. As is shown by the list below, the number of larger units in the province is still small, but a rapid acceleration in the organization of these units took place in 1938. This was due very largely to the adoption by the Department of Education of a more vigorous policy towards this problem. As a result, the local inspectors are constantly informing the ratepayers in rural areas regarding the advantages of larger units and the steps to be taken towards the organization of these units. In all cases the action is voluntary on the part of the municipal council, and official action is taken only when there is a body of opinion in the area favourable to the change.

There is hope that each year the number of larger areas may be increased in order that the people of all parts of rural Ontario may have ample evidence of the disadvantage of the school section as compared with the advantages of the larger unit. To encourage the organization of larger units, and as a means of assisting the equalization of school rates after organization, the Department now offers an additional grant of \$100.00 per school section where a larger area is formed. This grant is paid to the individual school sections for the first year and afterwards to the Township School Area board of trustees.

The following is the list of larger units of administration in the Province of Ontario:—

Townships	Number of School Sections	County or District	Inspector	Date of Formation
1. Morrison (Township Board).....	5	Muskoka	H. R. Scovell	1920
2. Blake.....	4	Thunder Bay	L. J. Williams	1925
3. Conmee.....	3	Thunder Bay	L. J. Williams	1925
4. Neebing.....	4	Thunder Bay	L. J. Williams	1925
5. York North.....	3	York	W. W. A. Trench	1928
6. York.....	12	York	A. A. Jordan and W. A. Fydell	1932
7. Teck and Lebel (Kirkland Lake)...	2	Temiskaming	H. E. Elborn	1932
8. Amherst Island.....	5	Lennox	S. A. Truscott	1934
9. Muskoka.....	3	Muskoka	G. S. Johnson	1935
10. York East.....	5	York	W. W. A. Trench	1936
11. Macaulay.....	6	Muskoka	G. S. Johnson	1936
12. Medora and Wood.....	13	Muskoka	G. S. Johnson	1937
13. Bosanquet.....	2	Lambton	H. B. Galpin	May 3, 1937
14. Dysart Municipality.....	12	Haliburton	A. F. Brown	June 7, 1937
15. Waters.....	2	Sudbury	O. M. MacKillop	May 28, 1938
16. Kaladar, Anglesea, and Effingham	7	Addington	T. R. McEwen	June 4, 1938
17. Griffith and Matawatchan.....	2	Renfrew	C. W. Lees	June 4, 1938
18. Denbigh, Abinger, and Ashby ...	8	Addington	T. R. McEwen	June 6, 1938
19. Brunel.....	7	Muskoka	A. F. Brown	June 21, 1938
20. Cardiff.....	6	Haliburton	A. F. Brown	June 23, 1938
21. Glamorgan.....	3	Haliburton	A. F. Brown	June 24, 1938
22. Faraday.....	6	Hastings	C. F. Cannon	June 25, 1938
23. Oakley.....	3	Muskoka	G. S. Johnson	June 25, 1938
24. Stanhope.....	4	Haliburton	A. F. Brown	June 27, 1938
25. Onondaga.....	5	Brant	W. Joyce	June 29, 1938
26. Ryde.....	4	Muskoka	G. S. Johnson	June 29, 1938
27. Otonabee.....	5	Peterborough	L. W. Copp	June 30, 1938
28. O'Connor.....	4	Thunder Bay	L. J. Williams	July 2, 1938
Total.....	145			

### Correspondence Courses

This branch of the Department of Education continued to render splendid service to the children of the province who, for various reasons, are unable to attend the regular elementary schools. The lessons offered cover the complete courses of study authorized for the public and separate schools of the province up to the end of Grade X. The number of children enrolled for the year 1938 was approximately 2,800, a considerable increase over the number enrolled for the preceding year.

### The School on Wheels

The Railway School Car is continuing to pursue its helpful way among the isolated communities scattered along the railways of Northern Ontario. The depression has depleted, to some extent, the groups depending for their occu-

pation on the timber industry, but the flexible character of the school car service enables it to accommodate itself readily to any such changes. The splendid co-ordination of railway schedules and school car movements by night and day has allowed more actual teaching time than in the regular schools.

A new car has been added to the service to operate on the Temagami division of the Temiskaming and Northern Ontario Railway. This territory is now fully organized with six car stops serving 45 pupils located along sixty-five miles of railway. Evening schools for adult education are conducted at two points. The advent of the car was hailed with pleasure by parents and children. Many of the latter had previously, even up to 'teen age, no opportunity for education. This makes a total of seven cars which are caring for the school needs of more than one thousand miles of railway.

The efficiency of the school car methods is revealed by the speed with which non-English pupils acquire speaking and reading ability. Self-learning, carefully co-ordinated with proper methods of teaching, imparts the power in a matter of a few weeks. A recent case in point is that of an English-speaking child of five who, after eighteen actual teaching days, has read five story books comprising over three hundred pages, well up to the standard of third to fifth grade.

The Railway School Car Auxiliary, comprising a group of Toronto ladies, has devoted itself to the service of helping needy homes and children in the school car areas. Their timely help brings cheer and necessary aid which has been greatly appreciated where help through organized channels is impossible.

#### Interchange of Teachers

In the matter of interchange of teachers, only those of good personality, good scholarship and teaching ability, not over forty-five years of age, and who are known to be willing and able to adjust themselves to new conditions are recommended for exchange. The inspector who is familiar with the work of the teacher, whether in a secondary school or elementary school, is required to declare that the teacher is a worthy representative of the teaching profession in Ontario before consideration will be given to the teacher's application for exchange. It is expected that equal caution is observed by the authorities over those teachers who exchange with teachers in Ontario.

Two very important purposes are served through the interchange of teachers. They have proved to be promoters of goodwill among the Canadian Provinces and other Dominions of the British Empire. They return to their duties with new enthusiasm, broader vision, and additional resourcefulness. They learn, when on exchange, the methods used by others to accomplish the same ideal, good citizenship in the Empire and the world.

A summary of the exchanges arranged for the current school year (1938-39) is given below:—

- 17 Ontario Public School teachers on exchange in England.
- 2 Ontario Public School teachers on exchange in Wales.
- 6 Ontario Public School teachers on exchange in Scotland.
- 2 Ontario Public School teachers on exchange in New Zealand.
  
- 1 Ontario Separate School teacher on exchange in England.
- 1 Ontario Separate School teacher on exchange in Scotland.
  
- 
- 29 Ontario Elementary School teachers on exchange overseas.

- 1 Ontario Public School teacher on exchange in Manitoba.
  - 1 Ontario Public School teacher on exchange in Saskatchewan.
  - 2 Ontario Public School teachers on exchange in Alberta.
  - 3 Ontario Public School teachers on exchange in British Columbia.

---

  - 7 Ontario Public School teachers on exchange in other provinces.
  - 1 Ontario Secondary School teacher on exchange in England.
  - 2 Ontario Secondary School teachers on exchange in Scotland.
  - 1 Ontario Secondary School teacher on exchange in British South Africa.

---

  - 4 Ontario Secondary School teachers on exchange overseas.
- 40 Ontario teachers, in all, on exchange for the school year 1938-39.

There were 44 Ontario teachers on exchange during each of the two preceding school years.

#### The Closing of Small Schools

During the year 1938, the determined policy of the Department to close small schools with enrolment below eight, where the children might be admitted conveniently to neighbouring schools, was pursued effectively. In 1936, 26 schools were closed; in 1937 the number closed was 28, while in 1938 some 37 schools were closed. Five schools were reopened in 1938 owing to increased numbers of pupils of school age resident in the school sections. A total of 96 schools remain closed.

The primary reason for closing these schools is that the pupils benefit by attendance in classes where the numbers are larger and by association in their play-life with a greater number of their own age-group. The secondary reason for closing the schools is that the local ratepayers effect a saving of from \$300 to \$600 in school rates for each school closed. The Department of Education is also enabled to distribute the amount saved in grants to more needy schools. It is estimated that there are still approximately one hundred schools of low enrolment which might be closed to the advantage of the pupils and in the economic interests of the local areas concerned.

#### Conclusion

During the year 1938 the chief interest of the elementary schools centred around the two new programmes of study, the one for Grades I to VI introduced on September 1st, 1937, and the other for Grades VII and VIII introduced on September 1st, 1938. Parents, trustees, teachers, and inspectors received the new courses with enthusiasm, and all co-operated splendidly in putting the changes into successful operation. In this respect the Ontario Home and School Associations were particularly helpful, due to their sponsorship of the courses in their meetings and through their activities.

More and more the inspector finds his time occupied with the advancement of new policies in education, and he finds it increasingly difficult to carry out the routine visiting of schools and the administrative duties of his office. It is becoming more evident each year that the inspector must have more clerical service and that one complete official visit per year to each school in his inspectorate, with additional visits only where most required, should prove sufficient. The inspector has not been able always in the past to give the leadership in

educational work which might be expected from his office. On the other hand, the routine work of the inspector has not always produced the results desired. An effort is being made, therefore, to free the inspector from those details which may be carried out by others and to give him, as a result, more time to meet trustees, teachers, and leading citizens so as to create a wider understanding of school problems and new policies and thus hasten changes greatly needed.

The Public and Separate School Inspectors of the province have rendered throughout the year faithful and efficient service. It is realized that while new programmes of study may be issued and new policies approved, the effectiveness of the work of the schools depends almost wholly upon the support and untiring efforts of the inspectors and the co-operation brought about between them and their teaching staffs.

I am indebted also to my colleagues in the Department of Education for their hearty co-operation throughout the year, and for their contributions to this report. To Dr. J. T. Phair, Chief Medical Officer of Health, Department of Health, to Mr. R. S. Duncan, B.S.A., Director of Agricultural Representatives, to Mr. George White, Chief Architect, Department of Public Works, and to the Supervisors of the Department of Municipal Affairs, thanks are also extended for willing co-operation and much help throughout the year.

V. K. GREER,

*Chief Inspector.*

Toronto, March 31, 1939.

## APPENDIX B

# REPORT OF THE CHIEF INSPECTOR OF SECONDARY SCHOOLS

I have the honour to submit herewith the reports of the High and Continuation School Inspectors and the Director of Vocational Education, for the school year 1937-38.

G. F. ROGERS,

*Chief Inspector of Secondary Schools.*

Toronto, August 8, 1939.

---

### 1. Report of the Inspectors of High and Continuation Schools

At the close of the school year 1937-1938 there were in the province 70 Collegiate Institutes, 157 High Schools, and 206 Continuation Schools. There were 69 Grade A Continuation Schools, employing the time of three or more teachers, and 129 Grade B Continuation Schools. In 20 of the latter, half the time of one teacher was given to public school work. A new High School was established at Copper Cliff, and new buildings were erected for the High School at Morewood and the Continuation Schools at Lyndhurst and Florence. Additional accommodation was also provided for the Continuation School at Smooth Rock Falls. A Grade B Continuation School was established at Paincourt. In a considerable number of schools, accommodation and equipment were provided for the teaching of General Shop Work and Home Economics. In composite schools, where a technical department already existed, instruction in these courses was made available to all first-year pupils. In some larger centres arrangements were made to have first-year high school pupils receive such instruction in the local vocational school. The number of teachers employed in all the Collegiate Institutes, High Schools, and Continuation Schools of the province was 3,085, an increase of 155 compared with the number employed at the close of the preceding school year. The total number of pupils enrolled was 77,951, an increase of 1928.

#### Changes in the Staff of Inspectors

In July, 1938, Mr. J. P. Hoag, B.A., retired from the staff of secondary school inspectors after a long and useful career in connection with secondary school education in Ontario. Before his appointment as inspector of continuation schools, he served as master in the London Normal School and as public school inspector in Brantford. For many years he made a notable contribution to the establishment and progress of the continuation schools and since 1935 the high schools and collegiate institutes also had the benefit of his ability and experience as inspector.

Mr. G. L. Gray, B.A., formerly Principal of the St. Thomas Collegiate Institute, was appointed an inspector of high and continuation schools and assumed his duties on September 1, 1938. Mr. Gray has had a very successful career as a teacher and principal. He brings to his work as inspector valuable qualifications in experience and scholarship.

### Inspection

Since the first-year courses of the revised secondary school curriculum went into effect in September, 1937, the Inspectors felt that it would be helpful to make brief preliminary visits to the schools to discuss any problems of organization or procedure that might be met. These visits were made in the first two or three weeks of the fall term and proved to be helpful to the principals and teachers.

During the school year each school received one regular visit of inspection. In addition to conferences with individual teachers, and especially with those who were beginning the work of teaching, the Inspectors endeavoured during their visits to meet the teachers in groups to discuss the progress of the pupils and aims and methods in the teaching of the various subjects. They were also able in many schools to meet the whole staff at the close of the inspection. In most cases the Board or representatives of the Board availed themselves of the opportunity for a conference with the Inspector about matters relating to the work of the school. The Inspectors feel that these conferences with Boards are a very useful feature of the visit of inspection.

In visiting the classes in the various schools, the Inspectors have continued to emphasize the importance of clear and well-formed oral answers by the pupils, neatness and accuracy in their written exercises, good posture, and effective participation by the pupils in every lesson. In general, added attention is being given to these matters by the teachers and improvement has resulted. In the teaching of the new first-year courses it has been necessary for the teachers to revise somewhat their methods and aims. This has been especially so in such subjects as French, English Composition and Grammar, and Art. On the whole, the teachers have displayed a very commendable degree of enterprise and resourcefulness in their presentation of the work in the revised courses. It is encouraging to observe the efforts being made by teachers in their lessons in the various grades of the schools to promote in the pupils those habits of clear thinking and self-reliance which will contribute to their future usefulness as citizens.

In certain schools the opportunity of special training in speech habits is provided. There is a growing interest in dramatics in the schools. In the larger schools especially, there is an increase in the number of extra-curricular activities. An effort is being made by principals to administer these activities in a manner that will contribute to the general progress and development of the pupils. Special mention should be made of the marked growth in the number of classes in which instruction in Vocal Music is provided as a part of the regular programme of studies. This instruction constitutes a valuable addition to the cultural opportunities offered by the schools.

In the conferences with Boards, the Inspectors met with much active interest in the courses in General Shop Work and Home Economics now provided for in the secondary school curriculum. They gave information concerning the nature and organization of these courses, the qualifications of the teachers required, and the grants payable to Boards in order to assist them to provide the necessary accommodation and equipment. In some instances, at the request of the Board, an Inspector attended a meeting of the ratepayers held for the discussion of these courses and gave information relating to their establishment. There appeared to be general recognition of the advantages of including this work in the programme of studies and a desire to do so as soon as warranted by local financial conditions.

It may be noted that in a considerable number of the schools, and more often in those with a large enrolment, the classes were too large to permit the best results from the teaching. In a number of cases it was necessary to lay stress upon the urgency of the problem of additional accommodation and staff.

Upon concluding the regular visits of inspection the Inspectors were able to make brief return visits to most of the schools.

The teachers and principals in the secondary schools of the province are in general to be congratulated upon the earnestness and efficiency with which they are meeting their responsible duties. There is, we believe, a genuine appreciation on the part of both teachers and Boards of the importance of providing for the boys and girls of the province a useful and thorough secondary school education which will assist them to become happy and useful citizens.

R. W. ANGLIN.

G. L. GRAY.

Toronto, June 17, 1939.

## 2. Report of the Director of Vocational Education, 1937-38

As predicted in last year's report, the time-tables of the vocational schools have been slightly modified to meet the requirements of the first year general courses. Social Studies, Business Practice and Writing, and Music or Art are now obligatory subjects of study in Grade IX. As a result, the time allotted to the teaching of the practical subjects in Grade IX Vocational classes has been reduced from 40-50 per cent. to  $23\frac{1}{3}$  per cent., or, if French is not a subject of study, to  $33\frac{1}{3}$  per cent. The character of the instruction in the practical subjects of the vocational curriculum has not changed. The students in vocational schools and departments continue to be taught by teachers of special trade subjects, in contrast to the method followed in a General Shop, under High School Regulations, where one teacher gives instruction in several industrial subjects.

According to the reports for 1937-38, there were sixty-one schools or departments operating under Vocational Regulations. The number of pupils enrolled increased from 34,766 in 1936-37 to 36,282 in 1937-38, and the number of teachers increased from 1,447 to 1,531 in the same period. In forty-six centres evening classes provided instruction for 31,880 adult students and employed a staff of 981 teachers. This is in contrast with the record of the previous year, when only thirty-two centres operated evening classes with a total enrolment of 25,750 students and a staff of 808 teachers.

Comparative statistics for vocational schools and departments are as follows:

	1922-23	1936-37	1937-38
Number of Schools—Day . . . . .	16	60	61
“ “ —Evening . . . . .	51	32	46
Number of Pupils—Day . . . . .	9,402	34,766	36,282
“ “ —Evening . . . . .	35,511	25,750	31,880
Number of Teachers—Day . . . . .	337	1,447	1,531
“ “ —Evening . . . . .	1,097	808	981
Government Grants . . . . .	\$638,217	\$959,611	\$1,248,334
Municipal Expenditure (Net) . . . . .	\$1,233,397	\$4,334,667	\$4,551,798

### Day Schools

A demand for the vocational training of youth is clearly evident, and the experience of the vocational day schools during the past year indicates that this type of school is filling a need of the times. The prevalence of unemployment has brought the question of vocational instruction to the fore. The business and industrial world today requires from beginners some acquaintance at least with crafts and industries, in addition to grounding in the usual academic subjects. The advantage enjoyed by vocational students in obtaining employment has brought home to teachers, social workers, and the general public the value of practical training.

The general introduction of Shop Work and Home Economics in the first year of the secondary schools will probably result in more pupils enrolling in the vocational courses in higher grades. Grade IX in all secondary schools has become an exploratory or vocation-finding year.

### Night Schools

Evening classes for adults reached their greatest expansion in 1930-31 when 47,000 students were enrolled. The classes declined during the industrial depression until the enrolment in 1933-34 was reduced to 22,000. An upward trend has been apparent since that year. During 1937-38, the enrolment increased to 32,000. The classes provide supplementary instruction for apprentices, journeymen, foremen, salesmen, and others who are engaged in industrial or commercial pursuits during the day. While regular courses are outlined for evening classes, each student is permitted to select the subjects that will best help him to make progress in his chosen trade or profession.

### General Shop and Home Economics

General Shop and Home Economics are the "Industrial Arts" introduced into secondary schools other than those operating under the Vocational Education Act. Because of the vocational character of these subjects, their organization and inspection have been entrusted to the Vocational Branch. The new regulations regarding Shop Work apply to any Shop in which provision is made for a modified course of practical instruction in Mechanical Drawing, Woodworking, Sheet Metal Work, Electrical Installation, Motor Mechanics, Machine Shop Practice, or any other subject approved by the Minister for pupils in secondary schools. The course for girls aims to develop sound standards of living, and an appreciation of the functions of family and community life. The course includes sections on Personal Appearance and Deportment; Foods, Shelter, and Clothing; Occupations; Community Life; Home Responsibilities, and, in general, Family Relationships.

Widespread interest has been awakened in these new courses. Approximately one hundred boards either have already introduced such practical instruction or have taken steps to provide it in the near future. The regulations governing the organization of these courses will require re-drafting in the light of the past year's experience. If schools are to be properly graded, it is desirable that an additional inspector be appointed at the earliest possible time.

### New Vocational Buildings

*Cornwall.* In the autumn of 1938, the new vocational addition to the Cornwall Collegiate Institute was opened. Filling a long-felt want, the addition provides facilities for technical education in a growing industrial centre. Not

only will these new facilities prove valuable to the boys and girls, but they will open up new opportunities for self-improvement to adult citizens who are now employed.

*Ottawa.* In the City of Ottawa the remarkable project of substituting a new technical school for the old, without materially interfering with the instruction of the pupils, has been carried out so successfully that the task will probably be completed by September, 1939. By a great effort on the part of the principal and the staff, classes have been maintained with considerable efficiency throughout the trying period of building operations.

*Toronto.* An extension of the Danforth Technical School is under consideration by the Toronto Board. For some time past, this school has been overcrowded. The library, the girls' gymnasium, and cafeterias have been used as classrooms, in addition to three portable rooms. A recommendation has been made that the usual grants be paid in aid of this new extension.

No decision has yet been reached with regard to the Aircraft Annex for the Central Technical School, although the Department of Education has promised to contribute a building grant in the event of this accommodation being provided.

### Inspection

In their annual inspection tours, inspectors attempt to regulate as far as possible the ratio of pupils to teachers, the division of duties among the teachers, and the provision made for teaching the authorized courses.

In many cases, classes are overcrowded because of the limited accommodation available. With the gradual improvement of financial conditions it is hoped that this problem will eventually disappear. It has been suggested to some boards that the Heads of Departments should be authorized to supervise more thoroughly the instruction offered in their particular departments.

Encouragement has also been given to the following features of organization:

1. The use of special rooms for designated subjects;
2. The development of classroom and laboratory libraries;
3. The preparation, and distribution to pupils, of lesson-aid sheets, with the object of improving the character of the instruction.

Some of the teachers continue to maintain a high standard of teaching through the resourceful application of sound methods in preparing and presenting their lessons; others, it has been found, could improve by a study of such methods. At the time of inspection, discussions concerning different phases of the work are held with the teachers, individually, or in groups, in an effort to assist them, and to dissipate the idea that the sole object of inspection is criticism.

### Conclusion

Principals and staffs generally are to be commended for their effective co-operation. The schools, on the whole, are staffed with qualified and efficient teachers, whose ability is reflected in the gratifying success of the student body not only while at school but also after leaving school.

F. S. RUTHERFORD,

*Director of Vocational Education.*

Toronto, March 15, 1939.

**APPENDIX C**  
**REPORT OF THE DIRECTOR OF PROFESSIONAL**  
**TRAINING**

**Normal School Registration**

Toronto Kindergarten-Primary.....					20	20
Total.....	211	779	990	196	891	1,087

Decrease in attendance during the past three years may be ascribed to:

1. Low rates of remuneration paid teachers, particularly in rural communities. Indications exist that operations of the law of supply and demand are beginning to bring about readjustments in this situation.

2. The raising of entrance requirements from Middle to Upper School standing.

3. The introduction of a medical examination in determining the eligibility of candidates. Not only have several candidates been debarred each year, but others have reconsidered their intention of pursuing a vocation which so obviously demands in high degree both health and vigour. Though the two factors, last named, will doubtless continue to operate, it is felt that the superior type of entrant thus obtained will more than make up for the resulting diminution of numbers.

4. A surplus of certificated teachers from years during which easier entrance requirements had resulted in a flooding of all Normal Schools, particularly at a time when financial depression was causing many teachers to remain in service beyond the usual period. Though scarcity of teachers is now an actual condition in many parts of the province there still persists from other years the idea that Normal School graduates find difficulty in obtaining employment.

**Provision for Observation and Practice Teaching**

During the year certain experiments were carried on more particularly in the Toronto Normal School with respect to observation and practice teaching. Arrangements were made with the Toronto Board of Education whereby critic teachers were selected from schools throughout the city instead of, as formerly, being located in one or two special schools. Arrangements were also made for two

weeks of continuous observation and teaching, one immediately after the Christmas holidays and one immediately after the Easter holidays, in rural schools throughout the several home counties of the Normal School students.

#### Changes in Staffs

Thornton Mustard, B.A., B.Paed., was appointed in September to the Principalship of the Toronto Normal School in place of David Whyte, B.A., B.Paed., who retired in July. Mr. Mustard was born and received his early education in Huron County. After graduating from the faculties of arts and education, Toronto University, and teaching in Huron County and Toronto, he was appointed Headmaster of the Normal-Model and later English Master in the Normal Schools Toronto. His appointment as Principal follows a two-year leave of absence during which time he was engaged in the preparation of the new course of study for elementary schools.

J. V. McIntyre, B.A., B.Paed., Mathematical Master of the Peterborough Normal School was transferred to Hamilton to take the place of J. H. Davidson, B.A., B.Paed., retired in June. Following the death of Mr. Halnan, Mr. Davidson was asked to take over the duties of Mathematical Master in the Stratford Normal School for the remainder of the term.

Adrian Macdonald, M.A., of the Peterborough Normal School was transferred to the Toronto Normal School to take the place of W. H. T. Mooney who was appointed public school inspector for York No. 1. R. H. Roberts, M.A., was transferred from the inspectorate of York No. 1 to the Peterborough Normal School.

Miss E. G. Conover was transferred from the Ontario School for the Deaf to take the place of Miss Olga Johnston, assistant teacher of home economics in the Toronto Normal School. Miss Johnston was transferred to the Peterborough Normal School to take over the duties of Miss Elizabeth MacVannel, retired.

Miss Joicey M. Horne was appointed from the Duke of York Public School to take over the duties of Dr. Eleanor Shepherd-Thompson, Toronto Normal School, who has been granted extended leave of absence.

Miss Jean Care was appointed from Forest Hill Public School to the position of assistant kindergarten directress in the Toronto Normal-Model in place of Miss M. A. Campbell who retired in June.

Miss Dorothy Emery, Instructress in Art in the London Normal School, was assigned additional duty in the Stratford Normal School to take the place of Mrs. C. A. Mayberry who retired last June.

Miss Jean Moore of the Aylmer Public School was appointed Music Instructress in the Hamilton Normal School. She assumed the duties formerly in the charge of the late Captain H. Stares.

Dr. Louis Charbonneau has been released from the staff of the University of Ottawa Normal School to assist in the preparation of French text-books.

#### Obituaries

Captain Harry A. Stares, Music Instructor in the Hamilton Normal School since the time of its foundation in 1908, died at his home February 15th, 1939. Jovial, patient, kind but firm he gave unstintedly both time and effort in the

promotion of better music in the schools of the province. Apart from the field of education he had a long and distinguished career as director of music in Christ's Church Cathedral, leader of the 91st Highlanders' Band, and brigade bandmaster overseas. His genial personality no less than his mastery of music will long continue an inspiration to many teachers in Ontario.

Lemen Robert Halnan received an elementary and secondary education in Oshawa, the city of his birth. After a model school course and some years' experience as a rural school teacher, he attended Trinity College, graduating with an M.A. degree, and completed his professional training at the Ontario Normal College. He became housemaster at Pickering College, taught in the Georgetown and Brampton High Schools, and in 1922 was appointed Mathematical Master, Stratford Normal School. He continued in this position until his sudden death, November 8th, 1938. Mr. Halnan was an outstanding teacher, conscientious and painstaking in the performance of every duty, exacting of himself but patient and tolerant with others.

Dr. W. J. Karr passed away at his home in Toronto on December 18th 1938. An educationist whose life, both private and professional, exemplified in the highest degree the virtues of the Ryerson conception of education—endeavour, sincerity, scholarship, culture, moral and mental integrity. Born in Lambton County he received his early training in the Forest Public, High, and Model Schools; the Toronto Normal School; the Ontario Normal College; and successfully graduated from Queen's University with the degrees B.A., B.Paed., and D.Paed.

Beginning his teaching career in a Lambton rural school, he became in turn Principal of the Sarnia Model School, English Master in the North Bay Normal School, Assistant Principal of the English-French Model School at Ottawa; Director of Rural School Organization, Director of English Instruction in English-French schools, and in 1938 Director of Professional Training.

Devoted to duty, and loyal in all his associations, he was responsible for an effective organization in each of the several departments over which he had charge. His greatest contribution to education, however, was the life and ideals of a Christian gentleman.

H. E. AMOSS,

*Director of Professional Training.*

Toronto, May 18, 1939.

## APPENDIX D

**REPORT OF THE DIRECTOR OF FRENCH INSTRUCTION  
ON THE SCHOOLS ATTENDED BY FRENCH-  
SPEAKING PUPILS, 1938.**

**Appointments and Transfers**

Mr. Rémi Millette, B.A., B.Paed., formerly assistant principal of the Sturgeon Falls High School, was appointed to R.C. Separate Division III, with residence in Cochrane. Mr. Millette, who replaced Mr. Rosario Masse, B.A., began his duties on September 1st, 1938.

Mr. Adélarde Gascon, B.A., was transferred from R.C. Separate Division VII, Windsor, to R.C. Separate Division XIX and District Division XII, Part II, with residence in Ottawa.

Mr. Lucien Laplante, M.A., was transferred from R.C. Separate Division XIX and District Division XII, Part II, Ottawa, to R.C. Separate Division VII, with residence in Windsor.

**Training of Teachers—Improvement in Qualifications**

In 1937-38, there were 196 teachers-in-training at the University of Ottawa Normal School, 170 of whom were enrolled in the Second Class course, and 26 in the First Class course. As a result of the term and final examinations, 17 students were awarded First Class teachers' certificates and 121 obtained Second Class certificates.

The use of rural ungraded schools for some of the practice teaching in connection with the training of future teachers was a happy and successful innovation.

The following table shows the number of French-speaking teachers holding First or Second Class certificates in 1938, and the progress made in this regard since 1929.

Total number of teachers under French-speaking inspectors, November 1938. . . . .	1,316
Total number of teachers holding I or II class certificates, November 1938. . . . .	1,135
Total per cent. of teachers holding I or II class certificates, November 1938. . . . .	86.24
Total per cent. of teachers holding I or II class certificates, November 1937. . . . .	79.46
Total per cent. of teachers holding I or II class certificates, November 1929. . . . .	25.11

**Age-Grade Distribution of Pupils in Elementary Schools**

The following tables present a compilation of the French-speaking School Inspectors' Annual Age-Grade Summary Reports for May 1938:—

Auxiliary.....			217	.76	217	.46

## (B) Separate Schools

Grades	Rural		Urban		Rural and Urban	
	Number	Per cent.	Number	Per cent.	Number	Per cent.
I-IV.....	10,591	64.09	15,885	57.97	26,476	60.27
V-VIII.....	5,606	33.93	10,496	38.30	16,102	36.65
IX-X.....	327	1.98	823	3.00	1,150	2.62
Auxiliary.....			201	.73	201	.46

## (C) Public Schools

Grades	Rural		Urban		Rural and Urban	
	Number	Per cent.	Number	Per cent.	Number	Per cent.
I-IV.....	1,599	67.44	655	59.71	2,254	65.00
V-VIII.....	766	32.31	412	37.56	1,178	33.96
IX-X.....	6	.25	14	1.27	20	.58
Auxiliary.....			16	1.46	16	.46

While the foregoing statistical tables show some progress over the situation reported in 1937, it is evident that much remains to be done yet in order to bring about a satisfactory age-grade distribution of pupils and to check the excessive drop in enrolment in the senior grades of the elementary school. It will be observed, for instance, that while 11,216 pupils were enrolled in Grade I classes of all elementary schools attended by French-speaking pupils in 1938, only 2,913 were found enrolled in Grade VIII classes. (Table No. 1, (A), (i)). This great discrepancy between the Grade I and Grade VIII enrolments would appear to be due largely to the fact that more than 50 per cent. of the pupils enrolled in Grades II, III, IV and V are too old for their respective classes, and are likely to drop out before reaching the higher grades of the school. (Table No. 2, (A)).

Of course, it will require some time, probably seven or eight years, before the conditions obtaining at present in the elementary schools are properly adjusted to the desired standards. That teachers and inspectors are sincerely applying themselves to correct the existing situation is unquestionable. The following

comparison, for instance, shows clearly the successful effort that has been put forth within the past year.

		Under Ideal Age Spread (per cent.)	Within Ideal Age Spread (per cent.)	Over Ideal Age Spread (per cent.)
Grade I.....	1937	0.03	53.28	46.69
	1938	.04	61.13	38.83
Grade II.....	1937	.....	36.52	63.48
	1938	.....	48.00	52.00
Grade III.....	1937	.....	36.13	63.87
	1938	.02	47.83	52.15

See 1937 Report, Table No. 2, and Table No. 2, (B) of this Report.

That much progress in only one year augurs well for the future.

### Secondary School Classes

The following table shows the number of French-speaking pupils enrolled in December 1938 in the special French courses of Collegiate Institutes, High and Continuation Schools under Departmental supervision.

Grade	IX	X	XI	XII	XIII	Total
Number enrolled.....	327	182	155	143	32	839

There are, besides, 1,170 French-speaking pupils enrolled in Grades IX and X of the elementary schools (Table No. 1 (A), (i)) and approximately 1,000 who are taking these same courses in private schools and colleges. An effort will be made during the coming year to verify the last figure. Thus, in the province, there would be in all about 3,000 French-speaking pupils pursuing their studies in Grades IX to XIII in which advanced courses in French Grammar, French Literature and French Composition are given. If this number of 3,000 is compared with the approximate French-speaking school population from Grades I to XIII, say 50,000, we find that about 6 per cent. of the French-speaking pupils in Ontario remain at school beyond Grade VIII. This picture is not brightened when one analyses the table given above and observes that only 20 per cent. of those entering secondary schools reach either Grade XII or Grade XIII and that less than 4 per cent. attain Grade XIII.

Obviously, the main cause of this low and rapidly decreasing enrolment from grade to grade in the secondary schools is to be found and eradicated in the elementary school classes. Once the problem is solved in the elementary departments of the school, there should be automatic improvement in the secondary school enrolment and age-grade distribution of pupils. A continued effort should be made by teachers and inspectors to impress French-speaking parents and children with the importance of a good education. In some parts of the province, home and school clubs have been very helpful in that regard.

### French Books in Secondary School Libraries

Marked progress was made during 1938 in the establishment and development of French libraries in the 16 secondary schools attended by French-speaking

pupils. The following table, which was compiled from Principals' reports, shows the number and value of French books purchased during 1937 and 1938.

	Number	Value
French books purchased in 1937.....	276	\$204.95
French books purchased in 1938.....	729	413.77
Total number of French books in secondary school libraries, December 31st, 1938.....	3,373	1,597.97

Secondary school boards, principals and teachers are to be commended for adding so generously during 1938 to their school libraries. Such investments to provide their classes with appropriate material for supplementary reading are sound and profitable.

#### Preparation and Revision of French Text-Books

The work of revising French text-books now in use in schools attended by French-speaking pupils and of preparing additional books was carried on successfully during the year. Dr. Louis Charbonneau, a member of the teaching staff of the University of Ottawa Normal School, was relieved of his ordinary duties and assigned this special task. The revision of the two authorized texts, *Recueil de Morceaux Choisis* and *Lectures Choisies*, used for teaching French Literature in Grades IX to XIII was completed. Circular 23-B, containing the details of the courses in French given at the University of Ottawa Normal School was also revised. A vast amount of preliminary work in connection with the preparation of new French readers was undertaken; a new French pre-primer entitled *Frou-Frou et Fin-Fin* was prepared and will be ready for the opening of schools in September 1939.

#### Provincial Contest

A Province-wide competition was organized during the year among the 3,000 Grade VIII French-speaking pupils. After winning preliminary tests in their own schools and inspectorates, twenty-two contestants—one boy and one girl from each of the eleven French-speaking inspectorates—took part in the finals held in Ottawa on May 25th, 1938. The four winners, who were awarded secondary school scholarships, were as follows:

- 1st boy: Jean-Guy Blais, 12 years old, of Sturgeon Falls;
- 1st girl: Gilberte Dubois, 12 years old, of Hawkesbury;
- 2nd boy: Roger Despatie, 12 years old, of Ottawa;
- 2nd girl: Jeannine Dubé, 12 years old, of Ottawa.

This contest was organized with two main objectives in view: firstly, to draw into closer co-operation the home and the school; secondly, to impress upon French-speaking parents and children the importance of secondary school education. Reports from teachers and inspectors all over the province show that this first attempt was very successful and that it should be repeated annually.

#### Teachers' Study Groups

A very interesting experiment was carried on during the year in the majority of French-speaking inspectorates. Teachers' study groups, known as *Cercles pédagogiques*, were organized with the special aim of acquainting the teachers thoroughly with the new Programme of Studies and other matters affecting particularly schools attended by French-speaking pupils. Inspectors report

favourably on the results obtained through the establishment of these study groups. In one of the Eastern Ontario inspectorates, for instance, the Inspector states that all the teachers under his jurisdiction are divided into four such groups, each group meeting with the Inspector once a month, on Friday evening, to study their particular school problems. In this case, of course, it means that the Inspector must spend practically every Friday evening with one-quarter of his teaching staff, but, according to this Inspector's report, the improvement noted in the classrooms is well worth the time and energy such conferences require. This spirit of co-operation between teachers and inspectors is to be highly commended.

ROBERT GAUTHIER,  
*Director of French Instruction.*

Toronto, April 29th, 1939.

## APPENDIX E

## REPORT OF THE PRINCIPAL OF THE ONTARIO TRAINING COLLEGE FOR TECHNICAL TEACHERS

---

### Classes and Enrolment, 1937-38

In the school year beginning in September 1937, and ending in June 1938, courses for the following certificates were offered at the Ontario Training College for Technical Teachers:

Ordinary Vocational Certificate,  
Intermediate Manual Training Certificate,  
Elementary Manual Training Certificate, Type B, Part I,  
Elementary Home Economics Certificate, Type C, Part I.

The classes for the Elementary Manual Training and Elementary Home Economics Certificates were held on Saturdays in Hamilton and Ottawa.

The enrolment in these classes was as follows:

Ordinary Vocational Certificate.....	14
Intermediate Manual Training.....	22
Elementary Manual Training, Type B, Part I	
at Hamilton.....	52
at Ottawa.....	47
Elementary Home Economics, Type C, Part I	
at Hamilton.....	38
at Ottawa.....	47
Total.....	220

### Summer Session, 1938

The classes offered in the summer session of 1938 were attended by large numbers. The enrolment was as follows:

#### 1. MANUAL TRAINING OR SHOP WORK:

##### (a) Hamilton

Elementary Manual Training, Type B, Part I.....	158
Elementary Manual Training, Type B, Part II.....	139
Elementary Manual Training, Type A, Part I.....	82
Elementary Manual Training, Type A, Part II.....	72
Specialist Manual Training, Part I.....	28
Specialist Manual Training, Part II.....	19
Specialist Extension.....	20

##### (b) Ottawa

Elementary Manual Training, Type B, Part I.....	61
---	----

## 2. HOME ECONOMICS:

## (a) Hamilton

Elementary Home Economics, Type C, Part I..... 166

Elementary Home Economics, Type C, Part II..... 185

## (b) Ottawa

Elementary Home Economics, Type C, Part I..... 85

## (c) Toronto

Elementary Home Economics, Type B, Part I..... 79

Elementary Home Economics, Type B, Part II..... 37

552

## 3. VOCATIONAL GUIDANCE..... 32

## 4. VOCATIONAL:

Specialists..... 32

Ordinary Permanent..... 5

Ordinary Interim (H.S.A.)..... 1

Special..... 6

Sewing and Dressmaking, Part I..... 35

Sewing and Dressmaking, Part II..... 17

121

Less duplicates..... 26

95

Total..... 1,258

The large enrolment in the courses in home economics and manual training shows an increasing desire on the part of teachers to prepare themselves for teaching such practical work. While this desire is commendable, teachers should bear in mind that two short summer courses cannot give adequate preparation for teaching the more advanced courses in these subjects. If they expect to teach in schools which are making a serious effort to extend the practical work of the new courses beyond Grade IX, they should plan to take further training. The success of the new courses in home economics and shop work depends much upon direction by well-trained teachers, skilful in performance and competent in knowledge.

The requirement of an elementary certificate in manual training for admission to the year course leading to the Intermediate Certificate is working out satisfactorily. In addition to providing some preliminary training, it has provided a means of selecting those with a natural aptitude for shop work.

The course for the Intermediate Certificate in Manual Training has been revised and extended to provide a better correlation between the training provided for the teachers and the subject matter of the new course of study.

The requirement of two summer courses in sewing and dressmaking for a permanent home economics certificate is proving its worth. The new courses in home economics provide for experience in clothing and textiles as well as in foods and nutrition. It is to meet this new emphasis that teachers are asked to obtain

additional training on what is called the domestic arts side. From the comment of teachers it is apparent that the course provided is meeting a real need.

The supply of vocational teachers, except in one or two departments, barely equals the demand. Indeed, in some departments such as drafting, electricity, sheet metal work, and welding, there are not enough teachers to meet the demand. As soon as school boards find themselves able to make much needed additions to the staffs of vocational teachers, there will be a shortage, perhaps acute, of properly qualified teachers. School authorities are already experiencing difficulty in filling certain types of positions with suitable certificated teachers.

F. P. GAVIN,  
*Principal.*

Hamilton, August 1, 1939.

## APPENDIX F

### REPORT OF THE INSPECTOR OF AGRICULTURAL CLASSES

---

Agriculture has been and still is the basic industry of Canada, but with the development of modern agricultural industries, many of the processes which were formerly an integral part of home activities have been taken over by big business. The canning industry, the meat packing industry, the dairy industries, and the milling and baking industries all represent activities formerly conducted in the home where the raw materials were prepared for use. Farming is becoming more specialized, machinery is available for operations formerly done by hand, and tractors have in many cases replaced or reduced the number of horses kept on the farm. Because of these changes, a knowledge of the sources of raw materials and their processing must come through the school since these activities no longer form a part of home life. This is true not only in urban centres, but in many rural areas where specialized farming is carried on. The need of agricultural instruction is greater now than formerly if boys and girls are to leave school with a comprehensive knowledge of how the nation's food supply is provided. The programme of instruction must be adjusted to meet the changing conditions. School gardens in which vegetables, farm crops and flowers are grown are needed more than ever. Where possible, practice in rearing and caring for chickens at the school is desirable, and greater stress should be laid upon home project activities related to gardening, care of home grounds, and farm activities.

Excellent provision for instruction in agricultural subjects is made in the new courses of study for elementary and secondary schools. The courses in Natural Science for Grades I to VI include many elementary topics on Agriculture. An optional course in Agriculture, in addition to the course in Science, is provided in Grades VII and VIII and was being taken in September 1938 in 68.8 per cent. of the elementary schools. Optional courses are provided in Agricultural Science for Grades IX and X. These were being taken in September 1938 in 167 secondary schools. It is worthy of note that there has been a total increase in the number of schools taking Agriculture from 1932 to the present, in spite of the fact that special grants to teachers have been reduced by nearly 50 per cent. During the same period, the grants paid to boards have increased, showing that more is being spent for agricultural instruction. In many rural and urban schools this increased expenditure is reflected in the planting of flower beds and shrubs and other improvement in the appearance of the school grounds. In both elementary and secondary schools the standard of instruction is improving as more qualified teachers become available, and as the necessity of laying stress upon the practical applications of different topics is more generally understood.

In April 1938, sets of coloured pictures of breeds of dairy cattle were purchased by the Department of Education, and distributed to all elementary schools, and to the secondary schools in which Agriculture was being taught. These pictures represent the ideal type of each breed approved by the type committee of each Breeders' Association. Inspectors and teachers have been enthusiastic in their praise of these pictures as a valuable means of teaching the

breeds of dairy cattle. In September, pamphlets prepared by the Ontario Department of Agriculture, and dealing with common ragweed, field bindweed, bladder campion, clover dodder, and leafy spurge, were sent to all elementary schools, and to secondary schools in which Agriculture was being taught. During the year, seeds of grasses and legumes were supplied to a number of schools where plots for such planting were established three years ago.

Beginning in September 1938, arrangements were made for a series of articles on Agriculture in "The School" magazine. The titles of the articles and the authors for the series follow: *The Programme of Agricultural Instruction in the Schools of Ontario*, Norman Davies, B.A., Department of Education; *Agriculture and Garden Projects in a Graded School*, I. W. McNaughton, Principal, Public School, Ridgetown; *Practical Agricultural Projects in a Continuation School*, R. O. Rilett, Lobo Continuation School, R. R. No. 2, Ilderton; *Supervised Farm Practice in Vocational Agricultural Classes*, H. B. Disbrowe, B.S.A., High School, Simcoe; *School Ground Improvement*, J. J. Neilson, B.S.A., High and Vocational School, Ridgetown; *A Poultry Project in High School Agriculture*, Andrew Dixon, B.S.A., High School, Hagersville; *Agricultural Activities and Projects in the Ungraded School*, Gordon Young, B.A., Inspector of Public Schools, Strathroy; *Phases of Agricultural Instruction in the Normal School*, A. J. Madill, B.A., D.Paed., Normal School, Peterborough; *Uses of a Greenhouse in Agricultural Instruction*, W. A. Porter, B.A., B.Paed., Scarborough Collegiate Institute, West Hill, P.O.

The subsequent paragraphs of this report deal with the progress of agricultural instruction in the elementary schools, secondary schools, summer schools and the Normal Schools:

#### Public and Separate Schools

The number of schools which have met the requirements of the Regulations and qualified for grants for Form III, Form IV, and Form V, since 1903, is given in the abbreviated table following:

Year	Number of Schools	With School Gardens	With Home Gardens
1903.....	4		
1913.....	159		
1914.....	264	208	56
1920.....	1,648	702	946
1928.....	3,395	1,059	2,336
1932.....	4,906	1,344	3,562
1934.....	5,201	1,594	3,607
1937.....	5,065	1,580	3,485
1938.....	4,928	1,743	3,185

The figures for 1938 are based on the number of reports received at the Department for the school year ending June 30th, 1938, and show that agricultural instruction was given in 68.8 per cent. of all the elementary schools, and in 71 per cent. of all rural schools and 56.4 per cent. of all urban schools. The decrease in the number of rural schools is due to adjustments being made because of the introduction of the new courses in Grades IV, V and VI. There is, however, a slight increase in the number of urban schools for 1938.

The following table shows the number of certificates held by teachers engaged in the work for the years given:

Year	Elementary	Elementary Part I	Intermediate	Intermediate Part I	Totals
1934.....	1,552	86	144	10	1,792
1935.....	1,957	106	163	16	2,242
1936.....	2,092	208	188	22	2,510
1937.....	2,351	502	218	42	3,113
1938.....	2,864	444	259	52	3,619

It will be noted that in 1938 there was an increase of 506 in the number of certificated teachers, and that in the 4,928 schools which reported instruction, there were 3,619 teachers who held certificates in Agriculture:

In addition to the courses for Form III and Form IV, Agriculture of the Lower School course was taken in fifth classes of 623 schools under the Regulations for Public and Separate Schools. The Lower School courses taught by a teacher holding an Intermediate Certificate are taken under the High School Regulations in the following schools: S.S. No. 7 Biddulph, Granton; Elizabeth Ziegler Public School, Waterloo; R.C. S.S. No. 6 Ellice and Logan, Kinkora; \*Hearst Public School; Hespeler Public School; Innerkip Public School; Mayfair Public School, No. 5 Sandwich East; Mono Mills Public School; Port McNicoll Public School; \*St. Andrew's West Separate School; \*St. Patrick's Lyceum Separate School, Ottawa; St. Peter's Separate School, Peterborough; St. Raphael's West Separate School; Victoria Public School, Kitchener; Tecumseh Public School; Toronto Public Schools, \*Brown, General Mercer, \*Kimberley, \*McMurrich, \*Perth Avenue.

#### Secondary Schools

Instruction in Agriculture in secondary schools is provided under three schemes as stated below and may be taken in those schools which meet the requirements of the Department of Education.

1. Optional classes in Lower and Middle School as a part of the course for Normal Entrance or Matriculation.
2. Department of Agriculture under the High Schools Act.
3. Department of Agriculture under the Vocational Education Act.

Under scheme (1) above, Agriculture was taught during the year in the schools listed below. Under (a) are the schools in which Lower School courses only are taken, and under (b) both Lower and Middle School courses.

#### *Collegiate Institutes*

(a) Clinton, Cornwall, Goderich, Ingersoll, Kitchener, Oshawa, Perth, Seaford, York Memorial, Vaughan Road. Total 10.

(b) Barric, Belleville, Brockville, Cobourg, East York, Fort William, Lindsay, Napanee, Orillia, Picton, Port Arthur, Renfrew, Runnymede, Scarborough, Smith's Falls, Stamford, Strathroy. Total 17.

\*Introduced in September 1938.

*High Schools*

(a) Alexandria, Arthur, \*Blenheim, Bracebridge, Chesterville, Cobalt, Durham, Englehart, Essex, Flesherton, Forest, Harrow, \*Havelock, Kapuskasing, Lakefield, Lucan, Madoc, Markham, Mattawa, Maxville, Meaford, Merriton, Morewood, Mount Forest, Niagara, Omemee, Orangeville, Port Credit, Shelburne, \*Sydenham, Tilbury, Trenton, \*Williamstown. Total 33.

(b) Alliston, Amherstburg, Athens, Beamsville, Bowmanville, Brighton, Burford, Burlington, Caledonia, Cayuga, Dundas, Dunnville, Elmira, Fergus, Fort Frances, Grimsby, Hagersville, Haileybury, Iroquois, Kemptville, Kincardine, Kingsville, Leamington, Listowel, Markdale, Midland, Milton, Mitchell, Nepean, Newburgh, New Liskeard, Norwich, Norwood, Oakville, Petrolia, Port Elgin, Port Perry, Rainy River, Ridgetown, Ridgeway, Saltfleet, Simcoe, Smithville, Stirling, Streetsville, Tweed, Uxbridge, Waterdown, Waterford, Watford, Whitby, Winchester. Total 52.

*Continuation Schools*

(a) Ailsa Craig, \*Arkona, Beaverton, Bothwell, Burk's Falls, Chatsworth, Coldwater, \*Delta, Eganville, Fordwich, \*Forester's Falls, \*Hensall, Grand Valley, Inglewood, Merlin, \*Milverton, \*Richard's Landing, \*Stevensville, Thamesville, Tiverton, \*Wellesley. Total 21.

(b) Agincourt, Ayr, Brooklin, Brownsville, Comber, Drayton, Drumbo, Embro, Florence, Ilderton, Little Britain, Lobo, Lynden, Lyndhurst, Melbourne, Merrickville, Mindemoya, Mount Albert, Mount Brydges, Mount Elgin, Mount Pleasant, New Dundee, New Hamburg, Orono, Pelham, Princeton, St. George, Sparta, Sundridge, Tamworth, Teeswater, Thamesford, Wheatley, Woodville. Total 34.

A summary of the above shows that Agriculture is now taken in twenty-seven Collegiate Institutes, eighty-five High Schools, and fifty-five Continuation Schools. During the year the work was introduced in four High Schools, and eight Continuation Schools, and was discontinued in three High Schools. Both Lower and Middle School courses are taken in one hundred and three schools.

The following abbreviated table shows the development in this phase of instruction since its beginning in 1913 and the number of schools now taking the work:

Year	Collegiate Institutes	High Schools	Continuation Schools	Total
1913.....		1	1	2
1918.....	8	13	4	25
1923.....	8	23	4	35
1928.....	14	44	23	81
1933.....	24	54	33	111
1935.....	26	67	40	133
1936.....	26	68	43	137
1937.....	27	83	48	158
1938.....	27	85	55	167

Two hundred and eighteen teachers are engaged in giving instruction in Agriculture. Of this number, one hundred and twenty-one hold the Specialist certificate, eighty-four being graduates of the Ontario Agricultural College.

\*Introduced Agriculture in September 1938.

The following schools are taking work under the scheme indicated in (2) above: Drayton, Elmira, Listowel, Port Perry, Wheatley, and Whitby. Additional time is given to Agriculture and practical phases of the subject are stressed. At Elmira, Port Perry, and Whitby provision is made for Shop Work for boys and Home Economics for girls.

Under (3) above, the following schools are qualifying for grants under the Vocational Education Act: Beamsville, Kemptville, Renfrew, Ridgetown, Stamford, and Simcoe. In all except Stamford, provision is made for instruction in Shop Work and Home Economics and the new courses in these subjects, with stress on agricultural applications, are being followed. In all centres, stress is laid upon home project activities on agricultural topics, and at Simcoe a definite programme of supervised farm practice is being carried on with pupils of the agricultural department.

#### Summer Courses

The attendance at the Summer Courses in Agriculture at Guelph and Kemptville in 1938 was less than in 1937. The course for the Specialist certificate was given. The organization of classes was the same as in 1937, but fewer students were enrolled in each class division. The character of the work done and the results obtained at both centres were quite satisfactory.

The following table shows the attendance at the Summer Courses for the past five years:

Attendance at the Ontario Agricultural College, Guelph

Year	Elementary		Intermediate			Inspectors	Farm Mechanics	Total
	I	II	I	II	III			
1934.....	112	95	38	45	12	1	17	320
1935.....	188	112	61	46	.....	2	.....	409
1936.....	414	223	79	72	.....	3	24	815
1937.....	368	408	88	79	.....	3	23	969
1938.....	209	307	52	101	26	3	21	719

Attendance at the Agricultural School, Kemptville

Year	Part I Elementary	Part II Elementary	Total
1934.....	19	28	47
1935.....	116	40	156
1936.....	220	110	330
1937.....	187	202	389
1938.....	102	185	287

#### Normal Schools

Except in the University of Ottawa Normal School, instruction in Agriculture is a part of the regular course and the subject is taken by all students. Students who have taken four years of Agriculture in an approved school during their High School course are granted an Interim Elementary Certificate on successfully completing the Normal School course. Others must attend summer school to secure a certificate in Agriculture.

Facilities for instruction in practical phases of gardening and other topics are provided, the instructors are all qualified in Agriculture, and a good course is given as far as the time allotment on the Normal School programme will allow.

NORMAN DAVIES,  
*Inspector of Agricultural Classes.*

Toronto, August 28, 1939.

## APPENDIX G

REPORT OF THE INSPECTOR OF AUXILIARY  
CLASSES

Statistical Information for the School Year, 1937-38

*Opportunity Classes.*—For backward and psychopathic children and those who cannot successfully pursue the ordinary grade work, but who can be trained and whose mental age is not less than the legal school age.

### Urban Organization

In addition to the classes mentioned above the following new Auxiliary Classes were opened during the latter half of 1938:

*Opportunity Classes.*—Kirkland Lake, 1; Toronto Separate Schools, 1; S.S. No. 7 Toronto, 1; Wallaceburg, 1.

*Handicraft Classes.*—Stratford, 1; Ottawa Separate Schools, 1.

*Speech and Lip-Reading.*—Kitchener, 1.

*Visiting Teacher.*—Port Arthur, 1; Windsor, 1; York Township, 1.

During the year, Almonte, Cornwall, Hespeler, Port Hope, S.S. No. 7 Toronto, and Wallaceburg Separate Schools were surveyed for purposes of Auxiliary Education. With few exceptions one or several forms of auxiliary education have been established in urban centres of over 3,000 population. In the majority of these centres it is felt that all children requiring special education on account of physical or mental handicaps are being fully looked after. In several centres, however, existing facilities require extension, and, in some cases, provision has yet to be made for the education of children suffering from certain types of handicap.

### Rural Organization

Complete surveys of the following rural inspectorates were carried out by Miss DeLaporte and myself in conjunction with the Inspectors concerned:

Inspectorate	Inspector	Number of Cases
Bruce West.....	G. C. Dobson	97
Middlesex East.....	D. G. Smith	128
Simcoe Centre (partial survey).....	W. R. McVittie	32
Simcoe South.....	W. H. Carlton	186
Waterloo (No. 1).....	H. E. Elborn	92
Wellington South.....	G. G. McNab	74
Division V.....	D. T. Walkom	92
Division VI.....	L. L. Skuce	166
Division XVI.....	A. F. Brown	143
S. S. Division XII.....	L. J. Langan	136

In all, some 1,146 pupils were examined and advisements made concerning their educational welfare. Through the co-operation of the local Inspector and the several school boards, special educational facilities have been provided for the large majority of those who were found to stand in need of assistance.

Up to the present time thirty-one rural inspectorates have been completely and one partially surveyed and organized. There are in operation 90 home instruction units, 183 sight-saving units, 213 speech-correction units, and 1,918 opportunity units. Some 120 sick or crippled children in rural areas who cannot attend school are being looked after by means of correspondence courses. Between 80 per cent. and 90 per cent. of the children who were afflicted through the Polio epidemic of 1937 have now returned to school, their educational progress having suffered but slight interruption during their lengthy periods of convalescence. Though the number of home-instruction units and correspondence courses for crippled children has, as a result, fallen off, it is interesting to note that efforts made in 1937 to provide for Polio cases have been the means of attracting attention to the needs of pupils suffering from other forms of illness. In March, 1938, the Department co-operated with the Toronto Board of Education to provide instruction for seven adults in the General Hospital who were still confined in the Polio Respirators. Three of these have completely recovered but four are still in receipt of special teaching. It is felt by the hospital authorities that the visiting teacher was a decisive factor in maintaining intact the mental integrity of these patients during their long struggles toward recovery.

Reports from local Inspectors concerned go to show that upwards of 50 per cent. of the pupils in opportunity units are re-adjusted to grade work; that the establishment of sight-saving units enables pupils suffering from defective vision to maintain normal grade progress, and that the provision of a home-instruction teacher for sick and crippled children has equally beneficial results.

Through the establishment of speech-correction units the attention of rural teachers has been directed to the importance of this phase of education, with the result that care is being devoted to the building up of proper speech habits among regular grade pupils as well as among those affected by speech defects.

Arrangements have been completed for surveying the following rural inspectorates in 1939.

It is expected that by the end of the year 1939 one-half of rural Ontario will have been surveyed, and provision made for children needing special help. In

this connection it is heartening to note that Inspectors whose areas have already been surveyed are keeping up the good work by testing incoming pupils and advising for those requiring consideration.

### The New Courses of Study

In making surveys throughout both urban and rural areas in the province, the beneficial effects of the New Courses of Study on the educational welfare of both handicapped and normal children have been noted with interest. There is undoubtedly a new enthusiasm for school which is more particularly apparent among backward adolescents and pupils who were formerly problem cases. Much of this enthusiasm is due to the activity programme recently introduced. Pupils who are not word-minded find that they can compete on equal terms with their fellows when they are given an opportunity to express their ideas in sand-table pictures, mural decorations, and the construction of models. Ability in reading and eagerness for books, especially among adolescent pupils, are other benefits which feature the introduction of the new programme. It is noted, however, that the intelligence tests given this year record an unusual number of fantastic reproductions of the drawing test (year ten) and jumbled responses to the number-repeating tests of years seven and ten. A high correlation was found to exist between such fantastic responses and the over-promotion of pupils on the basis of age rather than achievement. Since such fantastic responses usually indicate a state of chronic or temporary mental confusion, one is forced to the conclusion that in an attempt to avoid the formation of an inferiority complex through forcing pupils to repeat grades, the sympathetically minded teacher who promotes all pupils annually irregardless of their academic fitness may be pursuing a course dangerous to the mental integrity of some of her pupils. The boy who repeats a grade is at least pursuing a course more or less within the measure of his ability, while a pupil who is seriously over-promoted finds himself frustrated and defeated in the great majority of his attempts. This is more particularly true where backwardness has as its basis an inability to read.

### Publications

The Special Class Teacher, a magazine devoted to the interest of special education, and published by the Auxiliary Class Section of the O. E. A., has doubled its subscription list within the last three years. Its efficient and progressive staff turns out a periodical whose general articles on various phases of special education are nicely balanced by a wealth of practical suggestions from teachers engaged in actual field work.

Life and Literature, Book II, the reader for Grade VIII, was reproduced this year in 24 point type by the publishers, W. J. Gage and Co. The book is published in three volumes, printed on sight-saving paper and bound with wire-o binding which permits the book to be turned back when in use. It is hoped that the Grade VII reader may be enlarged in the same way during 1939.

Through experiments conducted by Miss Helen DeLaporte, Assistant Inspector of Auxiliary Classes, there was established the value of a six-inch semi-cylindrical magnifying glass, known as the "Ezyrede", for pupils who are partially handicapped as to eye-sight. The glass enables such pupils to consult the dictionary, to read arithmetic questions, and to make other brief use of printed matter in relatively small type. With the concurrence of the physician concerned, this magnifier is approved as equipment in sight-saving classes and units.

#### Organization

All teachers of Auxiliary Classes are especially trained in a five weeks' summer course. In 1938 a tri-part course was given: I and II for teachers having at least an Interim Second Class certificate and two years' successful teaching experience in the province who wished to qualify as teachers of (1) Opportunity and Handicraft Classes, (2) Speech, Sight-Saving, Home-Instruction and Hospital Classes; (III), a general course for teachers who wished to improve their professional standing. One hundred and one took the first course, 41 the second and 32 the third.

Brief courses were given in each of the eight provincial Normal Schools to acquaint teachers-in-training with methods of dealing with auxiliary-type pupils, especially in rural schools. The many inquiries received by the Department from recently graduated teachers concerning the educational welfare of exceptional children in their charge is evidence of interest aroused by these Normal School talks.

Through the co-operation extended by their respective school boards, a great many special class teachers throughout the Province took advantage of the proximity of the meeting of the Council for Exceptional Children in Buffalo this year. The teachers from Ontario gained a great many practical ideas from their visits in the special classes of that city and renewed their enthusiasm through conferences with many of the leading educators in the neighbouring republic.

H. E. AMOSS,

*Inspector of Auxiliary Classes.*

Toronto, February 28th, 1939.

## APPENDIX H

## REPORT OF THE DIRECTOR OF SCHOOL ATTENDANCE

The old saying that all men are born free and equal is true only to a certain extent. 'Tis true that, in this country, all are freeborn, but all are not as fortunate in other ways. All are not endowed with the same mental ability; all have not the same advantages of environment and lineage; and all, as they develop, are not given the same care and attention. The state endeavours to do its part by providing the best facilities for the development of the child and by making it compulsory that he should attend until he is sixteen years of age.

During the academic year just closed (1937-38), there was an increase in the number of our elementary schools, the total being 7,286 composed of 6,452 Public and 834 Separate Schools. In the preceding year the corresponding figures were 6,347 and 812. The incoming year will show another increase in spite of the fact that many of the smaller schools were closed and the pupils transported to other schools, much to their advantage.

## Enrolment

Table No. 1

	1935-36	1936-37	1937-38	Increase or Decrease over 1936-37
Public Schools.....	460,785	455,365	454,509	856 decr.
Separate Schools.....	101,152	100,348	102,505	2,157 incr.
High Schools and Collegiate Institutes.....	67,899	67,088	68,700	612 incr.
Continuation Schools.....	9,464	8,996	9,251	255 incr.
Vocational and Special Industrial Schools—				
Day Classes.....	35,418	36,256	37,748	1,492 incr.
Night Classes.....	24,360	25,930	32,083	6,153 incr.
	699,078	693,983	704,796	10,813 incr.

The enrolment for the elementary and secondary schools in Ontario increased 10,813 and the Separate Schools 2,157 during the year, but the enrolment in the Public schools showed a decrease of 856.

## Checking Attendance

At the present time there have been appointed by various bodies 1496 attendance officers, 450 in the urban centres, 887 in the county rural sections, and 159 in the unorganized districts. It is the duty of these officers to investigate undue absence of pupils and to take such action as they may deem advisable to have the pupils returned to school at the earliest possible opportunity. The School Attendance Act and the Adolescent School Attendance Act give them authority to summon the parents before a magistrate but this is done only when other efforts have proved unsuccessful. The Welfare Department, in cases of privation, and the Children's Aid, in cases of neglect, have been of great assistance in relieving difficulties. Big Brothers and Big Sisters, Service Clubs, Church societies, Women's groups, Neighbourhood Workers, Home Visitors, and other benevolent and charitable organizations have at various times lent a helping hand.

Table No. 2

(Showing percentage attendance since 1934-35)

Class of School	1934-35	1935-36	1936-37	1937-38	Increase in % over 1936-37
City Schools.....	91.70	91.87	92.49	92.96	.47
Town Schools.....	92.77	91.62	92.67	93.08	.41
Village Schools.....	91.57	91.39	91.83	91.95	.12
County Rural Schools.....	89.29	88.17	87.65	88.77	1.12
District Rural Schools.....	87.33	86.29	87.22	86.85	.37 decr.
All Urban Schools.....	91.94	91.64	92.49	92.92	.43
All Rural Schools.....	88.97	87.85	89.34	89.13	.21 decr.
All Elementary Schools.....	90.83	90.27	90.91	91.51	.60

## School Leaders in Attendance

In 1935-36	Per Cent.	In 1936-37	Per Cent.	In 1937-38	Per Cent.
City of Galt.....	95.34	City of Galt.....	96.10	City of Galt.....	95.69
Town of Chelmsford ..	96.85	Town of Palmerston.	96.22	Town of Elmira.....	97.41
Village of Port Perry ..	96.51	Village of Port Perry.	96.98	Village of Mildmay ..	96.28
County of Waterloo...	93.41	County of Waterloo..	93.54	County of Waterloo..	93.46
District of Nipissing...	89.17	District of Algoma ..	89.04	District of Kenora ..	89.36

The City of Galt has the distinction of having led the urban centres, and Waterloo the Counties of the Province, in percentage attendance for the past three years—an enviable record.

## Public School Attendance

Table No. 3

Public.....	406,956	91.05	16.98	404,882	91.22	16.39
Separate.....	92,174	92.87	13.42	94,360	92.80	12.60

The percentage attendance for all elementary schools for 1937-1938 was 91.51 and the average loss per pupil was 15.70 days.

## Losses in the Elementary Schools

Table No. 7

Days lost through	1937-38	Percentage Loss			
		1934-35	1935-36	1936-37	1937-38
1. Illness.....	5,449,834	66.09	62.96	65.41	62.39
2. Home Help.....	865,606	8.48	7.67	9.11	9.91
3. Parental Neglect.....	606,879	5.48	5.10	5.92	6.95
4. Physical Obstacles.....	332,034	2.63	4.39	2.62	3.81
5. Truancy.....	28,205	.27	.24	.28	.32
6. Privation.....	90,752	.98	.95	1.04	1.04
7. Irregular Closing.....	510,943	3.44	6.96	4.56	5.85
8. Other Reasons.....	850,340	12.63	11.73	11.05	9.73
Total days lost.....		9,728,239	10,248,309	9,083,567	8,734,593
The above losses are classified—					
Lawful.....		7,457,039	7,790,825	6,845,284	6,329,014
Unlawful.....		2,271,200	2,457,484	2,238,283	2,405,579
Percentage attendance.....		90.83	90.27	90.91	91.51

From the above figures it will be seen that there has been a steady decline in losses due to illness. Curiosity has led us to investigate this loss to a greater degree and while there are no statistics available showing just what these various illnesses were, yet statistics from other sources where conditions are, on the whole, quite similar, show that about 50 per cent. are due to respiratory diseases, colds, sore throat, and similar ailments; about 20 per cent. due to more prolonged diseases such as measles, mumps, whooping cough, scarlet fever, and chicken pox; 5 per cent. due to digestive disorders; 5 per cent. to headaches; and 5 per cent. due to toothaches and affections of the eyes and ears. The remainder of the absences is due to accidents and miscellaneous ailments, many of them related to or growing out of the above disorders.

With better ventilation in schools, with better care of the clothing of children, and by adequate isolation of pupils with respiratory disorders, these ailments could be considerably reduced. By vaccination and by examination on the part of the teacher and exclusion of suspects, the "common" communicable diseases (other than respiratory) would become less common. With good hygiene for which the school is now more responsible, there is hardly an excuse for digestive disorders and real headaches, while with adequate medical and dental supervision, toothache and eye troubles should almost disappear. With such prevention, illness from miscellaneous causes should diminish. On the whole, the amount

of sickness would be reduced, retardation losses lowered, physical standards raised, and a better foundation laid to resist the ills and diseases of the adult.

Losses due to Home Help and Parental Neglect are apparently growing, but on the other hand, the increase in these losses may be due to a more careful classification, thus partly explaining the decrease in "Other Reasons". Weather conditions are shown in the increase in the Physical Obstacles losses and partly in the Irregular Closing losses. Some Boards have not yet realized that they have no power to close a school and that every day a school is irregularly closed means a reduction in the grant. Schools are sometimes closed for funerals because that has been the custom in those particular sections, although the deceased may never have taken an active interest in the community at all. Schools are sometimes not opened on time because of the tardiness of the Board in making necessary repairs or engaging a teacher. They are sometimes closed a day early or opened a day late to give the teacher a little longer holiday. All such losses could and should be avoided.

### Secondary Schools

The number of Secondary Schools remains the same: Collegiates, 70; High Schools, 156; Continuation Schools, 206; Vocational Schools, 59; and Special Industrial, 5. Total, 496.

Table No. 8

Schools	Enrolment		Per Cent. Attend.	
	1936-37	1937-38	1936-37	1937-38
High Schools and Collegiates.....	67,088	68,700	94.28	95.72
Continuation Schools.....	8,996	9,251	91.94	93.42
Vocational and Special Industrial Schools				
Day.....	36,256	37,748	*92.79	*93.34
Night.....	25,930	32,083		
	<u>62,186</u>	<u>69,831</u>		
	138,270	147,782		

\*Day Schools only.

Table No. 8 shows an increase in Secondary School enrolment of 9,512. The percentage attendance has reached the high mark of 94.79.

While the vast majority of the children in Ontario are in regular attendance, yet there are some who are not so fortunate—some who live a long distance from school, as is the case with some pioneer families in the ever-extending northland; some who are handicapped through the physical infirmities of blindness and deaf-mutism, as well as natural constitutional weaknesses and the ravages due to poliomyelitis; some who through prolonged illnesses are confined to hospitals and sanatoria; some who are less mentally endowed. Such special cases are, however, being cared for in various ways. The world of to-morrow will be built by the children of to-day, and every child should be equipped in the best possible manner that he may play his part to the best of his ability in the not far distant future.

R. D. KEEFE,

*Director of School Attendance.*

Toronto, July 10th, 1939.

## APPENDIX I

### REPORT OF THE SUPERINTENDENT OF THE ONTARIO SCHOOL FOR THE DEAF

I have the honour to submit the Annual Report of the Ontario School for the Deaf for the year ending March 31st, 1939.

#### Attendance

##### Enrolment by months:—

	Boys	Girls	Total
April, 1938.....	142	140	282
May.....	142	140	282
June.....	142	140	282
September.....	145	141	286
October.....	146	146	292
November.....	149	147	296
December.....	149	147	296
January, 1939.....	154	151	305
February.....	152	151	303
March.....	152	152	304

Average attendance for the year—293.

##### Enrolment by counties and districts:—

Algoma.....10 pupils	Muskoka.....3 pupils
Brant.....6 "	Nipissing.....5 "
Bruce.....4 "	Norfolk.....2 "
Carleton.....15 "	Northumberland.....2 "
Cochrane.....4 "	Ontario.....4 "
Dufferin.....1 pupil	Oxford.....7 "
Dundas.....3 pupils	Parry Sound.....6 "
Durham.....2 "	Peel.....1 pupil
Elgin.....1 pupil	Perth.....4 pupils
Essex.....26 pupils	Peterborough.....3 "
Frontenac.....7 "	Prescott.....1 pupil
Glengarry.....1 pupil	Rainy River.....4 pupils
Grenville.....1 "	Renfrew.....7 "
Grey.....2 pupils	Russell.....1 pupil
Haldimand.....3 "	Simcoe.....6 pupils
Halton.....3 "	Stormont.....1 pupil
Hastings.....10 "	Sudbury.....13 pupils
Huron.....3 "	Thunder Bay.....9 "
Kenora.....3 "	Timiskaming.....18 "
Kent.....7 "	Victoria.....1 pupil
Lambton.....1 pupil	Waterloo.....12 pupils
Lanark.....6 pupils	Welland.....9 "
Leeds.....6 "	Wellington.....5 "
Lincoln.....2 "	Wentworth.....15 "
Middlesex.....10 "	York.....59 "

Enrolment by cities:— (These pupils are also included in the enrolment by counties and districts).

Brantford.....5 pupils	Peterborough.....2 pupils
Fort William.....4 "	St. Catharines.....1 pupil
Hamilton.....11 "	Port Arthur.....3 pupils
Kingston.....4 "	Sault Ste. Marie.....6 "
Kitchener.....7 "	Toronto.....39 "
London.....9 "	Windsor.....13 "
Ottawa.....10 "	

Twenty-six pupils left school during the year, and forty-six new pupils were admitted.

The ages of pupils leaving school were:—

21 years.....	0 pupils	15 years.....	2 pupils
20 " .....	2 "	14 " .....	2 "
19 " .....	5 "	13 " .....	3 "
18 " .....	4 "	12 " .....	1 pupil
17 " .....	4 "	10 " .....	1 "
16 " .....	1 pupil	6 " .....	1 "

Eight of the ten pupils under sixteen years of age, who left school during the year, are not attending any school, but may return to this school again next year.

Ages of new pupils on date of admission:—

4 years.....	1 pupil	12 years.....	0 pupils
5 " .....	6 pupils	13 " .....	2 "
6 " .....	4 "	14 " .....	3 "
7 " .....	9 "	15 " .....	3 "
8 " .....	5 "	16 " .....	3 "
9 " .....	0 "	17 " .....	1 pupil
10 " .....	1 pupil	18 " .....	0 pupils
11 " .....	7 pupils	19 " .....	2 "

Only seven of the new pupils over eight years of age had not attended any school before being admitted to the Ontario School for the Deaf. Two of these, who were nineteen years of age on admission, had no knowledge whatever of spoken or written English.

All applicants for admission were tested by means of the Ontario School Ability Examination. As a result of these tests eleven children were refused admission and the date of entrance of thirteen others was postponed for at least one year.

#### Excerpts from Inspector's Report

The following excerpts are taken from the report of Dr. H. E. Amoss, Inspector of Auxiliary Classes, after his annual inspection of the school:—

The boys', girls', and the junior residences are being well looked after. The sitting rooms in both the senior boys' and senior girls' residences are being improved through the addition of a number of comfortable chairs made in the furniture shop. These chairs are a credit to the vocational plant and will do much to make the barren quarters more attractive and home-like.

As noted in the 1938 report, consideration must be given in the near future to the construction of a new vocational building and gymnasium to replace the two ancient vocational buildings now in use and to provide much needed gymnasium facilities, especially during the Autumn and Spring between seasons.

It is understood that the construction of a new heating plant is being contemplated.

The various duties of the service staff are being carried out efficiently. The school plant is clean, tidy, and in a good state of repair. The children are being well cared for and there is every evidence of harmonious co-operation.

A picture of the student body is given in the following age-grade and attendance-grade tables in which connection it is noted:

1. Compared with the report of 1937-38:—

(a) There is an increased attendance of 22. This increase is largely to be found in the intermediate and senior schools.

(b) The mean age of pupils in the Junior First Preparatory forms has lowered from 8 years 3 months to 7 years 5 months. The earlier age of entry has resulted from the earnest effort of the Superintendent to get in contact with candidates throughout the Province; the rural surveys being conducted by the Auxiliary Branch; the heightened reputation of the school as an institution; the co-operation being extended by the adult deaf and the hard-of-hearing; the better placement

of graduates which may in part be attributed to the introduction of a vocational guidance course and in part to the earlier age of graduation; the success which has attended the introduction and use of oral methods of instruction; and the widening interest which is being displayed throughout the Province in the welfare and well-being of the deaf.

(c) The mean age of the entire intermediate school has been reduced from 13 years 0 months to 12 years 6 months and this in spite of the fact that attainments in reading and arithmetic throughout the school are decidedly ahead of those in 1937-38. It is to be noted that the mean age throughout the intermediate and senior schools has been reduced almost three years since September, 1934.

(d) That the use of the Ontario School Ability Examination as a test of eligibility preparatory to acceptance for admission has been the means of eliminating the unhappy procedure of accepting pupils for entrance and returning them home as unsuitable. Some eleven children this year were refused entrance as being temporarily or permanently unable to make school progress. The school accepts all candidates not unsuitable from a physical or mental hygiene standpoint who are above five years mentally and who have an I.Q. above 50. Several pupils in a Junior II Class who are borderline cases and who have been given fair trial over periods of from one to five years might well be permanently graduated next June as being incapable of further training.

(e) Deaf children enter the school not only without language but without conception of language as a vehicle of communication or as a means of carrying on thinking. Three years (preparatory) are devoted to the inculcation of an art possessed by every hearing child on his entrance to a public school.

(f) Children who enter school late in life or children whose cerebral language areas are undeveloped from any cause, do not absorb language readily either as speaking, reading or thinking. Such pupils pass up through the intermediate and senior school as V classes in order that by annual promotions they may remain in contact with their age groups and receive normal training in mathematical, social and vocational departments. The A classes comprise pupils whose language facilities are comparable with those of hearing pupils of similar school grades.

(g) The teaching of language throughout the school, but especially in the Junior Department, has improved greatly during the past four years as evidenced by the earlier age at which pupils begin to read, the superior use of English in letter-writing and composition, and the astonishing growth of a desire to read for the pleasure of reading. This improvement would seem attributable to: (1) a wider use of the synthetic (practice) method in contradistinction with the old analytic method; (2) a more extended and systematic use of hearing aids; (3) provision of libraries in the residences and of a newspaper reading room in the school; (4) the segregation of juniors in the junior residence and the consequent delay in their acquisition of the sign language; (5) the compilation of pictorial dictionaries in the fourth year junior schoolrooms.

### The Teaching Staff

Misses V. Sheffield and N. Tett resigned in June to be married. By transferring Mr. Cunningham from the department of physical education to the senior academic school, Miss Harris and Mr. Hodgson were appointed to fill the vacant positions.

Miss C. Connell, who had been matron of the girls' residence and director of girls' physical education for two years, resigned in June and was succeeded by Miss Maloney who had had a very wide experience in teaching.

Owing to the appointment of Miss G. Conover to the staff of the Toronto Normal School in October, Miss H. Waite was appointed as teacher of the senior sewing classes. Miss Waite had had a varied experience in practical sewing.

The increased attendance made necessary the appointment of an extra teacher and Miss M. Hill was engaged, her duties beginning on January 3rd, 1939.

The five new teachers were carefully selected for their gifts to teach handicapped children. They are taking the new Normal Training Course for Teachers of the Deaf and all have made a successful beginning in their classrooms.

### Pasteurized Milk

With the introduction of the new law requiring that all milk sold in Ontario must be pasteurized, all milk produced on the school farm has been collected in the morning by a local dairyman, pasteurized, and returned to the school by

noon. While all milk produced is from a T. B. tested herd of pure Ayrshire cows the additional protection afforded by pasteurizing the milk is greatly appreciated.

#### Exhibit at Canadian National Exhibition

A display of pupils' work and a demonstration of vocational work were presented at the Canadian National Exhibition in Toronto in 1938.

The purpose of the exhibit was to demonstrate to the public the capabilities of the deaf in handling machinery in the hope that our boys and girls will have less difficulty in finding jobs after they leave school.

The exhibit under the direction of Mr. R. H. Vaughan was very successful and we express our appreciation to the A. R. Williams Machinery Company, the Singer Sewing Machine Company, and the Canadian National Exhibition Board for making this exhibit possible. Deaf boys and girls worked on machines for several hours each day of the Exhibition.

#### The School Calendar

All activities of the School are recorded in the school paper, *The Canadian*. The following calendar of events taken from its files are indicative of the broad and practical training the pupils receive:—

April 29th—A concert was presented in the auditorium of the Belleville Collegiate Institute. The following excerpts are taken from the report of the concert in the *Ontario-Intelligencer* of Belleville:

Perfect in its staging, performance and finish, the Concert given Friday evening, April 29th, by the students of the Ontario School for the Deaf won the whole-hearted admiration of a large audience in the Collegiate auditorium when one hundred and fifty children took part in dancing, dramatics, music and gymnastic display. Spectators had to re-assure themselves again and again that the little ones were really deaf, that their only response to music was through vibrations in the floor, for the presentation of the numbers was flawless.

The exhibition, however, was not merely a specially executed programme; it was more of a demonstration of the actual educational work carried out daily at the school where the development of the healthy child is aided through instruction in music, dancing and athletics.

The Toy Shop was the stellar presentation of the evening and introduced the audience to the most charming wares any toy shop could boast of.

May 5, 1938—School concert at Trenton.

May 19th—Annual boys' banquet and sports' night in assembly room. This banquet marks the culmination of the recreational programme of the entire year.

May 26th—Annual banquet of girls' athletic association and girl guides. Guests included Mrs. L. Riggs, Divisional Commissioner, Girl Guides; Mrs. Durley, District Captain; and a number of other officials of the girl guides.

June 8th—Exhibition of pupils' work from the vocational classes; Open House for visitors.

June 10th—Closing Exercises, presentation of certificates and diplomas.

June 18th to 22nd—Twenty-fourth Biennial Convention of the Ontario Association of the Deaf, held at O. S. D.

June 27th to July 1st—The Superintendent, the Directress of Professional Training and four teachers attended the 1938 Summer meeting of the American Association to Promote the Teaching of Speech to the Deaf, held in the Detroit Day School. Miss Ford read a paper on the topic "Language for the Slow Child."

October 17th—Mrs. Nellie McClung visited the school and addressed the teaching staff. An article by Mrs. McClung written later for the Toronto *Telegram* and other papers was very complimentary.

October 29th—Annual Hallowe'en Party for seniors.

November 5th—Annual Hallowe'en Party for intermediates.

November 7th—Visit of the Honourable L. J. Simpson, M.D., Minister of Education. During the day Dr. and Mrs. Simpson visited the school and observed the work being done by the pupils in the classrooms and shops. In the afternoon the Minister addressed the teachers and in the evening was guest of the Belleville Board of Education at a complimentary banquet.

December 7th—Fourth Annual Christmas Bazaar.

December 27th—Christmas Pageant in auditorium of school.

February 11, 1939—Ice Carnival.

### Bursar's Report

C. B. MCGUIRE,

*Bursar.*

**Report of School Physician**

The following is the report of the School Physician. Total admissions to hospital from April 1, 1938 to March 31, 1939, were 479. These included two cases of fractured arms, three cases of lobar pneumonia, one mastoidectomy, and one appendectomy.

During February and March 172 cases of influenza occurred. During the epidemic, and owing to the infection, a boy of twelve died as the result of diabetic coma.

In the course of the year 26 children were vaccinated against smallpox, 41 were given scarlet fever immunization, and 29 were given diphtheria toxoid.

R. W. TENNENT,  
*Physician.*

Respectfully submitted,  
W. J. MORRISON,  
*Superintendent.*

Belleville, May 10th, 1939.

## APPENDIX J

# REPORT OF THE SUPERINTENDENT OF THE ONTARIO SCHOOL FOR THE BLIND

### Foreword

"The impossible is only the untried."

### Enrolment

	Boys	Girls	Total
Enrolment, January 1, 1938.....	80	71	151
Admitted January 1 to June, 1938.....	0	1	1
	80	72	152
Withdrawn January 1 to June, 1938.....	1	2	3
	79	70	149
Left June, 1938.....	4	9	13
	75	61	136
Admitted September, 1938.....	16	13	29
Admitted March 1, 1939.....	1	0	1
	92	74	166
Withdrawn September, 1938, to January 1, 1939.....	1	0	1
Withdrawn April 6, 1939.....	1	0	1
Enrolment, June, 1939.....	90	74	164

### Graduates and Withdrawals

Age	No. Pupils	Reason for Withdrawal
8	1	Heart condition.
11	1	*Returned home after illness—brain tumour.
13	1	Remained at home on account of illness.
13	1	†Epileptic.
15	1	Went to work on father's farm.
16	1	At home on account of illness.
17	1	Remained at home to help mother.
18	1	Went to work.
19	4	One took Home Teacher's Course at Canadian National Institute for the Blind, Toronto, and is now employed as Home Teacher.
		One went to work in Canadian National Institute for the Blind shops, Winnipeg.
		One stayed at home on account of illness (diabetic).
		One went to work in father's store.
21	2	One at home.
		One at work in Canadian National Institute for the Blind shops, Toronto.
22	3	All three completed the course. One is employed as Home Teacher, Toronto.
		‡One entered University of Alberta.
		§One completed musical training—excellent student.
	17	

\*This little girl was a very brilliant student. She had had a brain tumour operation before coming to us, and the condition again became aggravated, resulting in her death some months after she left school.

†This is the last of three pupils afflicted with epilepsy, all of whom we have had to exclude. May I again point out that I feel a home should be established for blind children who are prevented from attending school through mental disability, physical disability, or both.

‡This Alberta lad entered the University of Alberta last September. He is taking a course in Economics and History.

§All of our graduates were placed in employment with the exception of this one boy.

## New Pupils in Age Groups

Age	No. Pupils	Age	No. Pupils	Age	No. Pupils
6 years.....	1	*13 years.....	4	19 years.....	1
7 ".....	1	14 ".....	5	20 ".....	1
9 ".....	1	15 ".....	1	‡22 ".....	1

11 ".....	2	17 ".....	1		
12 ".....	1	18 ".....	1		31

\*One of these thirteen-year-old lads was a re-entry in September.

†This 22-year-old pupil lost her sight as a result of a brain tumour last year, and came to us for training and orientation to blind life. She has made a remarkable adjustment, and will unquestionably make her way upon graduation.

‡The Government of Alberta requested us to accept this girl for a year's training.

## Mental Ratings of New Pupils

Intelligence Quotient	No. Pupils	Intelligence Quotient	No. Pupils
140 plus .....	1	75-90 .....	4
120-140 .....	2	50-75 .....	3
110-120 .....	5

Comment on Age-Grade Table

The mean age in Grade I in the Ontario School for the Blind, as will be seen in the accompanying Age-Grade Table, is nine years, six months; throughout the primary schools of the Province, seven years. The mean age of Grade VIII at the Ontario School for the Blind is sixteen years, eight months; throughout

the Province, thirteen years, eight months. It is thus seen that the blind progress as rapidly through the Public School grades as do the seeing, the age-grade difference being more than accounted for by the late age of entry.

### High School

As shown by the table "Enrolment by Grades," our High School Department is made up of Grades IX, X, XII, and a group of special students. We covered courses leading to matriculation in Music, English, French, British History, Spanish, Geography, Mathematics, Science, Typewriting, Sewing, Knitting, and Boys' Industrial Shop.

It would seem that Science and Mathematics should be very limited in a curriculum for the education of the blind. Our students do the work in Language and History quite as well as the seeing. The work in Music is much more advanced than the curriculum calls for. We train for a full A.T.C.M. degree.

Fifteen of our High School students passed a partial junior matriculation this year. One of our graduates of June, 1938, entered the University of Alberta and completed a very successful first year in Economics and History. A Saskatchewan graduate finished his Bachelor of Arts degree at the University of Saskatchewan.

### Library Report

Total enrolment.....	164
Number of pupils borrowing books.....	146
Total number of volumes read.....	2,059
Average number of volumes per pupil.....	14.10
Number of volumes added to the Library during the year.....	116

A number of our High School students have also been regular borrowers from the Library for the Blind in Toronto, as they have exhausted our own library.

### Health Education

We regard education for health and the development of good physique as our first duty. To that end, every child in the school has a health education period of at least forty minutes every day. This is in addition to hikes and walks with Scouts and Guides, and free time in the open air for a minimum of an hour per day.

Miss Behrens has done extensive and efficient work with her folk dance units in the gymnasium. Last month we had an inter-school meet with the New York School for the Blind of Batavia. Some of the top figures for that meet were as follows:

Climbing a 16-foot rope.....	3 seconds.
Throwing the basket ball.....	105 feet.
75-yard dash.....	8 $\frac{4}{5}$ seconds.
Standing broad jump.....	9 feet, 10 inches.
Three consecutive broad jumps.....	29 feet, 6 inches.

Of the sixteen boys representing the two schools, six are totally blind. The outstanding athlete of the meet is totally blind. This lad, who is twenty years old, made four of the five records above. Except in the broad jumps, he was closely followed by the other competitors. I have given these statistics to

show that the blind can be trained to achieve top standing in lines of endeavour where seeing folk would think sight essential. Finally, I should explain that the blind boy does his sprint guided by a leather tab attached to a cable by means of a metal ring. Otherwise he could not maintain a straight course. But even with this handicap, the best do a measured 75 yards in 8  $\frac{1}{10}$  seconds.

### Industrial Shop

During the year we have used an electrically-driven lathe. We built shields about the lathe to avoid accidents. It has been of considerable value to us in turning out material for such projects as table legs and fern stands.

During the year the boys built two full-size row-boats. These were tested and put to good use at Thayendanegea Camp during our camping week-ends in June. Indeed, the camp authorities asked us to donate one for the use of summer campers throughout the season. The boys who conceived this project and did the major part—if, indeed, not all the work—are totally blind.

A down-town friend and former Master at the Brantford Vocational School, Mr. Hudson, together with the boat builders, made a Braille graduated yard-stick with gauges suitable for the use of the blind.

The senior classes repaired school furniture and did caning for outside customers to the amount of over sixty dollars.

### Extra Curricular Activity

On June 13th, the School presented Edward German's light opera, "Merrie England." This opera demanded skill of a high order, not only in the interpretation of the spoken word, but also in the interpretation of song. The story is set in the days of "Good Queen Bess," and introduces the Queen, Sir Walter Raleigh, Essex, pages, courtiers, a May Queen scene, and some enjoyable comedy.

The opera was staged in the beautifully wooded school grounds. There was the bank of the Thames with the royal barge, and Windsor Forest. The Egyptian and English country dances were exquisitely executed for the Royal Court in Windsor Forest. Possibly the highest achievement was the costuming—over seventy people with colourful costumes all definitely in period.

Our Guides and Scouts have had busy and successful years. They both contributed largely to city-wide rallies during the year. Seventy of our senior students again used Camp Thayendanegea for long week-end camps. They went out, sexes separately, Friday at 3.00 p.m., and returned Sunday evening. They cooked their own meals, swam, rowed, danced, played ball, and came home feeling that the time had been all too short.

### Music

In our Music Department we have given instruction as shown below:

Piano.....	121 students
Orchestra.....	48 students
Individual.....	30 students
Choral (in three separate groups).....	Whole School
Musical Theory and History for Toronto Conservatory Examinations.....	31 students

The following is a list of candidates who passed Conservatory examinations:

1938

Viola Switch..... <i>First Class Honours</i>	

At the Stratford Musical Festival in February, 1939, our students won the following honours:

Small Madrigal Choir.....	<i>First Prize and Stratford-Beacon Herald Trophy</i>
Ladies' Ensemble.....	<i>First Prize and Mrs. McLagen Cup</i>
Ladies' Trio.....	<i>First Prize—Gold Medals</i>
Ladies' Duet.....	<i>Second Prize—Silver Medals</i>
Mixed Quartet.....	<i>First Prize—Gold Medals</i>
Baritone Solo.....	<i>First Prize—Gold Medal</i>
Soprano Solo.....	<i>First Prize—Gold Medal</i>

Miss Helen Self, who won the gold medal in the soprano class also won the Medlyn Trophy for the finest performance of all gold medallists in the festival under twenty-one years of age. Along with the Medlyn Trophy, Miss Self won a fifty-dollar scholarship.

#### Services to the Community

The following is a list of services rendered to the community by students of our school:

English teachers on exchange in Toronto visited the city as guests of the Brantford Teachers' Federation, and were entertained at the school with afternoon tea, a tour of the school, and musical entertainment by our pupils.

One of our senior boys played a violin solo at a meeting of the Victoria Home and School Club.

One of our senior lads gave an original address on "Sir Wilfrid Laurier" at an I.O.D.E. meeting of the Brant Chapter.

A full evening's concert was presented by a group of our pupils at the United Church in Otterville.

Our musical director, Mr. Lord, is also the organist at the First Baptist Church. During his absence from the city, members of our senior choral class took over the musical part of the Sunday Church service. One of our boys played the organ throughout the whole service—for hymns, offertory, solos and anthems.

The superintendent addressed the Windsor Canadian National Institute for the Blind, giving details of the school's work in his talk.

A full evening's concert was given at the Oakville United Church by our senior pupils.

Miss Esther Murray, one of our academic teachers, gave a talk on the work of the school at Blow's Corners. She took two of our senior pupils along to give vocal solos.

Miss Sue Miller of our music staff and her choral groups presented a full evening's concert at Brantford Sydenham United Church.

Miss Esther Murray gave an address at Woodstock on the work of our school, and was assisted during the evening by musical numbers from two of our senior pupils.

Under the direction of Miss Miller, our choral students contributed to the programme of the local Canadian National Institute for the Blind.

On the night of school closing for the Christmas holidays, at the request of C.N.R. officials, our senior pupils sang carols at the C.N.R. station,—the occasion being a staff party of C.N.R. employees.

Members of our senior Girls' "Star Fourteen Club" entertained members of the Widow's Home.

One of our junior boys played the timpani at a concert given by the Colborne Street Church.

Our self-taught junior jazz band, by request played at a banquet given by Scouters of the city.

One of our junior boys read the scripture lesson at Wellington Church service,—from Braille Bible.

Members of Brant Avenue United Church attended the church supper, contributing numbers to the concert after the supper.

Dufferin Public School pupils visited our school to receive certain instruction regarding orchestral instruments from our Musical Director, Mr. Lord. He was assisted in this demonstration by some of our orchestra members.

Under the direction of Miss Sue Miller, our senior pupils presented a concert at the Scottish Rites Temple in Hamilton. Masons from Brantford drove our party to Hamilton.

One of our senior boys sang at a meeting of St. Basil's Young People's Association.

Our Senior Boys' Dance Orchestra went to Burford to play for a dance given by the Rebecca Lodge.

One of our junior orchestra members played the timpani in a concert given by a city organization at the Collegiate Institute.

The Superintendent spoke at a meeting of the I.O.D.E. on the work of the school, and took along a group of our pupils to assist with musical numbers.

During Easter week, Mr. Lord and our madrigal group went to the O.E.A. meeting. Mr. Lord gave a talk on music, and our madrigal group assisted with certain numbers.

Miss Zella Perry of our music staff addressed a meeting of the Music Teacher's Association. One of our senior students assisted her to demonstrate methods of teaching music to blind students.

Our Jazz orchestra played at a meeting of "Native Sons."

Members of our senior boys' gymnasium classes demonstrated "pyramid building" at the local Y.M.C.A. Circus. They also gave this same demonstration at a city wide Scout Rally.

Our pupils presented a concert in Hamilton under the auspices of the Hamilton C. N. I. B.

Miss Murray spoke at Fairfield United Church on the work of our school, taking with her junior pupils to demonstrate our methods of teaching.

#### Acknowledgments

We wish to make acknowledgment of the following gifts and entertainment in connection with our school:

To Mr. E. Moule, Manager of the Capital Theatre, for entertainment of our pupils at various shows during the season.

To Brant Avenue Church officials for an invitation to attend a lecture on Nova Scotia.

To Mr. Lord and his Canadian Choir for an invitation to attend their concert, given on the occasion of Lieutenant-Governor Matthew's visit to Brantford.

To St. Jude's Church for the entertainment of our Girl Guides.

To Brant Avenue Church Dramatic Club for inviting forty of our pupils to attend their production of "Enchanted April."

To Mr. Burkwall, a missionary from China, for his delightful talk on China to our student body.

To Mr. Ellsworth Jaeger of Buffalo, New York, for his address to our students, on "A Woodland Symphony." Mr. Jaeger illustrated his talk by many imitations of calls of wild animals, and made it a thoroughly delightful occasion for our young folks.

To the Brantford Collegiate Institute Dramatic Club, for inviting thirty-six of our students to attend their production of "Twelfth Night."

To Mr. E. V. Brown, Principal of Lower School, Ridley College, and twelve of his students for a gift of \$50.00 to assist less fortunate boys of our school in clothing, etc.

To Ernest Cuthbertson, Secretary of the local Boy Scout Association, for entertainment of our boys at various times during the year.

To the local C.N.I.B. for entertainment of our pupils.

To the Schubert Choir for tickets for our senior pupils for their spring concert. This concert was later presented at the New York World's Fair.

To the Brant Chapter of the I.O.D.E. for the gift of a beautiful flag to our Girl Guide Troop, and for money for talking-book records and public speaking prizes.

#### Canadian National Institute for the Blind

Throughout the year, the officers of the Canadian National Institute for the Blind have been of inestimable service to us in helping to finance some of our indigent students, in finding new students who should enrol, and in preparing them and their parents for their first school experience.

Most especially do we appreciate what Col. E. A. Baker and his placement staff do for our graduates. During these past difficult five years, they have given

all of our graduates employment. It seems a sort of anomaly, but nevertheless it is true, that our students during their graduating year journey more hopefully and more confidently than the seeing friends about us.

I herewith submit reports from Dr. J. A. Marquis, Physician; Dr. Norman Bragg, Ophthalmologist; Dr. J. R. Will, Dentist; and Mr. G. H. Ryerson, Bursar:—

#### Report of Physician

I submit herewith a report on the health of pupils and staff of the Ontario School for the Blind from January 1, 1938, to June 30, 1939:

Total number of patients.....	217
Total number of hospital days.....	1,264
Infections and boils.....	12
Vaccination reaction.....	2
Toxoid reaction.....	2
Colds.....	21
Sore throat.....	5
Influenza.....	93
Bilious attack.....	22
Vertigo.....	3
Nervous indigestion.....	2
Influenza and anaemia.....	1
Pneumonia.....	1
Brain tumour.....	1
Heart condition.....	2
Neuritis.....	1
Whooping cough.....	3
Whooping cough with flu and strep. infection.....	1
Removal of coin swallowed.....	1
Removal of pin swallowed.....	1
Enucleation of eye.....	3
Fracture of arm.....	2
Fracture of thumb.....	1
Fracture of radius and ulna.....	1
Ingrown toenail and removal.....	1
Sprained ankle.....	2
Miscellaneous.....	33

From January 1, 1938, to January 1, 1939, we had only a total of 87 patients and 393 hospital days, as compared with 148 patients and 1,220 hospital days in the previous year. On March 17, 1939, the flu epidemic which was general throughout the city, reached our school, and over half of our pupils and staff contracted the disease. In addition to the school hospital, it was necessary to use parts of both the girls' and the boys' dormitories as hospital units, and to call in extra nurses for these patients. One patient developed pneumonia and was quite ill for a time, but she made a complete recovery. I must commend especially the work of our nurse, Miss Howell, at this difficult time.

One bright little girl who came to school in the fall of 1938, blind as the result of brain tumour, suffered a recurrence of this condition. She was cared for in our hospital for a time, but it was thought best to send her home when she was well enough to travel. Her death occurred at her home some months later.

Another young lad was sent home because of a heart condition.

Three boys with buphthalmic eyes were operated upon at the Brantford General Hospital. With this source of infection removed, they have all enjoyed improved health.

X-rays were taken of all fractures. The patients concerned have all recovered nicely.

We are continuing vaccinations, toxoid injections, and annual physical examinations. These examinations show a continued improvement in the children's physical condition during the past few years. The health programme followed at the school is developing sturdy bodies able to resist disease. This is supplemented by excellent and conscientious care during illness.

All of which I take pleasure in submitting.

J. A. MARQUIS,  
*Physician.*

#### Report of Ophthalmologist

I have the honour to report on the eye examinations of new pupils entering the Ontario School for the Blind for the year 1938-9. This class numbers 29 pupils, 16 of whom are boys and 13 girls. The results of the new examination are as follows:

#### New Pupils

Condition of Sight	Male	Female	Total
1. Limited vision in both eyes.....	9	6	15
2. Limited vision in one eye.....	5	.....	5
3. Quantitative light perception in both eyes.....	2	3	5
4. Quantitative light perception in one eye, none in other.....	.....	2	2
5. Without light perception in both eyes.....	.....	2	2
Totals.....	16	13	29

We are pleased to note from the above table that the new pupils coming to the school have a better degree of sight than previous classes. In this year's class we find that there are fifteen out of a total of twenty-nine who have some visual acuity in each eye, and five who have some vision in one eye. Only two new pupils are blind in both eyes. As improvement has been noted in each class for the past two or three years, we are inclined to attribute it to increasing public interest in matters concerning blindness. Medical attention is evidently being sought before cases become too advanced.

#### Diseases Causing Blindness

	Male	Female	Total
1. Ophthalmia Neonatorum and Keratitis.....	.....	.....	.....
2. Iritis, Uveitis and Sympathetic Ophthalmia.....	1	3	4
3. Congenital Cataract and Dislocation of Lens.....	3	5	8
4. Fundus Lesions, Retino-Choroiditis.....	1	.....	1
5. Optic Atrophy.....	4	2	6
6. Myopia.....	5	2	7
7. Congenital Glaucoma and Buphthalmus.....	2	1	3
Totals.....	16	13	29

One of the most gratifying facts to be noted from the foregoing table is the total absence of any case of keratitis that might be classified as being of ophthalmia neonatorum origin. This is a definite improvement on what was found formerly, and can be construed as the happy result of better prophylactic care of the newborn child. Unfortunately, in the other class of preventable blindness, namely, class 2, there is a slight increase in the number of cases over last year's class.

In two classifications, that of optic atrophy and myopia, we find a very definite increase in this year's class. It is hard to ascribe a reason for this, but it would seem that this form of congenital lesion, certainly in the case of myopia, might be reduced if medical examination were to be enforced previous to marriage; or if myopic children were taken out of school for a definite period when it has been established that their myopic condition is of a progressive type.

In group three, there are still too many cases. Practically all of these have been operated on, and with excellent results, from a surgical point of view, but with no marked improvement from a visual standpoint. This would seem to suggest that while surgery must and should be tried, it is not entirely sufficient to deal with the situation, and that the best hope of dealing with this problem lies in improved pre-natal care.

In addition to examining all new pupils, we made a careful examination of every pupil in the school. In many cases we were pleased to note a decided improvement in vision and eye condition. We were able to change glasses for a number of pupils, and to prescribe glasses for those who had not used them. Other students were assisted by advice regarding the use and care of their eyes.

All of which is respectfully submitted.

NORMAN W. BRAGG, M.D.

#### Report of Dentist

I am pleased to state that on the whole the pupils take good care of their teeth. As the result, twenty-nine pupils did not require to have their teeth cleaned, and most of the others did not require much attention in that line.

One hundred and thirty-two fillings were inserted for the boys. Seventeen permanent and seventeen deciduous teeth were extracted.

One hundred and fourteen fillings were inserted for the girls. Six permanent and sixteen deciduous teeth were extracted.

Forty-six pupils required no fillings and thirty-seven needed only one each.

Partial dentures were made for two pupils—one where the teeth had been previously removed, and the other where they were considered detrimental to good health.

The co-operation of the pupils in this work was all that could be desired.

Respectfully submitted,

J. R. WILL,

*Dental Surgeon.*

## Conclusion

May I express to you, Sir, and to Dr. McArthur, and all Department officials, my appreciation of your readiness to help us in the great work that is a constant challenge to us.

I should like to commend to you the work of the teachers and officers. They have given their best freely, in school and out. The members of the house staff have been faithful in their tasks, and kindly disposed to the students of the school.

I have the honour to be, Sir,

Your obedient servant,

H. J. VALLENTYNE,

*Superintendent.*

July 10th, 1939.

## APPENDIX K

## REPORT OF THE INSPECTOR OF PUBLIC LIBRARIES

## 1. The Influence of the Public Library

If education is the second line of defence of democracy—and it is difficult to see how any other view can be supported—then the public library which is the antidote to propaganda and the parent of adult education, must, in this present hour of decision, be regarded as one of the chief peaceful defences against the enemy who would destroy us.

Such being the case, the tables of library information that are the essence of this report ought, one would think, to be worth the trouble of rather wider consideration from the public—and even from those who profess to be interested in library development—than they appear, formerly, to have received.

I do not suggest that all the books used through our public libraries are of equal value from the point of view of adult education. In fact, there are still books being circulated that come perilously close to having no value whatever. But the important consideration is that the general quality of public library selection is being steadily improved; and when one tries to make for himself a picture of the whole volume of the public reading, he cannot but be impressed by the thought of how great an influence it must be exerting, day after day, upon the outlook and the frame of mind of the people of the province. This public library reading means something infinitely more than gathering facts out of text-books. It means stimulus. It means the exercise of the alert mind, the broader view of life and of contemporary problems. It means the quickened imagination, the clearer vision, the ability to arrive at more cleanly-cut decisions.

The chief thing wrong with our public library reading is that there is not enough of it. The reason will, I hope, become apparent from the brief summaries of the general statistical tables which follow.

## 2. Circulation

I do not believe it can be taken as anything but under-statement when I suggest that the people of Ontario are perfectly capable of absorbing between six and seven books per capita each year from their libraries. This would give a total of twenty-two million books.

The actual circulation, 1937, was.....	13,193,642
A reduction from 1936 of.....	193,421
A per capita use of.....	3.09
The per capita use in cities and towns being.....	5.8
And in rural districts.....	.6

### 3. Libraries in the Province

The following summary shows the number of public libraries operating in the Province:

Free Libraries.....	184
Library branches.....	39
Libraries listed but not reporting.....	5
	—
Total number of free libraries.....	228
Association libraries.....	274
	—
Total number of all public libraries.....	502
	—

The distribution of these libraries, without including library branches and non-repeating libraries, is as follows:

In places of 500 or smaller.....	174
500 to 1,000.....	100
1,000 to 5,000.....	127
5,000 to 10,000.....	26
10,000 to 20,000.....	14
More than 20,000.....	17

During 1938, the association libraries in Haileybury and Niagara changed their status and have now become free public libraries. New association libraries were organized at Port Dalhousie and Thornton, and the association libraries at Elk Lake and Hawkesbury, both of which had been closed for some years, were reorganized. The libraries at Runnymede and Delaware have been closed and the books distributed.

### 4. The Support of Public Libraries

It would seem from the foregoing figures that we must have almost enough libraries in the province to fill the people's book needs; and if the libraries were all effective that would probably be quite true and we should reach the twenty-two million mark already mentioned. But the libraries are not all effective. Indeed, it has often occurred to me that we are undertaking this particular phase of our national defence with flintlocks. Modern weapons cost money. The Libraries Act gives to every board of a free public library the right to expend on its services a minimum of fifty cents per capita, which is bare subsistence for a library that is carrying neither debt charges nor branches.

This is what the library boards do about it in their municipal appropriations:

Using less than 25c per capita, there are.....	23	libraries
Using between 25c and 50c, there are.....	95	“
Using the 50c minimum.....	13	“
Using between 50c and 60c.....	27	“
Using more than 60c.....	26	“

Analyzing the situation further, we find that—

- 118 libraries use less than the statutory 50c per capita.
- 13 libraries use the statutory minimum of 50c per capita.
- 53 libraries use more than 50c per capita.
- The per capita expenditure for the whole province is 36.Sc.
- Legislative grants amount to 2.9 per cent. of total expenditures.

#### 5. Book Stocks

The free libraries contained in 1938.....	2,624,479 books
The association libraries contained.....	617,566 “
Total.....	3,242,045 books

It is not possible to collect statistics which would throw much light upon the actual value (book value, not dollars) of these collections, but I think I should be quite safe in saying that at least forty per cent. of the books in our public library are more or less out of date, many of them completely so.

#### 6. Library Users

The free libraries have.....	638,036 borrowers
The association libraries have.....	22,595 “
Total.....	660,631 borrowers, or 19.2 per cent. of the population of the province.

#### 7. Certification and Training of Librarians

Although the certification of librarians is not compulsory, the classes that graduate annually from the Ontario Library School continue to be almost completely absorbed into the work. It is to be noted, however, that the great majority of these graduates go to the libraries in the larger cities. The following figures are enlightening:

Total number of free libraries (with branches).....	228
Chief librarians holding certificates of librarianship.....	33
Staff members holding certificates.....	234

But, since 183 of these qualified staff members are employed in the libraries of Toronto, Hamilton, London, Ottawa and Windsor, we come upon the startling fact that in all the rest of the province there are only 51 trained staff workers. They are divided among 23 libraries.

During the summer of 1938 the Department carried out a successful experiment in training for small libraries. Two classes in librarianship were held, one at McMaster University and the other at the University of Western Ontario.

Twenty students were admitted to each class. The period of each class was two weeks, and admission was confined to librarians in employment in places of fewer than 2,000 people. Although such a brief time of instruction meant that training was necessarily confined to the bare rudiments of librarianship, I am able to report that practically all the forty student-librarians came away very much better equipped for their work. I have since visited a number of the libraries that sent students to these classes, and in every instance I have found the standards of librarianship and library service being materially improved.

#### 8. Librarians' Salaries

The following summary shows the salaries paid to librarians in the free libraries:

Population	Number of Places	Highest Salary	Lowest Salary	Average Salary
Not over 5,000.....	129	\$ 900	\$ 20	\$ 304
5,000 to 10,000.....	25	1,680	100	830
10,000 to 20,000.....	13	2,280	900	1,285
More than 20,000.....	17	.....	.....	2,295

#### 9. County Libraries

The work of the county libraries continues to progress steadily. Perhaps the most noteworthy step taken in 1938 was the appointment of a trained librarian by the Lambton County Association. In addition to the four counties now operating, Simcoe is in process of organizing itself, and a demonstration of the county co-operative is being carried out in Waterloo by the Kitchener Public Library. The 1937 reports show the following circulation from the county libraries:

Elgin.....	2,570	Middlesex.....	13,636
Lambton.....	35,255	Oxford.....	1,378

#### 10. The Travelling Libraries

People living in the more thinly settled parts of the province are finding the travelling libraries more and more useful each year. The latest increase in borrowing has been chiefly through schools, the local branches of the Women's Institute, and young people's clubs. Letters that indicate a keen appreciation of this service have been received from many outlying points, particularly in the north, where in several instances the cases of books have been carried by aeroplane and dog team far beyond the end of steel.

A reference library has been established for the use of rural school teachers, the work being done through the office of the travelling libraries. More than 800 books were purchased for the purpose of this service. The registration of teachers was 749 and the book circulation 1,199.

Statistics for the travelling libraries are as follows:—

Libraries sent out during 1938

To schools . . . . .	409	
To Public Libraries . . . . .	216	
To Women's Institutes . . . . .	101	
To Farmers' Clubs, etc. . . . .	111	
Total . . . . .	—	837
Increase over 1937 . . . . .		215

Book Circulation:

Boys' and girls' . . . . .	45,770	
Adult non-fiction . . . . .	11,376	
Adult fiction . . . . .	22,963	
Total . . . . .	—	80,109
Increase over 1937 . . . . .		15,669

## APPENDIX L

### REPORT OF THE PROVINCIAL SUPERVISOR OF MUSIC

---

There has been a gratifying increase in the number of schools receiving regular music instruction. Almost all elementary schools make some provision for the subject, the majority under skilled supervision of qualified teachers. The secondary schools are generally including Music as a part of the new Programme of Studies, the number qualifying for special grants being as follows:—1935, 17; 1936, 24; 1937, 46; 1938, 141.

The public, the teachers, and the students are being gradually acquainted with the attitude of the Department concerning music instruction. During the past two years I have had the opportunity of addressing the following groups:—Trustee Boards—1937, 15; 1938, 2; Service Clubs—1937, 9; 1938, 12; Teachers' Meetings—1937, 16; 1938, 14; School Assemblies—1937, 15; 1938, 18.

*Music Festivals.*—Music Festivals, both competitive and non-competitive, continue to spread throughout the Province, and to stimulate interest. More than 50 Festivals were held in the spring of 1938. I attended the following:—1937, 24; 1938, 28.

*Radio.*—A series of 10 radio programmes was sponsored during March and April by the Department of Education with the co-operation of the Canadian Broadcasting Corporation. Choral numbers by children from the elementary and secondary schools were broadcast from Toronto, Hamilton, Ottawa, Windsor, Kitchener, London, North Bay, Port Arthur, and Fort William.

On the Wednesday evening following Easter, in connection with the Ontario Educational Association, a concert was given in Massey Hall, Toronto, featuring the Provincial High School Orchestra, directed by I. W. Lomas, Hamilton; the Provincial High School Chorus, directed by G. R. Fenwick, Toronto; and the Provincial Public School Chorus, directed by W. B. Collier, Toronto. Approximately five hundred children from all parts of Ontario formed the various groups.

*Teacher Training.*—The summer sessions in Music at Toronto and London continued to grow in attendance and in the breadth of the courses offered. Comparative attendance figures are as follows:—

1935—Toronto, 264; London, 145.	Total, 409.
1936—Toronto, 362; London, 191.	Total, 553.
1937—Toronto, 481; London, 238.	Total, 719.
1938—Toronto, 614; London, 356.	Total, 970.

The following pamphlets have recently been prepared and distributed to the schools—Music in Rural Schools; An Introductory Course in Music Appreciation through Listening, for Elementary Schools; Operettas, Cantatas and Music Plays.

*Statistics.*—The following statistical information concerns the school year ending June 30th, 1938, and includes only those schools earning special grants for

the teaching of Music. Many others provide a music course but are not at present qualifying for the grant.

In some parts of the Province redistribution of Inspectorates during the past few years makes it difficult to show the development of Music in those areas.

**The Provincially-Controlled  
Schools of Ontario**

ONTARIO'S MOST NORTHERLY SCHOOL—MOOSONEE

Moosonee, situated at the terminus of the Temiskaming and Northern Ontario Railway on James Bay, is one of the early Hudson's Bay Company posts. The present school was built in 1934, and is well equipped. The attendance is about 15. Except in the summer months, there is a train in and out but once a month. Moosonee has telephone connection with southern points, and the radio supplies the daily news and amusement. In case of necessity a plane can be called from Cochrane in a very short time.

THE SCHOOL CAR

Six of these "Schools on Wheels" carry education and social betterment to scores of small communities scattered along the railway lines in Northern Ontario. Each car has a definite route of about 175 miles, which must be covered in at least six weeks. The length of time at each stop varies from four days to a week, depending upon the number of pupils, 90 per cent. of whom are non-English speaking. The first two days of a stop are usually spent discussing the work previously assigned. The rest of the time is well occupied with the teaching of the most difficult parts of the new work to be left as homework. Each pupil receives a detailed outline of the work he is expected to do, with a definite time-table to be followed until the car returns. Any difficulties which arise during the interval the Car is away are solved by writing the teacher, who endeavours to explain the problem by mail. Supplementary Reading is left with each pupil. The Department supplies all text books, scribblers, pens, and paper free. The School Car Auxiliary of Toronto helps the needy families. Many parents attend night classes, where not only English, spelling, writing, and arithmetic are taught them, but troublesome occurrences of daily life are discussed.

## TERMINOLOGY

**Assessment**—The valuation placed upon property for tax levy purposes. The County Council generally makes an equalization annually of local assessment figures, and this equalized figure is used in the computation of Legislative grants to schools.

**Attendance Efficiency**—The percentage relation of the actual days attended to the perfect aggregate.

**Auxiliary Classes**—These are provided for pupils whose abilities do not lie along academic lines.

**Capital Charges**—Debenture instalments, or sinking fund deposits, made on debt incurred for school buildings and equipment.

**Consolidated School**—An amalgamation of two or more rural schools, or of rural schools with a village or town school, either for the purpose of strengthening the means of school support where the original schools were small or poor, or for the purpose of providing a graded school and other advantages, such as conveyance, instead of the original one-room school.

**Compulsory School Age**—Children 8 to 14 must attend full time; children from 5 to 8, if enrolled, must attend full time to the end of the school term for which they are enrolled. Adolescents, 14 to 16, who have not attained University matriculation standing must attend full time; those exempted on the plea of circumstances compelling them to go to work must attend part time (400 hours a year) in municipalities where part-time courses are provided. Urban municipalities with a population of 5,000 and over, are required to provide part-time courses.

**Cost per Pupil-Day**—The cost of educating one pupil of actual attendance, for one day. It is found by dividing the total cost of education of the group of pupils concerned by the actual aggregate attendance of this group for the period under consideration.

**District**—The eleven defined areas of Northern Ontario which do not constitute municipal units for any purpose. With the exception of Parry Sound and Muskoka, these areas lie north of the French River and Lake Nipissing. This region is newer and more sparsely populated than Southern Ontario, and produces most of Ontario's extensive mineral and forest wealth.

**Enrolment**—The number recorded on the school register as in active attendance. The school census for the Province is now taken annually on the last school day in May.

**Free School Age**—The Public Schools are free to all residents (except Separate School supporters) between the ages of 5 and 21. The Separate Schools are free to separate school supporters.

**Fifth Classes**—Grades IX and X in Elementary Schools, doing work similar to the first two grades of Secondary Schools. The majority of these classes are in rural areas.

**General Maintenance**—Ordinary, current expense, as opposed to capital outlays and debenture charges.

**Inspectorate**—The area under the supervision of a local Departmental representative.

**School**—Provincially controlled schools may be classified as:

I. **Elementary**—Those doing the work of the first eight grades. A few have Fifth Classes (see above).

(a) **Public**—Non-sectarian.

(b) **R.C. Separate**—For the children of Roman Catholics.

(c) **Protestant Separate**—For the children of Protestants in centres preponderantly Roman Catholic.

II. **Secondary**—Those doing the work of Grades IX to University Matriculation.

(a) **Academic:**

1. **Collegiate Institutes.**

2. **High Schools.**

3. **Continuation Schools.**

These schools are differentiated by minimum staff requirements. Continuation Schools are located mostly in villages or rural areas. Academic Courses are designed to lead to Universities and Teacher-Training Schools.

(b) **Vocational:**

1. **Technical High School.**

2. **Commercial High School.**

In the smaller centres the above two are combined in the one school. Vocational courses are designed to lead to industry, trade and commerce.

**School District**—The area over which a school board has jurisdiction.

**School Year**—The school year consists of two terms, September 1 to December 22, and January 3 to June 30. In addition to the intervals between these terms there is a vacation of one week following Easter. In this Report statistics cover the school year where possible. Financial data remains on the calendar year basis.

**CONTENTS**

Education—General maintenance, and debenture charges.

Debenture Debt Charges—General, local improvement, public utility, housing, etc., but excluding Schools.

Protection—Administration of justice, fire protection, hydrant rental, street lighting, traffic control.

Unemployment Relief—Gross cost, including administration.

Charity and Welfare—Charity, Child Welfare, grants, hospitalization, House of Refuge, Mothers' Allowances, Old Age Pensions.

Administration—Auditors, tax discounts, elections, interest on loans, legal costs, maintenance of municipal buildings, grants (other than Charity and Welfare), indemnities to Mayor and Council, office expenses.

Health and Sanitation—Board of Health expenditures, garbage collections, sewer maintenance.

Deficits and Uncollectible Taxes—Provision for tax sale purchases, uncollected and uncollectible taxes, deficits of public Utilities.

Highways and Streets—Cleaning, watering and oiling; repairs and maintenance.

Recreation—Parks, playgrounds, rinks, etc.

Miscellaneous—Payments to other municipalities, payments to County on roads, etc.

Public Services—Cemeteries, Housing Commission deficits, Library costs.

## TREND IN SCHOOL BUILDINGS IN NORTHERN ONTARIO

OLD SCHOOL—S.S. No. 1 MISSANABIE

NEW SCHOOL—S.S. No. 1, MISSANABIE

This school is situated about 200 miles northwest of Sudbury. It cost \$3,241, has a classroom 24 ft. by 32 ft., teacher's room, cloak-rooms, hall and porch. It is well lighted, well ventilated, and easily heated, even at a temperature of 40 degrees below zero. It conducts a Fifth Class, has equipment valued at over \$900, and has an attendance of 36. Over half the residents of the school section are Indians. The teacher has a First Class certificate, and receives a salary of \$1,000.

## B. DEPARTMENTAL SUMMER COURSES ENROLMENT BY SUBJECTS IN RECENT YEARS

(The Summer Courses are conducted by the Department of Education for the benefit of Teachers, who desire to spend a part of their summer vacation in an effort to improve their academic and professional standing, and thus to become more efficient in carrying on with a modernized curriculum.)

Courses	Centre	1929	1930	1931	1932	1933	1934	1935	1936	1937	1938

### SUMMARY

(This includes, in addition to the above, results of candidates from private sources.)

Enrolment Grade VIII on the last school day in May, 1938.....57,548

Number of High School Entrance Candidates:

Recommended by Principal on Group II.....31,795

Number taking written test on Group II.....23,556

————— 55,351

High School Entrance candidate percentage of 1938 Grade VIII Enrolment.....96.18%

(a) Number of Teachers in this Salary Group. (b) Percentage this Group is of Total Rural Teachers. (c) Cumulative Percentage of Total Rural Teachers.

\*On the basis of a 300 day working year.

RURAL TEACHER TURNOVER COMPARED WITH GENERAL BUSINESS CONDITIONS, 1928-1938

Base Year, 1935

Index of Physical Volume of Business is from Monthly Bulletin of Dominion Bureau of Statistics.

Rural Teacher Turnover is the percentage of rural teachers who changed positions at the end of each school year.

The high in 1933 is due to an enforced second year Normal course.

E Includes debenture levy.

F General Maintenance.

G Debenture Charges.

H Including any arrears.

I Exclusive of those in default.

J Includes both Public and Roman Catholic Separate School supporters.

K Partial payment.

L In addition, all arrears, totalling \$65,206, were paid off.

M Of this, \$4,128 is for Protestant Separate School, and \$6,094 for Roman Catholic Public School. Against the latter debt there is a reserve of \$3,387.

## PERCENTAGE ANALYSIS OF CURRENT EXPENDITURES—CITIES, 1937

Graph 6.

## CLASSIFICATION OF CURRENT EXPENDITURES

1. **Cost of Instruction**—Actual payments made for salaries and expenses of Inspectors, Supervisors, Principals and Teachers (regular, supply and special).

2. **Cost of Instructional Supplies**—Pupils' supplies, teachers' supplies, text books, library books, maps, blackboards.

3. **Cost of Administration**—Salaries, office supplies and expenses of Administrator, Secretary-Treasurer, Attendance Officers and Auditor; expenses of Principals' offices in schools; upkeep of administration buildings, legal fees, expenses for O.E.A. and Teachers' Institute, interest on temporary loans and charges for renewal.

4. **Cost of School Plant Operation**—Salaries, expenses and supplies of caretaker and engineer, fuel, gas, water, electricity, telephone, rent.

5. **Cost of School Plant Maintenance**—Repairs to buildings and care of grounds, repairs and annual additions to school furniture, bookcases, etc., care of portable buildings, temporary class rooms, insurance.

6. **Cost of Auxiliary Agencies**—Medical, dental and nursing services, student organizations, recreational equipment, transportation of pupils, school fairs and exhibitions, hot lunches, contributions, prizes, scholarships, medals, cadet corps.

Circular No. 84.

## MEMORANDUM

To Principals of Collegiate Institutes, High, Continuation and Vocational Schools, and Fifth Classes of the Public and Separate Schools.

Notice is hereby given that the Lower School examinations are abolished, and former regulations relating to them are cancelled. Hereafter, Lower School standing will be granted to pupils under the following conditions:

- (1) that the principals and teachers certify that these pupils have completed satisfactorily the prescribed courses of study of Grade IX and of the second form of the Lower School, which fulfil the Lower School requirements for admission to Normal,
- (2) that the pupils have passed the tests given by the teachers concerned.
- (3) that the inspectors report favourably upon the teaching and organization of the classes in which these pupils are enrolled.

In June, principals will forward to the Department of Education upon a form supplied by the Department the names of students who are planning to attend the Normal Schools, and who are recommended for standing.

Toronto, May 25th, 1938.

(b) June Middle School

\*Whole-time teachers in Vocational work. Vocational teachers who spend part-time in High School (or Collegiate Institute) and the balance of the in time the Vocational School are shown in the High School (or Collegiate Institute) section.

## MODERN COMPOSITE SCHOOLS

KEMPTVILLE HIGH AND PUBLIC SCHOOLS

The corner-stone of this new composite school was laid by Dr. L. J. Simpson, Minister of Education, on December 21st, 1936. Built of fireproof construction throughout, at a cost of \$103,000, it contains five standard classrooms in each of the Public and High Schools, and in addition has a combination gymnasium and assembly hall, with seating capacity of 600, a general science laboratory, a household science room, and a general shop. The Public and High Schools have separate entrances, separate cloak rooms, separate toilets for both schools, separate playgrounds and gardens. With non-glare lighting, heat maintained at even temperature, and well-equipped science rooms, this is one of the most modern schools in Eastern Ontario.

LYNDHURST PUBLIC AND CONTINUATION SCHOOL

A modern school building, erected in 1937, at a cost of \$35,000. It contains two public school classrooms, two high school classrooms, a manual training room, a home economics room, a room for men teachers, and one for the women teachers. The cost of equipment in the home economics room and general shop was \$2,650. The school has accommodation for 125 pupils, and its present enrolment is about 70. Two school buses, at a total monthly cost of \$125 provide transportation from the surrounding school sections. The total cost of the school was spread over twenty years, and debentures were issued for \$20,000.

A Average Daily Attendance for the calendar year.

B Includes Debiture

C Combined Debt. See High School Financial Table.

D In default.

E In addition, \$24,455 was paid on arrears.

F Partial payment.

G Not reported

H Including grants on Capital Charges.

K Total of Vocational Schools in separate buildings, and vocational portion of composite schools where indebtedness has been divided between High and Vocational.

CURRENT EXPENSE PER PUPIL-DAY, FOR ACADEMIC AND VOCATIONAL SECONDARY SCHOOLS IN CITIES, 1937

Graph 7.

## THE VOCATIONAL SCHOOLS

TABLE 44—NIGHT SCHOOLS—Classification of Pupils by Subjects of Study, 1937-38

## I. ACADEMIC

## A—CULTURAL

1. English for New Canadians.....	200	7. History and Civics.....	11
2. Reading.....	272	8. Current Events.....	32
3. Literature.....	250	9. French.....	306
4. Composition and Spelling.....	639	10. Orchestral Music.....	11
5. Grammar.....	206	11. Dramatic Art.....	74
6. Public Speaking.....	107		

## B—PRACTICAL

1. Arithmetic.....	613	4. Trigonometry.....	120
2. Algebra.....	382	5. Mensuration.....	108
3. Geometry.....	251	6. Shop Mathematics.....	415

## II. VOCATIONAL AND INDUSTRIAL

## A—DOMESTIC ARTS

1. Cooking.....	2,905	8. Textiles.....	34
2. Hygiene and Dietetics.....	185	9. Embroidery and Lace-Making.....	9
3. Home Nursing.....	241	10. Knitting.....	34
4. Home Economics.....	91	11. Appreciation of Dress.....	58
5. Drafting and Design (Clothing).....	207	12. Period Furniture.....	58
6. Sewing and Dressmaking.....	4,052	13. Household Accessories.....	97
7. Millinery.....	313		

## B—COMMERCE

1. Writing.....	352	10. Office Routine.....	183
2. Stenography.....	4,696	11. Book-keeping.....	2,132
3. Typewriting.....	5,881	12. Accounting.....	40
4. Business English.....	107	13. Business Management.....	50
5. Journalism.....	42	14. Advertising.....	223
6. Rapid Calculation.....	27	15. Salesmanship.....	187
7. Business Machines.....	591	16. Insurance.....	735
8. Business Forms.....	376	17. Economics.....	22
9. Filing.....	35	18. Commercial Law.....	49

## C—ART, DRAFTING AND DESIGN

<b>(a) Pure Art</b>		5. Still Life Drawing.....	139
1. History of Art.....	79	6. Life Drawing.....	322
2. Elementary Art.....	64	7. Modelling.....	57
3. Elementary Drawing and Design.....	74	8. Perspective.....	61
4. Colour Study.....	510	9. Antique Drawing.....	155
<b>(b) Applied Art</b>		3. Interior Decorating.....	392
1. Illustrating.....	204	4. Costume Drawing and Design.....	200
2. Lettering and Show Cards.....	378	5. Block Printing.....	7
<b>(c) Industrial Drafting and Design</b>		5. Electrical Drawing.....	18
1. Mechanical Drawing.....	1,075	6. Machine Drawing and Design.....	252
2. Industrial Design.....	221	7. Tool Design.....	29
3. Blue Print Reading.....	184	8. Sheet Metal Drawing.....	185
4. Architectural Drawing.....	282	9. Watchmaker's Drafting.....	12

## D—CRAFTS

1. Handicrafts.....	86	6. Art Metal Work.....	37
2. Woodcarving.....	17	7. Printing.....	244
3. Cabinet Making.....	168	8. Watch Making.....	40
4. Pottery.....	36	9. Pattern Making.....	40
5. Rug Making.....	58		

## E—SCIENCE AND ENGINEERING

<b>(a) Science</b>		5. Mineralogy and Geology.....	21
1. Chemistry.....	331	6. Metallurgy and Assaying.....	67
2. Industrial Chemistry.....	218	7. Applied Mechanics.....	46
3. Chemistry for Nurses.....	39	8. Electricity.....	757
4. Photography.....	88		
<b>(b) Engineering</b>		4. Aviation.....	26
1. Marine.....	30	5. Diesel Engines.....	141
2. Heating and Ventilating.....	12	6. Prospecting.....	18
3. Refrigeration and Air Conditioning.....	49		

## F—TRADES AND INDUSTRY

1. General Woodworking.....	594	8. Air Craft.....	655
2. Carpentry and Building.....	369	9. Electric Wiring.....	478
3. Painting and House Decorating.....	106	10. Electric Construction.....	57
4. Machine Shop Work.....	1,676	11. Radio (Construction and Repairs).....	298
5. Plumbing.....	350	12. Glove Making.....	31
6. Acetylene Welding.....	886	13. Yarn Making.....	29
7. Auto Mechanics.....	1,383		

## III. MISCELLANEOUS

1. First Aid.....	108	3. Gymnasium.....	881
2. Swimming.....	560	4. Lip Reading.....	32

## Regulations

1. *General Regulations, Public and Separate Schools (1938)*
2. *Regulations of the High Schools and Collegiate Institutes (1939)*
3. *Regulations of the Continuation Schools (1938)*
4. *Recommendations and Regulations for the Establishment, Organization, and Management of Vocational Schools, and Vocational Departments in Continuation Schools, High Schools and Collegiate Institutes (1936)*
5. *Regulations, Examinations, and Courses of Study of the Normal Schools (Cir. 23) (1939)*
6. *Special Regulations and Courses of Study of the University of Ottawa Normal School (Cir. 23-B) (1938)*
7. *Extracts from the Statutes for Use in the Normal Schools (1939)*
8. *Regulations for the Administration of the Consolidated Schools (Cir. 40) (1935)*
9. *Regulations for Auxiliary Classes (Cir. A.C. 6) (1939)*
10. *Regulations respecting the Application of the School Attendance Act and the Adolescent School Attendance Act (Cir. A.A. 1) (1938)*
11. *Regulations respecting Medical and Dental Inspection of Public and Separate Schools (Cir. 56-D) (1928)*
12. *Instructions to School Inspectors re the Apportionment of the Legislative Grant among the Public and Separate Schools (Instr. 12) (1938)*
13. *Regulations respecting Special Departmental Grants to Public and Separate Schools (Cir. 56) (1936)*
14. *Regulations respecting Special Departmental Grants in Agriculture for Public and Separate Schools (Cir. 56-E) (1939)*
15. *Regulations for Inspectors' Certificates (Cir. 37) (1936)*
16. *Instructions to Presiding Officers and Candidates regarding the Annual Departmental Examinations (Instr. 5)*
17. *Regulations of The High School Entrance Examination (Cir. 48)*

PUBLICATIONS OF THE DEPARTMENT OF EDUCATION—*Continued*Regulations—*Continued*

18. *General Regulations for Teachers' Institutes (Cir. 60) (1930)*
19. *Regulations respecting Permanent Certificates (Kindergarten-Primary, Second Class, First Class) (Cir. 72) (1939)*
20. *Recommendations and Regulations for the Establishment, Organization and Management of Home Economics and General Shop Work Courses in Secondary Schools and in Grades IX and X of the Public and Separate Schools*
21. *Recommendations and Regulations for the Establishment, Organization, and Management of Manual Training Courses in Public and Separate Schools (1939)*
22. *Recommendations and Regulations for the Establishment, Organization, and Management of Home Economics Courses in Public and Separate Schools (1939)*
23. *Recommendations and Regulations for the Establishment, Organization, and Management of Home Economics and Manual Training General Shop Courses in Secondary Schools and in Grades IX and X of the Public and Separate Schools (1939)*
24. *Regulations relating to Subjects of Study for Grades IX, X, XI and XII in Collegiate Institutes, High, Vocational and Continuation Schools and for Grades IX and X in Public and Separate Schools (1939)*

## Courses of Study

1. *Programme of Studies for Grades I to VI of the Public and Separate Schools (1938)*
2. *Programme of Studies for Grades VII and VIII of the Public and Separate Schools (1938)*
3. *Courses of Study for Grades IX and X (Lower School and Fifth Classes) in Collegiate Institutes, High, Vocational, and Continuation Schools, and Public and Separate Schools (1938)*
4. *Courses of Study, Middle and Upper School, and Examinations of the High Schools, Collegiate Institutes and Continuation Schools (1938)*
5. *Suggested Courses of Study for Commercial High Schools and Departments established under the Vocational Education Act (1932)*
6. *Courses of Study and Examinations in Schools Attended by French-Speaking Pupils (Cir. 46) (1938)*
7. *Courses in Agriculture for Public and Separate Schools (Cir. 56-F) (1935)*
8. *Music in Rural Schools (1937)*
9. *An Introductory Course in Music Appreciation through Listening, for Elementary Schools (1938)*
10. *Operettas, Music Plays, Cantatas (1938)*

## Text Books

1. *Text Books Authorized and Recommended, and Text Book Regulations for Public, Separate, Continuation and High Schools and Collegiate Institutes (Cir. 14) (1939)*
2. *Text Books Authorized and Approved for Vocational Schools (Cir. 52) (1939)*
3. *Supplementary Reading for Departmental Examinations (Cir. 58) (1939)*
4. *Suggested Books for Supplementary Reading in English Literature, Grades IX and X (1938)*
5. *Teachers' Manuals, etc. (1937)*
6. *Upper School Requirements in Modern Languages (Cir. 69) (1936)*
7. *A Graded List of French Supplementary Reading Books (Prepared for Schools which are Attended by French-Speaking Pupils, and in which French is a Subject of Instruction with the Approval of the Minister)*

## Miscellaneous

1. *General Announcement of Summer Courses*
2. *School Year and Holidays (Form 94)*
3. *Bible Readings for Schools (3 Volumes)*
4. *Selected Scripture Readings*
5. *Teachers' Library for Rural Public and Separate School Teachers (1938)*
6. *Health Handbook for Teachers in Public and Separate Schools (1938)*

UNIVERSITY OF TORONTO  
REPORT  
OF THE  
**BOARD OF GOVERNORS**  
FOR THE  
YEAR ENDED 30th JUNE  
1938

PRINTED BY ORDER OF  
THE LEGISLATIVE ASSEMBLY OF ONTARIO  
SESSIONAL PAPER No. 12, 1939

UNIVERSITY OF TORONTO

---

REPORT  
OF THE  
**BOARD OF GOVERNORS**  
FOR THE YEAR ENDED 30TH JUNE, 1938

---

*To His Honour the Lieutenant-Governor-in-Council:*

The Governors of the University of Toronto have the honour to present their thirty-second annual report, which includes the President's extensive review of the academic work of the University and its Colleges for the Session 1937-38, the reports of various officers and departments, and a number of appendices and statistics dealing with the manifold activities of the institution.

There are also included in the report the customary statements covering the funds and assets, including investments, as they stood at the close of business on 30th June, 1938, together with statements in detail of the receipts and expenditures of the Board for the fiscal year which ended on that date, and the certificate of audit thereof by Mr. G. T. Clarkson of the firm of Clarkson, Gordon, Dilworth and Nash.

During the year under review the Board purchased out of funds available from the Whitney Bequest the property known as No. 104 St. George Street, having an area of 12,885 square feet with a substantial brick house thereon, for the sum of \$22,500. The premises have been altered and renovated to suit the needs of the Department of Psychology which is now in occupation.

The general revenue for the year amounted to \$1,699,382. There were also credited to revenue the Special Legislative Grant of \$900,000 and a Supplementary Grant of \$200,000 (voted in lieu of \$300,000 applied for), making a gross total of \$2,799,382. The deduction from this sum of \$66,388, representing interest credited to certain scholarship and trust funds, left available for expenditure for salaries and general maintenance \$2,732,994.

The expenditure under the appropriations made by the Board for these purposes, exclusive of the Ontario College of Education which is maintained by a separate vote) the estimates for which were approved by the Minister of Education, totalled \$2,830,590. There was consequently an excess of expenditures over receipts of

\$97,596, to which there has to be added the small debit balance of \$14,105 brought forward from the previous year, making a total deficit to 30th June, 1938, of \$111,701.

The Board begs leave to observe that it has no means of absorbing this deficit and has therefore to look to your Honour-in-Council to provide a grant to cover the same.

All of which is respectfully submitted.

D. BRUCE MACDONALD,  
*Chairman.*

Toronto, 20th December, 1938.

## PRESIDENT'S REPORT

1937-1938

---

*To the Governors of the University of Toronto:*

GENTLEMEN:

I have the honour to present herewith my report on the academic work of the University and University College for the twelve months ending on the 30th June, 1938:

### INTRODUCTION

The year's academic work has been marked by co-operation among the staff, thorough and stimulating teaching, much publication of the results of investigations, the carrying on of innumerable researches, and in the main, serious and successful work by the students. This university has attained among educational institutions a high reputation for scholarship, teaching and research. That reputation can be maintained only by retaining and securing instructors and investigators of the highest rank. On the teaching staff the real importance and worth of a university depends. The university still stands in the front rank of those agencies of society which are engaged in "the task of putting intelligence, rationality and spirituality into living."

The detailed report of the different faculties and departments of the University are appended and deserve careful attention. In my commentary on the work of the year, I can give only supplemental information and a summary treatment of special features.

Owing to the epidemic of poliomyelitis the University opened one week later than normal. Lectures began on October 6th.

There has been a slight diminution in the registration, mainly in the Faculties of Art and Medicine. If we look over the registration for the last few years, we shall find relatively slight variations from year to year. This probably means that there is no need in our country at the moment for a larger annual supply of graduates in the professional schools. So far as a general arts education is concerned, the life of the individual is enriched by it; he ought to be reasonably equipped with that combination of knowledge, discrimination, and sound judgment which universities seek to provide. In that case, no country can have too many men and women so trained and disciplined, no matter in what field of national life they may be found.

The hall-mark of a university is and always should be quality rather than quantity; the chief aim should be to improve the quality of work rather than merely increase the number of students, "intensification of effort rather than extension of enrolment."

### ATTENDANCE

The total number of students enrolled was 7,841, of whom 4,889 were men and 2,952 women; 7,232 being registered in the colleges and faculties, and 628 in the departments. The number of students proceeding to degrees were 6,374 and to diplomas 813. Of the students in attendance 3,786 came from Toronto, and 3,251 from other parts of the Province of Ontario. Every country is represented. There has been a decrease in registration of 295.

## THE STAFF

The total staff of the University and University College numbered 914, of whom 119 were professors, 77 associate professors, 93 assistant professors, 226 lecturers, associates (in medicine and dentistry) and instructors in the Ontario College of Education, 1 director, 2 assistant directors, 296 demonstrators, fellows and instructors with sessional appointments.

In the Federated Colleges there are 117.

The total number in the complete staff is 1031.

During the year we have suffered the loss of members of the staff in the past and present. The list is as follows:

Adam Carruthers, M.A., professor emeritus, faculty of arts: G. R. Pirie, M.B., F.R.C.P. (London), associate in paediatrics, faculty of medicine: C. A. Kennedy, D.D.S., associate professor, faculty of dentistry.

On Nov. 12, 1937, Professor Emeritus Adam Carruthers passed away in his 81st year. He was one of the few remaining links with the University of earlier days. Of Scottish birth and Canadian training he graduated, through University College, as gold medallist in classics in 1880, and was one of the best pupils of Dr. McCaul. After qualifying as a barrister he was drawn back to the study and teaching of Greek and Latin. He taught at Seaforth and Parkdale, and then began his long connection with the staff of University College. In 1893 he was appointed lecturer in Greek, associate professor in 1908, and in 1918 professor. Here he taught his classes faithfully and quietly till his retirement in 1923. He possessed and required a thorough knowledge of the grammar and syntax of Greek and Latin as a basis for appreciation of their literature and their legacy to modern times. With Professor J. C. Robertson of Victoria College he was the joint author of various Latin grammars and readers, some of which have been used in our secondary school for the past forty-five years. He carefully studied the influence of classical authors on English poets, especially on Tennyson. He may be said to have laid the foundations of a department of classical archaeology in our University. His three sons are graduates of this University: one of them is on the classical staff at McGill. A retiring, studious teacher, of fine character, he left a deep impression for good on the successive groups of undergraduates who attended his classes.

On May 5, 1938, died Dr. George R. Pirie, associate in paediatrics, at the age of 58. He graduated in Medicine from this University in 1901, did post-graduate work in New York and practised in Calgary. In 1913 he again went abroad, this time to London, for further experience and study. While in England he was head of the Great Ormond Street Hospital for Sick Children and received his licentiate of the Royal College of Surgeons and his membership in the Royal College of Physicians. Later, after his return to Canada, he received his fellowship in the Royal College of Physicians. He served on the staff of the Hospital for Sick Children, Toronto, and in the department of paediatrics in this University. A good teacher and skilful physician he was held in high esteem by his colleagues, his students and his patients.

Dr. C. Angus Kennedy of the Faculty of Dentistry died suddenly during the summer vacation of 1937 in his sixty-third year. A graduate of the Royal College of Dental Surgeons, he served for years as associate professor of orthodontia in the Faculty of Dentistry and was librarian of the Faculty. The high esteem in which he was held by the members of his profession is shown by his election to be President of the Ontario Dental Association and a member of the Board of Directors of the Royal College of Dental Surgeons of Ontario. A tablet to his memory has been erected in the faculty building by the profession of dentistry in the Province, and is inscribed in honour of one who was to students and colleagues "teacher, librarian and friend." The Library is his abiding monument.

Under the age limit Herbert Austin Fricker retired from the Faculty of Music. After being organist for the city of Leeds, England, from 1898 to 1917, organist and chorus master of the Leeds Musical Festival and conductor of the Leeds Philharmonic Society and of the Leeds Symphony Orchestra, he came to Canada in 1917.

He was a Master of Arts of Leeds University, a Bachelor of Music of Durham, an honorary Doctor of Music of Toronto, and a Fellow of the Royal College of Organists. Ever since his arrival in Canada he has been organist and choir master of the Metropolitan Church, Toronto, and conductor of the Famous Mendelssohn Choir founded by Dr. A. S. Vogt. On the establishment of a faculty of music in this University in 1918, Dr. Fricker became a member of the staff, lecturing on choral and orchestral work. A competent and kindly teacher, he added distinction to the Faculty of Music.

The following resigned their positions:

W. C. Ferguson, B.A., professor of methods in modern languages, Ontario College of Education; Miss I. M. Biss, M.A. (Bryn Mawr, Camb.), assistant professor political economy; T. C. Graham, B.A.Sc., lecturer, mechanical engineering; Miss E. M. Stuart, lecturer, School of Nursing; Miss H. Stantial, S.B. (Simmons), M.A., Ph.D., lecturer, chemistry; V. Lange, M.A. (Tor.), Ph.D. (Leipzig), lecturer in German; J. A. Kinnear, M.D., C.M., associate in obstetrics and gynaecology.

At the end of August, 1937, Professor William Chalmers Ferguson retired from the Staff of the Ontario College of Education after nearly half a century of service in the schools of Ontario. Graduating from this University in 1889 he taught successively in Uxbridge, St. Mary's, London and Riverdale, Toronto. In 1910 he returned to his *alma mater* as lecturer in methods of teaching modern languages in the faculty of education, and chief instructor in French and German in the University Schools. His success in training teachers led to a full professorship of methods in modern languages, to membership in the Senate of the University, and in various educational commissions. In 1935 he was appointed chairman of the committee on text-books for provincial schools in French is a language of instruction. He has exercised a fine influence on the modern language teachers of the Province, combining enthusiasm, scholarship and practical power of instructing.

Miss Irene Mary Biss resigned at the end of the year to be married and take up residence in England. A graduate of Cambridge University she came as a lecturer to Bryn Mawr College and in 1929 was appointed a lecturer in political economy in the University of Toronto. She was promoted to be an assistant professor in 1934. She was an excellent teacher, combining research with instruction. During the summer vacation she travelled over Canada investigating the economic aspects of various industries, notably of the pulp and paper industry.

Dr. James Alexander Kinnear, has been a demonstrator in obstetrics and gynaecology from 1907-8 to 1913-14, and an associate since 1914. After long and efficient service he has resigned and taken up practice in Timmins in Northern Ontario.

These and junior members of the staff who have gone to other positions deserve our heartfelt thanks for their services. Some who have been with us for years have given to the university and its students the full measure of their energies and abilities.

Leave of absence was granted to:

For the session: F. A. Mouré, Mus. Doc., bursar; D. C. MacGregor, B.A., assistant professor, political economy; G. A. Cline, M.A., instructor in University Schools.

For one term: W. H. Martin, M.A., Ph.D., F.R.S.C., associate professor chemistry; E. A. Dale, M.A. (Ox), professor, Latin; A. Brady, B.A. (Ox), M.A., Ph.D., associate professor, political economy; T. M. C. Taylor, B.A. (B.C.), M.S. (Wisc), Ph.D., assistant professor, botany; R. D. C. Finch, B.A., assistant professor, French; Miss H. L. Bryans, B.A., instructor in physical education, Ontario College of Education.

The following new appointments and promotions were made during the year:

In the Faculty of Arts:—Appointments: E. S. Moore, M.A., Ph.D. (Chic), F.R.S.C., head of the department of geology; F. B. Kenrick, M.A., Ph.D. (Leip),

F.R.S.C., head of the department of chemistry: H. A. Innis, M.A. (McM), Ph.D. (Chic), F.R.S.C., head of the department of political economy: G. B. Langford, B.A.Sc., Ph.D. (Corn), professor of mining geology; M. A. Peacock, M.A. (Harv), Ph.D., D.Sc. (Glas), associate professor mineralogy; R. M. Dawson, M.A. (Dal), A.M. (Harv), M.Sc., D.Sc. (Lond), associate professor political economy; E. K. Brown, B.A., D. es L. (Paris), associate professor English; L. S. Russell, B.Sc. (Alberta), M.A., Ph.D. (Princ), assistant professor palaeontology; K. C. Fisher, B.A. (Ac), M.A., Ph.D., assistant professor experimental biology; C. D. Rouillard, A.B. (Bowdoin), M.A., Ph.D. (Harv), assistant professor French; G. F. Wright, B.S., Ph.D. (Iowa), special lecturer chemistry; J. J. Rae, B.A. (McM), M.A., Ph.D., special lecturer chemistry; F. J. Westcott, B.A. (Brandon), special lecturer political economy; D. B. DeLury, M.A., Ph.D., lecturer mathematics; V. B. Meen, M.A., Ph.D., lecturer in mineralogy; P. Nash, A.B. (Wisc), Ph.D. (Chic), lecturer, anthropology.

Promotions: J. T. Burt-Gerrans, Phm.B., M.A., Ph.D., from an associate-professorship to a professorship in chemistry; L. J. Rogers, B.A.Sc., M.A., from an associate-professorship to a professorship in chemistry; D. S. Ainslie, M.A., Ph.D., from an assistant-professorship to an associate-professorship in physics; H. J. C. Ireton, M.A., Ph.D., from an assistant-professorship to an associate-professorship in physics; G. deT. Glazebrook, B.A., M.A. (Ox), from an assistant-professorship to an associate-professorship in history; J. O. Wilhelm, B.Sc. (Sask) M.A., from a lectureship to an assistant-professorship in physics; M. F. Crawford, B.A. (West), M.A., Ph.D., from a lectureship to an assistant-professorship in physics; A. Pitt, B.A. (Houghton), from a lectureship to an assistant-professorship in physics; Miss M. A. Fritch, B.A. (McG), M.A., Ph.D., from a lectureship to an assistant-professorship in palaeontology; D. C. MacGregor, B.A., from a lectureship to an assistant-professorship in political economy; A. F. W. Plumtre, B.A., M.A., (Camb), from an lectureship to an assistant-professorship in political economy; K. S. Bernhardt, M.A., Ph.D. (Chic), from a lectureship to an assistant-professorship in psychology; C. R. Myers, M.A., Ph.D., from a lectureship to an assistant-professorship in psychology; J. R. MacGillivray, M.A., Ph.D. (Harv), from a lectureship to an assistant-professorship in English; H. Boeschstein, Ph.D. (Rostock), from a lectureship to an assistant-professorship in German.

In the Faculty of Medicine:—Appointments: W. Boyd, M.D. (Edin), F.R.C.P., professor, pathology and bacteriology; W. W. Jones, B.A., M.B., honorary professor, surgery; C. G. Smith, M.Sc. (West), M.D., Ph.D., lecture, anatomy; Miss M. I. Tom, B.A., M.B., lecturer pathology and bacteriology; K. G. Gray, M.B., B.Sc. (Med), lecturer, medical jurisprudence; W. L. Robinson, B.A. (McM), M.B., F.R.C.P. (C), lecturer, medical jurisprudence; B. Hannah, M.B., F.R.C.P. (C), associate, medicine and clinical medicine; J. Hepburn, M.B., F.R.C.P. (C), associate, medicine and clinical medicine; T. Owen, M.B., M.R.C.P. (Lond), F.R.C.P. (C), associate, medicine and clinical medicine; T. A. Robinson, M.D.C.M. (McG), associate in surgery and clinical surgery; J. W. Ross, M.B., M.S. (Minn), associate in surgery and clinical surgery.

Promotions:—A. W. Ham, M.B., from an assistant-professorship to an associate-professorship in anatomy; G. L. Duff, M.A., M.D., Ph.D., from a lectureship to an assistant-professorship in pathology and bacteriology; K. G. McKenzie, M.B., F.R.C.S. (C), from an associateship to an assistant-professorship in surgery.

In the Faculty of Applied Science:—Appointments: S. E. Wolfe, M.A.Sc., lecturer in mining engineering; H. Carver, special lecturer, town planning.

Promotions:—C. F. Morrison, B.E. (Sask), M.Sc. (McG), from a lectureship to an assistant-professorship in civil engineering; W. L. Sagar, B.A.Sc., C.E., from a lectureship to an assistant-professorship in civil engineering.

In the Faculty of Dentistry:—Appointments:—L. A. Killburn, D.D.S., associate professor, dental praxis; W. D. Cavanagh, D.D.S., lecturer, dentistry; C. V. Fisk, D.D.S., associate, dentistry; J. Kreutzer, D.D.S., B.Sc. (Dent), associate, dentistry; F. Martin, D.D.S., associate, dentistry; G. W. Spinks, D.D.S., associate, dentistry;

R. L. Twible, D.D.S., B.Sc. (Dent), associate, dentistry.

In the Department of Social Science:—Promotion:—A. E. Grauer, B.A. (B.C.Ox.) Ph.D. (Cal), from an associate-professorship to a professorship and directorship.

In the Ontario College of Education: Appointments:—Miss H. B. St. John, B.A., assistant professor of modern languages; A. T. McLachlan, lecturer in shopwork and instructor in University Schools; H. McGuire, B.A. (Qu), B.Paed., instructor in University Schools.

Promotion:—B. C. Diltz, M.A. (Qu), from an assistant-professorship to an associate-professorship of methods in English and history.

Medical Research—Banting:—Promotion:—C. C. Lucas, M.A.Sc. (B.C.), Ph.D., from an assistant-professorship to an associate-professorship.

Honours were conferred upon members of the staff:

Dr. William Boyd, professor of pathology and bacteriology, was invited to give three lectures under the Porter Lectureship in Medicine at the University of Kansas; Professor E. F. Burton, professor of physics, was invited to give lectures on "Low Temperature" at the Bell Telephone Laboratories, New York, at Cornell University, at the University of Rochester, and at the Massachusetts Institute of Technology; Dr. W. E. Gallie, Dean of the Faculty of Medicine, was invited to give the Founders' Lecture in Vancouver to the North Pacific Surgical Society, and the Mayo Foundation lecture; Professor T. J. Meek, department of Semitics, was elected president of the Mid-West Section of the Society of Biblical Literature, and an honorary member of the Eugene Field Society; Professor E. K. Brown, department of English, was visiting professor of English at the University of Minnesota; Professor Griffith Taylor, department of geography, has been appointed joint editor of the "International Zeitschrift für Rassenkunde" (Stuttgart), contributing editor of "Economic Geography" (Worcester, Mass), director, American Polar Society (New York), and President (Section E) British Association for the Advancement of Science at Cambridge, England; Sir Ernest MacMillan, Dean, Faculty of Music, was guest conductor of the Philadelphia Orchestra, of the National Symphony Orchestra at Washington, D.C., of the Ford Sunday Evening Hour in Detroit for five concerts, and for one of the series of Les Concerts Symphoniques in Montreal; Professor C. H. Best, professor of physiology, was elected a Fellow of the Royal Society of England; Dr. Gordon Murray, department of surgery, has been appointed Hunterian Professor in the Royal College of Surgeons of England for his work on "Heparin"; Professor Homer A. Thompson, department of classical archaeology, was elected Vice-President of the Archaeological Institute of America, and lectured in the Universities of Oxford, Cambridge and London on "Excavations in the Agora"; Dr. J. D. Fitzgerald, professor of hygiene and preventive medicine, was elected a Vice-President of the International Association of Microbiologists.

The University owes much to Herbert Edward Terrick Haultain, C.E., who has been associate professor since 1908, and professor, since 1910, of mining engineering in the Faculty of Applied Science. Graduating from Toronto, he took further work at the famous mining academy in Freiberg in Saxony. He has had experience as a mining engineer in Ireland, Bohemia, South Africa, British Columbia, the Western United States and Canada. He was held in high esteem by the mining leaders of Northern Ontario and from them obtained for his department assistance in money and equipment. In 1925 he was elected President of the Association of Professional Engineers of Ontario. He was among the founders of the Technical Service Council, established to place graduates of our technical training institutions in Canadian industry. He was awarded in 1937 the Randolph Bruce Gold Medal in recognition of his research work in mining engineering. He retired at the end of this academic year in order to pursue certain investigations in his own field for which his heavy teaching duties did not allow him the necessary time. In grateful acknowledgment of his distinguished services to the University and the mining industry of Canada, he was made a professor emeritus. He will carry on his researches in the Mill building.

which was erected during his term of office by the Ontario Department of Mines to provide the additional accommodation needed for his steadily growing department. A vigorous and stimulating personality, he has won the respect of his students and of the whole mining community.

#### NEW APPOINTMENTS FOR 1938-39

In the Faculty of Arts the following major appointments have been made for the coming year:

T. A. Goudge has been made a lecturer in philosophy. A graduate of Dalhousie University he held an open fellowship in Toronto in 1934-5, and the Royal Society Fellowship held at Harvard in 1936-7. He taught at Queen's University in 1935-6, and in 1937-8 took the work of Professor Vlastos of Queen's during his year of absence.

Miss J. C. Romeyn graduated with first class honours in chemistry and took special work in micro-analysis in the University of the City of New York. She succeeds Miss Stantial as lecturer in Micro-analysis in the department of chemistry.

We have been very fortunate in securing for a lectureship in applied mathematics Dr. Leopold Infeld. Born in Poland, he received his doctor's degree at the University of Cracow in 1921. He collaborated in research work with the eminent mathematicians, or theoretical physicists, Drs. Born and Einstein. He has been joint author with the latter of "The History of Relativity," and has issued other publications in his special field of research. He is warmly recommended to us by Professor Einstein and Professor H. P. Robertson of Princeton University.

The department of geography has grown so rapidly that, in view of a fresh group of students in the first year, it has been necessary to secure a full-time lecturer. After long searching, it was decided to appoint Dr. Stephen B. Jones, Bachelor of Science of the University of Washington; Master of Arts of Harvard in 1929, and Ph.D. of Harvard 1934. At Harvard he took courses in geology, geography, mineralogy, palaeontology and meteorology. After teaching experience in Harvard, Kansas State University and Lehigh University, he was appointed to the department of geography in the University of Hawaii. He has travelled widely and published valuable papers in the *Geographical Review*. His coming will relieve the already over-burdened but ever-enthusiastic head of the department, Professor Griffith Taylor.

In succession to Mr. Victor Lange, who resigned his lectureship in German to accept a position on the staff of Cornell University, Dr. Martin Joos of the University of Wisconsin has been appointed. He is of Swiss-German stock. He has specialised on the philological side of German and strengthens the department in teaching the history of the language.

To the department of political economy, Dr. Harold Amos Logan brings special authority on problems of labour and industrial relations. A graduate of Acadia University, he took postgraduate work at Yale and Chicago. He has taught in Purdue University, Brandon College, Randolph Macon College, and the University of Western Ontario as professor of economics and political science. He comes to us as associate professor of political economy. He served in the Great War in the Artillery and with the Army of Occupation on the Rhine. He has written "The History of Trade Union Organisation in Canada" (1928) and "Labour Costs and Standards" in the volume on "Labour" in the series on "Canadian American Relations" (1937), as well as articles in various economic journals. He will strengthen our economics department in the important field of labour questions.

For some years we have sought to find a suitable professor of mediaeval history. For the coming year we have appointed Dr. B. Wilkinson of the University of Manchester, England, a pupil of the well-known mediaevalist, Professor James Tout. Professor Wilkinson took his M.A. and Ph.D. at Manchester, his undergraduate career was interrupted by three years of army service, 1916-19. From 1923 to 1930, he was lecturer in history in University College, Exeter; and from 1930-8 lecturer in

constitutional history in Manchester University. He has written much on the mediaeval period—including volumes entitled “The Chancery under Edward III” (1929), “The Mediaeval Council of Exeter” (1931), and “Studies in Constitutional History” (1937), and contributions to the English *Historical Review*, *History*, the *Law Quarterly Review* and other historical journals. Through the Institute of Mediaeval Studies at St. Michael’s and the special equipment of Dr. Wilkinson in the constitutional history of mediaeval England, this University should continue to make valuable contributions to the interpretation of the Middle Ages in relation to present day problems.

In the Faculty of Medicine Dr. J. K. W. Ferguson has been appointed assistant professor of pharmacology under Professor V. E. Henderson. He graduated from this University in arts in 1928 and in medicine in 1932. After serving as interne in the Toronto General Hospital, he went to the University of Cambridge as a research scholar, working with Professor F. J. W. Roughton (who deals with the physico-chemical aspects of physiology). He returned to be assistant in physiology at the University of Western Ontario, and after two years was appointed to the department of physiology in the State University of Ohio at Columbus. He has shown a steady development in the breadth of his interests and in his knowledge of techniques. He has been a successful teacher in Ohio, and will doubtless prove equally influential in our department of pharmacology.

In the Faculty of Engineering important appointments have been made for the next academic year:

Charles G. Williams has been appointed to the professorship of mining engineering in succession to Professor H. E. T. Haultain. This appointment has met with universal approval from our own mining graduates and from the mining men in Northern Ontario. Professor Williams graduated from the School of Practical Science in 1903, having spent summers in the machine shop and practical milling work of the Canadian Corundum Company, and in land surveying in Saskatchewan. In 1904 he was a fellow in chemistry in this University with summer work underground in Calumet and Hecla Mine, Michigan. In 1905 he won the degree of B.A.Sc. with honours from the University of Toronto. His engineering experience has been wide and various. In the pulp and paper industry he has been chemist and superintendent; he has prospected in our north country; he has held positions of responsibility in connection with the Buffalo Mine, Cobalt; the Otisse Mine, Elk Lake, and the Nova Scotia Mine, Cobalt, he has been general manager of the Deister Machine Company, Fort Wayne, for the making of concentrating machinery; and from 1913 to 1928 he has been associated with the Hollinger Consolidated Gold Mine—serving as the general superintendent for twelve years. On retiring from the Hollinger he has been a consulting mining engineer in Toronto. The esteem in which his colleagues hold him is shown by his election to the presidency of the Professional Engineers of Ontario, the vice-presidency of the Canadian Institute of Mining and Metallurgy, and the presidency of the Toronto Branch of the Institute. In Professor Williams we believe we have found one who combines scientific knowledge with practical experience and who will transmit to students the stimulus of his own enthusiasm. He will keep his department in close touch with the mining development of our Northland.

Robert Ferguson Legget has been appointed assistant professor of civil engineering. He was trained in the University of Liverpool, receiving the degrees of Bachelor and Master of Engineering. He had a broad experience on the staff of the famous firm of consulting civil engineers, S. Meik and Buchanan of London, England. He prepared contract documents for hydro-electric schemes in Scotland, Greece, Italy and Finland, and was engaged on dock, harbour and general civil engineering work. As assistant to the chief resident engineer, he was associated with the construction of the Lochaber Water Power works in Scotland. From 1929 to 1932 he was employed as engineer with the Power Corporation of London and as resident engineer and assistant to the construction superintendent of the Upper Notch Water Power plant

(probably the largest automatic plant in Canada): from 1932-6 he was engineer for the Canadian Sheet Piling Company.

In 1928 he was awarded the James Forrest medal and the Joule medal of the Institution of Civil Engineers, and later on the Society's Premium and the Telford Premium of the same institution. For the last two years he has been in the engineering department of Queen's University, Kingston. He is a brilliant young engineer; and, by reason of his English training and varied achievements in the world of construction, he will make a fine contribution to the teaching strength of our Faculty of Applied Science.

Robert B. McIntyre comes as lecturer in applied mechanics to aid Professor T. R. Loudon in his many duties. In 1936 he graduated from this university as B.A.Sc. in mechanical engineering. Awarded a Massey fellowship he proceeded to the University of Cambridge (St. John's College) when he studied aeronautical engineering under the Mond professor of this subject, B. Melvill Jones, learning British methods and technique, especially on the side of research and development. In the vacations he has worked in the Royal Aircraft establishment in Farnborough. He will be of special value to members of the projected course in aeronautics.

Until this year we have not been able to secure a suitable person to take the work carried on by Dr. T. R. Rosebrugh, the former head of electrical engineering. Now we are glad to appoint to an associate-professorship Gordon F. Tracy (a son of Emeritus-Professor F. Tracy of the department of ethics in University College).

Mr. Tracy's undergraduate course in Toronto was broken by three years of Overseas Service in the Great War. In 1921 he graduated with honours in electrical engineering. He remained here for three years as research assistant to Professor H. W. Price. He went to the Massachusetts Institute of Technology and obtained his Master of Science degree, by work mainly on the theory of electrical machinery and circuits. He was appointed to the staff of the University of Wisconsin and has served there from 1926 to 1938, as teacher, supervisor of laboratories and director of graduate students in electrical engineering. Out of this work grew two publications accepted by the American Institute of Electrical Engineers—"Power Transients in A.C. Motors" and "Split Phase starting of 3-Phase Motors" (a thorough study of the performance of such motors in unbalanced conditions of electrical supply). During the past five years he has been employed during the summers in the A.C. Design Department of the Allis-Chalmers Mfg. Co. of Milwaukee, in developing new methods of predicting by calculation the performance of large synchronous motors during both running and starting conditions. In Professor Tracy we feel we shall have a thoroughly competent instructor, both in electrical theory and application.

In the Faculty of Music, Dr. Healey Willan and Mr. Leo Smith have been appointed professors. Both have been lecturers in this faculty for some years. Dr. Willan is a skilled organist and choir leader and a composer of world-wide fame. Mr. Leo Smith is the first cellist in the Toronto Symphony Orchestra and a noted composer of chamber music.

In the Library School, Miss M. E. Silverthorn has been appointed an assistant professor. A graduate of the University of Alberta, she served two years in the Public Library of Calgary, and then went to the University of Illinois where she received the degree of Bachelor of Library Science. After seven years of work in large public libraries in the State of Michigan she was appointed assistant professor of library science in the Carnegie Library School at Pittsburgh, from which she will come to us. She will bring to the work of our Library School the best experience and teaching power of the first class libraries and library schools of the United States.

#### THE UNIVERSITY IN GENERAL

Under authority of the University Act, the Senate with the approval of the Board of Governors made some additions to its membership in order that all groups of graduates might be adequately represented. Medicine will be represented by three additional elected graduates, engineering by two, dentistry by two, agriculture by one;

while household science, education, and veterinary science will have one each, and pharmacy two—these four groups being previously unrepresented: the department of university extension will be represented by the director for the time being; the department of social science and the school of nursing will be represented by one member appointed by their Councils. By these changes I believe all groups of graduates will be fairly represented on the Senate.

New buildings on the west side of St. George Street have been purchased, which provide accommodation for psychology and for the Workers' Educational Association. Owing to the large number of students who take psychology in nearly all faculties it had become necessary to secure additional space for experimental and practical work. Additional space has been granted to the Canadian Medical Association to house the secretary of the allied Associations for Cancer Control.

The agreement with the Ontario College of Pharmacy for providing instruction in certain subjects has been extended for two years. In all probability the pharmacy authorities will raise the standard of admission to conform with the general university requirements, and will lengthen the course. It has been agreed for the present that a degree in pharmacy will not be an indispensable condition for licensing to practice. The question of degree or degrees will be dealt with later.

Dr. F. A. Mouré, the bursar, who has been connected with the University for nearly half a century, was absent on leave during the session. During his absence Mr. Charles Higginbottom, the assistant bursar, efficiently discharged the duties in a year which unexpectedly called for much extra time and work.

One of the outstanding events of the year was the special Convocation held on October 22nd, 1937, to confer an honorary degree on the Hon. Cordell Hull, Secretary of State for the United States. Lord Tweedsmuir, his host in Ottawa, accompanied him to Toronto, as did also the Rt. Hon. Mackenzie King, the Prime Minister of Canada, and the American Minister to Canada, Mr. Armour. The occasion was historic. Mr. Hull's comprehensive address on the reign of law as against the reign of force was published in all the leading newspapers of the Continent.

The University and the Royal Ontario Museum made a striking display at the Canadian National Exhibition. An actual demonstration was given of the method by which the skeleton of a dinosaur is separated by patient chiselling from the encrustations which surround it. The vivarium or collection of living creatures from the museum of biology drew great crowds. To Mr. Dunlop, the Director of University Publicity, we owe this successful effort to link up the work of the University with the general life of the Province.

A large delegation of College Presidents and Trustees and business men from the State of Georgia visited this University last May, under the guidance of Dr. Jackson Davis, associate director for Southern Education of the General Education Board of the Rockefeller Foundation. They represented various neighboring institutions in and around the City of Atlanta, such as Emory University and Agnes Scott College, and came to investigate the practical working of the system of college federation established here by the Act of 1887. We showed them all we could and they seemed happy in their visit.

Among visitors to the University who have gone over our buildings, even though they have not given lectures, are the following: Lord Eustace Percy (formerly President of the Board of Education, Great Britain, and new Rector of King's College, Newcastle, in the University of Durham), Archbishop Day of Armagh, Dr. T. R. Glover (Public Orator of the University of Cambridge), Rt. Hon. Lord Queenborough, the Lord Bishop of Leicester, England, Baron Silvercruys (the Belgian Minister to Canada), Prof. Kaye of the National Physics Laboratory of London, Dean Landis of the Harvard Law School, Viscount Cecil of Chelwood (awarded the Nobel Peace Prize in 1937), Dr. Brüning (former Chancellor of Germany), Lord Hewart (the Lord Chief Justice of England), Rev. Dr. Henry Sloan Coffin (President of Union Theological College, New York), Dr. John A. Mackay (President of Princeton

Theological Seminary), President Valentine (of Rochester University), Count Robert de Dampierre (French Minister to Canada), Dr. Liu (President of Che-loo University, Tsinan, China), and Hon. Angus Macdonald (Premier of Nova Scotia).

Mr. W. B. Brander, Secretary of the Bureau of the Universities of the Empire, established in London, paid a visit to Canadian universities and to our University, among others. His observations bore on the contents of the *Universities Year Book* issued by the Bureau. This Bureau is a clearing-house of information on all phases of higher education.

#### FACULTY OF ARTS

Dr. Henry B. Ward, emeritus professor of biology of the University of Illinois, the most distinguished limnologist of North America, and a past president of the American Association for the Advancement of Science, recently visited the Fisheries Research Laboratory in Northern Ontario, which is carried on in connection with our department of biology. The credit for the success of this laboratory should go to Dr. Clemens (now director of the Pacific Biological Station) who organised it and Professor Harkness of our own biological staff who now directs it. Dr. Ward writes to Professor E. M. Walker, head of the department of biology:

"I want to congratulate you on the splendid work which is being done by the Fisheries Research Laboratory. I came expecting to spend four or five days, but the work was so interesting and the contact with Professor Harness so appealing that I allowed his blandishments to persuade me and spent as many weeks with him. He has the best co-ordinated program for freshwater biology that I know of and he is getting fundamental results that far surpass those obtained by people who work on their own problems without any regard for what the other fellow is doing. I have always felt that the profitable attack on biological problems would be made in the future through co-operating investigators, and this seems to show it. I hope that that work may have the support it deserves. If then it can be effectively applied by the people in Ontario and in Canada who control the fisheries service, I am sure you will find a return far exceeding the outcome of our previous and disjointed attacks on the problem where everybody seemed to be going his own way and little attention was given to the real significance of even those results which were secured by investigators."

This is indeed high praise from the highest authority.

Professor Homer Thompson spends one half of the year with us in Toronto and the other half in Athens, where he is actively engaged in excavation work carried on under the American School.

During the spring he took an active part as assistant director in the eighth annual campaign in the excavation of the ancient Agora at Athens. The work of laying bare the Market Square itself, the public buildings, sanctuaries and private houses that surround it, is now nearing completion: though several more years will be required for the detailed investigation of the principal buildings. The activities of the past season included the exploration of the Klepsydra, the spring on the shoulder of the Acropolis which is repeatedly referred to by Greek authors; of the Eleusinion or sanctuary of Demeter and Kore, one of the most venerable in Athens; and of the roadway by which the Panathenaic Procession made its way from the lower city to deliver her now robe to Athena in the Parthenon. As in previous years, much sculpture has been found, coins, inscriptions and pottery dating from the Neolithic period through the Middle Ages. Professor Thompson spent most of the season in completing the exploration around the Council House and the adjacent Tholos which served as the office and club-house of the Councillors. It has been possible to recover the history of these buildings from their first beginnings in the time of Solon in the early years of the sixth century B.C. to their final abandonment in the sixth century of our era. The results are of interest not only for Athens, but for Greece at large. In no other city of Greece has it been possible to trace the history of the public

buildings in such detail or to so early a beginning. The publication dealing with this group of building should be ready next summer.

During the summer Professor Thompson spent some time in preparing the publication of the results of excavations carried out under his direction during the previous several summers on the Pnyx Hills. The material includes almost a mile of the city walls of Athens, not previously explored, much pottery, terracotta figurines and other small finds. In this work he enlisted the co-operation of several members of the American School of Classical Studies.

Two of our graduates in classics and archaeology, Carl Roebuck of University College and W. A. McDonald of Victoria College, have gone to Athens this year and are taking part in the excavations. Roebuck has a fellowship from the University of Chicago and McDonald one from the Royal Society of Canada.

I feel that our students in classical archaeology enjoy a rare privilege in receiving tuition from one who is in constant touch with the actual work of excavation and to whom the storied land of Greece is as familiar as his homeland.

Sociology is being gradually separated from anthropology and will probably become an independent department under Professor C. W. Hart.

For the first time, the department of anthropology has been able to send out an expedition to excavate an ancient Indian site in this Province. Dr. Nash, who has had much experience of excavation among the Mississippi Valley Mounds, conducted a small group from the Museum to a property near Aylmer, which proved to be the site of a prehistoric village. The details of the discoveries made will appear in next year's report, suffice it to say that the remains of a house-structure of the Iroquois "long-house" type have been found, and 3,000 specimens have been recovered from a pile of refuse, which when carefully studied will enable archaeologists to reconstruct a picture of life in a prehistoric Canadian village.

This year the Department of Political Economy completed fifty years of teaching and research. In 1888-9 Professor Wm. J. (later Sir William) Ashley delivered the first lectures in the new department of political economy. His successors were Professor James Mavor (1894-1923), Professor R. M. MacIver (now of Columbia University) (1924-1927), and Professor E. J. Urwick (1928-1937). This department has shared in the establishment of later departments which reflect the necessary specialisation in the social services, such as law, sociology and geography; it still gives the courses in economics, political science and commerce and finance. To celebrate this jubilee, a series of lectures was planned to commemorate the work of the successive heads of the department itself and of the related departments, both in this University and in sister institutions, and to describe current trends in economic and political thought. Through distinguished alumni this department has played a great part in the life of Canada. The President gave an introduction to the series and the following lectures were given: By Prof. J. M. Clark (Columbia University)—"Industrial Stabilisation"; By Prof. A. P. Usher (Harvard University)—"Sir William Ashley"; By Prof. C. A. Ashley (University of Toronto)—"Sir William Ashley and The Rise of Commerce Schools"; By Prof. H. R. Kemp (University of Toronto)—"Prof. James Mavor"; By Prof. E. J. Urwick (University of Toronto)—"The Unity of the Social Sciences"; By Prof. R. M. MacIver (Columbia University)—"Social Sciences at the University of Toronto"; By Prof. J. Viner (University of Chicago)—"Classical Economics and Laissez-Faire"; By Prof. R. M. Dawson (University of Toronto)—"Democracy in the Modern World"; By Prof. H. A. Logan—"Labour Problems in Canada"; By Prof. Chester Martin (University of Toronto)—"Professor George M. Wrong"; By Prof. W. A. Mackintosh (Queen's University)—"Adam Shortt"; By Prof. H. A. Innis—"Professor Stephen Leacock".

In the department of economics and political science and in commerce and finance, courses have been instituted in public and in business administration. These courses begin to differentiate in the fourth year and are carried on for a post-graduate year. On the whole it has seemed wiser to our staff to lay a broad foundation of general economic history and theory before dealing too specifically

with practical problems of administration and business. The famous School of Business Administration at Harvard is entirely a graduate institution.

The two thousandth anniversary of the birth of the Roman Emperor Augustus was commemorated last December by the Classical departments of the College. Principal M. W. Wallace presided over a well-attended gathering at which addresses were delivered by Professors Norwood, DeWitt and Homer Thompson, on the political, literary and social aspects of this great period of ancient history. The publication of the Governor-General, Lord Tweedsmuir's excellent study of the life of Augustus added much public interest to this commemoration.

The Law Club, at its annual dinner in March, celebrated the coming of Lord Durham a hundred years ago. Professor Kennedy gave a succinct account of the constitutional aspects of the famous Report, and the Governor-General, Lord Tweedsmuir, spoke vividly on the character and achievements of Lord Durham himself.

Professor Lash Miller, who retired last year from the chair of chemistry, which he had held with distinction for many years, generously presented to the University his splendid private library. This contains rare books on chemistry, modern treatises, and a priceless collection of chemical journals. This library will be under the immediate charge of the professor of chemistry, and the University Library will spend \$200 a year in keeping the series of journals up to date. The University gratefully acknowledges Professor Miller's valuable gift.

#### THE FACULTY OF MEDICINE

There are several features of the year's work to be noted:

The number of students to be admitted must not be too large for the available clinical material and for the comfort of the patients in the teaching hospitals. A selective process has been adopted at the end of the first year, and will be applied in the session 1938-39. Students who fail in their first year (including supplemental examinations) will not be allowed to re-register in the first year. By this regulation the perpetual "repeaters" will drop out at the beginning, both to their own advantage and to the general advantage of the classes. A general standard of knowledge and ability will be secured sufficient to meet the exacting demands of medical training. But every consideration will be given to the first year students, lest any injustice be done them. Term work will be carefully recorded; test examinations will be given through the year, so that the teachers may have full opportunity of knowing the ability and the diligence of each student. When the results of the final examinations in the first year are known, the case of those who fail will be reviewed in the light of their whole record both in the secondary schools and throughout the university year. Even if a student, after this full consideration, fails, his time is not thrown away, as he can still register in some other course in the University. The adoption of this selective method, approved both by the Board of Governors and the Senate, is an important landmark in the development of the Medical Faculty.

The whole medical curriculum has been under review for some time by a committee of the Faculty and important changes for the better have been made. There is a general reduction in the number of hours devoted to lectures and laboratories, so that the student may have more time for individual study and reading and for clinical practice and observation. The aim of the teaching in the pre-clinical period is to introduce the student to scientific methods and the scientific habit of mind, to give him proper habits of learning and a stimulus to independent inquiry, and to equip him with such scientific knowledge as will be an adequate foundation for his strictly professional studies. In the clinical years, there will be a better correlation of lectures with laboratories. Some courses are being re-arranged, and there is a general increase in the practical training, notably in obstetrics. There is increased teaching of physical therapy on a scientific basis.

This committee of review will continue to work by investigating the curriculum for each year as a unit rather than for a departmental standpoint, and by broadly

defining the objectives to be kept in view both in the basic medical sciences and in the clinical years.

Postgraduate courses, lasting for one week of intensive study in special branches of medicine and surgery, have now become a regular part of the work. This year the subjects dealt with were heart diseases, physical therapy and fractures. Medical practitioners attended, about thirty in each class, from various parts of the Province and even beyond its boundaries. One came from China and another from Peru!

The Governors purchased the valuable pathological library of the late Professor Oskar Klotz and have added it to the Medical Library. Professor William Boyd has made certain rearrangements of the objects in the Pathological Museum which facilitate the teaching and examination of specimens.

The enlargement of St. Michael's Hospital, one of our teaching hospitals, adds to the general clinical facilities of the Faculty of Medicine.

Dr. Bruno Mendel, who is working in the department of medical research on the fundamental problems of cancer, has been greatly aided by chemical results obtained through Dr. Hermann Fischer, research professor of organic chemistry, and his assistants, Dr. Baer and Dr. Grosheintz. All these members of the staff, together with others from the department of physiology and the Connaught Laboratories, attended the International Association of Physiologists held at Zurich this year.

As a result of the epidemic of poliomyelitis last autumn, Dr. Hall and Mr. Leibel of the department of medical research devised a respirator which has proved of value in many cases, and may have a wider use in cases of resuscitation.

#### FACULTY OF APPLIED SCIENCE AND ENGINEERING

Because of the material development of the country, young engineers are still in demand. In 1935 there were in attendance 766; in 1936 there were 789; in 1937 there were 833. It is probable that there will be a further increase next year, even though numbers are stationary or even less in other faculties. Many graduates find occupation in business and in executive positions. An engineering training develops resourcefulness, adaptability and accuracy—qualities of value in every walk of life.

The course in engineering physics has had its first graduating class and because of its stiff requirements, attracts students who have a special aptitude for mathematics and physics. Another new course just established is that in mining geology, embracing two years of mining and engineering and two devoted mainly to geology.

There is an urgent need for more accommodation and equipment for chemical and mechanical engineering (especially for hydraulics). Laboratories are overcrowded and equipment cannot be properly placed.

It is my earnest hope that in the near future a new building may be erected to house chemical engineering in juxtaposition to the chemistry building of the Faculty of Arts. The removal of chemical engineering to a new building would leave vacant much needed space in the present mining building. Those chemical students accommodated in the economics building on Bloor Street could be brought back to the general chemical family, and their removal would make room for large accommodation required for geography and psychology. A sub-committee of the Board of Governors has the whole question of these additions under consideration.

#### Music

The honour course in music in the Faculty of Arts is now well launched and promises to develop healthily. Professors Willan and Leo Smith, appointed to the University Faculty of Music, and the Dean of the Faculty, Sir Ernest MacMillan, will have charge of the instruction both theoretical and practical. The relations between the University and the Conservatory of Music have become closer. Mr. Ernest Hutcheson of the Jouillard Foundation, New York, made a comprehensive survey of our whole musical situation. He enumerated the function of a Conservatory as three: (a) to be a training school for professional musicians; (b) to be a general

public school of music; (c) to be a public academical body closely connected with a university and exercising an important influence on the general musical life of the community through its examination system and by other means.

There has been an increase of 300 in the registration at the Conservatory; the number of candidates for its examinations has been 13,432.

#### FACULTY OF FORESTRY

Disastrous forest fires emphasize periodically the need for well-trained foresters to prevent vast loss of life and property. Since this Faculty of Forestry was established, thirty years ago, 409 students have registered and 258 have completed the course. They are working mainly in forestry and allied fields. Pulp, paper, and lumbering have absorbed about half of them. Thirty-three are in the Forest Service of the Province and seventeen in that of the Dominion. Eight are teaching in universities.

Two new courses of great practical importance were given during the year—one on fish and game preservation, and the other on the scaling of timber (this latter at the Faculty Camp).

#### THE SCHOOL OF GRADUATE STUDIES

The special direction in which the University of Toronto should grow is that of providing advanced instruction for graduate students. All universities are not equipped to do this, but some Canadian institutions must assume this responsibility, unless we wish to see all our able graduates who desire to carry on additional research work going to the universities in the United States. Our University ought to develop this side of academic work. We are ready and able to do this if adequate funds can be found for this purpose.

In the Graduate School were registered 583, a small decrease from last year's numbers. Of these 421 came from Ontario. From 59 institutions these students have come, and from all the Provinces of Canada, as well as from Great Britain, China, Japan, the Bahamas, India, Newfoundland, Ireland, Switzerland and the United States. Of these students 178 have held positions on our staff as demonstrators or instructors.

The chief need of this School is an increase in the number of open fellowships. By means of the Reuben Wells Leonard bequest six additional open fellowships have been established, and these have been awarded to students from outside Ontario, in fulfilment of the generous donor's desire that, through the meeting of young men from various parts of Canada in one centre of research, the unity and higher life of the Dominion might be promoted and enriched.

#### FACULTY OF DENTISTRY

From England, Australia, New Zealand and India students have been enrolled. This Faculty stands high in the esteem of the dental colleges of the world, both for its sound fundamental scientific basis and for its progressive application of principles to practice. Valuable postgraduate work is being carried on in the ceramic department and under Dr. Harold Box.

The books of the late Dr. A. E. Webster (a former Dean of the Faculty) have been given to the Library and make a substantial addition to its contents.

#### THE SCHOOL OF HYGIENE

This School is now recognized as the chief centre of graduate teaching in public health, both in Canada and abroad. Since its opening in 1927, 182 medical graduates have received the diplomas of Public Health and are now leaders in the field of preventive medicine in various parts of our Dominion and beyond its borders. To

enable suitably qualified men and women to attend the school. 74 Rockefeller fellowships and 41 Connaught Laboratory fellowships have been given. Inasmuch as it is generally accepted today that nutrition is closely linked with the maintenance of good health, special research work is being prosecuted in the field of nutrition. The director, Dr. Fitzgerald, on behalf of the Rockefeller Foundation, was absent throughout the year, making a survey of the teaching of preventive medicine to medical students in Europe and North America. Much more attention is likely to be devoted to this phase of medical instruction in the future. Dr. Fitzgerald expresses his belief that "the future progress of preventive medicine depends as much upon an enlightened and alert medical profession as upon organised community effort conducted by departments of health."

The present building, once enlarged to double its original size, is already becoming crowded—so rapid has been the development of preventive medicine, and so vast the increase in the products of the Connaught Laboratories.

#### LIBRARY

The number of books in the Library is 352,155, and of pamphlets 135,395, a total of 487,550, and an increase of 16,380 over last year. We seem to have reached the peak of the extraordinary increase in the circulation of books among undergraduates that has taken place during the last few years. The total circulation for staff, graduates and undergraduates for the current year has been 360,223. This number takes no account of the large circulation of books in some of the departmental libraries.

The Library is open throughout the day and in the evening.

The late Inspector G. H. Armstrong of Toronto left a valuable library of books relating to education, Canadian history and geography.

The \$500.00 prize won by our team in the Putnam Mathematical Competition from among similar teams from sixty universities in North America, has been handed over to the Library for the extension of the mathematical section.

The congestion in the stack room increases every year.

#### UNIVERSITY EXTENSION

This evergrowing department has completed its eighteenth year of service to the University and the Province under the energetic guidance of Mr. Dunlop. The number of adults who have taken continuous courses is 6712—3562 men and 3150 women. Through 182 extension lectures delivered by members of the university staff throughout Ontario probably 25,000 persons were reached. The evening tutorial classes, 52 in number, were attended by 3225 persons. The Workers' Educational Association had an enrolment of 1442 and were conducted in sixteen Ontario cities and towns.

For the third season an intensive course in Public Administration was conducted, with an attendance of 158. We are indebted to the Ontario Department of Municipal Affairs, under the Hon. Eric Cross, for generous and helpful cooperation.

Correspondence courses of various kinds are taken by 797 students.

The courses in occupational and physical therapy are the only ones of the kind provided in Canada. The increasing enrolment will soon call for larger accommodation. The demand for these trained workers still exceeds the supply. In the pass course for teachers 908 are registered. This year classes were held at Brampton and at Port Arthur and Fort William.

The last course to be added, under this department, is a two-year diploma course in Aerial Navigation. The curriculum closely resembles that in the British Air Colleges and the well-known Boling School of Flying in the United States. The physical standards for admission are set by the Federal Department of Transport: the subjects to be taught include mathematics, electricity and magnetism, applied astronomy, meteorology, map construction, navigation, aircraft-engines, radio and

the theory of flight. Conversational French will also be taught. Practical flying will be taught elsewhere. Probably many who take this course will find a career on the ground as meteorologists, radio operators, dispatchers, in the traffic business or mechanical departments. In any field these graduates will be fitted for the most responsible posts. There will be great developments in aerial navigation and any advance will make new demands on the men in aviation. This course should provide thoroughly trained experts. It will be our duty to keep this course in close relation to every advance which aerial navigation is so rapidly making. The first class will probably be about twenty in number. Our staff will give the necessary instruction. Among the teachers will be Mr. Robert McIntyre, who returns to us from a course in aeronautic engineering at Cambridge and from the practical experience of Farnborough. Professor T. R. Loudon has for years sought to develop such a course at this, and now sees his hopes fulfilled.

#### SOCIAL SCIENCES

Dr. Grauer has satisfactorily completed his first year as director. Professor Urwick continues to give valuable voluntary help. The department is seeking to keep the happy mean between scientific theory and practical work. It is important that a field worker in a pupil social service agency should have a high standard of training, such as can best be given in connection with a university. In university circles in the United States the problem of training social workers is receiving marked attention, in order to meet the demands of the State social services for trained workers. The best judgment there seems to be that it is wise to concentrate training in a few of the more important universities, which can provide students with a good foundation in the social sciences.

The Sadowski scholarships in Sociology and in this Department of Social Science will prove a stimulus to the best students.

Intensive courses for social workers in the field are being planned for next year.

As soon as funds permit, the staff should be strengthened on the side of research in the social sciences. A professor to direct research on general social problems would be of value both to the students immediately under his care and to the community at large. Research in the social sciences lags sadly behind research in the physical sciences, but is even more urgently required.

#### SCHOOL OF NURSING

The large enrolment in the various classes is taxing the accommodation of the School to the uttermost. In refresher courses 187 nurses registered. Miss Russell, the director of the School, was absent for some months at the request of the Rockefeller Foundation to aid in a project of reorganising nursing education in London, England. There is good hope that some permanent endowment for this School may be obtained. Its methods of training are exerting an influence outside its own walls. As people realise that it is easier and wiser to maintain health than to cure disease, the sphere of preventive medicine and the public health nurse will be enlarged and appreciated.

#### MILITARY STUDIES

The total registration was 136. Students in the special classes may obtain through the C.O.T.C. and the War Office in London, qualifications for commissions in the various Imperial Services. The results of the War Office examinations held in March showed that 76 per cent. of the candidates were successful. Major Barry Watson, the director, notes that owing to the increasing preference for university men in the Regular Army and Air Force, and the attractive conditions offered, a number of our graduates are adopting military work as a profession.

I hope that we may soon be able to provide more commodious quarters for this work, as numbers and interest are increasing.

## HEALTH SERVICE

Dr. George Porter states that the number of men examined was 2296—the largest on record—because of 710 senior students coming in for health certificates. Only 19 were unfit for physical training. The average height of our first year students is 5 ft. 9 $\frac{3}{4}$  in. and their average weight 144 $\frac{1}{2}$  lbs. This is our highest average. Our freshmen stand first in height among eleven of the best American Universities and second in weight. In the last sixteen years there is a general upward trend—due probably to good nutrition and bodily exercise.

Dr. Edith Gordon reports that of the women entering University College, medicine and household science, 214 were examined and 83.2 per cent. were fit for gymnasium and swimming requirements. From the other years and from other colleges, 306 were examined, including 66 who voluntarily came for a re-examination before leaving college. Intercutaneous tuberculin tests were made on all incoming students, and on those whose previous tests had been negative. Two cases of active tuberculosis were discovered among those entering for the first time and both are now receiving treatment in sanatoria.

Tests of hearing were made as an experiment and will probably become a regular part of the physical examination.

The Tuberculin tests so successfully and helpfully applied to women students will, I hope, in the near future be applied to all students in the University.

The question of the Health Service is engaging the careful attention of the Governors and committees are considering necessary improvements and enlargements.

## RESEARCH

The spirit of research permeates the whole university. Details of the various investigations in progress will be found in the reports that follow. Some are in the field of pure science and some in the applications of science to health, and industry. It is notable that more and more researches are being carried on by groups; and co-operation of related departments is essential to progress.

I may refer particularly to the work of Sir Frederick Banting and his colleagues in silicosis and in fundamental cancer problems; to the continued testing of heparin in the treatment of human beings; to the experiments at the Sick Children's Hospital and in other departments on the relation of nutrition to health; and to the romantic and amazing development of the Connaught Laboratories.

This kind of work is necessarily expensive and requires adequate funds and accommodation. This leads me again to state that one of our immediate needs is the addition of two storeys to the Banting Institute. Dr. Banting's work is undoubtedly being hindered by lack of space both for his research colleagues and for the animals required in experiment. Professor Hermann Fischer and his two colleagues in organic chemistry are at present housed in this already crowded building, until we can get the money to erect an extension to the chemistry building. Splendid work is, however, being carried on in spite of the limitations of space. After all it is the man, more than the material structure, that counts.

I have elsewhere noted that provision should be made for more research facilities in connection with the social sciences. It is easier to master matter than to master ourselves. The social sciences are the formulation of those human relations by which we master ourselves and are able to live happily and helpfully together.

## INSTITUTE OF CHILD WELFARE

The St. George School, financed by the Rockefeller Foundation and conducted by a committee appointed by the Board of Governors, is being put upon a new basis. The present School is being made an institute of child study under the direction of a Council appointed by the Board. The committee felt that as a separate entity the services of the staff of the St. George School could be made more readily available

to the various faculties and departments interested in the study of child development. This change has been made on the following grounds: (1) Such an institute is and has already made distinctive contributions to the understanding of the training and problems of the young child; (2) It is the only school in Canada where teachers of children of pre-school age can obtain the necessary education in this field; (3) It is the only centre from which the theory and technique of parent education can be studied and presented. The results already obtained are seen to be of great value to the teachers in our Public School systems: (1) Instruction in the field of child care is increasingly demanded in public and private school services and social welfare work. Formal courses in the University are now given in the following Departments: The faculty of household science, the departments of social science, psychology, occupational therapy, nursing and psychiatry. Forty-five students who have worked in this school have obtained the degree of M.A. and one the degree of Ph.D. Of the graduates working in the field of Child Study in the community nine are in government services, seven in nursery school and kindergarten positions, three in personal advisory work, two are principals of private schools and one is in social welfare.

Sixty-seven students completed the course for professional leaders in Parent Education and sixty groups have been conducted during the college year, attendance at which has reached the total of two thousand.

The committee recommended that the following departments be represented on the Council of the Institute of Child Study: two from the College of Education, and one each from the departments of psychology, social science, household science and medicine, together with the Director of the Institute, Dr. W. E. Blatz, and the President of the University. The Board of Governors have duly confirmed this recommendation of the committee.

The importance of the pre-school age in relation to the child's subsequent development is being increasingly recognized. This Institute of Child Study is really doing pioneer work in an important field.

#### THE LIBRARY SCHOOL

As a result of the inspection made last year by the American Library Association, it has been decided to strengthen the staff of the School by the addition of a full-time instructor.

The course is now so arranged that one-third of it is given to basic technical knowledge, one-third to knowledge of books, and one-third to administrative problems and special lectures.

#### SCHOLARSHIPS, BURSARIES AND LOANS

I am glad to note that the list of scholarships, bursaries and loans in all colleges and faculties is increasing. The help which these can give often makes the difference between attendance at the University or non-attendance, continuance or non-continuance. Both in number and in amount our scholarships might well be extended. The problem created by the increased cost of education differentiates against the non-urban population. The rural population cannot as well afford higher education as once it did. Thus educational opportunities for city and country can but be equalised by scholarships and bursaries specially allocated to students from outside the university centre. Yet we must not forget that brilliant students from the city may also stand in need of financial help.

#### FALCONER LECTURESHIP

Friends of Sir Robert Falconer, President-Emeritus, of this University have raised a sum of money to establish a lectureship in his honour. The lectures will be given every second year and the subject will be some phase of international relations. Our special lectureships are being steadily increased. In Medicine are

the Mickle and the Balfour lectures and in Arts the Marfleet (on Canadian-American relations), the Alexander (on English literature), and now the Falconer.

#### ATHLETICS AND STUDENT ACTIVITIES

Owing to the athletic fee, which the students themselves asked to be imposed, the students have been able in greatly increased numbers to be present at the Inter-collegiate Games and to engage in various sports previously out of their reach, and, best of all, the gymnasium and swimming pool have been opened at night.

The Senior Rugby Team lost the championship by one point to their old and gallant rivals of Queen's University.

The new athletic fee has given greatly increased facilities for exercise and recreation to the women students, notably in connection with golf and riding.

The new athletic building for women is still in the future. Our financial resources do not allow us to proceed with its erection at present. The gift of such a building would be of inestimable benefit to the health of the women and would provide accommodation for a more thorough course in physical education. Here is an opportunity for a generously disposed friend of the young women of the Province.

In the regrettable absence of the Warden of Hart House, Mr. J. B. Bickersteth, Mr. J. R. Gilley, the Controller, acted in his stead. Mr. Bickersteth has made such progress to recovery that his return is expected for the coming year. Mr. Gilley and his assistants have "carried on" admirably. In his report will be found the details of the social, intellectual, recreational, artistic and religious work of the House. The Hon. Vincent Massey, our High Commissioner in London, never loses his interest in Hart House. He has sent out a "coronation chair", used by one of the peeresses in Westminster Abbey at the Coronation Service, and this has been placed in the Hart House Library. He has also sent one of the plaster of paris lions, holding a shield with Canada's arms upon it, which adorned the temporary annex built at the west end of the Abbey for coronation convenience. This has been set up on a pedestal in the Debates Room.

One of the most interesting reports is that presented by Mr. E. A. Macdonald, secretary of the Students Administration Council, on the varied and increasing activities of this organisation, which represents the whole student body. I cannot speak too warmly of its work and of the help I have received from Mr. Macdonald, its kindly, competent and efficient executive officer.

It publishes a Students' Handbook, the *Varsity*—the student newspaper, and *Torontonensis*, the annual year book containing the photographs of the graduating class and a description of all student activities. It bore half the cost of printing the *Directory*—a charge that should properly be borne by the University. It finances inter-collegiate debates, the band, the orchestra, and other student projects.

It has established a loan fund which has been a wonderful help to students. These loans have been so well repaid that it has been possible to loan in all about \$18,000. Boarding houses for students are inspected and listed. An employment bureau has been in existence since 1933, to secure for students summer, Christmas and part-time work. Last year 1486 students were referred to positions, and this year the number is even larger. Owing to the increased activities of the Council, the Governors provided additional accommodation in Hart House.

#### DAVID DUNLAP OBSERVATORY

The famous 74 inch telescope continues to operate most efficiently. The number of clear working hours was 1273, and during this period 1216 photographic plates were taken. The publication of results will soon begin.

The 19 inch telescope has been put into operation.

## ROYAL ONTARIO MUSEUM

The report of the various directors are full of interest. The Sigmund Samuel Gallery has been opened to receive the great collection of Chinese books, called the "H. H. Mu Library," over 50,000 volumes.

The archaeological section has acquired several treasures of mediaeval art and sculpture.

A study of the fauna of Ontario, made by the museum of zoology, is being continued by summer surveys in various remote parts of this huge Province.

In the galleries of the museum of palaeontology have been installed a magnificent series of mural paintings, the work of the eminent artist, Mr. G. A. Reid, R.C.A. These portray the history of the world from its misty beginnings to the ordered world, as we know it to-day.

The total attendance at the Museum during the year ending on the 30th June was 268,872.

## THE PRESS

Mr. Gordon Burns, for some years assistant manager, has been appointed manager of the Press. A new press of large size, new binding machinery, and much new type have been purchased, and the whole interior has been cleaned and more conveniently arranged. Every year new books, written by members of our staff, are being published. The Oxford University Press and the University of Chicago Press are handling our publications in Britain and in the United States.

## ALUMNI FEDERATION

The Alumni Federation under its secretary, Mr. Byron Wood, continues to keep the graduates in touch with their *Alma Mater*. The *University Monthly* is full of interesting news and should be read by all graduates. During the year I addressed gatherings of our Alumni at Ottawa and at Chicago. Branches of the Federation have been revived at these centres. I hope that an increasing number from the very day of graduation will enroll as members of the Federation and help to form a public opinion, which recognises the value of higher education to the nation and which especially rallies to the support of our own University.

## UNIVERSITY BUILDINGS

Col. Le Pan, the superintendent of buildings, has charge of the material fabric of the University and carries on a work of supervision, repair and construction, the extent of which is scarcely realised but which reflects the magnitude of the institution. On his office staff fourteen persons are employed. The number of buildings (not including buildings of the Federated College) is 53. The number of employees (carpenters, painters, electricians, plumbers, tinsmiths, labourers, cleaners and caretakers) is 274; their salaries and wages (including services rendered to the Connaught Laboratories, Hart House, the Athletic Association, the Royal Ontario Museum and the Federated Colleges) amounted to \$321,000. Customs entries for equipment and books for all departments reached a total of 1336. The turnover in the Post Office was \$36,000. The cost of coal was \$105,000. Repairs and renewals amounted to \$83,000 (which is less than one-half of one per cent. of the value of the buildings). The capital expenditure at the Royal Ontario Museum, the Hygiene Building and the Connaught Laboratories Farm amounted to \$60,000. The number of accounts on which work was done for separate financial entities was 6,170.

The addition to the Royal Ontario Museum has been completed, and provided space for the Chinese Library and additional offices. The money for this was given by the Ontario Government, Dr. Sigmund Samuel and Sir Robert Mond, and the new galleries are named "The Samuel Galleries".

We congratulate Trinity College on its new residence for women under-

graduates. This seemly and commodious building—St. Hilda's—will accommodate 73 students and will be ready for occupation for the session 1938-9.

#### VISITING LECTURERS

During the year the following special lectures were delivered:

On the Alexander Foundation a course of five lectures by Dr. Carleton Stanley, President of Dalhousie University, on "Matthew Arnold"; the Donald C. Balfour lecture in surgery by Dr. Gordon Gordon-Taylor, senior surgeon Middlesex Hospital, London, England, on "Gastric Haemorrhage"; a lecture by Professor Hugh S. Taylor of Princeton University, on "Holes in liquids and their consequences"; a lecture by Professor Harold C. Urey of Columbia University on "Isotopes"; a lecture by Professor Morris Ginsberg, of the department of sociology, University of London, England, on "Social Development"; a lecture by Mr. Harrison Brown, correspondent for the British Broadcasting Corporation, on "The Successes and Failures of the Fascist Bloc"; a lecture by Dr. W. E. Gye, Director of the Imperial Cancer Research Fund, London, England, on "Cancer Research"; a lecture by Dr. Donald D. Van Slyke, Charles Mickle Fellow for 1936, on "Neutrality regulation of the organism"; a lecture by Professor E. J. Dent, Professor of Music, Cambridge University, on "Music in university life"; a lecture by Dr. Hans Simons, New School of Social Research, New York, on "Europe of to-day and the world of to-morrow"; a lecture by Mr. Frank Rising, editor of "Business Week," on "Trade Unions in the United States"; a lecture by Dr. Alfred C. Lane, Boston, Mass., on "Recent work on the measurement of geological time"; a lecture by Dr. W. I. Jennings, of the Faculty of Law, University of London, on "The Law and Custom of Cabinet Government in England".

In connection with the Department of Physics two special courses of lectures on "The Physical Principles of Television Tubes" and "Refrigerated Storage and Transport" were arranged, and nine lectures delivered by Dr. W. H. Kohl of the Research Laboratory of Rogers Radio Tubes, Ltd., and special lecturer in the department of physics on "The History of Television"; "The Cathode Ray Tube"; "The Iconoscope"; "The Kinescope"; "The Electron Multiplier"; "The Photoelectric Image Tube"; "The Electron Gun"; "High Intensity"; "Fluorescent Screens"; "Secondary Emission"; five lectures by Dr. W. H. Cook, of the Division of Biology and Agriculture of the National Research Council, Ottawa, on "General Refrigerated Storage and Transport"; "Temperature"; "Humidity"; "Atmospheric Composition"; "Special Problems".

University College, Department of English, arranged an exchange with Professor W. C. DeVane, head of the English Department, Cornell University, and with professor Herman J. Weigand, head of the Department of German, Yale University.

Professor E. K. Brown visited Western Reserve University at Cleveland. His subjects were: "Matthew Arnold and the Eighteenth Century"; "Mr. Eliot and his enemies"; "Higher Studies in English at the Sorbonne".

The following lectures were given in Convocation Hall under the auspices of the Royal Canadian Institute:

By Professor J. Ellis Thomson, Professor of Mineralogy, University of Toronto, on "Presidential Peregrinations to the Pacific"; Mr. Matthew William Stirling, Smithsonian Institute, Washington, D.C., on "By Airplane to Pygmy-land"; Dr. Karl K. Darrow, Research Laboratory of the Bell Telephone Co., New York, on "Transmutation"; Dr. Harold E. Edgerton, Assistant Professor of Electrical Measurements, Massachusetts Institute of Technology, on "Seeing the Unseen with high-speed Photography"; Dr. George M. Sutton, Curator of Birds at Cornell University, on "A year with the Eskimos of Southampton Island"; Mr. J. A. Wilson, Department of Transport, Ottawa, on "The Trans-Canada Airways"; Professor H. E. T. Haultain, department of mining engineering, University of Toronto, on "From Rock to Dollars"; Dr. Laurence M. Gould, Professor of Geology, Carleton College, Northfield, Minn., on "Antarctic Geological Adventures"; Dr. Guildford B. Reed, Queen's University, Kingston, on "Man and his Microbes"; Mrs. Mary Vaux Walcott, Wash-

ington, D.C., on "Wild Flowers of the Canadian Rockies"; Professor K. B. Jackson, University of Toronto, on "Aerial Photographic Surveying"; Dr. Harold C. Urey, Columbia University, on "The Isolation of "Isotopes"; Dr. W. H. Cook, National Research Council, Ottawa, on "Food Preservation"; Professor L. J. Rogers, University of Toronto, on "Scientific Crime Detection"; Dr. W. B. White, American Steel and Wire Company, Chicago, on "Musical Sounds and Their Engineering"; Mr. Denton Massey, M.P., Toronto, on "The Social Experiments in Sweden and Denmark"; Dr. Robert Chambers, New York University, "The Cell as the Architectural Unit of the Body"; Dr. William Boyd, University of Toronto, on "Growth—innocent and malignant"; Dr. Hugh S. Taylor, Princeton University, on "Chemistry and your Automobile"; Mr. Lionel E. Taylor, Plant Explorer, on "Plant Hunting in South Africa."

#### LEARNED SOCIETIES

The following Learned Societies met at the University:

The American Physical Society; The American Association of Physics Teachers; The American Society of Mechanical Engineers.

#### SPECIAL CONVOCATIONS

Two special convocations were held, when honorary LL.D. degrees were conferred, October 22nd, upon The Honourable Cordell Hull, Secretary of State, Washington, D.C., and March 21st, upon Sir Howard d'Egville, K.B.E., of the Empire Parliamentary Association, London, England.

#### BENEFACTIONS

During the year the University has received the following benefactions, totalling \$185,932.72:

From the estate of the late Reuben Wells Leonard, \$57,350.69; Rockefeller Foundation: Child Research and Parent Education, \$15,009.90, School of Nursing, \$9,993.99; Eaton Endowment, \$25,003.89; Sir Robert Falconer Foundation, \$16,115; Ontario Mining Association grant for research in silicosis, \$10,000; Carnegie Corporation: Fine Art, \$4,995.51, Workers' Educational Research, \$1,498.59, Physiology research, \$552.06; E. A. Wallberg Memorial Fund, \$7,036.57; Anonymous, for organic chemistry, \$5,000; For J. S. McLean Fellowships: Canada Packers, \$2,500, Mr. J. S. McLean, \$2,500; Reuben Wells Leonard Fellowship and Scholarships, \$3,700; W. P. Mustard Scholarship, \$3,000; Geophysics Research Fund, \$2,400; Eli Lilly Fellowship, \$2,002.19; Graduate Fellowships: Estate of the late Sir Edward Kemp, \$1,000, Imperial Oil Ltd., \$500, Sir Joseph Flavelle, \$250; Flavelle-Peacock Retiring Allowance, Sir Joseph Flavelle, \$750, Sir Edward Peacock, \$750; Bickle Bursary, \$1040; D. A. Dunlap Memorial Scholarships, \$1000; Arthur Cohen Scholarship, \$1000; Standard Brands, research fund for chemistry, \$999.07; Medical Society Bursary, \$600; William Lowell Putnam Prize Fund, \$505.31; J. W. L. Forster Library Fund, for fine art, \$500; Emerson Wickett Memorial Scholarship, \$500; Sadowski Scholarships, \$500; John Northway Memorial Fellowship, \$500; Sir Edmund Walker Scholarship, \$450; Robert Simpson Company Scholarships, \$450; University College Alumni Matriculation Scholarship, \$400; Gertrud Davis Exchange Fellowship, \$400; Robert Bruce Scholarship, \$387.64; Johannesburg Chamber of Mines Donation, \$351.75; J. A. Findlay Scholarship, mechanical engineering, \$330; Toronto League for Race Betterment Scholarship, \$300; School of Nursing Undergraduate Bursary Fund, \$300; S. R. Parsons Scholarship, commerce and finance, \$250; Mr. Robert A. Bryce, U.T.S. Engineering Scholarship, \$250; J. B. Willmott Scholarships in Dentistry, \$250; Percy Hermant Scholarship, \$250; Anonymous, for Mary Keenan Award, \$200; Delta Phi Epsilon Bursary, \$200; Pan-Hellenic Association Prizes, \$150; Boiler Inspection and Insurance Company Scholarship, mechanical engineering, \$150; Anonymous, for special research in

biochemistry, \$125; Sir John Eaton Memorial Scholarship, University Schools, \$120; University College Alumnae Scholarship, \$100; Maurice Hutton Matriculation Scholarship, \$100; University Tours Association Scholarship, \$100; Darling and Pearson Prizes in architecture, \$100; Herbert Willson Scholarship, \$100; Toronto Brick Company Prizes, architecture, \$100; Ontario Association of Architects Scholarship, \$100; George Kennedy Scholarship, \$83.10; Sarah Kennedy Scholarship, \$83.10; St. Margaret's College Alumnae Scholarship, \$75; Ramsay Wright Scholarship, \$53.36; Hollywood Theatre Prizes in French, \$50; Dr. R. A. Reeve Prize in Medicine, \$50; Toronto Women's League of the United Synagogue Scholarship, medicine, \$50; Public Speaking Association Bursary, \$50; F. W. Jarvis Bursaries, \$50; Hon. Charles McCrae, for Dent McCrea Scholarship, \$50; Hon. Justice Riddell, for Riddell Scholarship in law, \$30; Lambda Chi Alpha Alumni of Toronto, for Saddington Medal, \$26.75; Hon. Dr. J. A. Faulkner, for Faulkner Medal, \$26.53; Labour Research Institute Prize, \$25; Engineering Institute of Canada Prize, \$25; Ontario Medical Association Prize, \$25; U.C. French Society Prize, \$25; American Society of Heating and Ventilating Engineers, \$25; University College Alumni Prize, \$25; B.A.A.S. Fund, \$21.81; Maurice Cody Memorial Scholarship, University Schools, \$10; Alumnae Prize in English, \$10.

### OUR NEEDS

A living institution like a university always has needs. As far as I can see at present, we have filled the gaps in our teaching staff. But our first need is for an adequate annual maintenance, if the efficiency of the institution and its service to all Canada are not to be impaired. In regard to buildings, we require, in my opinion, as soon as the necessary funds can be found:

Two additional storeys for Medical Research on the Banting Institute.

A new unit for Chemical Engineering.

An enlargement of the present Chemistry Building in the Faculty of Arts.

An addition to the Mechanical Engineering Building, for hydraulics and other purposes.

An Athletic Building for the women of the University.

A new residence for University College.

More space and more books for our Central Library.

### GENERAL CONSIDERATIONS

Those who are interested in education are pointing out that it must have two objectives. First it must insure to the mass of our young people adequate training for the actual problems of living they will meet—that is, the mental discipline necessary to make a living and to enjoy life itself; and secondly, it should provide opportunities for the limited group who possess the natural ability which will qualify them for leadership and higher service in the community and the world of science. Some selective process for university education seems inevitable. Some kind of test of fitness, usually an examination, is applied. Much attention must be given to devising the best type of examination for choosing those students who will profit most by the discipline of higher education. Closely connected with this problem of selection is the problem of giving financial assistance to students of ability whose family or individual resources are insufficient. No economic group in the community should be excluded from the benefits of the highest education. Hence the necessity for an adequate scholarship policy throughout the university. There will always be a place for student self-reliance and self-help, but opportunities for finding work in vacations are not as great as they used to be, and there is a keener realisation of the cost to health and well-rounded development at which a student has too often obtained his university and professional training. President Conant of Harvard sums up the case in these words: "With the increasing emphasis on the importance of having a student's scale of living commensurate with physical well-being and the growth of a

well-adjusted personality, the need for scholarships and other forms of aid becomes more pressing." I note with great satisfaction the growth of scholarships, bursaries and loan funds in our own university, but more are needed.

The universities of Canada are powerful influences on behalf of the unity of Canada. They are engaged in the common task of imparting, widening, distributing and enjoying the content of knowledge. Professors pass freely from one university to another. Students often exchange universities in their third year. There is an organised conference of Canadian universities. At the same time no institutions do more to foster an imperial and an international outlook, in contradistinction to that doctrine of blood and race and extreme nationalism that is wrecking the unity of the world, in spirit of exclusiveness, suspicion and hate. In Canada today we need to emphasise those factors that make for unity, even amid the widest diversity of resource, tradition and interest. One of these factors is our common loyalty to the Crown and to British institutions, another is our community of educational and religious ideals.

It will always be difficult in educational curricula to keep the happy mean between specialisation and a broader general training. In some way we must combine the good in each. Here we have not a case of "either—or", but of "both—and". The specialised courses, for which this University has become famous, must be built upon a foundation of liberal culture. For our specialised undergraduate courses, we have probably reached a reasonable limit. Further specialisation can best be carried on in the postgraduate school. A common first year in science, in applied science, and in philosophic and social studies, is becoming the rule. As I have already stated, our courses in public and business administration are based upon a foundation of economic, political and philosophic studies.

Among the aims of a true education are a reasonable knowledge of facts, the ability to think clearly, willingness to learn, and a sense of the fitness of things. The broader a man's education is the better able is he to deal with the problems of today. Specialisation may be carried to the point where the law of diminishing returns becomes operative and where the number of professional and business men, politicians and educators who have a broad outlook is definitely limited.

Among the unifying factors at the University athletics must take a high place. All colleges and faculties are represented on the teams, which uphold the honour of the University of Toronto on the field. The *Varsity*, the undergraduate newspaper—itsself a great potential and actual influence for university consolidation—has editorially remarked: "Beside the benefits gained by the participants themselves, there is that intangible thing called college-spirit which comes to the fore when undergraduates get together in a student section to cheer their team on to victory. College-spirit may be defined as the desire to cooperate for the good of the college." University-spirit is the desire to cooperate for the good of the whole university. When there are so many and so varied groups on our campus, there is danger of disintegrating tendencies, nothing better integrates the student body than common interest and pride in an athletic team which bears the name of the University of Toronto.

It is well to remember that there is no such thing as "painless education" and that sturdy mentality and character will not be reared by too much humouring of individual taste. A shrewd observer of educational tendencies—himself a great captain of industry—has expressed his conviction that undue emphasis is placed on the interest factor, as opposed to the factor of mental discipline. Undoubtedly if mental effort is to be fully effective there must be interest; but to eliminate the element of mental discipline and to assert that, when there is no interest (at least at the outset), it is futile to attempt to educate, is a doctrine of doubtful validity. It is probable that effort will create interest just as frequently as interest creates effort. We value most those things for which we worked hardest. The Headmaster of the Leys School at Cambridge, England, used words of boys which are as applicable to university students: "A system of education which allows boys to leave school with-

out ever having had to do things which they disliked and without ever having had a face real difficulties is not calculated to produce a very effective type of citizen." If a youth never learns that the supreme values in life have to be struggled for mentally, morally and physically, he will not be well equipped to meet the problems of life. Can any one learn anything worthwhile without consistent effort—without, in Newton's phrase, "thinking about it all the time"? Further, is there not a danger that our youth, if nurtured mainly on the motive of interest, will conclude that the "great achievements of civilisation are a God-given right to which they are justly entitled, almost irrespectively of personal effort"? Perhaps, as in most fundamental antinomies, the answer is found in the effort to combine interest and discipline.

How far can education prove a bulwark of sound democracy in our country? Only so far as educated men actively participate in public affairs. An American university president, the Chancellor of New York University, describes his fellow-citizens in words that may in some measure be applied to ourselves: "We are a tolerant people. We are also an apathetic people when it comes to public affairs. We are good citizens to a degree. We pay our taxes when we can. We are orderly and law-abiding. Many of us go to the polls on election day. But we do not concern ourselves with matters of government as we should. . . . Few of us get very much excited about such matters, at least until things begin to tumble about our ears. We are pretty good followers, we college-trained men and women, but seldom do we show inclination toward public leadership. . . . We now and again feel ourselves the 'forgotten' class, forgetting it is mainly our own fault. An educational programme that fails to seek improvement of this state of affairs is missing something." We in Canada should rather follow the British tradition and practice of using higher education as an approach to and equipment for public service. The State pays a substantial part of the cost of university education, it has a right to the intelligent service of its privileged sons and daughters. I believe that many of these would gladly serve if the opportunity were open to them. Many of the courses we are now offering in the University directly help to fit men for public administration and public life. The general effect of a university course should be to deepen that sense of public responsibility without which higher education would fail to become a factor in preserving the ideals and principles of democracy. A sane democracy can be maintained only if the citizens are intelligent, interested, honest and religious. Democracy based only some inherent right of man is everywhere imperilled. I believe it can survive only if it is rooted in the religious faith of a people, such a faith as recognises the worth of the individual in the sight of God. To men and women whom education has fitted for some kind of leadership the challenge comes: What are we doing with our democracy? Are we using it to best advantage? Are we making it work? Are we keeping it pure?

This is the testing time for democracy. Just because our system is based on freedom, the responsibilities of the individual are greater than they are in totalitarian states, where a man must do it every detail what the authorities tell him to do, whether he likes it or not. We do not want wholesale regimentation, but we must practice self-discipline. We want a people, not apathetic, but capable of showing enthusiasm over something, a people with sense of public as well as of private duty, a people conscious of responsibility to safeguard freedom both at home and in all parts of the world. Courage, discipline, efficiency and leadership are as necessary to democracy as to dictatorship, and will be used in a nobler cause.

#### CONCLUSION

It is no light task to administer the academic affairs of this University and to bear the anxieties about expenditures which limitation of funds necessarily creates. But my helpers have been many. To the teaching staff, to the administrative officers, to the benefactors, to the fine body of loyal and self-disciplined students, to the chairman and members of the Board of Governors, who have given help, wisdom and

encouragement, and to the Government of the Province which has largely provided for our yearly maintenance. I offer a full measure of gratefulness.

All of which is respectfully submitted.

H. J. CODY,  
*President.*

November 10, 1933.

## APPENDIX A

- (25) Statement regarding the Museum of Geology
- (26) Statement regarding the Museum of Mineralogy
- (27) Statement regarding the Museum of Palaeontology
- (28) Statement regarding the educational work of the Royal Ontario Museum
- (29) Report of the Director of David Dunlap Observatory
- (30) Report of the O.C. The Canadian Officers' Training Corps
- (31) Report of the Secretary-Treasurer of the Students' Administration Council

## (1) REPORT OF THE DEAN OF THE FACULTY OF ARTS

*(Professor S. Beatty)*

The honour course in Music got under way in 1937-38, with 8 students in the first year. The enrolment in the third year of the general course was almost three times the average of that in preceding sessions, while for the fourth year the corresponding enrolment was nearly doubled. The increase in attendance during 1937-38 over the earlier figures is due to the provision whereby successful students in the second or third years of honour courses, as well as certain types of these not successful, may be transferred to the next higher year of the general course. The original arrangement remains in force, whereby students who have adequate standing in the second year of the pass course may enter the third year of the general course. It will be interesting to watch the development of the general course, particularly in relation to the type of student taking it and the affect which it may have on standards in the second and third years of honour courses.

The Council has always given a great deal of consideration to the system of honour courses, both in the abstract and in relation to the reactions of students. Naturally, there must be a balance between these two, in the sense that both must be taken into account. It is to be expected that individual departments will assume more and more responsibility for adjusting the content and manner of their courses to the capacity of their students, always keeping in mind that conviction rather than merely formal assent is what must be looked for in these who are to profit by the instruction which they receive.

It is gratifying to realise that the schedules of scholarships and bursaries in the various Colleges are constantly expanding. In several cases, bursaries make the difference between attending and not attending the University. The system of loans to students by Alumni organisations is a significant and valuable development, both for what it accomplishes and for the contact which it implies between the Alumni and the life of the University.

## (2) REPORT OF THE PRINCIPAL OF UNIVERSITY COLLEGE

*(Professor M. W. Wallace, M.A., Ph.D.)*

I have the honour to submit my annual report as Principal of University College:

Last year I had to report the resignation of Professor H. J. Davis of our English Department who accepted a post as head of the department of English in Cornell University. Once more the same American university has taken one of the most able of the younger members of our staff—Dr. Victor Lange, lecturer in the department of German, who has been appointed associate professor of German in Cornell. Dr. Lange came to us in 1930 as the first German student on the Gertrud Davis Exchange Fellowship. In 1933 he joined the staff of the college as lecturer in German. Dr. Lange has rendered admirable service to his department,—as a productive scholar, a highly successful teacher, and a wise and intelligent interpreter of the literature and history of his native land. We regret his departure exceedingly. He carries with his new position the warmest good wishes of his colleagues in Toronto.

Professor E. A. Dale was granted leave of absence during the Easter term for study in Greece and Italy. Professor C. N. Cochrane will spend next session in London and Oxford supervising the publication of a volume which deals with Roman history during the early centuries of our era, and which is to be brought out by the Clarendon Press. Professor Winnett of the department of Oriental Languages will spend the Michaelmas term in research work in Palestine and Arabia, and Professor Endicott of the department of English the Easter term at the Huntington Library in Pasadena, California.

As usual many members of the graduating class have won fellowships in other

universities where they will pursue graduate studies. Mr. A. H. Jarvis of the department of philosophy was appointed Rhodes Scholar for Ontario; this is the fifth successive year in which this honour has come to University College. Mr. W. C. Smith of the department of Oriental languages secured the Massey Scholarship in the University of Cambridge, Mr. G. D. A. McPherson the J. S. McLean Fellowship in the University of London, Miss Constance Lailey the Gertrud Davis Fellowship in the University of Leipzig and Mr. H. C. Keenan the Leonard Fellowship in the University of Toronto.

Perhaps the most striking testimony to the high scholarship of our undergraduate body has been furnished by the department of Mathematics. In April of this year the Mathematical Association of America conducted a competition open to teams of three, or to individual contestants, from colleges and universities in the United States and Canada. Altogether there were 163 individual contestants from 67 institutions. When the results were announced the University of Toronto stood first, California second and Columbia third. The Toronto team was composed of A. J. Coleman and N. S. Mendelsohn of the third year and I. Kaplansky of the fourth year. Mr. Kaplansky also secured the highest standing of any individual student in the competition. All three of the successful candidates were students of University College.

The benefactions of graduates of the college continue on the ample scale to which we have become accustomed. Among the gifts received during the present session are the following:

- (a) Two scholarships in the honour course in sociology, one in the second and one in the third year, of the value of \$125.00 each, the gift of Mr. B. Sadowski who graduated from the college in 1918 in the honour course of mathematics.
- (b) The Herbert Willson Scholarship in the second year of the honour course in biology and medicine of the value of \$100.00, the gift of Miss Alice Willson of the class of 1894 in memory of her brother, Dr. Herbert Willson.
- (c) The Wilfred P. Mustard Scholarship in Classics to be paid from the income of a sum of \$3000.00 given by Dr. J. W. Mustard and his two sisters in memory of their brother, Professor Wilfred P. Mustard, for many years head of the department of classics in Johns Hopkins University, and a graduate from University College in 1886.
- (d) The Maude Charleton Gibson Scholarship to be paid from the income of a sum of \$1500.00 bequeathed to the college by Mrs. W. A. Charlton in memory of her daughter who was the wife of Mr. John J. Gibson, a member of the Board of Governors.
- (e) The renewal for a fourth year of the prize of \$50 in oral French, the gift of the Hollywood Theatre.
- (f) A prize of \$50 given by the Public Speaking Association of Toronto and to be awarded at the discretion of the College Council.
- (g) A prize of \$25 given by the Alumni Association of the college, and to be awarded at the discretion of the Council.
- (h) A scholarship of \$150, given by Mr. Arthur Cohen, K.C., and his wife, to be awarded to a student of University College in English at the end of the first year.

A course of five lectures on Matthew Arnold was delivered by President Carleton Stanley of Delhousie University in Hart House on January 31st and the first four days of February. The lectures will be published during the summer by the University Press. The regular college course of public lectures was given during the Michaelmas term on *Aspects of the Victoria Era*. The lectures were Professors Mackay, Endicott, MacCallum, Coventry, Urwick, Bladen and Creighton.

We have continued our recent practice of informally exchanging lectures with other universities. During the present session we have had visit of two or three days from Professor DeVane, recently appointed Dean of Yale College, and Professor Weygand, head of the department of German in Yale. In return Professor Fairley of our German department visited Yale and Professor Brown of our English

department visited Western Reserve University. It seems unnecessary to stress the value of this plan for keeping the members of our staff in touch with the work that is being done in similar institutions.

### (3) THE ANNUAL REPORT OF THE DEAN OF THE FACULTY OF MEDICINE

(*W. E. Gallie, M.D., F.R.C.S. Eng.*)

The many letters received from graduates who have read recent annual reports from the Faculty of Medicine have indicated clearly that the plan of issuing it in the form of a letter designed to keep them in touch with all the activities of the Faculty is much appreciated and should be continued. As in last year's report, therefore, the Dean will comment upon matters of general interest to the whole faculty, and the heads of the various departments will discuss those subjects, both scientific and administrative that have been of interest in their particular fields.

As indicated in the report of last year the Faculty Council has been much concerned with the increasing numbers of students who desire to register in this Faculty and with the low level of scholastic aptitude shown by many of them. As it is quite impossible to keep up the standard of clinical instruction in the three final years if the hospitals are overrun with students, all possible ways of keeping the numbers within reasonable limits have been considered and every suggestion studied which might lead to a selection of those who are most likely to be successful.

As this question of how many students shall be accepted and who they shall be is of the utmost importance to the Faculty and as a definite policy in regard to it has now been decided upon, it would seem that the time is ripe for a frank discussion of the subject with the graduates.

Twenty years ago, from seventy to a hundred freshmen who held the matriculation standing of that time were admitted from Ontario and the other provinces, with an occasional student from the United States and other foreign countries. By the time they graduated the numbers had usually diminished by ten per cent. Then came the Rockefeller report on medical education and the almost immediate closing of hundreds of medical schools on this continent and the enormous raising of standards of both premedical and medical education. In Toronto the matriculation was raised from the pass to the honour standing and the medical course was lengthened first from four to five years and then to six. Many schools have required that students entering medicine shall hold a degree in the natural sciences, but so far we have not insisted on this but have attempted in a six year course to give the student an adequate training in the medical sciences and a slight contact with some of the purely cultural arts subjects. With this changing of the curriculum has come an enormous improvement in the courses given in both the preclinical and the clinical years, so that our Faculty has been able to reach and to maintain a position, as indicated by the Rockefeller reports, among the best schools on the continent.

Coincident with the sharp reduction of the number of schools and the general raising of the standards of medical education throughout America, many of the Schools abruptly reduced the number of freshmen accepted to 50 or 60, the number that could be handled satisfactorily in their associated hospitals. Naturally the selection committee picked out those applicants who appeared to be the best. I understand that nowadays such Schools as Western Reserve, Rochester and Buffalo select 50 or 60 freshmen from nearly a thousand applicants who hold their entrance qualifications and the result has been that we have been finding it increasingly difficult to compete with these Schools in the average of the intelligence of the students.

With this great general reduction in the opportunity for registration there has been a steadily increasing pressure for admission to Toronto and some years ago it became necessary to increase the restrictions. Bearing in mind that this Faculty is supported by the Province of Ontario, these restrictions have not yet been applied to

its citizens. They have, however, been applied stringently to the citizens of other countries and to a lesser degree to citizens of our sister provinces. Thus each year we have approximately five hundred applications from Americans who cannot get into the Grade A schools at home, and these are all declined. There are a certain number of applications from sons and daughters of our own graduates who live in the United States or elsewhere and from these we select only those who show aptitude for a prolonged course of study. This has caused some resentment on the part of some of our graduates but we hope that they will appreciate the great changes that have developed since their day and accept the general principle that this Faculty must serve primarily the citizens of Ontario.

Besides providing educational opportunity for young men and women from this Province, we must also lend assistance to the other provinces, particularly those who have no medical schools. In the case of British Columbia and New Brunswick, which have no medical schools, we accept graduates in arts who have covered the natural sciences and also students who have taken the first two years of that course. Such students are accepted into our second year if their academic record indicates that they may be expected to make satisfactory progress. With the University of Alberta we have an agreement by which students in either school may transfer to the other, provided all subjects in the previous year have been completed. The University of Saskatchewan has a course which coincides fairly well with our pre-clinical years. It is a four year course leading to a B.Sc. or a B.A. degree. We accept such graduates into our fourth year if their records are satisfactory. We also accept into our second year some students from Saskatchewan and Western Ontario who have completed satisfactorily their first two years, provided the number registered in our second year is not already excessive. In the case of St. Francis Xavier and Acadia Universities in Nova Scotia, and McMaster and Ottawa in Ontario, we accept into our second year graduates or students who have completed courses equivalent to our first year. From Alberta, Manitoba, McGill, Dalhousie and Queen's we consider applications for admission to the next higher year at Toronto provided equivalent courses have been completed and the applicant's record has been without stain, failures or poor reports from his school.

Before the period of overcrowding of our medical schools began, the previous record and aptitude of applicants from other Universities and provinces were not considered very carefully, but for the past few years this has to be changed and now no students are accepted from outside Ontario who cannot be classified as good students. They always may be found in the upper third of the class.

But in spite of these restrictions, lengthenings of the course and general raising of standards, the overcrowding has continued. Three years ago there were 450 students in the three clinical years. This is an intolerable condition from many standpoints but from two in particular. First, it is difficult if not impossible in a city of the size of Toronto to give an adequate training in the principles of medicine, surgery and obstetrics to 450 students. Secondly, it is not fair to the patients in our public wards to force them to submit to continual use as clinical material for teaching. The Faculty determined, therefore, that in some way or other the number of students in the clinical years must be reduced to approximately 100 in each year.

In examining the plan of selection of freshmen in the Class A Schools in the United States and such Canadian Schools as McGill, Queen's, Western Ontario, and Manitoba, we found the method simple. Each school has a definite limit to the number of freshmen who will be accepted, usually between 25 and 75, and from the mass of applications the requisite number of the brightest students are selected. The choice is based on previous scholastic record, recommendation by head masters of schools, personal interview and standing in the so-called "Scholastic Aptitude Test" concerning which something will be said later. This method could not be adopted in the University of Toronto, however, as here we have a definite matriculation standard which gives any Ontario student who has it, no matter how long he took to obtain it, the right to register.

In searching for other plans of selecting students a study of the whole scholastic and academic records of large groups was made by the assistant dean, Dr. E. S. Ryerson. This showed conclusively that students with poor records in high school and in arts courses almost invariably did badly throughout their medical course and that students who had failures in their freshman year almost always had failures in subsequent years and either failed to graduate or did so only after repetition of whole courses of study. It was determined, therefore, that while no limit could be placed on the number of students from Ontario who might wish to register in the freshman year (provided they had their senior matriculation), it would be wise to allow only those to advance to the second year who had shown aptitude for medical studies. It must be agreed that the kindest way to deal with the poor student and his parents is to drop him at the earliest possible moment from a course of study for which he has no aptitude.

As indicated above, the freshman year is really a premedical year during which the student studies in lecture hall and laboratory the fundamental sciences, physics, chemistry and biology. In addition he elects one arts subject, usually French or German and he attends a course of lectures on the history of science and civilisation. It is a full year and forms an excellent educational basis for the medical course.

The first step in developing a plan of selection consisted of raising the passing standard of the first year in the three sciences. Previously a mark of 50% in each subject constituted a pass. This has been changed in that while 50% is still the passing mark in each subject, an average of 60% must be obtained in the total of the three sciences. No supplemental examinations are allowed in these three subjects. While this does not appear to be an important change, it nevertheless reduced the number with a clear pass to a level that could be handled in the clinical years. We were annoyed to find, however, that the following autumn most of those who had been ploughed returned for re-registration in the first year in spite of strong advice to the contrary, and as there was no way of preventing this re-registration, the first year was larger than ever. As might be expected, these repeaters nearly all scraped through in the following spring examination, for only mental defectives could fail to pass this examination after two whole years of preparation for it.

This experience demonstrated that nothing short of strict methods of selection could be effective and it was accordingly determined to add to the existing regulations that students who failed in their first year examination could not re-register in the first year. This regulation comes into force this year and it should do something towards reducing the number of students to a level where each can expect to receive adequate training and where the general standard of intelligence will be equal to the work for which they are to be trained.

This final step in establishing methods of selection was taken only after grave consideration and with full realisation that occasional mistakes might be made in dropping from the Faculty students who might ultimately have achieved success in their studies and practice. To reduce this chance to a minimum, a system of recording the term work has been established and a series of test examinations introduced in order that the instructors may acquire early some knowledge of the application and ability of the students. When the results of the final examinations are considered, the whole record of these students who have failed, throughout high school and medical college, is reviewed and every effort made to eliminate mistakes. To lessen the hardship to those who have failed simply because they had selected the wrong course, the way is still open for them to register in the first year in any other course in the University, or, if they have obtained a 50% standing in the subjects of the freshman year in medicine, to apply for admission to the second year of the pass arts course.

In determining the fate of borderline students, the Scholastic Aptitude Test of the Association of American Medical Colleges is likely to prove helpful. This test is applied to applicants for admission to most Class A American Medical Schools, during their premedical years in college. Last year we submitted our first year to the

test early in December and were much interested to find that the standing obtained by the students in this very general test of intelligence, memory, powers of observation, general information, and so on, agreed very closely with students' records throughout the year and at the final examination. The test should be useful, therefore, in helping us to make the best selections for promotion to the second year.

Two years ago a committee of the Faculty was appointed to study the whole medical curriculum and to recommend whatever changes might lead to its improvement. At the end of the first year of the study the committee reported on the curriculum of the first, second and third years and recommended a general reduction of the number of hours devoted to both laboratories and lectures. They formed the opinion that with the passage of time, the various departments had tended to introduce much that was of special and advanced character into their courses and had forgotten that for the average medical student a firm grasp of principles is what is desired. In view of the committee the objects of the whole preclinical period of a medical curriculum ought to be (1) to introduce the student to scientific method and to imbue him with the scientific habit of mind, (2) to induce in him correct habits of learning and the faculty of independent inquiry, and (3) of course, to equip him with such a body of fully assimilated scientific information as will form an adequate and enduring basis for his later, more purely professional studies. Each department has sought to elaborate its courses to the fullest possible extent, and with this object has sought the largest attainable share of the student's time. The result is that the curriculum has become overloaded in content, and overcrowded in time. The student has no time for individual study and reading—no encouragement therefore to teach himself. His one duty he feels, and is practically made to feel, is to commit to memory a certain mass of information; and, having discharged this at an examination, to replace it as completely as possible by another. The Faculty is convinced that the results of this system are not good and that a general reduction of the time devoted to lectures and laboratory classes would probably produce an improvement. The remedy is not simple.

One of the most important changes has been made at the request of the professor of pathology, Dr. Wm. Boyd. Hitherto, pathology has been taught in the fourth and fifth years synchronising with the clinical teaching, but according to the new plan it has been moved back into the third and fourth years. This was made possible by the reduction of the time devoted to chemistry, physiology and anatomy and it has the great advantage that when the student commences his clinical work at the beginning of the fourth year, he has some knowledge of the principles of pathology and when he enters the fifth year, which is the year of intensive study of disease, he had already covered the special pathology of those diseases.

This year the Committee on Curriculum completed its study of the three clinical years and made the same criticism as in the report on the primary years, that while the courses have been, on the whole, of excellent quality, some of them have been over-elaborated so that the student, busy in the acquisition of a mass of detail, loses sight of the principles of the subject and of its real place in the science and art of medicine. The changes recommended and adopted were as follows:—

1. *Bacteriology* (third year)—A reduction from 165 hours to 120 hours, a change that partly balance the introduction of 45 hours of pathology in the third year.
2. *Pathological Chemistry*: A reduction of the laboratory course from 60 hours to 40 hours. The lecture course will be of the same length but will begin in the third trimester of the fourth year and be completed in the first trimester of the fifth year. This change has two advantages; first, that it correlates more closely the lectures with the laboratory work, and second, it relieves to a certain extent the already overcrowded fifth year. This change will facilitate the student beginning the clinical study of certain types of cases in the department of medicine in the third trimester of the fourth year instead of the beginning of the fifth year.
3. *Radiology*: A reduction of the number of didactic lectures from 40 to 30 hrs.
4. *Obstetrics*: In this subject the most important changes have been introduced. Last

year the didactic course on normal obstetrics was moved back into the fourth year and the timetable so planned that all didactic work would be completed by the end of the fifth year. At the same time arrangements were made with St. Michael's and the Western Hospitals whereby each fifth year student will have five weeks intensive practical training in one of these hospitals. During this period he will either live in hospital or be on call continuously. He will be excused from all other work except afternoon lectures. In the sixth year he will again have five weeks practical training in obstetrics and gynaecology, during part of which time he will live in the General Hospital and take part in the routine work as in general practice. This very great increase in the practical training in obstetrics should remove what has hitherto been a serious weakness in our course.

5. *Physical Therapy*: The increasing popularity of various empirical forms of physiotherapy led the committee to recommend greater attention to the teaching of this subject. Under the direction of Dr. W. J. Gardiner in the department of therapeutics, the teaching of physiotherapy has been established on a scientific basis and each student is given an opportunity to acquire both theoretical and practical training in the essentials.

The work of the Committee on Curriculum has prove so valuable that the Faculty decided to continue it for another year with the idea that it might investigate the schedule for each year as a unit, in contrast with the former approach from the departmental standpoint, and also that it might define along broad lines the objectives to be kept in view in the basic medical sciences and the clinical divisions of the course as a whole.

The summer courses for volunteer students from the sixth year was continued in surgery and obstetrics and again proved very successful. These students were distributed among the various services as externs and received a practical training very similar to that of a hospital intern. When the trimester comes in the regular term, during which they should be studying the subject covered during the summer, special appointments will be given to them in work in which they feel weak or in which they are specially interested. Thus, two will have appointments as externs at the Hospital for Sick Children, one at the Emergency Department of the General Hospital, one in the Urological Department and one on the Cancer Wards.

Accounts of the many important researches at present being conducted in this Faculty will be found in the reports of the various departments. Some of these are of the utmost importance and indicate that this University hold a strong position among the great centres of learning.

The outstanding medical contribution of the year came in response to the challenge of the epidemic of infantile paralysis which swept through Toronto and Ontario last Autumn. The whole staff of the Hospital for Sick Children rose to this emergency and in conjunction with the Departments of Health of the Province and City did excellent work in the diagnosis and treatment of the disease. The size of the epidemic made it possible to observe in large numbers of cases the effect of convalescent serum. The consensus of opinion was that it was of no value. The suggestion, supported by experimental evidence on monkeys, that spraying the olfactory mucous membrane with zinc sulphate solution would prevent infection with the virus of the disease was tested out in a mass experiment on 5,000 children. A study of the results showed that the method as carried out was of no value.

A feature of the epidemic was the surprising number of adults that were affected. This presented an emergency at the General Hospital which was ably handled by the medical staff.

In both the children and the adults a very high percentage showed involvement of the muscles of respiration and to meet the situation the mechanical department at the Children's Hospital supplied large numbers of Drinker respirators which proved of great value to both children and adults.

The postgraduate courses on manipulation therapy, cardiovascular diseases and fractures, held in the latter part of September, were well attended and successfully

carried out. This year the courses will be on metabolic and endocrine disorders and on cancer. These short courses of one week of intensive study of special branches of medicine and surgery are proving very attractive to the graduates of both this School and others and will be continued as a part of the regular University work.

This year the Donald C. Balfour Lecture was delivered on Lister Day by Mr. Gordon-Taylor of Middlesex Hospital in London, England. His subject was "Gastric Haemorrhage". Mr. Gordon Taylor made the journey from England specially to give this lecture and so brought to fruition the founder's hope that in this lectureship our students might, from time to time, have an opportunity to hear distinguished surgical teachers from abroad.

The practice of inviting the Charles Mickle Fellow to deliver a lecture to the students and Faculty has proven very successful and has given us an opportunity to meet intimately the most distinguished practical research workers of their time. Last year we had a most interesting lecture from Dr. Donald D. Van Slyke on "Neutrality regulation of the Organism". This year the award has been made to Dr. George Hoyt Whipple of the University of Rochester for his work on pigment metabolism and regeneration of haemoglobin.

Well deserved honour has come this year to Professor C. H. Best, Head of the Department of Physiology, who was elected a Fellow of the Royal Society of England. Dr. Gordon Murray of the Department of Surgery has been much honoured also in his appointment as an Hunterian Professor in the Royal College of Surgeons of England for his work on "Heparin".

I regret to have to record the death of a member of the Faculty, Dr. George R. Pirie, of Dr. George C. McIntyre, a former teacher in the department of surgery, and of Dr. E. A. Gray, the medical superintendent at the Toronto General Hospital.

Doctor Pirie was a distinguished member of the medical staff of the Hospital for Sick Children and an excellent teacher of paediatrics. Dr. McIntyre was an exceedingly popular young surgeon whose retirement some years ago because of ill health was regretted by all. Doctor Gray was known to all interns and students and was a valued friend of the University.

#### (4) REPORT OF THE DEAN OF THE FACULTY OF APPLIED SCIENCE AND ENGINEERING

*(C. H. Mitchell, C.B., C.M.G., C.E., D.Eng.)*

The past session has been noteworthy in this Faculty because of the steady and serious application to work by the students, with their consequent excellent academic results.

Notwithstanding the general unrest which is abroad, and the apparent unconcern and inattention of present-day youth to serious things, the young men of this Faculty appear to have successfully resisted the slackness which seems to so generally prevail. This has been observable both in their academic work and their student activities, and is a tribute not only to their own determination and judgment, but, I believe, to the faculty staff as well, in its special efforts to meet these prevailing conditions.

The number of students in attendance continues to increase. The upswing which recently became apparent has now definitely developed and is a natural result of the recovery of general conditions and activities in the country following the conclusion of the depression, the low point of which was reflected by the number (766) registered in this Faculty in 1935. Since then there has been a distinct rate of increase, there being 789 in 1936 and 833 in 1937. A similar rate of increase will doubtless now continue for a time.

The present "recession", as it has been called, has noticeably affected the activities of industry and some fields of engineering in this country the past year, and this may temporarily influence the attendance in certain of the engineering courses. In the long view, however, it is reasonable to expect a still greater attendance in this Faculty in the next few years. This is desirable because the country

still needs young engineers—highly and carefully educated technical and technical-business men.

It is worthy of record at this time, and with respect to the foregoing, that in the past few years the number of young men taking applied science courses in this Faculty who go out into business and work other than engineering, has steadily been increasing. Whereas ten years ago only a small percentage of applied science graduates did this, there are now many more who do so immediately upon graduation. More than ever do young men come for applied science courses who never intend to follow engineering. In the usual course of graduates' progress, it has been noticeable, moreover, that the percentage of those who have been out five and ten years, who have departed from purely professional work and gone into the business side, has very much increased and continues to do so. Engineering graduates from this Faculty are now to be found in large numbers in executive positions in very many industries where they are more concerned with finance, economic, and commercial operations than with technical. A great many have also gone on into banking, finance, law, and purely commercial enterprises, a number into teaching, and some into church and foreign missionary work.

The relative distribution of numbers of students into the various graduating departments is now regaining a proportion more appropriate to the country's probable needs. Those in civil engineering are definitely increasing, which is desirable, as a shortage of young men in this important branch of the profession has already been manifested. The numbers entering mechanical engineering should also increase in proportion, as there is always a strong demand in this field and it will continue. The result of the small numbers which have been entering architecture, a five-year course, now begins to be felt in a distinct shortage, and this will be accentuated with the impetus given the construction industry by the new legislation.

A study of the results of examinations in this Faculty over a period of time, say ten years, discloses several interesting features with respect to the number of students entering and the failures in the first and succeeding years. Emerging from such study, the following observations may be made:—

- (1) That when students crowd into a faculty of course, the ratio of failure tends to increase, a natural consequence of attraction to such a course by a greater number of students of diverse abilities.
- (2) That ratios of failures in the first year were high in 1931 and again in 1935 and 1936, the former being with a large number in the year on the entrance of the depression, and the latter on its approaching exit, with a hundred students less, but with the first full effect of the operation of the "recommending" process of entrance to the University.
- (3) That in the past two years the first year failures have declined, and
- (4) That in the past two years the failures in the second, third, and fourth years have also noticeably declined, and for this year it is pleasing to note an increased percentage taking honours, especially in the first two years.

This session the first group of students taking the course in engineering physics established four years ago completed their fourth year, six in number, and graduate this spring. While this is a difficult course, requiring high attainment especially in mathematics, it appears to have attracted a fair number of students, there having been passed this session twelve in the first, ten in the second, and six in the third years.

The course in mining geology, established a year ago, which combines the first two years of mining engineering with the last two devoted mainly to geology and kindred subjects, has already attracted a few students, there having been, this session, seven in the first, one in the second, and two in the third years.

The provision of increased building accommodation is still the outstanding necessity in this Faculty. Hopes have long been entertained that additional facilities could be provided, especially for mechanical and chemical engineering. As each year passes, difficulties, due to lack of space and appropriate equipment, become more acute.

In mechanical engineering the scope and further development of instruction in newer directions is being seriously hindered due to lack of or delay in providing these facilities. The phases of expansion greatly desired, and indeed necessary if the University is to even reasonably keep pace with growing requirements in this field, lie in new laboratories for machine design and open channel hydraulics, and in means of conducting experimental studies by models of river channels and harbours. These latter have now become of great importance with respect to flood control and the resulting property damage. Additional provision is greatly needed for expansion of facilities for instruction and experimental study regarding heat insulation, a subject now much to the front in this country.

In chemical engineering, the necessity of providing increased accommodation has rapidly become more urgent. During the past few years the crowded condition of laboratories in this department, due to greatly increased numbers of students, has become steadily worse. Not only does this crowded condition seriously obstruct the normal course of instruction, but it makes almost impossible the installation of new and much needed equipment, even if the requisite funds for such were forthcoming.

Each succeeding session, the increasing numbers of students moving up into higher years in chemical engineering have very greatly added to difficulties of instruction and have limited its scope. Attention has been drawn to this condition each of the past eight years or more as the members of the staff and the students of this Faculty and department have continuously experienced these conditions becoming more acute, notwithstanding all the efforts, devices, and makeshifts which both staff and students have continued to keep necessary instruction going. These conditions can, in the end, have only one result, even apart from the discouragements which ensue. The efficiency must suffer. Attention has frequently been called to this possibility, almost yearly, having been first reported in 1930.

It is with great regret that, now, after every means appear to have been exhausted, the department of chemical engineering, contemplating the very large classes coming into their third and fourth years, all members needing specific personal facilities, reports that in the forthcoming session the efficiency of instruction will definitely and seriously be impaired. This is most unfortunate in such an important field of education.

Accommodation for metallurgical engineering is now being taxed in a manner that threatens results similar to those already described. This department was provided with accommodation in its earlier days for not more than thirty or forty students in all years. An endeavour is now being made to compress into the same space over twice this number—there being eighty students the past session, and nearly a hundred coming next year. These figures apply only to those registered in the department, and have no relation to the large numbers in those which this department also services.

Research in this Faculty has proceeded as usual during the past session, although under great restriction, due to lack of funds with which to prosecute most desirable researches. The Committee of Management of the School of Engineering Research has held many meetings, particularly during the past term, and a result its structure has been considerably improved, with its membership doubled and its operations provided for by more comprehensive arrangements. Its report on the work of the session is presented separately, but concurrently with this.

It will be observed that thirty-five researches have been carried on by thirty-four different researches, including professors, lecturers, instructors, and specially appointed research assistants. These researches are all carried out in applied science fields directed towards objectives which are hoped to be of specific use in various industries, with which the work in this Faculty is concerned. While all this research effort has produced a degree of satisfaction on the part of the School of Engineering Research and the members of the staff, there is much more to be desired if funds and opportunity in point of available time on the part of the researchers were available. A difficulty encountered in this respect in this Faculty is that the

normal and routine work of instruction absorbs so much of the time of the staff during the session that their efforts are limited, and after the session is ended there is but a short time left before this report of the year's work requires to be presented. Many researchers work steadily throughout most of the summer holidays as a consequence.

In the retirement of Professor H. E. T. Haultain at the end of this session, this Faculty loses a most valuable member. Professor Haultain has been head of the department of mining engineering for the past thirty years, since he first came onto the staff. His great ability as a teacher and administrator has resulted in building up a department of which the University and the Province may well be proud. His close contact with the mining profession and the industry generally, and the foundations he has laid in this respect, have been of the greatest value. His efforts and his long and painstaking work in connection with the provision of the new mining mill in 1930 will long be remembered. Perhaps, however, Professor Haultain's greatest contribution has been in his deep interest in the young men going through his department and his concern for them after graduation; this after all is one of the finest attributes upon which a university professor can be congratulated.

#### (5) REPORT OF THE DEAN OF THE ONTARIO COLLEGE OF EDUCATION

(*Dr. J. G. Althouse*)

Registration in the Ontario College of Education was slightly lower than in the previous session. Including extramural students the total number of registered was 628, as against 653 in 1936-37. The decrease occurred mainly in the High School Assistants' course, but the proportion of students in this course seeking specialist standing continues to increase.

The current revision of the High School courses of study necessitated the establishment of two new supplementary courses for teachers: home economics and shop work. The supplementary course in music again attracted a large group of students, and the class for Intermediate Certificates in home economics was much larger than usual. On the other hand, the enrolment in physical education and in the public school course was reduced.

The Librarians' course continues to attract classes to the capacity of the school. A revision of the course of training, which has been in process for some time, was greatly accelerated by the decision of the Board of Governors to add a full-time instructor to the staff. The course now devotes approximately one-third of the time to basic technical knowledge and skills, one-third to knowledge of books, and one-third to special lectures and administrative problems.

During the year the Department of Educational Research published Bulletin No. 10, *Bibliography of Canadian Education*. Two forms of a World Geography test were published for use in the elementary school, and two intelligence tests, one for high school grades and the other for the middle grades of the elementary school, were made ready for standardisation. Preliminary work was done on an achievement test in French. Several minor researches were carried out: a study of grades awarded by critic teachers to teachers-in-training; the influence of economic factors on student-teacher enrolment; the reliability of test-item validities. Members of this department participated in a Dominion-wide conference on national research in education, in preparation for the biennial meeting of the Canadian Educational Association.

Mr. G. A. Cline's continued ill-health prevented him from assuming his duties throughout the entire session.

The Board of Governors made the following additions to the staff:

Miss Mary E. Silverthorn, M.A., Assistant Professor of Library Science in the Carnegie Library School at Pittsburgh, to be assistant professor of library science in the College of Education:

Miss Ruth E. Ratz. B.A., head of the department of home economics in Jarvis Collegiate Institute, Toronto, to be lecturer in home economics in the College of Education.

#### (6) REPORT OF THE SECRETARY OF THE FACULTY OF HOUSEHOLD SCIENCE

*(Professor C. C. Benson)*

The work of the Faculty of Household Science has proceeded much as usual this session.

The registration has been about the same as last year, with the majority of the students coming to us from Macdonald Institute, and a few from other universities. With the present entrance requirements and arrangements of courses, it is undoubtedly wiser for most of the students who wish to study Household Science and who come to the university from the secondary schools of the province, to take their work in the Faculty of Arts and to graduate from the course in household economics. In that course, the increase of household science work in the schools has already shown a larger number in attendance here, but the registration in this Faculty is not likely to greatly increase for the present. We are, however, glad to be able to offer opportunity to obtain a household science degree to graduates of Macdonald Institute, and to others from other colleges and universities.

There have been requests during the session for an arrangement for extension work, but as yet it has not seemed advisable to undertake this. The numbers wishing such work are small and the cost would be considerable, but it may be necessary to arrange for summer courses in the future.

#### (7) REPORT OF THE DEAN OF THE FACULTY OF FORESTRY

*(Dr. C. D. Howe)*

This year's graduates from the Faculty of Forestry, six in number, have all found positions, four in governmental services and two with pulp and paper companies. Nearly ninety per cent. of the undergraduates who passed their examinations are employed in forestry work for the summer, being divided about equally between the Government and private companies. The so called recession in the business uptake in the United States has reflected itself adversely on the pulp and paper industry in this country and so on the employment of forestry graduates compared with the conditions a year ago when the Faculty could not supply the demand from the industry. The present situation is undoubtedly a temporary condition in the industry and the former demand for graduates will be restored. The demand for foresters in the governmental services is slowly increasing.

The two new courses introduced into the curriculum last year, namely the course on fish and game conservation and the one on the scaling of timber, the latter given at the Forestry camp, have been carried on with increasing success during the current year.

We had occasion to make a statistical study of our students' origin, pre-university education and employment after graduation, covering the first thirty years of the Faculty's existence. We found that since its establishment four hundred and nine students registered in the Faculty. Of these seventy-seven per cent. came from Ontario and nine per cent. from the other provinces and Newfoundland. Outside of Ontario, New Brunswick has contributed seven students and six each have come from British Columbia, Manitoba and Quebec. Five came from Alberta, Nova Scotia has furnished four, Saskatchewan two, and Prince Edward Island and Newfoundland one each. Fifty-seven students, fourteen per cent. of the whole number, have come from other countries among which Great Britain and possessions lead with twenty-two men, followed by the United States, Holland, Finland and Norway.

Around forty-four per cent. of the three hundred and nineteen students from Ontario came from Toronto and this city has contributed a little more than a third of the students as a whole. The Parkdale Collegiate made the largest contribution to the Faculty, twenty-five men. Jarvis and North Toronto stand next with seventeen and sixteen men respectively. Humberside Collegiate furnished thirteen. Riverdale and the University of Toronto Schools eleven each. Nine of the entrants came from Harbord, seven from Oakwood, five from Malvern, and four each from Bloor and West Toronto Collegiates. The Central Technical School furnished three men. Among the private schools in the city, Upper Canada College leads with eight men. St. Clements contributed two, St. Michael's and De la Salle one each.

It is a significant fact that the Toronto schools furnishing the largest number of men to the Faculty are those that have had principals or science masters with more than the usual interest in the conservation of our natural resources.

Other towns than Toronto in Ontario have contributed one hundred and seventy-seven men representing seventy-six different preparatory schools. Forty-five of these, however, sent only one man each to the Faculty during the past thirty years. Ottawa leads with twelve men. Aurora, Clinton, Kitchener, London and Sault Ste. Marie furnished five men each while Belleville, Brampton, Galt, Hamilton, Peterboro and Woodstock contributed four men apiece.

Of the four hundred and nine men who began the study of forestry in the past thirty years, only two hundred and fifty eight, or sixty-three per cent., completed the course and received degrees. Failure to meet the academic requirements was the chief cause of the men dropping out. Comparing the number entering from Toronto with that from the Ontario towns outside of the city, one can find practically no difference in the number completing the course in the two groups; it is less than one per cent. in favor of Toronto.

The number of living graduates is two hundred and forty-four; of these one hundred and eighty-six or over seventy-six per cent. are employed in forestry or related fields. Pulp and paper, lumbering and allied industries have absorbed nearly one half the forestry group. The various governmental forest services employ about one-third of the remainder. In the next largest group, a little over ten per cent., are included the men who are working in forest entomology, forest pathology, nursery inspection and so forth in other governmental organisations and engaged in aerial patrol, timber estimating, and saw-milling for private companies. Eight of the graduates are teaching forestry in universities, four in this University and four in the United States, one each at the University of Michigan, the University of Washington (state), Purdue University in Indiana, and the New York State College of Forestry at Syracuse University.

Under the classification of pulp and paper, lumbering and allied industries, the distribution of the men is as follows: Ontario forty-seven, Quebec twenty-three, British Columbia six, Manitoba three, New Brunswick two, Newfoundland three, England one, and United States four—eighty-nine men in all.

Ontario leads in the number of men in government forest service with thirty-three men. The Dominion Forest Service comes next with seventeen men. The Forest Branch of British Columbia has six of our graduates, Manitoba three, Saskatchewan two and Alberta one.

The figures given above are based on conditions in December, 1937. The shiftings of the past six months have changed them somewhat but not in essential character.

### (3) REPORT OF THE DEAN OF THE FACULTY OF MUSIC

(*Sir Ernest MacMillan*)

An important step has been taken this year in the appointment of Dr. Healey Willan and Mr. Leo Smith as professors in the Faculty of Music. The extension of musical activity in the University, particularly in connection with the new Arts

Course, has rendered full time appointments necessary. As the appointments have been made with the support and co-operation of the Board of the Conservatory of Music, a closer relationship between the University and the Conservatory seems assured for future years.

Dr. H. A. Fricker, who has been a lecturer of the Faculty of Music since the Faculty was constituted in its present form in 1918, retires this year. His colleagues will greatly regret the loss of his valuable advice and co-operative spirit.

Eight students were registered in the new Music Course in the Faculty of Arts and indications point to an increased interest in this course in years to come. Instruction will be undertaken, as heretofore, by members of the Faculty of Music.

During the years 1937-38 the number of students registered for the Mus.B. degree was forty-nine. Eight of these were registered in the first year, sixteen in the second, and twenty-five in the third. The degree of Bachelor of Music was conferred on nine students. No doctorates in music were conferred. The usual series of lectures have been given by members of the Faculty and fourteen students were registered for special tutorial classes.

Four organ recitals have been given in Convocation Hall, arranged by Dr. Healey Willan: one each by Mr. David Ouchterlony, Mr. Maitland Farmer, Dr. Charles Peaker, and Mr. Frederick Silvester.

Early in the autumn, the Carnegie Corporation of New York, at the request of the President of the University and the Conservatory Board, asked Mr. Ernest Hutcheson of the Juilliard Foundation to undertake a survey of the activities of the Toronto Conservatory of Music, and in the light of his experience of similar institutions, to make suggestions which might further the interests of the Conservatory. In spite of the short time at his disposal, Mr. Hutcheson was able to cover a great deal of ground and his report has been of notable value in suggesting direction of future activities. The division of the functions of the Conservatory into three categories has become somewhat clarified:

- (1) Training school for professional musicians.
- (2) General public school of music.
- (3) A public academic body closely connected with the University and exercising an important influence in the general musical life of the community through its examination system and otherwise.

While no drastic changes are contemplated for the present, it is probable that in the course of time these functions will be more sharply differentiated. In the meantime a Summer School has been announced, to be held in July, 1938, and during the coming year courses for full time professional students of the Conservatory are being planned on a broader basis than heretofore in order to establish a definite Senior School.

The sale of the Academy property on Spadina Road should result in easing somewhat the financial problems of the institution and in enabling a greater degree of concentration of its activities.

The Conservatory Choir has appeared in Convocation Hall in the annual performance of Bach's "Saint Matthew Passion" on April 12, and has also sung Mendelssohn's "Elijah" and extracts from Act III of Wagner's "Parsifal" and from Act III of "Die Meistersinger" in Massey Hall with the Toronto Symphony Orchestra. The Choir sang also Pierne's "The Children's Crusade" with the Philadelphia Symphony Orchestra in Massey Hall in May. The Conservatory Orchestra, under the direction of Mr. Ettore Mazzoleni, appeared twice in Massey Hall, and twice in Convocation Hall. Other Conservatory organisations, notably the Conservatory String Quartet, have made valuable contributions to the musical season in Toronto. A new Chamber Music Club formed in the early fall has already attracted a large membership.

At the end of May, 1938, registration for tuition at the Toronto Conservatory of Music showed an increase of nearly three hundred over figures for the previous year. The number of candidates for examinations for the present season has been 13,482.

The musical activities of Hart House have been as extensive as ever and the Hart House Glee Club, under Dr. Charles Peaker, continues to progress. It has been decided to concentrate the Carillon recitals from the Memorial Tower, by J. L. Richardson, into a shorter season in order to enable a larger number of enjoy them during the warmer months.

### (9) REPORT OF THE DEAN OF THE SCHOOL OF GRADUATE STUDIES

(*Professor G. S. Brett*)

The number of students registered in the School of Graduate Studies for the year 1937-8 was 583. As compared with the enrolment for 1936-7 this is equivalent to a decrease of 51. The number registered for the Ph.D. was 118, as compared with 131 in the previous year; for the M.A. the number was 173, an increase of 33 over the previous total. The significance of these figures is made uncertain by the fact that students who are in reality proceeding to the M.A. may be registered as graduate students: a total of 205 students were so registered in the current year. The number of men enrolled was 432, showing a decrease of 32 from the previous year; the number of women increased from 137 to 151. It is possible that the decrease in the total enrolment reflects the effect of raising the fees. The decrease of candidates for the D.Paed. accounts for 46 out of the total 54, which shows that the fluctuations in the other subjects was not great.

The number of students resident in the Province of Ontario was 421, a decrease of 51; the number from Toronto was 259 (a decrease of 43) and from the other parts of the Province 162 (a decrease of 8). (For detailed distribution see Appendix B (K).) The number of students from other Province of Canada was as follows:— Quebec 6, Manitoba 28, Saskatchewan 23, Alberta 11, British Columbia 12, New Brunswick 14, Nova Scotia 17. The number from other countries increased from 48 to 51, distributed as follows: Great Britain 2, China 9, Japan 1, Bahamas 1, India 2, Newfoundland 1, Ireland 1, Switzerland 1, Germany 1, U.S.A. 32.

The number of institutions represented in the School was 59. This number includes 17 Canadian institutions, 26 institutions in the United State, 4 English and 12 situated in other countries. The number of students from universities in Ontario other than Toronto was 33, including 31 from McMaster, 27 from Queen's and 25 from Western Ontario. The number of students who had taken their first degree at Toronto was 335.

The distribution of the candidates for the different degrees was as follows:—

Ph.D. ....	118
M.A. ....	173
M.S. ....	3
M.A.Sc. ....	12
C.E. ....	1
Mech.E. ....	1
D.Paed. ....	46
M.Sc. (Dent.) ....	1
M.S.A. ....	20
Mus. Doc. ....	3

The distribution of the candidates according to the major subject was:— Anatomy 1, anthropology 5, applied mathematics 5, architecture 1, biochemistry 13, biology 30, botany 21, chemistry 10, chemical engineering 10, Chinese archaeology 3, civil engineering 2, classics 13, dentistry 1, education theory 2, electrical engineering 2, English 53, food chemistry 3, geography 2, geology and palaeontology 15, Germanic languages and literature 3, history 31, household science 3, hygiene and preventive medicine 4, law 1, mathematics 10, mechanical engineering 5, mineralogy 3, music 3, pathological chemistry 1, pedagogy 46, pharmacology 3, philosophy 59, physics 36, physiology 9, physiological hygiene 3, political science and economics 23, preventive dentistry 2, professional degrees 2, psychiatry 1, psychology 39, romance languages 27, semitics 3, surgery 3, special committees 20.

The number of students recommended for degrees was:—

Ph.D. ....	35
M.A. ....	117
M.S. ....	2
M.A.Sc. ....	4
C.E. ....	1
E.E. ....	1
D.Paed. ....	1
M.S.A. ....	9
D.V.Sc. ....	2

Fellowships:—Nine Open Fellowships and Scholarships were awarded by the Council of the School on the recommendation of the Scholarship Committee. Other awards, noted below, were made by the Council on the recommendation of the departments or committees concerned.

F. E. L. Priestley, M.A. Alberta, department of English.

Miss M. B. Ellis, M.A. British Columbia, department of romance languages.

A. F. Graham, B.A.Sc. Toronto, department of chemistry.

L. H. Turl, B.A. Toronto, department of physics.

W. Robbins, M.A. British Columbia, department of English.

M. Long, M.A. Toronto, department of philosophy.

W. Paterson, B.A. Manitoba, department of history.

B. M. Springbett, B.A. Alberta, department of philosophy.

Miss M. E. Biehn, B.A. Queen's, department of biochemistry.

Alexander Mackenzie Fellowships:—

W. B. Ross, B.A. Dalhousie, B.A. Oxford, department of history.

D. D. W. Irwin, B.A. Manitoba, department of political science.

Ramsay Wright Scholarship:—

Miss G. W. Workman, B.A. Toronto.

George Paxton Young Fellowship:—

J. G. L. Pearson, B.A. Toronto.

Nipissing Mining Company Research Fellowship:—

D. A. J. McDonald, B.A.Sc. Toronto.

Fellowships tenable in the University of Toronto by students undertaking graduate research were awarded by the respective Committees of Award as follows:—

War Memorial Fellowships:—

E. E. Minett, B.A. Toronto.

J. O. Gorman, B.A.Sc. Toronto.

Maurice Cody Fellowship:—

F. J. Westcott, B.A. Brandon; department of political science.

A Fellowship of the value of \$500 has been established for research in problems of personality. This fellowship, to be known as the John Northway Memorial Fellowship, will be awarded annually on the recommendation of the department of psychology. For the year 1938-9 the fellowship has been awarded to Miss M. L. Northway, Ph.D.

Staff Appointments: The number of graduate students holding positions as demonstrators or instructors during the session 1937-8 was 178.

## (10) REPORT OF THE DEAN OF THE FACULTY OF DENTISTRY

(*Arnold D. Mason, D.D.S.*)

It is with regret that I report the passing of Dr. C. Angus Kennedy, associate professor of orthodontia, in July, 1937. His unexpected death was a great shock to me as well as the other members of the Faculty. Dr. Kennedy had given years of constructive service not only to the faculty and the dental library, but also in his associations with the general activities of the profession of dentistry. A suitable tablet is being erected to his memory by the Board of Directors of the Royal College of Dental Surgeons and the Ontario Dental Association.

One hundred and eighty-six students registered in the regular dental course this year, three of whom were young women. Twenty young women enrolled in the class in Dental Nursing. Four candidates were registered for the degree of B.Sc. (Dent.), and two of them were awarded the degree this year. In addition to the Ontario students, three students from the Western provinces were enrolled as well as one from New Brunswick and two from the United States. Six graduates from Australia attended the final year, and one graduate of Calcutta Dental College, India, was admitted to the fourth year.

During the year, four graduates attended for post-graduate instruction, one being from London, England, and one from Nova Scotia.

Eleven members of the Faculty have addressed dental associations in various phases of dentistry at twenty-two different centres throughout the province. The Board of the Royal College of Dental Surgeons assisted in the financing of this service to the profession, augmenting the university appropriation.

When Dr. Fulton Risdon was in Winnipeg in February in connection with the Medical Association, he addressed the Winnipeg Dental Society. Dr. Roy Ellis on his way to Aklavik gave lectures and clinics to dental associations at Winnipeg, Saskatoon and Edmonton. When Dr. Frank M. Lott is returning from the Pacific Coast Dental Conference in July, he will speak to dental groups at Lethbridge, Calgary, Moose Jaw, Winnipeg, Port Arthur and Sault Ste. Marie.

The meeting of the American Association of Dental Schools was held at Minneapolis from March 14th to 16th. This faculty was represented by Dr. C. A. Corrigan and myself. En route we visited the faculties of dentistry in Chicago, as well as the dental faculty of the University of Minnesota.

As usual the dental library has been extensively used by the students and the members of the profession. Copies of most of the new dental publications have been purchased. The family of the late Dr. Albert E. Webster has kindly presented his personal library to this faculty. The stack room has been renovated and many duplicate copies of serial journals have been donated to other libraries.

The Graduate Consultation Service has been much appreciated by the profession and 178 dentists have availed themselves of this service during the past year.

Following last year's intensive study of the report of the Curriculum Survey Committee of the American Association of Dental Schools, a study was made of the methods of presenting dental techniques. This has brought closer co-operation and understanding between the teachers in the departments teaching various phases of dentistry, resulting in better instruction to the student. The rearranged time-table has adjusted the hours of teaching in this faculty to coincide with those in other departments of the University and has met with the universal approval of the staff and students.

I believe the feeling between the students and staff of this faculty is very cordial and that this harmonious relationship produces the best possible results.

#### (11) REPORT OF THE DIRECTOR OF THE SCHOOL OF HYGIENE

(*J. G. FitzGerald, M.D., LL.D.*)

The School of Hygiene was formally established in 1925, but complete organisation was not affected until two years later. That occasion was marked by the opening of the Hygiene Building in June, 1927, funds for the building of which were provided by the Rockefeller Foundation. The demands which were likely to be made upon the School in providing instruction, graduate and undergraduate, in preventive medicine were of course unknown. Modest estimates were made of the accommodation which would probably be required for the School and for the University Section of Connaught Laboratories. Within three years it became manifest that the original building was entirely inadequate in size. So quickly did expansion occur that before the end of 1932 the building was extended to double its original size. The growth of the School and its associated unit, Connaught Laboratories, has amply

demonstrated the wide field of service open to them in the Dominion of Canada. The School is now recognised not only as the centre of graduate teaching of public health in this country but also as a training centre for all the provinces and for students from other countries as well. This is the eleventh annual report of the School of Hygiene, and a brief review of some of the developments of the past decade may be recalled.

Since 1927, the number of medical graduates who have completed the course leading to the diploma in public health is 182. These have come from all Canadian provinces and from elsewhere. They are distributed as follows: Prince Edward Island, 1; Nova Scotia, 4; New Brunswick, 9; Quebec, 42; Ontario, 65; Manitoba, 15; Saskatchewan, 5; Alberta, 8; British Columbia, 15; elsewhere, 18. This large group of trained public health workers is now engaged in whole-time service in the field of preventive medicine. This has made for vast improvement in the quality and scope of work undertaken in one of the most important of the social services.

For many years past the Rockefeller Foundation has aided governmental authorities in many part of the world to obtain the services of properly trained persons through the provision of public health fellowships. These have enabled suitably qualified men and women to spend varying periods of study in the School of Hygiene and in similar institutions in other countries. In Canada this arrangement has been supplemented by the creation and award of Connaught Laboratories fellowships in public health. Reference to these has been made in the report of the Director of the Laboratories. Since 1927 no less than seventy-four Rockefeller Foundation and forty-one Connaught Laboratories fellowships have been granted.

This year there has again been an increase in the number of students proceeding to the Diploma in Public Health, the enrolment being greater than in any previous year.

The departments of the School, namely, hygiene and preventive medicine, epidemiology and biometrics, physiological hygiene and the sub-department of chemistry in relation to hygiene have during the session of 1937-1938 provided instruction for 423 students who were enrolled in the following courses:—

A. <i>Graduates</i>	
Candidates for Diploma in Public Health .....	18
Candidates for the degree of Ph.D. ....	4
Candidates for the degree of M.A. ....	3
Occasional students .....	2
B. School of Nursing .....	
	57
C. <i>Undergraduates</i>	
Faculty of Medicine, 5th year .....	136
Faculty of Household Science, 2nd and 3rd years .....	31
Faculty of Arts, 2nd and 3rd years .....	63
Second-year Pharmacy .....	104
Fourth-year Physical Training .....	5
	423

Students in the D.P.H. course came from Alberta (1), British Columbia (3), Manitoba (2), Ontario (2), Quebec (4), New Brunswick (1), Nova Scotia (1), United States (1), India (1), and China (2).

Many important investigations have been undertaken in the various departments of the School during the year. The lines of inquiry have been of two general sorts. In hygiene and preventive medicine the studies of certain aspects of infection and immunity in pneumonia, diphtheria, scarlet fever, etc., have been extended in various directions. Many of these undertakings have been carried on in collaboration with health departments in various parts of Canada. This approach to many outstanding problems of the specific prevention of disease has many advantages. It is frequently possible to ascertain facts of theoretical interest and importance while developing practical means of more effectively controlling certain communicable diseases. Despite the great advances of the last two or three decades the number of preventable

deaths and the amount of invalidity reported yearly from such diseases as tuberculosis indicate how much remains to be accomplished. Patient, systematic and prolonged inquiry in the laboratory and in the field should in the years to come yield substantial returns. To that end much of the work in this School is directed.

In epidemiology and biometrics very valuable results have been secured in the field of research which bear most pertinently upon the day-to-day problems of the health departments, federal, provincial and municipal, of this country. It is no exaggeration to state that the most stimulating and helpful agency in the promotion of improved public health methods and procedures is that provided by Professor R. D. Defries and his colleagues and associates in their work in epidemiology and cognate branches.

In physiological and industrial hygiene much has been accomplished. In general the scope of activities may be defined as the study of certain physiological functions and the influence of various environmental factors upon them. Naturally attention is directed primarily to the study of those aspects of human physiology which may lead to a better understanding of the factors which maintain and promote health. In the present state of knowledge a most important field of research is that concerned with more exact definition of the normal. This may be approached by repeated, systematic and thorough examination of healthy persons for long periods of time. Just such work is being carried on in the School. Another avenue of approach, experimental rather than purely observational, is also occupying the attention of Professor Best and his colleagues in their studies in cardiology. Then again, the exceedingly important subject of nutrition is receiving more and more attention, and in this field Dr. E. W. McHenry and his group have made highly important additions to present knowledge. The work has been conducted in the Laboratory under experimental conditions and dietary surveys have also been carried out in collaboration with other workers. The exceedingly important rôle which nutrition plays in the maintenance of sound health and full bodily vigour is coming more and more to be recognized as being supremely important for the individual and the state. Under-nutrition and malnutrition are complex problems which, because of their economic and social aspects, are of very especial interest to those concerned in the promotion of physiological hygiene.

In industrial hygiene further work has been done by Dr. J. G. Cunningham and Dr. H. M. Barrett in the elucidation of health hazards in certain industries. Dr. Barrett and Mr. Johnston have also made a valuable contribution to knowledge of the probable mode of action of certain toxic agents which are widely employed.

The researches to which brief reference has here been made have, in the main, been supported by substantial grants from Connaught Laboratories. More detailed consideration of investigations which have been carried on in those Laboratories will be found in the report of the Director. Some work has of course been done partly in the School and partly in Connaught Laboratories where such an arrangement has been deemed desirable.

During the previous year the Director of the School was engaged in an extended study of the teaching of preventive medicine to medical students in various countries in Europe and North America. The work was undertaken on behalf of the Rockefeller Foundation. An endeavour was made to ascertain the extent and character of preventive teaching in medicine at the present time. Altogether more than twenty-five countries were visited, and almost everywhere there is a clear appreciation of the significance of the preventive function of medicine. There appears also to be a determination to extend and improve facilities for suitable instruction of future medical practitioners in hygiene, public health and the preventive aspects of the various clinical branches. To facilitate and promote such efforts some of the great foundations in the United States are contributing very substantially.

The future progress of preventive medicine, as is now clearly realised, depends as much upon an enlightened and alert medical profession as it does upon organised community effort conducted by departments of health. Therefore the school or

faculty of medicine has a role to play not second to that of the school of hygiene, in this and every other university, in affording the medical student every opportunity of familiarising himself with his duties, responsibilities and opportunities as a practitioner as well as of curative medicine.

Many visitors from various countries have visited the School during the year. They came from Belgium, Canada, Ceylon, China, England, France, India, Hungary, Jamaica, Japan, Korea, Panama, Roumania, Scotland, South Africa, Sweden, the United States of America, and Yugoslavia. They have always been most welcome, and the interchange of information and opinions has been highly advantageous to members of the staff of the School.

To my colleague Professor R. D. Defries I am deeply indebted for discharging the duties of director during the session 1936-1937.

## (12) REPORT OF THE LIBRARIAN

(*W. S. Wallace, M.A.*)

I beg to submit the following report on the work of the University Library for the year ending June 30, 1938.

The number of volumes added to the Library during the year has been 12,894; the number of pamphlets, 3,486; making the total number of accessioned volumes in the Library 352,155, and the total number of pamphlets, 135,395—or a grand total of 487,550.

The following are the statistics of the use of the Library by undergraduates, in comparison with various years:

	1921-22	1926-27	1934-35	1936-37	1937-38
Reading-room books . . . . .	41,928	106,485	186,605	206,694	194,708
Overnight books . . . . .	18,998	39,779	107,559	111,572	102,675
Week books . . . . .	4,782	13,104	23,399	22,820	21,233
Totals . . . . .	65,718	159,278	317,541	341,086	318,616

The following is a statement showing the circulation in the medical, political science, University College, and law reading-rooms, in comparison with other years:

	1934-35	1935-36	1936-37	1937-38
<i>Medical reading-room:</i>				
reading-room books . . . . .	10,761	11,195	12,814	11,333
over-night books . . . . .	11,386	12,219	12,425	10,072
week . . . . .	3,606	3,622	4,188	3,069
Totals . . . . .	25,753	27,036	29,427	24,474
<i>Political Science:</i>				
reading-room books . . . . .	12,567	11,208	9,088	8,956
over-night books . . . . .	6,890	6,338	4,865	5,438
Totals . . . . .	19,457	17,546	13,953	14,394
<i>University College:</i>				
reading-room books . . . . .	33,325	30,746	30,992	28,310
over-night books . . . . .	17,943	16,466	15,923	13,514
week . . . . .	.....	.....	.....	593
Totals . . . . .	51,268	47,212	46,915	42,417
<i>Law reading-room:</i>				
reading-room books . . . . .	8,822	15,585	22,985	25,981
over-night books . . . . .	2,870	4,368	4,004	4,302
week . . . . .	251	524	373	499
Totals . . . . .	11,943	20,477	27,362	30,782

The decrease here shown in circulation of books among undergraduates, which is the first noted in the Library for many years, is probably due in part at least to the fact that the University opened last autumn, because of the epidemic of infantile paralysis, a week late. This, however, does not wholly explain the decrease, since the circulation during the term itself showed a decline, except in the law reading-room. It would seem that we have now reached the peak of the phenomenal increase in the circulation of books among undergraduates that has taken place during the last twenty years.

The following is a statement showing the total circulation in the Library during recent years:

	1925-27	1934-35	1936-37	1937-38
To undergraduates .....	159,278	317,541	341,086	318,616
To professors and graduates .....	20,000	40,843	39,437	41,067
Totals .....	179,278	358,384	380,523	360,223

These figures are exclusive of books taken for consultation from the reference shelves, of which 23,092 have been replaced by the library assistants in the main library during the past year; and of course they take no account of the very considerable circulation of books in some of the departmental libraries.

The number of interlibrary loans continues to increase. During the year the Library has handled 851 interlibrary loans, as against 742 last year; 497 of these books being lent, and 354 books borrowed.

During the past year the binding and mending department prepared for binding 3,737 volumes, mended 2,301 volumes, and placed in pamphlet binders or boards 1,502 volumes. Library of Congress cards filed, temporary file, 40,667; permanent file, 85,045.

In addition to their ordinary work, the staff of the circulation department in the Library have this year revived the *Canadian Periodical Index*, which ceased publication in 1931. The staff had already embarked on the preparation of a card index of Canadian periodicals for their own use in reference work, when Mr. Angus Mowat, the recently appointed inspector of public libraries in the province of Ontario, kindly offered to print a Canadian periodical index in the *Ontario Library Review*, if any library would undertake to provide him with the copy. The circulation staff of the University Library took up his challenge, and the first quarterly installment of the revived index appeared in the *Ontario Library Review* for March, 1933. Already we have had numerous letters of congratulation and expressions of gratitude from librarians not only all over Canada, but in the United States. It would seem to be everywhere regarded as a genuine contribution to reference literature. It is hoped that at the end of each year the quarterly issues of the index will be cumulated.

Since I submitted my report last year the University Library has installed a library projector for reading microfilms. The growth of the use of microfilms in place of interlibrary loans made the installation of this projector a necessity, and it has proved its usefulness on a number of occasions. Its use, however, has yet been such as to suggest that microfilm is going to work the revolution in libraries that some people have anticipated.

During the past year the University Library has received from Dr. J. B. Tyrrell a valuable collection of geological periodicals; and by bequest from the late Mr. George H. Armstrong, the author of *The Origin of place-names in Canada* a remarkably fine collection of books relating to Canadian history and geography, as well as to education. I should like also to report that during the past three or four years a graduate of the University has annually placed at the disposal of the Library a sum of money for the purchase of books in psychology or law; and the Department of Mathematics is placing at the disposal of the Library the sum of \$500 received by it as a prize won in the William Lowell Putnam Mathematical Competition. In this connection I should like to explain that special bookplates with appropriate inscrip-

tions are inserted in books bought out of such special funds, and that there are few ways in which a name may be more suitably commemorated.

Once again I beg to bring to your attention the increasingly congested conditions in the University Library, both as regards space for books, space for readers, and space for library workers; and to commend to you the faithful service of my assistants in the Library, rendered in circumstances which are becoming increasingly difficult.

### (13) REPORT ON RESEARCH

#### *Anatomy, under direction of Professor J. C. B. Grant*

During the summer vacation the head of the department made an anthropological study of the Stonley Indians who live in Alberta. He also completed a text-book of Anatomy on which he had been engaged for some years. This was published by Messrs. William Wood & Company, and is entitled, "A Method of Anatomy, Descriptive and Deductive".

Dr. R. K. George has collected many data on details of anatomical interest, e.g., the numbers and locations of the valves in the spermatic veins; pelvic diameters in relation to inguinal hernia.

Dr. C. G. Smith carried out experiments on rats to determine the effect on the olfactory mucous membrane of zinc sulphate solution used as a prophylactic in the poliomyelitis epidemic. It was found that this treatment led to a rapidly progressing degeneration of the olfactory sensory area culminating in sloughing of the olfactory nerve cells or in their complete degeneration and removal by the end of one week. Following this the surface was relined by non-sensory ciliated columnar epithelium. (This was completed by the end of the second week.) Observations were continued for two months after the treatment but no regeneration of the sensory olfactory cells could be recognised. The olfactory centres of the brain at the end of two months were markedly atrophic. Since the survey of the cases which received the zinc sulphate treatment during the epidemic last summer reveals a number with permanent loss of the sense of smell, it would appear that the injurious effects found in these animals occurs also in man, and that the treatment should be appreciated as being far from harmless.

Mr. H. E. Lemasurier in collaboration with the Poultry Department of the O. A. C. of Guelph, has made a radiological study of the growth of the skeleton of the chicken to six weeks of age. This work resulted in three reports (in press) with the following titles:—(1) A radiological study of the development of the fowl to six weeks of age on a mineral deficient ration. (2) The relation of the mineral supplement consumption to the normal skeleton development in males and females of various breeds of fowl to six weeks of age. (3) Some observations on the development of the fowl to six weeks of age.

Under Dr. A. W. Ham's direction:

Dr. K. Baldwin has been studying the various transitions in the histological structure of the alveoli of the lung from early foetal life until the time of birth, in rats, rabbits and guinea pigs, with a view to determining whether intra-uterine breathing motions, which distend the foetal alveoli do so by stretching the alveolar epithelium or by bursting through into the mesenchyme. This study is being pursued.

Miss Chapman, a graduate student and Dr. Ham have been trying to find a means whereby the growth stimulating effects evinced by certain hormones in vivo could be studied in vitro, their purpose being to learn something of the mechanism by which this influence is exerted. In pursuing this study it was first necessary to find a means whereby some hormone could be caused to accumulate in the blood in concentration sufficient to allow a small quantity of blood to remain active in this respect for several hours. Trial experiments have been successful. This study is being pursued.

Mr. Keenan and Miss Winston, students in Histology Option Course, investigated the possibility of a uterine hormone being concerned in the oestrus cycle by removing

uteri and studying daily vaginal smears. They found, in contrasts to some results reported by similar studies in other animals, that the oestrus cycle was not markedly altered.

Miss Fleming, taking the same option, with Dr. Ham and Dr. George, investigated the effect of longitudinal growth of bone on the position of tendon insertions and muscle origins.

This year, as last year, the scope of the research of the department has been considerably enlarged by co-operative research with the department of paediatrics. With Dr. Tisdall and Dr. Drake, of that department, Dr. Ham has engaged in several experimental studies, e.g., on the cause of parathyroid gland hypertrophy; the action of vitamin D in large doses which is being studied by chemical analysis and histological studies of the same tissues.

*Applied Mathematics, under direction of Professor J. L. Synge*

B. A. Griffith, Ph.D.: Investigations are being conducted on the theoretical stability of viscous liquid contained between a rotating cylinder and a coaxial cylinder suspended by a torsion-fibre, as in a standard method employed in the measurement of viscosity.

G. E. Hay, M.A.: By the use of elliptic functions, last year's work on the torsion of certain prisms has been shortened and improved.

Teeth are held in their sockets by the thin periodontal membrane, which may be regarded as an elastic solid of small compressibility. The stress in the membrane and the displacement of the tooth under load have been investigated, and the results compared with those previously obtained by Professor Synge for an incompressible membrane. These investigations have been carried out under a scholarship of the National Research Council of Canada.

W. D. Rennie, M.A.: Various approaches to the problem of the stability of a viscous liquid flowing between fixed parallel planes have been tried, and work is now in progress on a method in which the characteristic functions of the problem are approximated to by polynomials.

A. F. Stevenson, Ph.D.: The variational method which has been much used in approximate calculations in quantum mechanics furnishes an upper limit to the theoretical energy levels. It is desirable to find also a lower limit in order to estimate the error. A method due to Weinstein for obtaining such a lower limit has been put on a somewhat more rigorous basis and the technique of the method improved. Calculations have been made, in collaboration with Professor M. F. Crawford of the department of physics, for the normal state of helium, with satisfactory results.

J. L. Synge, Sc.D.: New sufficient conditions have been obtained for the stability of a viscous liquid flowing between fixed parallel planes.

The preparation of an address on "Hydrodynamical Stability" for the Semi-Centennial of the American Mathematical Society has provided an opportunity to collate the various methods which have been employed and to suggest approaches to the discussion of general types of disturbance.

For liquid contained between two rotating coaxial cylinders, a sufficient condition for stability has been obtained without assuming the distance between the cylinders small, as in the work of G. I. Taylor.

*Astronomy, under direction of Professor R. K. Young*

General Programme

At the David Dunlap Observatory the programme of radial velocities of 500 stars in and near the Kayteyn areas is nearing completion. During the progress of this work 26 new spectroscopic binaries have been discovered and 69 others are suspected of being variable in velocity. 1125 plates were secured on this programme and the measurement of these plates and arrears from the last two years have been

completed by Miss Northcott, Miss Patterson and Mr. MacRae. A comparison of the results of about 50 stars which have been observed elsewhere shows that the systematic errors are small and that the probable error is satisfactory.

During the year five papers were presented at various astronomical meetings.

### Spectroscopic Work

Dr. Hogg has completed the four binary orbits H.D. 25638, 25639, 206155, 183794 and taken plates for the improvement of the orbit of H.D. 34762 and for testing short period variations in H.D. 58715. Dr. Millman has made a photometric study of the surface features of Mars and finds that the dark markings are relatively rich in blue and violet light but that the results lend no support to the generally accepted view that this represents chlorophyll reflection. Dr. Heard has completed the orbit determination of H.D. 142926 and obtained plate for an orbit of H.D. 219634. Dr. Heard has also continued his investigations on the spectrum of  $\gamma$  Cassiopeiae.

### Newtonian Focus

Dr. H. S. Hogg with the assistance of Dr. F. S. Hogg and others has obtained 91 direct photographs of globular clusters. About a dozen new variable stars have been found from D.D.O. plates in the important clusters N.G.C. 6205, 6366, 6779. A few more periods have been derived in the cluster N.G.C. 6402, but as this is a difficult object, with 72 known variables, it is expected that work on this cluster will extend over several years. The period of two variable stars in Messier 10 and 12 have been determined. A catalogue of all variables known in globular clusters has been made, giving data and magnitudes, periods and positions.

### Meteor Research

The photographic and visual observation of the major meteor showers was carried out by Dr. Millman as in other years. One meteor spectrum was photographed as a result of exposure times totalling 53 hours with the meteor spectrograph, and eight direct meteor trails were secured in a total exposure of 23 hours. Five of the above photographs were secured with the rotating shutter. Twelve direct photographs were also secured at co-operating stations.

### Instrumental

During the year a self-recording microphotometer was constructed in the observatory workshop. It is hoped that this instrument will be of great help in analysing the spectra already secured. The upper end of the 19-inch reflector has been remodelled so that it is rotative. This makes the instrument much more convenient to operate.

### *Biochemistry, under direction of Professor H. Wasteneys*

Directed by Professor Wasteneys:

Mr. B. F. Crocker and Dr. Paul Hamilton have continued their investigations on digestion in dogs. They have confirmed their previous observation that as to the amount of protein fed to the animals is increased, the time required for digestion increases while the percentage digestion decreases.

The addition of fat to a protein meal was found to increase the time needed for digestion and also the amount of digestion.

They are now investigating a method of labelling the food protein in order to distinguish the products of its hydrolysis from those of the proteins in the digestive secretions.

Dr. H. B. Collier, professor of biochemistry, West China Union University, and now on leave of absence, has been engaged in a study of the factors determining the rate of synthesis of 'plastein' by the enzyme papain.

Directed by Professor G. F. Marrian:

Dr. G. C. Butler has continued his studies on the nature of the steroids present

in the urine of women suffering from virilism of adrenal origin. A sufficient number of new steroids have been isolated and chemically characterised to enable an attempt to be made to outline some of the main metabolic paths of these compounds in the body. These researches promise not only to throw much light upon the etiology of adrenal virilism, but also to establish facts of considerable fundamental importance bearing on the problem of steroid metabolism.

Dr. A. D. Odell has continued his research on the constitution of the substance  $(C_27H^{12}O)_n$  which occurs in the urine of pregnant mares. Evidence has been obtained which very strongly suggests that this substance is a pregnane or allopregnane-3 ( $\alpha$ ), 6,20-triol formed by reduction and addition of water from the hormone of the corpus luteum-progesterone. Dr. Odell has been granted a Banting Fellowship for three months to enable him to continue and extend this work during the summer months.

Mr. B. Schachter, who is in receipt of a Banting Research Fellowship, is completing his research on the methods of isolation and the identification of the conjugated oestrogens in the urine of pregnant mares. Several new crystalline substances have been isolated which it is hoped will shortly be fully characterised. Mr. Schachter has also been engaged in attempts to isolate in a pure state the gonadotropic factor present in the urine of pregnant women.

Mr. W. Fishman has been successful in elaborating an efficient method for the extraction and purification of the enzyme *B*-glucuronidase from spleen and other organs. He has made a study of the distribution of this enzyme in various tissues and organs, before and after the administration of glucuronogenic substances. The results he has obtained are of considerable significance in the whole problem of the detoxification mechanisms in the animal body. Mr. Fishman will shortly be applying some of his findings to certain problems in connection with sex-hormone metabolism.

Mr. M. Darrach has obtained results which indicate that the coloured substance formed in the Kober test for oestrogens is an oxonium salt of 16,17-diketo-3-hydroxyoestratriene. This finding has enabled him to elaborate several qualitative tests which make it possible to detect oestriol in the presence of other oestrogens. One of these tests has been found suitable for quantitative work. Preliminary experiments suggest that 16,17-diketo-3-hydroxyoestratriene may be a normal end-product of oestrogen metabolism in the animal body.

During the past year a special laboratory has been equipped with apparatus for the micro-determination of carbon, hydrogen, sulphur, nitrogen, sodium and potassium, in organic compounds, in order to facilitate the identification of new compounds isolated in the research laboratories. Miss Dorothy Skill has been in charge of the work and has organised it with very commendable efficiency. This new departure has been of the utmost value in the various research problems in progress in the department.

Directed by Professor A. M. Wynne

Miss E. Macpherson B.A. studied methods of increasing the purity of preparations of pancreatic lipase, with the aim of using the enzyme in an investigation of its synthetic action.

F. L. Root, M.A. (Stanford), has investigated the improvement and application of methods for the analysis of mixtures of volatile fatty acids and of alcohols occurring in fermenting media.

J. Tuba, M.Sc. (Sask.), has undertaken a study of factors which affect the amount of enzymes such as phosphatase and invertase formed by yeasts and moulds during their growth in synthetic culture media.

*Biology, under direction of Professor E. M. Walker*

The following summary includes investigations in progress, published or in course of publication, for the year 1937-1938:

## Vertebrate Anatomy

By Professor W. H. T. Baillie—Studies on the eye reactions of fishes, amphibians, reptiles and mammals; beginning of the eye movements in developing fishes and amphibians; position and relationship of the semicircular canals of the ear in elasmobranchs and their homologies in the mammalia; investigations of a skin outgrowth in an amphibian that simulated an anterior limb with defective development of the muscular and bony parts.

## Invertebrate Zoology (including entomology and parasitology)

By Professor E. M. Walker—Cervical and thoracic exoskeleton and musculature of *Grylloblatta* (completed); faunistic and distributional studies of Odonata of British Columbia, Saskatchewan and Ontario.

Under the direction of Professor E. M. Walker:

C. G. Bucher—Anatomy of *Monodontomerus dentipes*, a chalcid parasite of the pine sawfly *Diprion simile*.

Mrs. E. Kuitunen-Ekbaum—Life history of *Philometra americana*, a dracunculid nematode parasite of certain flounders, blennies and clingfish (completed); experimental infection of dogs and cats with plerocercoid larvae of *Diphyllbothrium* sp. from lake trout.

G. M. Neal—Distribution of pelagic Rotifera in British Columbia.

H. H. J. Nesbitt—Anatomy of the nervous system of insects.

H. B. Wressell—Effect of temperature on egg-laying in the European Corn Borer.

## Marine Biology

By Professor A. G. Huntsman—Movements of Canadian Atlantic salmon kelts, as shown by tagging experiments and in relation to the environment.

Under the direction of Professor A. G. Huntsman:

A. A. Blair—Factors affecting the growth of salmon parr and smolts, principally as shown in the scales.

P. F. Elson—Factors determining movement of the trout, *Salvelinus fontinalis*, particularly the effect of temperature.

C. J. Kerswill—The Oyster fishery of the Bras d'Or region of Cape Breton Island; the Pteropoda of the Belle Isle Strait Expedition of 1923 and the Canadian Fisheries Expedition of 1915.

H. M. Rogers—Marine fauna of the eastern Canadian Arctic (field work with the Eastern Arctic Patrol); the life history of the capelin, *Mallotus villosus*, of the Miramichi region, New Brunswick.

Mr. H. C. White of the staff of the Fisheries Research Board of Canada was given accommodation in the laboratory for the study of the food of kingfishers and mergansers of the Margaree River, Cape Breton.

## Vertebrate Embryology

Under the direction of Professor A. F. Coventry:

S. H. Chambers—Comparative study of the umbelical hernia and its relation to the definitive arrangement of the coils of the alimentary canal.

Miss A. M. Ironside—Study of the corpus luteum of *Peromyscus* with special reference to its behaviour during immediately successive pregnancies and in different seasons.

## Animal Bionomics, Mammalogy and Ichthyology

By Professor A. F. Coventry—Continuation of studies of population of small mammals in Ontario. Data have been collected in the neighbourhood of Toronto, in Algonquin Park, in Temagami and in Kapuskasing.

By Professor J. R. Dymond—Taxonomy and distribution of the fishes of Algonquin Park and Ottawa Valley; ecology and distribution of fishes of King Township; York County, Ontario.

Under the direction of Professor J. R. Dymond:

A. H. Carter—Life history of fishes of the genus *Nocomis*.

Miss I. Limbert—Distribution of fishes in Ontario.

J. M. Speirs—Studies of bird migration at Toronto (completed).

#### Genetics and Human Biology

By Professor J. W. MacArthur—Methods of diagnosis of twins and multiple birth sets by the use of skin ridges and other characters.

By Professor J. W. MacArthur in collaboration with Professor Norma Ford—Studies of the Dionne quintuplets, an identical set.

By Professor J. W. MacArthur in collaboration with L. Butler—The mode of inheritance of a quantitative character (size).

By Professor J. W. MacArthur in collaboration with Dr. A. N. Langford—Development at Vineland of a commercial greenhouse tomato immune to brown mould.

Under the direction of Professor J. W. MacArthur:

L. Butler—Analysis of fruit size inheritance in the tomato.

Miss V. Engelbert—Reproduction, cytology, genetics and species relationships in a group of species of blue grass (*Poa*).

Mrs. M. Richardson—Intelligence quotients in social problem children and their sibs and parents.

A. Wilkes—Causes of varying sex ratios in parasitic Hymenoptera (*Monodontomerus*).

Mrs. F. H. Miller—Comparison of human hand and foot prints.

By Professor Norma Ford—A study of two sets of quintuplets loaned by the Royal College of Surgeons, England. (Examinations have been made of their dermal ridges and other physical characters and x-ray photographs to determine whether the sets are mono- or polyzygotic); assembling of data regarding two unpublished cases of quintuplet births. Canadian and Italian; further investigation of the blood vascular system in the placentae of multiple births, correlating the findings with the degree of similarity of the twins or triplets (in co-operation with four Toronto hospitals).

By Professor Norma Ford in collaboration with Professor J. W. MacArthur—A biological study of the Dionne quintuplets, an identical set.

Under the direction of Professor Norma Ford:

Miss M. Macdonald—Plantar patterns in mongolian idiots compared with their palmar patterns.

Miss G. Workman—Palmar patterns in mongolian idiots and the occurrence of similar patterns in normal individuals.

#### Comparative Neurology

By Professor E. H. Craigie—Morphology of the capillary supply in the brains of amphibians (completed): quantitative study of the vascularity of the frog's brain and of the hypophysis of the frog (completed): vascular supply of the hypophysis of tailed amphibia; summarisation of existing literature on the Comparative anatomy and embryology of the capillary bed of the central nervous system.

#### Limnology

By Professor W. J. K. Harkness—Comparative limnological studies of trout waters in the districts of Nipissing, Muskoka and Southern Ontario.

Under the direction of Professor W. J. K. Harkness:

F. E. J. Fry and W. A. Kennedy—The life history and controlling factors in the production of the lake trout (*Cristivomer umaycush*) in the lakes of Algonquin Park.

- R. R. Langford, W. R. Martin and V. E. F. Solman—Seasonal variation of plankton populations; comparative measurements of vertical distribution of plankton; plankton, small fish relations and vertical movements of small fish.
- K. H. Doan—Ecology of small-mouthed black bass.
- R. B. Miller—Ecology of lake living Chironomidae.
- By Dr. F. P. Ide—Quantitative determination of insect population of Costello Creek, Algonquin Park, Ont. J. B. Buchanan assisted in the making of collections under direction.

#### Experimental Biology

- By Professor K. C. Fisher—Investigations on the nature and mechanism of the rhythmicity of the heart; effect of temperature on heart rate; development of apparatus to follow spectroscopically the rate of certain chemical reactions inside living cells which are concerned with the mechanism of oxygen utilisation.
- By Professor K. C. Fisher in collaboration with Dr. D. W. G. Murray of the Toronto General Hospital—Possible application to the control of intravenous injection of the electron tube relay with a time delay feature.
- By Professor K. C. Fisher in collaboration with Dr. John Cameron University of Missouri—Relation of light intensity and temperature to the rate of the carbon monoxide poisoned heart.
- By Professor K. C. Fisher in collaboration with Dr. Richard Ohnell of Stockholm—Relation of cyanide concentration to the heart rate.

Under the direction of Professor K. C. Fisher:

- C. Armstrong—Respiratory mechanism of the frog heart; specificity of sodium azide, a new respiratory inhibitor, on the embryo fish heart.
- Miss R. D. C. Martin—Measurement of the respiratory exchange of damselfly nymphs: a method to investigate the inter-relations of temperature and oxygen partial pressure and the stage of development.
- W. B. Stallworthy—Assembling of apparatus for the maintenance of constant known humidities to be used in the investigation of the water balance in land Isopoda in relation to the distribution of species.

#### *Botany, under direction of Professor R. B. Thomson*

##### Phanerogamic Botany and Genetics

###### Anatomy and Experimental Morphology

- Bannan, M. W.—A study of the variations in wood structure in the native conifers and determination of the relationships between such variations and the ecological conditions under which the trees grow.
- Haldenby, C. N.—The origin and distribution of horizontal resin canals in the conifers.
- Hull, Kathleen L. & Thomson, R. B.—The anatomical organisation of *Lycopodium* and *Selaginella*.
- Thomson, R. B.—The comparative anatomy of the male and female cone scales of the conifers.
- Thomson, R. B. & Hull, Kathleen L.—The organisation of the sporeling of *Osmunda* and of the lower vascular plants.
- Wright, J. Gertrude—The nature of the pit-closing membrane in the higher gymnosperms.

##### Taxonomy

- The total number of specimens identified, mounted, stamped, recorded and actually distributed in the herbarium during the year was 11,472.
- Krotkov, P.—Plant survey work in the Bruce Peninsula; revision of the herbarium material; special study of Ontario willows and golden rods.

Taylor, T. M. C.—(1) A critical study of the genus *Woodsia*.

(2) Plant survey work in the Thundred Cape and Schreiber areas, in co-operation with the National Museum of Canada. A report on the collection from the former area has been completed, and in connection with the latter a report is in course of preparation.

#### Genetics

Wright, J. Gertrude—A study of abnormal types of *Linaria vulgaris* and their heredity.

#### Mycology, Forest Pathology and Cryptogamic Botany

(Under the direction of Professor H. S. Jackson)

Bier, J. E.—A study of Hypoxylon Canker of *Populus*.

Cain, R. F.—A taxonomic study of Ontario Sordariaceae and related Sphaeriales.

Groves, J. W.—Cultural studies of certain canker forming species of *Dermatea*, *Pezicula*, *Godronia* and related forms. (In part submitted for publication.)

Jackson, H. S.—(1) The mycological flora of the Toronto region and of the Temagami Forest Reserve.

(2) A taxonomic study of Ontario Thelephoraceae.

Lehmann, A. J. V.—A study of the nuclear phenomena of the germination of teliospores of certain species of *Lepto-Puccinia*.

Macrae, Ruth—A study of phosphorescence in *Panus stipticus*.

Skolko, A. J.—A cultural study of *Aleurodiscus*.

There have been 4,735 specimens added to the Mycological herbarium this year and the collection now totals 63,470.

#### Plant Ecology and Seed Studies

(Under the direction of Professor H. B. Sifton)

##### Structural Ecology

McPherson, D. C.—On the structure, form and development of air spaces in roots.

Sifton, H. B.—Leaf development in Labrador Tea.

Watson, W. R.—Development studies of leaf structure as related to light.

##### Seed Studies

Anderson, E. C.—Longevity of weed seeds.

Hamly, D. H.—New apparatus for the investigation of light relationships in seeds.

##### Stereo-photomicrography of seeds.

McGugan, Jean E.—Identification of seeds and seedlings of the Genus *Brassica*.

Sifton, H. B.—Effects of temperature, light, water and oxygen supply on the germination of *Typha* seeds.

Collection and identification of seeds. During the year 2,120 additions were made to the reference collection. Total, 13,675.

From the seed laboratory, two papers were presented by special invitation during the year. The first, by D. H. Hamly on the subject of seed photography was given before the 1937 convention of the International Seed Testing Association at Zürich, Switzerland, while the second, by H. B. Sifton, on seed collections, is to form a section of the manual on seed testing being compiled by the Association of Official Seed Analysts of North America. Both these associations are composed of professional Seed Analysts and they rarely ask for contributions except from their own members.

#### Plant Physiology

(Under the direction of Professor G. H. Duff)

Brodie, Anne B.—Tissue protein impairment induced by starvation has been studied in its effect upon respiration, respiratory quotient, water relations and chlorophyll content. The results have been presented in a thesis submitted in partial fulfilment of the requirements for the Ph.D. degree.

- Clendenning, K. A.—The metabolism of the tomato fruit in relation to its storage. Biochemical studies of the proteins, carbohydrates and acids of the fruit have begun in collaboration with the Cold Storage Research project of the Ontario Agricultural College. Special acknowledgment is made of the financial support and facilities provided for the summer work by the College.
- Duff, G. H.—The sugars of the wheat leaf, their concentration gradients and relation to cell heterogeneity within the leaf.
- Duff, G. H. & Forward, Dorothy F.—The rate of inversion of non-reducing, reserve sugar as a determinant of metabolic activity.

### Plant Pathology

(Under the direction of Professor D. L. Bailey)

Except where otherwise stated, these researches are being carried on in co-operation with the Vineland Horticultural Experiment Station.

- Bailey, D. L.—(1) Strawberry root-rot.  
(2) Disease of ornamentals.  
(a) *Cytospora* disease of Koster's blue spruce.  
(b) Suspected virus diseases of lilies and Gladiolus.
- Langford, A. N.—The development of a suitable greenhouse tomato resistant to *Cladosporium fulvum*.
- Mead, H. W.—A comparative study of some seed-borne diseases of barley. In co-operation with the Dominion Plant Pathological Laboratory, Saskatoon, Sask.
- Newell, P. G.—Bacterial leaf spots of tobacco. In co-operation with the Dominion Plant Pathological Laboratory, St. Catharines.
- Simmonds, S. A.—Factors influencing the fungous flora of raspberry roots.
- Wooliams, G. E.—Fusarium wilt of Zinnia. In co-operation with the Dominion Plant Pathological Laboratory, Summerland, B.C.

### Cytology

(Under the direction of Dr. L. C. Coleman)

- Coleman, L. C.—(1) The cytology of *Gasteria* and *Gasteria* X *Aloe* hybrids.  
(2) The cytology of *Veltheimia viridifolia*.  
(3) The preparation of Basic Fuchsin for the Feulgen stain (note ready for publication).
- Coleman, L. C. & Haldenby, C. N.—The cytology of *Scilla* species.
- Hillary, B. B.—(1) The Feulgen nuclear stain and its use in Cytology.  
(2) Permnanet preparations from rapid cytological technics (in press).

### *Chemistry, under direction of Professor F. B. Kenrick*

Forty-two students were engaged in research during last winter under the direction of members of the staff of the Department of Chemistry.

The degree Master of Arts was conferred on twelve of these, viz:—Messrs L. D. Finlayson, W. G. O. Hines, E. A. Hollingshead, F. L. W. McKim, J. H. Michell, W. A. Patterson, G. W. Rogers, Miss J. C. Romeyn. Messrs. J. Seath, G. A. Stewart, M. H. Thomas, G. E. Willey; also on Mr. J. H. Johnston, who worked under Dr. Barrett in the department of physiological hygiene, and on Mr. M. O. O'Sullivan who worked under Dr. Franks in the department of Banting medical research.

The Degree of Master of Science in Agriculture was conferred on Messrs K. G. McPhee, C. P. Rivaz, A. O. Walberg who worked in the laboratories of the Ontario Agricultural College under the direction of Professor Ruhke.

The Degree of Doctor of Philosophy was conferred on Mr. H. J. Bernstein, whose research was done under Professor W. H. Martin, and on Mr. K. K. Kay who worked under Dr. Barrett in the department of physiological hygiene.

The following were the subjects of research:

- R. W. Allgood—The transport numbers of magnesium chloride in aqueous solution.
- Professor F. Beamish—Estimation of Ruthenium in ores:  
The determination of the efficiency of pot assays for the platinum metals.
- H. J. Bernstein, M.A.—The Raman effect and the chemical bond.
- H. D. Bett—The photodecomposition of chlorine dioxide in carbon tetrachloride solution.
- A. McC. Birks—Preparation of ethyl aminofuroate picrate.
- W. H. Brown, B.A.—New reactions and new types of formic esters.
- W. K. Buchanon—Sour taste of buffers.
- D. M. Burpee—Analysis of lead-assay button.
- M. Cohen, M.A.—Adsorption of gases on solids.
- B. D. Deacon—The condensation of acetoacetic acid with glyceric and glycolic aldehydes.
- L. D. Finlayson, B.A.—The solubility of carbon dioxide in various solutions.
- Prof. H. O. L. Fischer—Chemistry of trioses; optically active fats; derivatives of glyceric acid.
- I. G. Goddard—The germination of mushroom spores.
- Prof. A. R. Gordon—Calculation of thermodynamic quantities from spectroscopic data.
- Miss E. A. Grant—The Williamson ether synthesis with ethylene chlorohydrin.
- W. G. O. Hines, B.A.—The activity coefficient of magnesium salts in aqueous solution.
- E. A. Hollingshead, B.A.—Differential diffusion constants of electrolytes in aqueous solutions.
- W. A. James, M.A.—The differential diffusion coefficients of electrolytes in aqueous solutions.
- A. A. Janis, M.A.—The Vapour tensions of aqueous solutions of non-volatile salts by the Isopiestic method.
- L. F. King, M.A.—The rates of reaction of alcohols and esters in an alkaline medium.
- A. H. Klopp—Bromination of furan.
- D. J. LeRoy, M.A.—The transport number of the alkaline acetates in aqueous solutions.
- Prof. F. Lorrimer—The alkaline reduction of 9-nitro-anthracene.
- Miss H. G. Macmorine—The preparation of 3-hydroxy acenaphthene.
- C. Marchant, M.A.—Bios.
- J. W. McCutcheon, M.A.—The isomers of linolenic acid.
- F. L. W. McKimm, B.A.—The preparation of solids by centrifuging in neutral liquids.
- R. N. Meals, M.A.—The mechanism of the Fuziwara Reaction.
- J. H. Michell, B.A.—The synthesis of various glycerides.
- J. L. Monkman—Presence of cyanide in cadaveric material.
- W. M. Orchard, B.Sc.—The paration and properties of coniferin and related substances.
- M. A. Partridge—The use of citraconic anhydride in the Diels-Alder Reaction.
- W. A. Patterson, B.A.—The effect of temperature change on the diffusion of copper in a solution of copper sulphate.
- Dr. J. J. Rae—The role of phosphoric esters in metabolism with particular reference to their occurrence in urine and their possible significance in mental cases.
- G. W. Rogers, B.A.—The vapour pressures of volatile liquids and adsorption phenomena.
- R. C. Romans, M.A.—Photochemical reactions.

- Miss J. C. Romeyn, B.A.—The sporulation of yeast.  
 Miss C. J. Sanderson, M.A.—The influence of inositol, *o*-alanine, l-leucine and Bios IIB on different varieties of yeast.  
 J. Seath, B.A.—Analytical methods for the determination of metals of the platinum group.  
 S. Shankman, M.A.—Vapour tensions of sulphuric acid solutions.  
 R. S. Soanes, M.A.—Carbon arcs.  
 Dr. Helen Stantial—Purification of Bios IIB.  
 G. A. Stewart, B.A.—Base-exchange in zeolites.  
 M. H. Thomas, B.Sc.—The kinetics of isomerization of 2-butene.  
 M. Wayman, M.A.—Purification of Bios IIB.  
 Dr. F. E. W. Wetmore—Electric thermoregulators.  
 G. E. Willey, B.A.—Distribution of potential in the carbon arc.  
 Dr. G. F. Wright—Synthesis and properties of coniferyl alcohol:  
 Isolation of the carbohydrate from the pine lignin-carbohydrate complex.

*Food Chemistry, under direction of Professor C. C. Benson*

The research work in this department during the present session has, as usual, been concerned with the chemistry and analysis of foods.

Two students have completed work for the Master's degree. One of them working on the distribution of pectin in apples during ripening and storage, and the other trying different methods of estimation of carbon dioxide in baking powders and making studies of rates of reaction of such materials.

Other students in this department have been concerned with analysis of foods which have not yet been sufficiently tested, and this work is being continued.

*Household Science, under direction of Professor J. B. Brodie*

During the session 1937-38 there were four graduate students doing work in this department. Three of them were engaged in research and one was granted her M.A. degree.

Miss A. M. Musgrave began work on "Baking Tests for Baking Powders."

Miss E. F. Lamon, working under the direction of Miss Roberts in textiles, has made good progress in her studies on Canadian cottons with respect to their suitability for household use as determined by physical and chemical analyses. She plans to continue this work next year.

Miss G. H. Donald has completed her work on the calcium content of some Canadian vegetables. The first part of the study dealt with the variation of calcium content in vegetables grown on different soils while the second part of the study was a determination of the change in calcium content due to cooking. This study is of practical value and already some of the figures have been used.

*Geology and Palaeontology, under direction of Professor E. S. Moore*

Field investigations in geology:

Professor E. S. Moore—Atikokan area, for Ontario Department of Mines.

Professor A. MacLean—Continuation of study of the eastern part of the Kirkland Lake area, for Ontario Department of Mines.

Professor L. S. Russell—Geology of Southern Alberta, for the Geological Survey of Canada.

Dr. J. Satterly—Geology and ore deposits of the McInnes (Sandy) Lake area, for Ontario Department of Mines.

Dr. V. J. Okulitch—Stratigraphy and palaeontology of the Black River group, between Montreal and Quebec.

- V. K. Prest, B.Sc., M.Sc., (Man.)—Geology of the Miminiska Lake area, for Ontario Department of Mines.
- M. W. Bartley, B.Sc., (Man.), M.A.—Geology of northern and eastern sections of the Scriber Map area, for Ontario Department of Mines.

Laboratory investigations:

- Professor E. S. Moore—The formations of the Steeprook series.
- Professor Madeline Fritz—Comparison of the Middle Silurian coral genera *Desmidopora* and *Multisolenia*, Microfossils from oil wells in southwestern Ontario, and their bearing on structural features.
- Professor L. S. Russell—Preparation of detailed report on four seasons field work in southern Alberta. The skull of *Hemipsalodon*, a giant carnivorous mammal from the Oligocene of Saskatchewan.
- Dr. V. J. Okulitch—Columella-like structure in the Corallites of *Tetradium fibratum* Safford.  
Interference wave marking in the Dundas formation at Toronto.  
A revision of the Black River corals.
- V. K. Prest, M.Sc. (Man.)—Wall-rock alteration in the Porcupine area.
- W. P. Corking, B.A.—Genesis of the Sherritt Gordon ore deposits.
- J. W. Britton, B.A.—Genesis of the Iron formations and their relation to gold deposits in the Patricia District.
- G. P. Crombie, B.Sc. (Man.)—Carbonate alteration in the rocks of the Larder Lake area.

*Department of Medical Research (Banting), under direction of Sir Frederick Banting*

For some years the Department of Medical Research has had the co-operation of members of the mining group on the silicosis problem. During the past year the work has been continued as a general problem of the department.

On January 3, 1937, Mr. J. J. Denny and Dr. W. D. Robson, of the McIntyre Porcupine Mine, came to the Department of Medical Research and presented the results of their preliminary experiments by which they had shown (1) that the addition of small quantities of metallic aluminum dust almost completely inhibited the solubility of siliceous material in a laboratory beaker and that (2) rabbits dusted with quartz to which less than one per cent. metallic aluminum dust had been added showed practically no fibrosis, while control rabbits, which had been dusted with quartz alone, showed well developed silicosis. The lungs and other organs of the animals of these experiments had been sent to Dr. D. A. Irwin, of this department, for pathological examination.

These preliminary experiments seemed to warrant a large scale investigation, and during the year Dr. Irwin and Mr. H. L. Collins, of this department, have carried on this work in collaboration with Mr. Denny and Dr. Robson.

It has now been shown that rabbits exposed for six months to an atmosphere containing quartz dust developed a silicosis which continued to progress after cessation of the dust exposure. Rabbits exposed to similar concentrations of quartz to which had been added 1 per cent. of metallic aluminum dust did not develop silicosis, after an exposure of a year. These animals showed no evidence of silicosis after being removed from the dust for a period of a year. Metallic aluminum has been found to effectively inactivate the quartz retained by the lung when inhaled as a mixture with quartz or when inhaled alone.

Considerable evidence has been obtained concerning the mechanism by which metallic aluminum inactivates quartz in the lung. The relation that exists between the solubility of quartz powder in vitro, the tissue response produced by the injection of quartz powders of varying solubility, the amount of aluminum necessary to inactivate quartz and the period for which aluminum will continue to inactivate quartz

has been studied. The practical application of metallic aluminum to the prevention of silicosis in industry is now under way.

The following investigations have been carried out with the co-operation and the financial assistance of the Technical Silicosis Research Committee of the Ontario Mining Association:

Miss H. Williams and Dr. Irwin have completed a study showing that the silicates commonly found in silicotic lungs are not leached to any appreciable extent by animal tissues up to periods of six months.

A study of the solubility of samples of quartz has been made by Miss Williams and Dr. Irwin. The samples were collected underground from the mining areas of Ontario by Mr. C. S. Gibson, of the above Committee. Professor H. E. T. Haultain, of the Department of Mining Engineering, ground the quartz in a ball mill especially constructed to avoid contamination and fractionated the resulting powder by means of the infrasizer he has developed.

Mr. C. S. Gibson and Dr. Irwin have investigated the toxicity of the various types of quartz encountered in the mining industry of this Province, and found them to be practically the same.

Dr. R. C. Sniffen and Dr. Irwin have demonstrated that certain silicates modify the action of quartz to increase or decrease its toxicity.

An X-ray diffraction pattern study of the crystalline siliceous materials present in silicotic lungs has been conducted by Dr. C. M. Jephcott, (Division of Industrial Hygiene, Provincial Department of Health), Mr. W. M. Gray (Department of Physics) and Dr. Irwin.

A detailed study of a rare case of simple silicosis uncomplicated by infection or the presence of siliceous dust other than quartz has been made by Dr. A. R. Riddell and Dr. Jephcott (Division of Industrial Hygiene, Provincial Department of Health) and Dr. Irwin.

A study of the shadows produced by various dusts in X-ray films of the chest is being carried out by Dr. R. C. Sniffen and Dr. Irwin, with the co-operation of Professor G. E. Richards (Department of Radiology).

Mr. B. S. Leibel and Dr. G. E. Hall have developed a greatly modified form of thermostromühr, by means of which accurate registrations of blood flow in arteries and veins may be made. Using this stromühr, changes in blood flow in the coronary vessels as a result of nervous influences are being studied.

These workers are also studying the effects of autacoids, hormones and drugs upon the coronary blood flow, ventricular output and total work of the heart in the isolated heart preparation, as well as in animals with denervated hearts.

Mr. G. W. Manning and Dr. Hall have conducted a series of experiments in which different branches of the coronary arteries have been ligated. The resulting myocardial changes have been studied at varying intervals so that specific time relationships are available in connection with the development of the progressive pathological changes. They have also found that sudden occlusion of a branch of the coronary artery in the unanaesthetised dog is usually fatal whereas in the anaesthetised animals no deaths occurred. The obvious influences of cardiac afferent nerves are thus being studied.

Mr. Manning has prepared many fine cleared specimens of human hearts as well as various types of animals. By these it has been possible to specifically note the differences in coronary artery distribution as well as the differences in anastomosis between the various branches.

Mr. Manning, Miss J. Lang and Mr. M. Allan have studied the changes in blood sugar, serum choline-esterase, blood sugar and heart-rate following the administration of parasympatheticomimetic drugs in normal animals and in animals in which this enzyme system has been inhibited by prostigmine, physostigmine or miotine.

Dr. Hall is studying the inotropic and chronotropic cardiac stimulation in animals deprived of their cardiac sympathetic control as well as in completely sympathectomized animals.

Dr. Hall is continuing the work on coronary artery and myocardial damage following the daily intravenous injection of acetylcholine in dogs. He has also produced atherosclerotic lesions in rats following long-continued daily subcutaneous injections of the same drug.

During the progress of the above experiment an inordinate number of spontaneous tumours have been found. These have been reported on by Dr. Hall and Dr. W. R. Frank, who are continuing to study the possible relationship of acetylcholine to the oestrogenic and carcinogenic substances.

Mr. D. W. Loughheed and Dr. Hall have been conducting a large series of experiments in an endeavour to apply the intravenous injection of oxygen and of oxygen and carbon dioxide to clinical patients. The use of intravenous oxygen in carbon monoxide poisoning appears to be reasonable. The use of carbon dioxide and oxygen together with sodium bicarbonate may be of benefit in decreasing the alveolar carbon dioxide and increasing the oxygen of arterial blood.

Dr. S. Gordon and Dr. Hall are continuing the work on experimental nephritis. At the present time special attention is being paid to antigen-antibody relationship as produced by an injection of virulent streptococci in an animal already treated with many injections of a non-virulent culture of human haemolytic streptococci. The results are very encouraging.

Dr. Hall, Mr. D. Lloyd, Mr. J. Goodwin and Mr. B. Leibel have been engaged on the problem of the physiological significance of metrazol and insulin shock therapy in the treatment of schizophrenics. This is a division of a similar general problem undertaken by the Department in conjunction with the Department of Psychiatry and Public Health, as well as the Committee on Mental Hygiene.

Mr. Leibel and Dr. Hall have studied the changes in the blood flow to and from the brain during experimentally produced insulin and metrazol shock.

Mr. J. Goodwin, Mr. D. Lloyd and Dr. Hall have studied the changes in the bio-electric potentials as recorded from the exposed area striata of the cortex during similarly produced shock. These potentials were recorded on the electro-encephalogram which has been constructed in this Department by Mr. Goodwin.

Dr. Hall is conducting a series of experiments where groups of animals are subjected to repeated insulin and metrazol shocks for many weeks. Blood sugars, glucose tolerance tests, etc. are being carried out on these animals which will later be used by Goodwin, Lloyd and Hall in a comparative series of electro-encephalographic studies of the effect of such chronic convulsions on the brain potential.

Mr. J. E. Goodwin and Dr. H. H. Hyland (of the Department of Medicine) are continuing their electroencephalographic studies of epileptic and other neurological cases from the Toronto General Hospital.

Mr. J. E. Goodwin and Dr. W. A. Hawke (of the Department of Paediatrics) are continuing their investigations of the brain potential changes in "behaviour problem" children as well as in the different convulsive states. They are studying, also by electroencephalographic recordings, the effects of hyperventilation, etc. in normal and abnormal children.

Mr. Lloyd has been working on the various phases of ganglionic activity in the autonomic nervous system with special reference to the following: (a) the excitability cycle of ganglion cells following activity; (b) the conduction of impulses by fibres which course directly through a ganglion; (c) retrograde transsynaptic electrotonus and (d) the slow potential waves set up by preganglionic and antidromic stimulation. Experiments have been started on the action potentials of a smooth muscle system (arrectores pili) excited by stimulation of the motor nerve supply. Recent developments from this work and by other workers in the field of nerve cell physiology have opened up many new questions for further experimental analysis.

Mr. L. Lawson and Mr. Lloyd have made a study of the potentials recorded from various parts of the cat's brain by means of the Horsley-Clarke instrument, both under normal conditions and under the influence of convulsive drugs.

In the biochemical division of the Department of Medical Research, Dr. C. C.

Lucas has been studying the conditions necessary for the quantitative removal of cystine from protein hydrolysates, by a method which will not introduce any substances interfering with a subsequent separation of the remaining amino-acids. Mr. J. Beveridge and Dr. Lucas have been engaged in a study of the chemical make-up of human and other hairs. Mr. L. B. Macpherson has continued his work on the synthesis of phosphoric esters related to the phospholipids.

During the summer months of 1937, Dr. J. J. Rae, while holding the James Page Rutherford Fellowship, did further work on the phosphoric esters in normal human urine.

In collaboration with Dr. G. E. Hall and Dr. D. R. Mitchell (of the Department of Urology) Dr. Lucas has studied the physiological and biochemical properties of mandelic acid in connection with its use in the treatment of cystitis and pyelitis. Some hazards (such as acidosis and stone formation) have been found to be associated with the use of mandelic acid as a urinary antiseptic. It has been possible to discover the clinical conditions in which the drug is contra-indicated; in other cases the drug is a valuable bacteriostatic agent of great value in controlling urinary infections. Miss J. M. Lang and Miss M. E. Wheatley gave valuable technical assistance by their careful analysis for urinary calcium and phosphorus, respectively.

An outgrowth of the above research was a collaborative study of the use of sulphanilamide in urology—Dr. D. R. Mitchell contributed the following clinical data. Dr. Philip Greey (of the Department of Bacteriology) studied the effects of the drug upon pathogenic micro organisms, both in vivo and in vitro, and Dr. C. C. Lucas, with the technical assistance of Miss Wheatley, conducted the biochemical control. The effect of the drug upon several species of animals, as well as upon healthy humans has been also studied. Dr. Hall has collaborated in some of the animal experiments where surgical, physiological and pathological assistance was required. It is particularly gratifying to record that as a result of the cordial inter-departmental co-operation the research progressed most favorably and for an exhibit at the recent Ontario Medical Association Convention, showing the results of the above collaborative research, Drs. Mitchell, Greey and Lucas were awarded a gold medal. The work is being continued and the program has been expanded.

Dr. Lucas and Dr. Mitchell have also commenced a collaborative study of kidney and bladder stones.

Dr. Lucas has given some time to furthering the cancer research program: several batches of very pure sodium ferricyanide and a quantity of glucuronic acid were prepared in this laboratory.

The following work has been carried out under the direction of Dr. W. R. Franks:

The work on the synthesis of chemoantigens from non-immunising compounds concerned in the pathogenesis of disease has been continued. As applied to carcinogenesis, immunisation of mice with antigen formed by linking dibenzanthracene to casein gives evidence of yielding protection against the carcinogenic action of the dibenzanthracene. The influence of such a procedure on spontaneous carcinogenesis in mice is under investigation.

The anthranyl and dibenzanthranyl isocyanates prepared by Dr. H. J. Creech in the above coupling to protein were identified by reaction with alcohols. The former substance and the *B* anthryl derivative are being used for possible cross-immunity against the carcinogens. Arrangements have been completed whereby the preparation of more suitable derivatives for anti-carcinogenic antigen formation will be conducted by taking advantage of the proffered co-operation of Professor L. F. Fieser, of Harvard University. To this end a grant has been obtained from the International Cancer Research Foundation to enable this phase of the work to be carried on by Dr. H. J. Creech under Professor Fieser's direction at Harvard.

The application of the above principle to tuberculosis carried on with the co-operation of Mr. M. O'Sullivan has been confined to testing linkage of organic

iodo derivatives to sulphhydryl groups of reduced keratin which itself shows some antigenic activity.

With the assistance of Miss M. M. Shaw, the *in vivo* activity of the isomers of glyceric aldehyde have been tested for possible synergistic activity with the toxic action of irradiation on tumors. The d- and the l-glyceric aldehyde were prepared by Dr. E. Baer, under the direction of Dr. H. O. L. Fischer, and the irradiation carried out in co-operation with the Department of Radiology.

Dr. E. M. Hearne Creech has continued her studies on the *in vitro* activity of water soluble carcinogenic substances on growth and cell division.

With the co-operation of Mr. G. A. Meek, the characteristics of mono-molecular films of the above carcinogenic and related derivatives on surfaces are being studied.

With the assistance of Mr. A. E. Byrnes and Dr. L. D. Proctor, the influence of acute B<sup>1</sup> deficiency on glyoxalase has been studied. The glutathionne content of brain in insulin hypoglycaemia has been similarly investigated.

Dr. E. M. Hearne Creech has studied *in vitro* the influence of phagocytosed silica on cell division.

Dr. Franks has studied the influence of the admixture of actively phagocytosed manganese dioxide on the development of experimental silicosis.

In co-operation with Dr. N. L. Easton, Director of Research of the Ontario Hospitals, Dr. Banting and Dr. Franks have been studying the development of certain refractory states to insulin, following prolonged administration of large doses of the latter.

Dr. Bruno Mendel, with the assistance of Miss F. Strelitz and Miss Mundell, has continued the study of the effect of glyceric aldehyde on the respiration of tumour cells. They found that d-glyceric aldehyde had no effect on the aerobic glycolysis of tumour cells. More recently they found that all the activity of racemic glyceric aldehyde was in the laevo rotatory form of the substance. Both the d- and l-glyceric aldehyde for this work was synthesised by Dr. H. O. L. Fischer and Dr. E. Baer.

Dr. Mendel has also tested a large number of chemical substances for their effect on the respiration and fermentation of the tumour cell, and has continued his investigation of sodium ferricyanide.

The facilities of the laboratory were extended to Dr. H. Krebs, Professor of Biochemistry, Sheffield University, England, during his three weeks' visit, for the purpose of investigating the effect of pancreatectomy on the metabolism of muscle.

Miss H. Ball continued the investigation of tuberculosis, using tuberculin treated with glyceric aldehyde.

#### *Medicine, under direction of Professor Duncan Graham*

During the past two years Dr. Cleghorn has been studying the functions of the sympathetic nervous system in adrenal insufficiency. It has been found that the functions of the sympathetic nervous system and the effect of pressor drugs are normal in adrenalectomised animals receiving adequate quantities of cortical extract. In adrenalectomised animals maintained on a high salt low potassium diet, the functions of the sympathetic nervous system appeared to be normal but the effect of pressor drugs showed marked qualitative differences. A report of this work is being published. Preliminary studies on the relation of surgical shock to adrenal insufficiency have been made. This work is being continued.

Drs. Cleghorn and Hyland, in association with Drs. Linell and Mills of the division of neuropathology, have published a most complete clinical and pathological study of a case of tumour of the pineal gland. As little is known of the function of the pineal gland, this report is an important contribution to our knowledge of the mechanism responsible for the production of the more important signs and symptoms present in this case.

Dr. Hyland, working in co-operation with the department of medical research, has made definite progress in the study of electroencephalograms from patients suffering from neurological conditions such as migraine and epilepsy.

The 1937 epidemic of poliomyelitis presented an opportunity for the study of a number of problems concerning the treatment of acute anterior poliomyelitis. Twenty-six patients in the pre-paralytic stage of the disease were treated with convalescent serum, but this treatment seemed to have no effect in preventing the development of paralysis or in modifying the course of the disease. In the treatment of respiratory paralysis different types of artificial respirators were tried. The Drinker respirator was by far the most effective during the acute phase of the illness and in cases where prolonged treatment was necessary. With a view to obtaining more accurate records of the progress of respiratory muscles showing paralysis, estimations of the vital capacity were made. Estimation of the vital capacity at intervals has proved to be a valuable aid for determining (1) the severity of the paralysis of the respiratory muscles at the onset; (2) the period of time each day a patient should be allowed out of the respirator after the acute phase of the disease is over; and (3) the length of time respiratory treatment should be continued. Unfortunately the method is not applicable in children suffering from poliomyelitis.

The results of repeated estimations of the vital capacity clearly show that prolonged immobilisation of the spine and ribs definitely impede the recovery of the paralysed muscles. It has been shown that the institution of suitable remedial exercises at an appropriate time promotes the recovery of paralysed respiratory muscles and thereby lessens the tendency towards the development of deformities. The application of similar measures in the treatment of paralysed skeletal muscles would appear to be indicated.

Drs. Hyland, Gardiner, Heal, Oille and Solandt will publish shortly a report of the clinical findings and results in treatment of sixty-six adult cases of acute anterior poliomyelitis.

Drs. Cleaver and Maltby have published a report on the results of medical treatment in forty cases suffering from gastric ulcer. The average age of the patients was fifty-five years. After approximately five years thirty-three patients were free of symptoms, seven had symptoms suggestive of gastric ulcer, but only three of the forty patients presented X-ray evidence of an active gastric ulcer.

In 1931 Dr. Farquharson and the head of the department reported the first cases of Simmonds' disease discovered on this continent. At a recent meeting Dr. Farquharson, in association with Drs. Belt and Duff of the department of pathology, reported the results of a clinical and pathological study of four cases of this rare disease. The clinical manifestations of Simmonds' disease are closely simulated by those found in anorexia nervosa. Many of the cases reported as Simmonds' disease are evidently cases of anorexia nervosa. Drs. Farquharson and Hyland will publish shortly a report calling attention to differences in the clinical and pathological findings in these two conditions.

The effect of different vitamin deficiencies are being investigated. Dr. Wallace Graham has determined the vitamin C content of the urine in a variety of diseases. Cases presenting evidence of vitamin C deficiency have been given liberal quantities of ascorbic acid and its effect on the clinical condition of the patient observed. Changes in the gums and teeth in such conditions as diabetes mellitus, arthritis and nephritis are being studied.

*Mineralogy and Petrography, under direction of Professor A. L. Parsons*

Professor A. L. Parsons has carried on during the year the following investigations:

A study of the relations between the wave surfaces of light and the corresponding index surfaces in crystals.

A further study of the semi-precious stones of Canada.

Professor Ellis Thomson was engaged in the investigation of the ore minerals of the Denison Nickel Mine.

Professor M. A. Peacock completed the following:

A description of Goldschmidtine, a new antimonide of silver.

A new theorem with a convenient graphical solution, for rapidly finding the spacing of any set of lattice planes in any lattice whose elements are known.

Assisted by Mr. L. G. Berry, a study of the crystallography and optics of four new salts prepared by Dr. J. G. Breckenridge and Mr. O. C. Smith in the department of chemical engineering.

In collaboration with Mr. M. C. Bandy, Llallagua, Bolivia, he completed a description of Ungemachite and Clino-ungemachite, new minerals from Chile.

Professor Peacock and Mr. L. G. Berry have completed the following investigation:

A study of the mineral copiapite. With the help of x-ray measurements made on our new Weissenberg X-ray Goniometer, they have determined the structural lattice and constitutional formula of the mineral and have revised the optics of the species. They are much indebted to Professor E. F. Burton and Professor H. J. C. Ireton of the department of physics who extended the facilities of the x-ray apparatus of the McLennan Laboratory for their use.

Dr. V. Ben Meen has been engaged in the following studies:

Cleavage-luminescence in mica from Kilmar, Quebec.

An investigation of Cancrinite from Bancroft, Ontario.

The examination of a meteorite from Chile.

Mr. A. T. Prince completed a study of the mineral Sphene from Lake Clear, Renfrew County, Ontario and 16 Island Lake, Argenteuil County, Quebec.

A part of Dr. Peacock's time has been devoted, in co-operation with the departments of mineralogy in Harvard University and Yale University, to the revision of Dana's *System of Mineralogy*. This involves, not merely a compilation from the literature, but in many cases a complete re-examination of the minerals, with optical and röntgenographic measurements. The addition of a universal stage for the petrographic microscope and a part of the x-ray equipment necessary for the study of crystal structures has facilitated such work. With the installation of the complete x-ray equipment for structural investigations the department will be admirably fitted to carry on this most important phase of mineralogy.

During the year the Walker Mineralogical Club was organised in affiliation with the department of mineralogy and petrography. Graduates from this university and colleagues in our sister universities and in the government service were consulted and asked to become members. The response has been very encouraging, for we have an organisation of two honorary members, fifty-one ordinary members and nine student members. A full account of the organisation appears in "Contributions to Canadian Mineralogy" for 1938.

So far as publication of results is concerned, the work of the department has been further supplemented by papers from members of the Walker Mineralogical Club, as shown below, which will be published in "Contributions to Canadian Mineralogy" for 1938.

Brownell, G. M. (University of Manitoba). Zeolites at the Sherritt Gordon Mine.

Osborne, F. F. (McGill University). Preliminary Notes on Pseudomorphs after Spinel from Kilmar, Quebec.

Poitevan, E. (Geological Survey of Canada). Natrolite from the Eastern Townships, Quebec.

Rutherford, R. L. (University of Alberta). Crystal Habit of the Orthoclase in the Crowsnest Volcanics at Coleman, Alberta.

Wilson, M. E. (Geological Survey of Canada). The Keewatin Lavas of the Noranda District, Quebec.

*Obstetrics and Gynaecology, under direction of Professor W. A. Scott*

Dr. J. R. McArthur returned in the fall from study abroad, and is assisting

Dr. Cosbie in the radiological treatment of carcinoma of the genital tract in collaboration with the Institute of Radio-therapy.

Dr. M. C. Watson has continued his work in the study of Endocrinology and has again published an interesting paper on that work.

*Paediatrics, under direction of Professor Alan Brown*

As in the past, the staff of the Department of Paediatrics, University of Toronto, has been actively engaged in studies on the prevention and cure of the various diseased conditions encountered during infancy and childhood.

Work in conjunction with the Connaught Laboratories has resulted in the perfection of whooping-cough vaccine which is now being made available to the physicians of Ontario. The results obtained with this vaccine have been so striking that the routine use of whooping-cough vaccine for the immunisation of children against this dread disease is now advocated by practically all paediatricians in Ontario. During the year 1936, there were no less than 29 deaths in the Province of Ontario from whooping-cough. As the results with this vaccine indicate that 98 per cent. of the children inoculated are rendered immune, the universal use of this vaccine will be the means of saving the lives of many little children.

Also in conjunction with the Connaught Laboratories, a serum has been developed for the treatment of influenzal meningitis. Formerly this disease was invariably fatal. Through the use of this serum, in the last 50 cases at the Hospital for Sick Children, 12 recovered and are now perfectly normal. This means that these twelve children owe their lives to the use of this serum.

It is well known that certain infections such as measles and chickenpox are disseminated by the causative factors being carried through the air. With this in mind, extensive investigations are under way to study air-contamination and means for its control. In one of the hospital operating-rooms, installation of special ventilation and special ultraviolet lamps resulted in a reduction of the bacteria in the air much below that which has been previously obtained.

In recent years, it has been recognised that many forms of asthma are caused by minute particles of different materials in the air being inhaled by the patient. From studies conducted in the Hospital for Sick Children, it has been found that in certain refractory cases the offending substance has been house dust. Accordingly, extracts have been made up from house dust which have been effectively used in the treatment of these distressing cases.

Studies have resulted in an improvement of our methods of treatment of bronchiectasis, pyelitis, nephritis and diabetes. A continuous study of these and other conditions is constantly necessary in order to evaluate the newer therapeutic measures which are being developed elsewhere as well as here. The study of heart disease in children is giving encouraging results of a most practical nature. It is now possible to determine fairly accurately the degree of activity of the disease and just how much physical exertion the child can safely undertake.

The mental health of the child is not being neglected in our studies. Extremely interesting results are being obtained in a study in co-operation with the Banting Institute of the electrical currents in the brain in different diseased conditions. These measurements are being made by means of the electro-encephalograph, which records and measures exceedingly minute electrical currents in different parts of the brain.

About the middle of August, 1937, it was evident that Toronto and Ontario were in the initial stages of an epidemic of anterior poliomyelitis. This dread disease rapidly spread through most of the province and to other parts of the Dominion. The staff and research facilities of the department of paediatrics were immediately placed at the disposal of the health authorities of the province and city, and took an active part in the prophylactic and curative measures which were instituted. In co-operation with the School of Hygiene, the Department of Health of the Province of Ontario, and the oto-laryngologists of all the city hospitals, the

prophylactic value of the zinc-sulphate nasal spray was investigated. It involved the spraying of some 5,000 children and the careful comparison of the results obtained on this group and on a control group of children living in the same sections of the city and of the same age who had not received the spray. Unfortunately the results obtained indicate that this procedure as followed was not effective as a prophylactic measure. In the treatment of the disease, no evidence was found that convalescent human serum was of any benefit. In the course of the epidemic many emergency cases arose in which the unfortunate patients suffered from a paralysis of the respiratory muscles. To combat this phase of the disease no less than 27 mechanical respirators (iron lungs) were rapidly manufactured by the Hospital for Sick Children and used not only by the Department of Health of the Province but also were shipped to other parts of the Dominion.

There is no one factor in our daily lives which has a greater influence on health than proper nutrition. During the past year investigations have been undertaken on the need of vitamin A, vitamin C, iron and calcium. The utilisation of iron and calcium in various Canadian foods has been studied. These investigations are giving information that is of importance not only in the prevention and cure of obvious nutritional deficiencies but when applied generally this knowledge will result in an increased resistance to disease, a higher level of health, and increased longevity.

*Pathology and Bacteriology, under direction of Professor W. Boyd*

I have dealt in my report to the Dean of the Faculty of Medicine with the difficulty of following in the footsteps of so distinguished a predecessor as the late Professor Oskar Klotz. The various changes which have been introduced in methods of teaching and in the development of the museum have also been considered in that report. In the present report reference will be made only to investigative work being done in the department.

Dr. G. Lyman Duff has analysed a rather large series of cases of carcinoma of the body and tail of the pancreas with the object of drawing attention to the tendency of these tumours to spread in such a manner as to produce misleading clinical symptoms and signs which have not hitherto been recognised as common in this disease. He has also collaborated with Dr. R. F. Farquharson of the department of medicine in a clinical and pathological study of 4 cases of Simmonds' disease which have come to autopsy in this department within recent year, and has assisted Dr. H. A. Dixon, also of the department of medicine, in his study of an unusual case of melanotic sarcoma. With the collaboration of Dr. D. E. Magner, Dr. Duff has continued and extended the experiments commenced a year ago on the effects of different protein derivatives upon the vascular systems of various animal species. Dr. M. O. Klotz has continued and completed his study of the association of silicosis and primary carcinoma of the lung, and he has also written an extensive review of the literature dealing with primary pulmonary cancer. Dr. D. E. Magner has made a study of various types of subacute myocarditis of unknown aetiology, and has prepared for publication a report of one case encountered at autopsy during the past year. Dr. H. C. Hair has been engaged in an histological study of infarcts of the lung with a view to establishing criteria for the determination of their age, while Dr. L. M. Gray has undertaken a study of testicular tumours which he will bring to completion during the coming year.

In the division of bacteriology the study of sulphanilamide and related compounds has been continued by Dr. P. H. Greey both on the experimental side as to their effort in tuberculous infections in animals and, in co-operation with the staff of the Toronto General Hospital, on the clinical use of these substances. The Ontario Medical Association at the annual meeting this year awarded a gold medal to Dr. P. H. Greey, Dr. C. C. Lucas of the Banting and Best department of medical research and Dr. D. R. Mitchell of the department of surgery for their exhibit on sulphanilamide treatment in urinary tract infections. Dr. W. L. Holman has published a

masterly review of all the work that has been done on sulphanilamide up to the present time, a contribution to which all investigators will turn as a source of information for many years to come. Dr. Greey continued his research on bacterial synergism, has studied the heterophil agglutinins in infection mononucleosis, and with Dr. Marion Ross has been determining the incidence of anaerobic streptococci in puerperal and other infections. Dr. D. R. E. McLeod investigated certain phases of the lysis of red blood cells. Dr. R. Margarite Price as part of her valuable work on tuberculosis has been correlating the results of the tuberculin tests which she has done since 1932 on the third year medical students and has retested the non-reactors (about half the class) during the next three years. The problem of bovine tuberculous infections in children has continued to attract her interest and the factors leading to the decreasing incidence, established by her diagnoses, are being better understood.

The division of surgical pathology has had to curtail its research activities somewhat due to the extra burden of routine work occasioned by the taking over of gynaecological pathology from the department of obstetrics and gynaecology. However work is still continuing on the problem of gastric and duodenal ulcers and it is hoped in the near future to have some interesting observations for publication. Experimental work was started on the aetiology of mixed tumors of the parotid gland, which it is hoped will clarify to a degree the vexed problem of their conglomerate nature.

The division of neuropathology has been strengthened during the past year by the appointment of Dr. J. Clifford Richardson as fellow in neuropathology and by the addition of Dr. E. H. Botterell to the staff in neurological surgery. Dr. Richardson has undertaken a detailed study of the pathology of acute anterior poliomyelitis, and is also engaged in investigating oedema of the brain. Dr. Botterell, in addition to adding important surgical material to the files of the division, is interesting himself particularly in studying injuries to the nervous system. Dr. K. G. McKenzie and Dr. Linell in collaboration with Dr. W. L. Robinson are continuing their investigations in this field, and Dr. Botterell will prove a valuable addition to the team. Dr. Mary I. Tom has collaborated with Dr. D. Y. Solandt and Dr. Botterell in a histological investigation of regeneration of nerve and voluntary muscle following nerve-suture. Dr. Linell is engaged with Dr. E. Hall in an experimental investigation of the histological changes to be observed in the brain following insulin and metrazol injections. Dr. Burns Plewes has investigated and reported upon an interesting case of cervical cord injury. Other subjects which will be found in the list of publications are hypogonadism associated with pineal tumour, intracranial aneurysms, spontaneous haematomyelia and cranio-cerebral injuries.

#### *Pathological Chemistry, under direction of Professor Andrew Hunter*

Drs. Nicholson, Urquhart and Selby, supported by a grant from the Banting Research Foundation, have continued on an extended scale their investigation of kidney function as affected by experimental nephrosis. One phase of this study has already been brought to a satisfactory completion. The degenerative changes in the cells of the proximal convoluted tubules have been shown to involve changes in permeability, which explain many of the functional derangements observed.

As part of the same general problem Dr. Nicholson and Mr. Gornall have studied the production of urinary ammonia in experimental nephrosis, and have obtained evidence that the site of ammonia formation is not the proximal convoluted tubule.

Dr. Hunter has completed his study of the action of arginase upon carbamido-arginine and has identified the products as urea and the hitherto unknown alpha-carbamido-ornithine. An anhydride of this substance, also new, has been prepared, and has been shown to be probably a piperidone. Attempt at the synthetic preparation of these substances are in progress. The general problem of the specificity of arginase is being explored in several other directions.

Dr. Hunter has devised methods for the preparation of arginine and ornithine by the use of appropriate enzymes. As a result ornithine in particular has been made much more accessible than it was, and considerable quantities of that substance have been prepared for research purposes.

In connection with the work on the specificity of arginase, Dr. Woodward has devised a new and simple method for the preparation of carbamido- and methyl-carbamida-arginine.

Mr. Gornall has completed a useful study of the behaviour of carbamido-compounds in the Van Slyke method for the determination of amino groups.

Dr. Lawford has worked out a method of preparing partly purified and highly concentrated solutions of arginase, by the use of which he has been able to improve and greatly to shorten the method for the enzymatic determination of arginine.

*Pharmacology, under direction of Professor V. E. Henderson*

The research in the department has proceeded satisfactorily. Dr. Bonnycastle continued the work on adrenalin begun by Prof. Lucas last year, and the material is ready for press. He has also begun a study of spinal anaesthesia, intending to settle the dispute in regard to the danger of direct poisoning of the respiratory centre by a local anaesthetic rather than a poisoning of the phrenic roots. This study has also made good progress.

Dr. Rice has continued some studies begun last year on the reflexes controlling respiration and the effects of drugs on the respiratory mechanism. A good deal of very excellent material has been obtained and a preliminary communication was presented before the American Society for Pharmacology and Experimental Therapeutics in April. A series of papers dealing with this work is in course of preparation.

Dr. Lucas has made a study of the oral absorption of bismuth, taking a new bismuth compound, bisiodide, in order to obtain a thorough insight into the literature not only of the oral but of the intramuscular use of bismuth in the treatment of syphilis. His work was not only on animals, but owing to the co-operation of Drs. A. MacKay, W. B. Edmonds and E. B. Hardy he was able to follow the excretion in a series of clinical cases. The study has been of value not only in giving this department a thorough insight into methods and the literature, but also as a means of informing some members of the clinical staff of the problem and its literature. A paper dealing with this study has already been published.

Owing to the kindness of the Ohio Chemical Company, the department was provided with specimens of monochlor and dichlor cyclopropane. Both these are liquids, the boiling points approximating ether and chloroform respectively. Unfortunately these substances proved to be quite unstable in the animal body giving rise to marked lung lesions, and are of no value as anaesthetic agents. This study enabled the Head of the Department to complete an investigation of the more obvious possibilities of improving cyclopropane and led to the presentation before the Royal Society of a paper reviewing the historical progress of our knowledge of chemical substances have anaesthetic actions. It showed the disadvantages of the various anaesthetic reagents at present available and enabled certain deductions as to the possible physical and chemical characteristics of substances which would prove suitable anaesthetics. Papers dealing with these two topics are in press.

*Physics, under direction of Professor E. F. Burton*

Low Temperature Laboratory:

The following members of the staff and graduate students have co-operated in the work: Professors J. O. Wilhelm, H. Grayson Smith, and Arnold Pitt. Dr. A. H. Woodcock, demonstrator, Mr. K. C. Mann, holder of a War Memorial Graduate Fellowship, H. E. John, National Research Council Bursary, J. C. Findlay, R. W. Leonard Graduate Fellowship, and H. M. Bryant, assistant demonstrator. The fol-

lowing problems have been studied.—the effect of magnetic fields on persistent currents flowing in closed superconducting circuits, and the relaxation effects connected with the transition between the superconducting and non-superconducting states; the refractive indices of liquid helium I and II; the flow of liquid helium I and II through capillary tubes; the velocity of sound in liquid helium, and its compressibility resistance and gas thermometers for use at liquid hydrogen and liquid helium temperatures; development of apparatus for the measurements of the magnetic susceptibilities of finely divided superconductors.

#### Spectroscopy:

The experimental investigation of hyperfine structure has been continued by M. F. Crawford, R. Richmond, and W. M. Gray. A light source which emits very narrow spectral lines has been developed and is being used to study the small hyperfine structures of the light elements.

The atomic spectra of mercury and lead have been analysed by M. F. Crawford and A. B. McLay, with the co-operation of A. M. Crooker and M. W. Johns formerly members of this department, but now engaged elsewhere.

Two theoretical researches on hyperfine and multiplet structures have been completed.

The spectroscopic determination of the amount of zinc in tissues that was undertaken some time ago for the Connaught Laboratories was completed during the year by S. Bateson. Several similar analyses are now in progress.

#### Geophysics:

Research in Geophysics has been carried on by Professor L. Gilchrist, A. R. Clark, C. H. Acheson, and M. J. S. Innes, as follows:

##### Laboratory Research

The determination of the average intensity of magnetisation and the equivalent susceptibilities of magnetic ore bodies.

A theoretical study of a useful collection of equivalent magnets as an aid to the magnetic exploration of ore bodies.

Results of combining electrical self potential methods with magnetic methods in geophysical exploration of magnetic ore bodies in the field.

##### Research in the Field

Field work carried out near Kenora, Ontario, in co-operation with the Northfield Mining Corporation.

Field work carried out near Kenora, Ontario, in co-operation with the Coniagas Mine Company.

Field work carried out near Maskwa Lake, Manitoba, in co-operation with the Stanmore Mining and Smelting Corporation.

During the year, as a result of a donation by Mr. T. Lindsley, of Ventures, Limited, Dr. Arthur Brant has held a fellowship in geophysics which enabled him to devote his whole time to research in this department. During the summer of 1937 he was in the field with a party under the Department of Mines carrying out geophysical investigations, and has already left with another party, under the same department, for further work during the summer of 1938. During the year he prepared, at the request of the Department of Mines, a comprehensive report on the use of the ordinary dip needle.

#### Colloidal Solutions:

Two graduate students were working in this field during the year.—Miss A. M. Crutcher, with a Bursary, and L. T. Newman with a studentship from the National Research Council at Ottawa; Miss Crutcher was investigating the problem of density of lyophobic solutions, particularly with reference to Bredig gold colloids to determine the actual density of gold in the colloidal state, and Mr. Newman the spectrochemical analysis of adsorbed ions in colloidal solutions.

### Electron Microscope:

Mr. James Hillier, assistant demonstrator, and Mr. Albert Prebus, under a bursary from the National Research Council have been working jointly on the construction of an electron microscope with very promising results. This work has been given some assistance by the National Research Council.

### Research with Quartz Crystal:

Mr. D. W. R. McKinley has carried out a research on the problem of finding the velocity of light by the use of an oscillating quartz crystal.

### Other Investigations:

Dr. John Satterly, with the cooperation of Mr. O. A. Gilmore, carried on a further study of the inclined water jet, by applying Bernoulli's principle to show that the pressure in the jet never varies greatly from atmospheric. This definitely disproves Levi-Civita's original theory. Parabolic projectile paths have been plotted with the same initial conditions as the jet and in all cases the jet falls short of the projectile path. Assuming this to be due to the viscous resistance of the air, an estimate has been made of the thickness of the air carried along on the moving fluid. Velocity measurements within the jet have been made with a Pitot tube of small dimensions and results compared with computed velocities from flows and cross sections.

Professor H. A. McTaggart has been working on the measurements of the ellipticity of light reflected from thin films of oriented molecules. His experiments and observations call attention to the changes produced in the ellipticity of the light reflected from a number of monolayers of Barium Stearate placed on glass. A complete theory based on the ordinary laws of reflection and refraction at such surfaces would be necessarily a complicated one. Two experimental facts may be emphasised in cases where the light is plane polarised.

Films built up of oriented molecules on glass may be used to vary the ellipticity—from positive to negative values—of light reflected from them.

Certain thicknesses of film may be found which give plane polarised light at all angles of incidence.

Professor H. J. C. Ireton, with Dr. H. L. Welsh cooperating, has carried out a study of atomic collisions in caesium vapour and of the reflection of the caesium resonance lines from the surface of the vapour.

Dr. H. L. Welsh, worked independently, on an investigation designed to measure the efficiency of atomic collisions of the second kind in sodium vapour.

Mr. C. K. Cheng, graduate student, continued his work on dielectric constant measurements.

Mr. W. F. Oliver has completed a study on vitreous ice on which he has been working for the last two years.

The students listed below have been carrying on work under the following awards:

Miss A. M. Crutcher	—Bursary from the National Research Council
K. C. Mann	—War Memorial Fellowship from the Alumni Association
H. E. Johns	—Bursary from the National Research Council
L. T. Newman	—Studentship from the National Research Council
Albert Prebus	—Bursary from the National Research Council
S. Levine	—A Royal Society of Canada Fellowship—held at Cambridge, England
A. D. Misener	—1851 Exhibition Science Research Fellowship held at Cambridge (second year)

### *Psychiatry, under direction of Professor C. B. Farrar*

Further work has been done in collaboration with the Department of Medical Research on the intermediate products of carbohydrate metabolism in certain acute

psychoses; also on the biochemistry of hypoglycemic shock. These studies are still in progress. In the out-patient service, a study of factors in the psychoneuroses is being conducted.

*Psychology, under direction of Professor E. A. Bott*

Fifty-seven graduate students took instruction in the department of psychology in 1937-8 of whom eight were enrolled from four other departments. Two candidates completed the requirements for the Ph.D. degree and eleven for the M.A. degree. The names of these candidates and the subjects of their theses are as follows:

For the degree of Doctor of Philosophy:

- Long, Eleanor R.: A Study of Children's Appreciation of Consequences.  
Northway, Mary L.: Bartlett's Concept, 'Schemata'.

For the degree of Master of Arts:

- Bailey, Nora: An Analysis of Camp Records.  
Bensen, Margaret: An Analysis of the Imitative Behaviour of Thirty Preschool Children.  
Brown, Isabel: An Exploratory Study of Teasing.  
Carson, Marjorie, E. C.: An Investigation of the Predictive Value of Intelligence Tests of Preschool Children in Foster Homes.  
Lamon, Helen: A Study of the Color Selection of Young Children.  
LeBas, Margaret: The Validity of Items of Preschool Tests.  
Loeb, Nora: A Critical Study of McQuitty's Concept of Concomitance.  
Ord, Violet: An Analysis of the Method of Art Instruction used at the Children's Art Centre, Toronto.  
Rintoul, Dorothy F.: An Experimental Study of Laughter and Smiling in Preschool Children.  
Sparling, Margaret: Variation and Predictive Value of the Intelligence Quotients of Preschool Children.  
Stewart, Margaret C.: The Application of a Theory of Discipline in a Private Home Setting.

The increase in enrolment of undergraduates in psychology classes during recent sessions necessitated this year enlargement of laboratory accommodation and the re-organisation of some of our large classes. This has been facilitated by the University securing the double house, 102 and 104 St. George St. for our purpose. As a result a more effective classification of our students in each year of the pass course will be possible; Professor Ketchum's social studies laboratory in 100 St. George St. will be enlarged to provide for practical work with honour students in sociology and psychology; suitable quarters for the vocational studies laboratory of Professor Cosgrave will be provided in 102 St. George St. as well as a laboratory for Professor Chant's advanced experimental psychology. These needed changes will permit more intensive work with graduate students as well as with undergraduates.

During the past session our staff have been engaged upon a number of special investigations.

Electrical equipment for the study of encephalograms has been completed by Professor Bott and Mr. H. C. H. Miller, also photographic equipment for the study of ocular behaviour with special reference to proficiency in reading.

Professor Chant has extended his investigations in the selection of educational adjustment of undergraduates through a special program relating to students in the first and second years of medicine which is being conducted in co-operation with the assistant dean of that faculty. Professor Chant has also advanced his previous studies in the psychology of reasoning and is continuing his work in conjunction with the Committee on Accident Prevention of the Canadian Public Health Association.

Professor Line's work upon psychological problems at the public school level has furnished valuable leadership both for teachers and graduate students who are

interested in the operation of the new courses of study in Ontario Schools; the relation between children's thought processes and their personality traits, also the validity of certain pre-school tests of intelligence have received his special attention.

Professor Co-grave in collaboration with Mr. V. S. Stevens, vocational counsellor of the Western Technical and Commercial School, has been engaged on a study in vocational guidance with approximately 1000 Grade IX pupils. Material has been compiled for a special course of instruction on occupations which should assist such pupils in the choosing of a vocation and in planning the educational steps necessary to pursue it. In addition 30 persons of various ages have been systematically examined and vocationally advised during the year in his vocational laboratory. These cases have been referred individually from schools and social organisations in Toronto which co-operate regularly with our department for this purpose. At the request of the Director of the School of Nursing Dr. Cosgrave has also devised a series of selective tests for first year students in nursing. This study is planned over a period of years as a means of predicting aptitudes for work in nursing.

The psychological material which Professor Ketchum has collected over a period of years from students' life histories is now an invaluable source of data for analysis and research by advanced students. Our increased accommodation for social psychology will permit more adequate analysis of these and other social data bearing upon personality development.

Professor Bernhardt in cooperation with Professor MacArthur of the department of biology is supervising a study on the inheritance of certain behavior traits in mice in his comparative psychology laboratory. This study is planned to continue through several animal generations. Dr. Bernhardt has also assisted in supervising some of the graduate researches in child psychology in St. George's School.

Last year Professor Myers took a notable part in the planning and carrying out of the extensive statistical study which the Ontario Department of Health conducted relating to the incidence and results in treatment of cases of poliomyelitis in Ontario. The recent report of the Department of Health upon this study has received wide attention.

The graduate work of our department has been greatly stimulated through the generous gift at this time of a research fellowship by an anonymous donor, establishing the John Northway Memorial Fellowship at \$500 per annum for a period of five years for advanced research in the field of personality development. The department aims to secure additional research fellowships of a similar kind for other essential phases of psychological work. The fields of vocational guidance, speech and reading disability, delinquency and penology, are examples of areas which await exploration if graduate students can be assisted through research fellowships.

#### *Physiology, under direction of Professor C. H. Best*

The various teaching courses proceeded in much the same manner as last year. New plans for the teaching of the practical work in third year medicine have been made so that the trimester system, to be introduced next year, can be utilised to the greatest advantage.

The researches carried on under the general direction of the head of the department were those of Mr. Louis Jaques in heparin and blood clotting and those of Mr. James Campbell on fat and carbohydrate metabolism.

Mr. Jaques has continued his researches on the purification and properties of fibrinogen and thrombin and the physiology of heparin. Promising results have been obtained in the purification of these proteins. He has also confirmed and extended his previous findings on the nature of the fibrinogen-fibrin reaction and has determined the solubility of fibrin.

With regard to the physiology of heparin the reaction of protamine with the anticoagulant has been studied. Chargaff's finding that protamine neutralises the

action of heparin has been confirmed and the phenomenon extended to other basic proteins some of which have been found to have the same action. The reaction has been studied in vitro and characterised as a simple salt formation. On the basis of this work, a quantitative test for heparin has been devised. In collaboration with Dr. Waters, this has been applied to the blood of dogs in anaphylactic and peptone shock. The incoagulability of the blood in these conditions has been shown to be due to heparin or a closely related substance released by the liver during the shock. These findings provide further evidence that heparin is a physiological substance. The studies on the relation between heparin dosage and effect on clotting time have been completed.

The investigation of the relation of the anterior pituitary gland to fat metabolism has been continued by Mr. Campbell. During the visit of Dr. I. A. Mirsky to Toronto last June, attempts were made to find the immediate effects of adrenalectomy on the ketonaemia produced in rabbits by the injection of anterior pituitary extracts. This study is as yet incomplete.

In co-operation with Miss J. H. Ridout, it has been found that a fasting ketosis occurs in rats whose livers have been made fatty by high-fat low-choline diets but this does not occur in normal rats. An "adaptation" to this ketosis occurs, but by the injection of anterior pituitary extracts a greatly increased ketonuria is produced to which the animals may again become adapted. There is no constant relationship between the ketonuria and the level of liver fat. The ketonuria produced by anterior pituitary extract during fasting is greatly in excess of the fasting ketonuria after high-fat low-choline diets although the level of liver fat may be the same in both cases.

The "diabetogenic" action of anterior pituitary extract on normal dogs has been studied. In several animals the "diabetogenic effect" described by Houssay and his collaborators has been produced. In one a slight, apparently permanent diabetes was produced. In another an intense diabetes was produced which persisted after discontinuing the injections. Subsequent findings strongly indicate that the diabetes had been produced by a degeneration of the islets of Langerhans of the pancreas.

Tests whereby the various physiological activities of anterior pituitary extracts may be assayed have been developed and others are in the process of development. A method of assaying the potency of anterior pituitary extracts in increasing liver fat has already been described.

Fractionation of anterior pituitary extracts has already thrown some light on the nature of the substance present in such extracts which increase liver fat.

Mr. Campbell has also been helping Dr. N. B. Taylor with certain experiments where anterior pituitary extracts have been used.

For the past year Dr. R. E. Haist and Miss L. E. M. Roddy have been engaged in research under Professor N. B. Taylor's direction. Research assistance was given by Dr. T. H. Clarke of London, Ontario, who spent from September 1st to January 1st in the laboratory. His time was devoted mainly to experimental work on intestinal obstruction. Problems connected with intestinal obstruction continue to interest Professor Taylor and his collaborators, and a fair proportion of the time available for experimental work has been given over to this research. Dr. Haist is carrying out another series of experiments to determine the relation, if any, of the general effects of intestinal obstruction to the level of the plasma potassium. Among other researches at present under way is a study by Dr. Haist of the behaviour and reactions of decorticated animals. Studies upon calcium metabolism are being continued. The action of parathyroid extract upon the serum calcium of nephrectomised animals has been investigated. It has been stated that such animals fail to show the usual effects of the parathyroid hormone. No substantiation for the claim was obtained from this investigation. The effects of parathyroid extract and of viosterol have also been studied in puppies in which rickets had been induced by the administration of beryllium carbonate: animals in which the rickets is well marked are resistant to the action of the hormone, and also, but to a less extent, to viosterol. The relationship of parathyroid function to the action of prolactin upon the crop glands of pigeons is

under study. Some interesting and suggestive observations have already been made. The pathogenesis of gastric and duodenal ulcer is a question upon which some light may be thrown from the experimental side. With this end in view, the actions of colchicine and cinchophen upon the gastric mucosa have been under investigation. Chronic ulcers in the pyloric region have been produced in a large proportion of dogs treated perenterally with the latter drug.

Professor Taylor, as co-author with the head of the department, has just published "The Living Body", a junior text in physiology requested by Messrs. Holt and Company for use in American colleges.

In the department of physiology the section in biophysics, under the direction of Dr. D. Y. Solandt, has carried out physiological research along a variety of lines. Mr. J. W. Scott has been working on the so-called reaction of degeneration in denervated muscle. A method of measuring the time constant of accommodation in human nerve using linearly rising exciting currents has been perfected, thereby greatly simplifying the clinical measurement of this factor. Work started in the previous year on the excitation of single muscle fibres and its relation to neural connections has been carried further. Dr. E. H. Botterell and Dr. Solandt have collaborated on the measurement of the excitability constants in normal and in regenerated mammalian nerve. Through Dr. Botterell and Dr. T. S. Pernetz this section has co-operated with the department of surgery and the section of urology in certain clinical investigations. Mr. F. L. Robinson has worked with the section in biophysics on the construction of a double cross-circulation pump of novel design. Mr. J. D. Brown has built an electronic device with several new features for the rapid measurement of hydrogen ion concentration by the glass electrode method. During the epidemic of anterior poliomyelitis in the summer and autumn of 1937 the section in biophysics collaborated with the department of paediatrics in the Toronto Hospital for Sick Children and the department of medical research in testing devices for the artificial respiration of patients with respiratory impairment. Collaboration of this section with the staff of the department of physiological hygiene in a study of the effect of heparin on coronary thrombosis produced in dogs is outlined elsewhere.

Dr. E. T. Waters and Dr. I. A. Mirsky of Cincinnati joined in an investigation on the utilisation of *B*-hydroxybutyric acid by the mammalian heart-lung preparation. Briefly, it was shown that there was no semblance of a fixed ratio between the amounts of carbohydrate and of *B*-hydroxybutyric acid used by the heart and lung; also that there appeared to be preferential utilisation of carbohydrate.

Further investigations have been made by Dr. Waters and Mrs. J. P. Fletcher on the effect of fructose on the glucose tolerance curve. A number of other substances have been used instead of fructose: so far sorbitol is the only substance which gives an effect similar to fructose on the glucose tolerance curve. Sorbitol is even more potent than fructose. Sorbitol appears to be absorbed from the intestinal tract only very slowly and this fact accounts, partly at least, for earlier reports that sorbitol cannot be utilised by the mammalian organism. It is now demonstrated that perenteral injection of a solution of this substance into a fasting rat leads to a rapid accumulation glycogen in the liver, and at a considerably faster rate than in control animals receiving an equal quantity of glucose.

Dr. Waters in collaboration with Dr. J. Markowitz has conducted investigations on anaphylaxis in the dog. It has been shown that, contrary to general belief, the anaphylactic reaction can still be obtained in a sensitised dog under ether anaesthesia, even after complete removal of the liver.

Dr. Fiddler has collaborated with Dr. Waters in experiments which had to do with the relationship of the respiratory quotient to the blood sugar level and the response to sugar feeding. With Dr. McHenry, experiments were made in the hope of obtaining from the respiratory quotient some evidence of the effect of vitamin B<sup>1</sup> in the metabolic change of carbohydrate into fat. With Miss Ridout, experiments were carried out to determine the metabolic rates of groups of rats under various conditions. Observations were made with Dr. Haist on a hemidecorticate dog in the

fasting state and with Mr. Campbell on a fasting "pituitary diabetic" dog. Dr. Fildar's co-operation with his various colleagues has been greatly appreciated by them and by the head of the department.

The head of the department gave the Nathan Hatfield Lecture at the College of Physicians and Surgeons in Philadelphia on April 6th, and lectures in Cincinnati, Indianapolis and Dallas during the academic year. He is to give the Stephen Paget Memorial Lecture on June 9th in London, England.

During the past year the head of the department has acted as Chairman of the Scientific Advisory Committee on Nutrition to the Dominion Council of Health.

*Surgery, under direction of Professor W. E. Gallie*

For the assistance of students and instructors the department is proceeding this year with the development of a museum of applied anatomy. Dr. Ross McKenzie who is attached to both the department of anatomy and the department of surgery has been detailed to make dissections under the supervision of Professor Grant, which will provide permanent demonstration of those anatomical fields that are of interest to the surgeon. Those will be of great value in both undergraduate and graduate teaching.

Through the courtesy of Sir Frederick Banting and the willing co-operation of the Superintendent and Board of Trustees of the General Hospital, an electro-encephalographic machine has been built and installed by the department of medical research in a room adjacent to the neuro-surgical operating room. It is hoped that this apparatus will prove of value in the definite localisation of brain tumours. Having the apparatus close to the operating room will make it possible for the surgeon to apply electrodes directly to the surface of the brain and so obtain records of the changes in bio-electric potentials associated with tumours. Throughout the coming year an attempt will be made by the departments of medical research, medicine and surgery to determine the clinical value of the apparatus.

Dr. Gordon Murray has continued throughout the year the study of the clinical applications of "heparin." An adequate supply of this expensive biological product has been provided through the generosity of Mr. J. Stanley McLean and the Connaught Laboratories. It is now definitely established that it is of great value in all operations on blood vessels and the heart, in preventing thrombosis, and the results in spontaneous venous thrombosis suggest that it is of value in preventing the extension of thrombus. The clinical experiment described last year to determine its value as a preventive of post-operative pulmonary embolism has been continued and is giving encouraging results.

Encouraged by the definite value of heparin in preventing thrombosis at the site of operations on blood vessels, Dr. Murray has enlarged the field of blood vessel suture to include free transplants of veins to replace gaps in arteries. This can be done with a high percentage of success in animals and its possibilities in wounds of great vessels and in tumours and aneurisms are highly interesting. He has also made some progress in an attempt to replace damaged heart valves.

In recognition of his work on heparin, Dr. Murray has been appointed Hunterian Professor in the Royal College of Surgeons of England and he will lecture on the subject in London early in the spring of 1939.

The study conducted by Dr. W. S. Keith on the use of free transplants of nerves that have undergone Wallerian degeneration has now reached a stage where it can be shown that following such operations there is a return of function in animals and that there is a down-growth of axis cylinders through the degenerated graft. No opportunity has occurred in the general surgical service to make use of the principle involved but encouraging results have been reported by Dr. J. A. Sullivan in lesions of the facial nerves in temporal bone. Dr. Keith's work has been supervised by Dr. Linell of the department of pathology.

Dr. Stuart Gordon has continued his experimental studies of the influence of refrigeration on free transplants of skin, fascia and bone. He is also engaged in

conjunction with the department of radiology, in studying the influence of x-ray, such as is used in the treatment of cancer, on skin grafts. These studies have important clinical bearings.

At St. Michael's Hospital, Dr. C. H. Watson and Dr. T. R. Sarjeant have conducted a study of the effect of the sterilamp in preventing the infection of wounds. This study is approaching completion.

Dr. D. R. Mitchell of the department of urology in collaboration with Dr. G. E. Hall, Dr. C. C. Lucas of the department of medical research and Dr. Philip Greey of the department of bacteriology have conducted an exhaustive and successful study of the uses of mandelic acid and sulphanalamide in infection of the kidneys and bladder and urethra. For this work they were awarded a gold medal by the Ontario Medical Association.

In addition to the laboratory studies several important clinical researches have been going on. Drs. R. I. Harris, Charles B. Parker and R. M. Janes have conducted an exhaustive follow up and analysis of the cases of biliary disease encountered in a period of years. Dr. H. W. Wookey has undertaken a study of total oesophagectomy for cancer, which has already yielded encouraging results. An original suggestion that the approach should be made from the right side and include ligation and section of the vena azygos major has proved helpful. Dr. Botterel is engaged in a careful study of the sensation in a patient on whom Dr. K. G. McKenzie did a hemidecortication. Dr. Keith Welsh is continuing his studies of staphylococcus infection. Dr. R. I. Harris has studied the clinical results of the treatment of hernia by sclerosing fluids and has presented interesting experimental and autopsy material illustrating the effects. Dr. E. E. Shouldice has been studying the effect of the use of fascia lata in reconstructing and supporting the transverse metatarsal arch. Dr. R. R. Graham has continued his efforts to find a way to make total gastrectomy for cancer a safer operation. Dr. F. I. Lewis and the head of the department have interested themselves in an effort to induce union of united fractures of the neck of the femur by reduction of the displacement and the introduction of a Smith-Peterson nail and a bone graft, without a major operation.

As in former years combined studies in the follow-up clinics have been conducted by this department in conjunction with the department of radiology. These include studies of oral carcinoma, carcinoma of the breast, malignancies of various kinds in the genito-urinary tract, and sarcoma, wherever it may occur. These combined studies have proved most interesting and are leading to a mass of accurate observations upon which authoritative opinions can be based.

The epidemic of infantile paralysis which occurred in Toronto in the autumn of 1937 gave the surgical staff at the Hospital for Sick Children a wonderful opportunity for service under pressure. Their particular contribution consisted of the development of a type of splint which could be easily applied and which would prevent, to a large degree, the deformations which so quickly follow the acute stage of the disease. In conjunction with the medical staff they organised and managed successfully a large special hospital devoted solely to poliomyelitis and altogether did an excellent piece of work.

#### *Therapeutics, under direction of Professor R. F. Farquharson*

As formerly, research work in the department of therapeutics has been closely associated with similar activities in the department of medicine, particular attention being paid to certain aspects of the therapy of various haemopoietic and endocrine diseases.

#### *Report of the School of Engineering Research*

The following researches have been in progress during the past year.

##### Department of Civil Engineering

Under the direction of Professor C. R. Young

A research on the lateral supporting force for steel columns and struts has been

continued. An analysis of the experimental results has been completed and a paper reporting these results is in preparation.

Under the direction of Professor T. R. Loudon

A research has been in progress into the effect of "cut outs" in monocoque construction fuselages by means of the Photo Elastic method. This problem was suggested by the Department of Transport through the Aeronautic Committee of the National Research Council. The preliminary results have been presented in a paper to the Aeronautics Sections of the American Society for the Advancement of Science.

#### Department of Mining Engineering

Under the direction of Professor H. E. T. Haultain

The study of size analysis of fine powders has been continued.

Under the direction of Professor J. T. King

(with S. E. Wolfe)

The investigation on methods for the determination of gold in cyanide solutions was continued. A paper on this was presented in *Canadian Mining Journal*, January, 1938.

(with S. E. Wolfe and M. Hewer)

Further study of the iron-nail method of assay was made, using additional reagents, with the objective of improving the method.

(with M. Hewer)

A research was commenced on the determination of impurities in silver beads from cupellation.

Under the direction of Professor F. C. Dyer

An adaptation of ore dressing methods to the treatment of soil for the concentration of seeds for analysis. This research has been completed and will appear in the July number of *Scientific Agriculture*.

The development of a new dry process for the separation of particles, in particular some kinds of seeds, has been brought to a semi-commercial stage.

#### Department of Mechanical Engineering

By Professor R. W. Angus

The investigation on water hammer which was in progress last year has been continued. This problem has become very important indeed in connection with hydro-electric plants on account of the sudden and great variations in load which frequently occur in connection with these plants. Any variation in load is accompanied by a change of velocity of the water in the penstocks, draft tubes and other passages, and this change of velocity always gives rise to abnormal pressures which may, and often do, become very dangerous.

Some of the operating and designing companies have had so much difficulty that they have spent much time determining the pressure rises which occur and have conferred with Professor Angus on the solution of their problems. The work formerly had to do with single pipes of uniform and of variable diameter, but during the past year the investigation was carried out so as to apply the method devised to branched pipes, as well as pipes with surge tanks and various complicated system of piping.

In addition to the application to hydro-electric plants, the methods developed have been used in connection with waterworks systems, and studies have been made for some of the municipal waterworks engineers, and the results have been used by them in designing their systems.

As a result of the investigation, three papers have been published and appear in the transactions of engineering societies and in the *Canadian Engineer*. The work is being continued throughout the next session and further papers are in preparation.

Under the direction of Professor R. W. Angus  
(with G. Gung)

During the session a postgraduate student, Mr. George Gung, carried out investigations, under the direction of Professor Angus, on flow in open channels and on other subjects. The first investigation was the determination of discharge coefficients for siphon spillways and a study of the connection of these coefficients with the Reynolds number. For this investigation, two models of the same spillway were made, one of the models being twice the size of the other, and a study of the flow conditions through them was made, and is still in progress.

A further investigation was carried out on flow over weirs, to determine the effect of the width of the crest on the coefficients and behaviour of the weirs. For this purpose, weirs of different crest width from one inch up to twelve inches were set up in the glass trough in the hydraulic laboratory, and the results of these studies have been compiled and a report is about ready. This study, however, will have to be continued, as only the preliminary work has been done in connection with it.

The investigation included the effect of submersion of the crest, the water being carried to different depths below the weir. In this same connection, an attempt was made to determine the nature of flow in a long channel with horizontal floor, a flat plate being set in the glass trough, and conditions of flow over it were studied. While a good deal of progress was made with this investigation as well, much still remains to be done and a study of this will be continued during the next session.

There has been need of information with regard to the action of valves in pipe lines, and to determine this, three valves were set up in succession in a pipe line and the coefficients for these were determined, as well as the pressure drop for different gate opening, in each case. This study proved of very great interest and it will be of value in connection with hydraulic practice, so that it will also be continued during the next session with larger sized valves and with other types. A report of the work done during the present session has been prepared.

Under the direction of Professor E. A. Allcut  
(with F. C. Ewens and R. J. Birss)

The investigations on the properties of heat insulating materials were continued, with particular reference to air infiltration and the influence thereon of the density and structure of commercial materials. Studies were also made on heat transmission across air spaces of various shapes and sizes.

#### School of Architecture

Under the direction of Professor E. R. Arthur

Research has been continued on the old buildings of Ontario.

In connection with the restoration of St. Andrew's, Niagara-on-the-Lake, research of an historical nature was undertaken. Papers, drawings, etc., were examined in the Provincial archives and in the Niagara Historical Museum. Letters were sent to the descendants or relatives of former ministers.

The church has in its possession the minutes of Vestry Meetings back to 1792 and records of baptisms of an even earlier date.

As a result of this research a brochure, "St. Andrew's Church", was published under the auspices of the School of Engineering Research.

There seems to be a growing interest in the subject of the early architecture of the Province. Many people have written to the School offering or seeking information.

A brochure on the Early Buildings of Ontario, by E. R. Arthur, with a foreword by John Alford, is being published at the University Press under the auspices of the Ontario Department of Education.

## Department of Applied Physics

Under the direction of Professor K. B. Jackson

The research on a new form of light source for the inspection of specular surfaces has been continued and extended.

(with D. H. Hamley and L. E. Jones)

The research on photographic sensitometry has been continued.

## Department of Chemical Engineering

Under the direction of Professor J. W. Bain

(with B. Marks)

An investigation has been in progress for the purpose of determining the nature of the reaction which was found to take place between sodium sulphide and lignin.

(with N. R. Fasken)

A study was made of the oxidation of lignin with periodic acid and some interesting data have been obtained.

(with G. V. Jansen)

The research on an investigation of the chlorination of spruce wood, and of the resulting chlorolignin was completed and published in the July, 1937, issue of the *Canadian Journal of Research*.

Under the direction of Professor M. C. Boswell

(with W. H. Rapson)

The use of glucose as a source of methyl groups in the methylation of glycine was investigated. This research is still in progress.

Under the direction of Professor E. G. R. Ardagh

(with G. T. Eaton)

A research into the reactions of thiophene has been continued and it is expected that results which will warrant publication will be obtained in the not distant future.

Under the direction of Professor E. A. Smith

(with W. L. Phene)

An investigation has been in progress on the solvent refining of lubricating oils, with special reference to Athabasca bituminous oil.

(with G. V. Jansen and E. DeLuca)

A study of the penetration of dyes on conditioned silk has been in progress. The results of the investigation will be published in the near future.

Under the direction of Professor R. R. McLaughlin

(with G. P. Beal)

A research on the ageing of rubber due to the presence of copper salts has been completed and the reason for the deleterious action determined. Results will be published in the near future.

## Department of Electrical Engineering

Under the direction of Professor H. W. Price

Absolute reliability of automatic electric control circuits is a matter of great importance. If the relays employed must operate with contact closing force of the order of 1 gram, unreliability in closing low voltage small current control circuits becomes a serious trouble. An investigation is in progress in the hope of finding the cause and method of avoiding such failures.

(with C. Kent Duff)

An investigation was undertaken of the conditions to be met in automatically regulating the frequency of alternators driven by direct current motors, when subject

to sudden and large changes in load. Regulators have been developed, constructed and proved in service to meet the requirements in performance and reliability.

By J. E. Reid

Mr. Reid has discovered an ingenious and simple method of obtaining automatically drawn graphs of the torque exerted by any type and size of electric motor during the starting period. It will be reported in detail when proved experimentally on a variety of motors.

Under the direction of Professor V. G. Smith

The principles on which a cathode Ray Oscillographic Wattmeter could be made to operate were studied and an investigation into the suitability for the purpose of some commercial vacuum tubes was made. This research will be continued.

A theoretical study of transformer leakage inductance and its relation to the equivalent circuits, particularly with respect to its division into primary and secondary components, was completed.

Under the direction of Professor B. deF. Bayly

A research on the analysis and synthesis of complex alternating current wave forms is in progress. The first part of this problem requires the development of a string oscillograph which is characterised by ease of operation and more accurate and comprehensive response than has been hitherto obtained. The design of the optical system is one of the main problems of such a piece of equipment. This part of the work is practically complete.

The numerical value of an integral can be found very exactly by a method due to Gauss. So far the constants have only been known up to ten ordinates. The values of these constants for twelve ordinates were calculated to sixteen significant figures. These results are of great usefulness in statistical work. They have been published.

#### *Report on Research in the Faculty of Dentistry*

Research in dental problems has been very active during the past year and although definite conclusions have not been reached in these intricate questions, still satisfactory progress has been made.

In the Department of Periodontology Dr. Harold K. Box carried out certain investigations on the physiological properties of saliva and an attempt was made to correlate these findings with the lesions known as erosion and cervical caries, and with calculus formation. Salivary enzymes concerned with the degradation of starch were studied, and the relation of these enzymes to the retention of carbohydrate debris on the teeth was investigated. A paper on the relation of the liquefying amylase of saliva and amylopectin to dental caries is now ready for publication.

Certain studies on the internal microflora of cereal grain foods as an acidogenic factor in dental caries have also been conducted in the department. The results of this investigation are to be published in the near future.

Dr. Frank M. Lott has continued his research on glass as a denture base, and on the anatomy of the temporo-mandibular joint in connection with mandibular movements. He has also made a study of the past and present conditions of the Dental Corps of the armies of Britain, United States, Australia, New Zealand and Canada to assist in the reorganisation of the Canadian Army Dental Corps.

Miss Doris Berry has continued her work on Phosphatase Activity of mixed, (resting and stimulated) saliva—clinical application of method, and also the importance of dietary correction in arrest of dental caries—clinical observations.

Dr. Elmer C. Purdy and Dr. Arthur W. Ham have continued their investigation into the relationship of the mineral content of teeth to disturbances of the calcium and phosphorus metabolism.

Dr. T. C. Whang, of West China Union University, who was awarded the B.Sc. (Dent.) degree, made a study of Dental Ceramics; the composition and properties of

dental porcelain together with a technique for the construction of crowns and inlays. He intends to write a text-book in Chinese on Dental Ceramics.

Dr. D. P. Sutton completed his research on the extrusive influence of epidermal processes on the teeth and alveolar tissues, and was awarded the B.Sc. (Dent.) degree.

Candidates proceeding to the B.Sc. (Dent.) degree are carrying on the following research:

Dr. Wm. Garard: An investigation to establish the relative toxicity of Monocaine and Procaine Hydrochloride, in the Department of Pharmacology under the direction of Professor Henderson and Dr. Lucas.

Dr. M. N. Rockman: An investigation of the effect of x-rays on blood, bone marrow and skin, using animals in his experimental work.

Dr. T. N. Scott who is proceeding to the M.Sc. (Dent.) degree is making a study of the anatomy and histology of the semi-edentulous and edentulous mouth.

#### *Report of work carried on under the wind tunnel committee*

A research has been conducted during the year into the effect of carrying canoes on the lower wing of a biplane. The results obtained are being tabulated and it is hoped to issue a report at an early date.

A calibration of thermometers in varying wind speeds was conducted for the Dominion Meteorological Service by Mr. Middleton of that department by use of the University of Toronto Wind Tunnel.

Certain model tests were also conducted for the de Havilland Aircraft of Canada Limited.

At the present time, tests are being made on the model of a small low wing single seat monoplane which has been designed at the University in an effort to solve the problem of a reasonably priced light plane for sport flying.

- Zur Kenntnis d. l-Tartron-aldehyd-säure*. (Helvetica Chimica Acta, Vol. XX, Fasc. 5, 1937, p. 151).
- Gordon, A. R.—*The Diffusion Constant of an electrolyte and its change with concentration*. (Journal of Chemical Physics, Vol. 5, p. 522, 1937).
- The Free Energy of Acetylene*. (Journal of Chemical Physics, Vol. 6, p. 219, 1938).
- Gordon, A. R. and LeRoy, D. J.—*The transference numbers for potassium acetate in aqueous solution*. (Journal of Chemical Physics, Vol. 6, June, 1938).
- Miller, W. Lash—*Wildiers' Bios. reporting work of Miss Elder, Miss Eastcott, C. Marchant, P. P. Paisley, Miss Stantial and M. Wayman*. (Trans. Roy. Soc. Can., Vol. III, No. 31, pp. 159-162, 1937).

## DEPARTMENT OF CLASSICS

- Cochrane, C. N.—*Review of "Augustus" by John Buchan*. (University of Toronto Quarterly, VII, 2, January 1938).
- Norwood, G.—*Classics—a section of "Letters in Canada"*. (Toronto Quarterly, April 1938).
- MacKay, L. A.—*Propertius II. 30 Quo fugis a demens*. (Classical Journal, Vol. XXXIII, No. 3, December 1937).
- Horace, Odes, IV. 5. 17-20*. (Classical Journal, Vol. XXXIII, No. 6, March 1938).
- Robertson, H. G.—*Review of von Erffa, Aidos und verwandte Begriffe*. (American Journal of Philology).

## DEPARTMENT OF ENGLISH

- Birney, E.—*The Moon-Wist of Audrey Brown*. (Canadian Forum, August 1937, pp. 176-177).
- Humors of Housman (review)*. (Canadian Forum, March 1938, pp. 425-426).
- The Two William Faulkners*. (Canadian Forum, June 1938, pp. 84-85).
- Brown, E. K.—*Edith Wharton*. (Etudes anglaises, January 1938).
- English Culture*. (Canadian Defence, Nelsons, Toronto, 1937).
- Poetry, in "Letters in Canada", 1937*. (University of Toronto Quarterly, April 1938).
- New England: The Recent Past*. (University of Toronto Quarterly, October 1937).

- A. Siegfried: *Le Canada, puissance internationale* (review). (Etudes anglaises, October 1937).
- E. Atkins: *Edna St. Vincent Millay and her Times* (review). (American Literature, January 1938).
- H. V. Routh: *Towards the Twentieth Century* (review). (Modern Philology, May 1938).
- Fisher, J.—*Review of "William Shenstone: an eighteenth century portrait" by A. R. Humphreys*. (Modern Philology, May 1938, pp. 461-462).
- MacGillivray, J. R.—*Canadian Fiction, 1937*. (University of Toronto Quarterly, April 1938).
- Pratt, E. J.—*The Fable of the Goats and other poems*. (Macmillans, 1937).
- Woodhouse, A. S. P.—*"Puritanism and Democracy"*. (Canadian Journal of Economics and Political Science (Feb. 1938), IV, 1-21).
- "Letters in Canada, 1937"*, ed. A. S. P. Woodhouse. (University of Toronto Quarterly (Apr. 1938), VII, 339-450 (also reprinted separately, Univ. of Toronto Press).)
- Report for Canada in Bibliography of English Language and Literature, vol. XVII (for 1936)*, Modern Humanities Research Association. (Cambridge University Press, 1938).
- Book reviews, including a review article on A. C. Lovejoy's The Great Chain of being*. (Journal of English and Germanic Philology (Jan. 1938). XXXVII. 109-14).

## DEPARTMENT OF FRENCH

- Rouillard, C. D.—*Montaigne et les Turcs*. (Revue de littérature comparée. 18<sup>e</sup> année, no. 2, avril-juin 1938).
- Trethewey, W. H.—*A review of "Quelques aspects de la littérature anglo-normande: leçons faites à l'École des Chartes, Paris, E. Droz, 1935."* (Zeitschrift für romanische Philologie, December, 1937).
- Walter, F.—*French-Canadian Letters, 1936*. (Letters in Canada, University of Toronto Quarterly, Vol. VI, no. 4, 1937).

## DEPARTMENT OF GEOLOGY

- Fritz, Miss M. A.—*Resemblance of the coral Multisolenia to Desmidopora*. (Journal of Palaeontology, Vol. 12, No. 3, May, 1938).
- Devonian fossil zones in wells from southwestern Ontario*. (American Association for the Advancement of Science, June, 1938).
- Langford, G. B.—*Geology of the McIntyre Mine*. (Mining Technology, May, 1938).
- Moore, E. S.—*Geology of the Afton-Scholes Area, Ontario*. (Ontario Department of Mines, Vol. 45, Part 6).
- Deep Oxidation in the Canadian Shield*. (Bull. Can. Inst. of Mining and Metallurgy, May, 1938).
- Okulitch, V. J.—*Notes on Fletcheria Incerta (Billings) and Fletcheria sinclairi n. sp.* (Royal Canadian Institute, Transactions. No. 46. vol. XXI. pt. 2. pp. 313-317. October, 1937).
- The Trenton and Black River Formations between Montreal and Quebec. Abstract*. (Proceedings of 1937 Meeting, Palaeontological Society of America).
- The Supposed Columella in Tetradium fibratum Safford*. (Journal of Palaeontology, Vol. 12, No. 3, April-May, 1938).
- Russell, L. S.—*New non-marine Mollusca from the Upper Cretaceous of Alberta*. (Transactions Royal Society of Canada, ser. 3, vol. 31, sec. 4. pp. 61-66. pl. 1, 1937).
- Satterly, J.—*Glacial Lakes Ponask and Sachigo, District of Kenora (Patricia Portion), Ontario*. (Journal of Geology, Vol. XLV, No. 7, October-November, 1937. pp. 790-796).

- Preliminary Report on Sandy (McInnes) Lake, Kenora District (Patricia Portion)*. (Ontario Dept. of Mines, Release October 11, 1937, p. 9, map).  
*Geology of the Stull Lake Area*. (Ontario Dept. of Mines Annual Report, Vol. XLVI, Part 1, 1937, pp. 1-31, 18 illus., map, 1938).

## DEPARTMENT OF GERMAN

- Boeschstein, H.—*Zur schweizerischen Kulturpolitik*. (Bern, 1937).  
*Kanadische Lyrik*. (Bern, 1938).

## DEPARTMENT OF HISTORY

- Creighton, D. G.—*The Commercial Empire of the St. Lawrence 1760-1850*. (Toronto, The Ryerson Press; New Haven, Yale University Press, 1937, pp. x, 441).  
*The Economic Background of the Rebellions of 1837*. (Canadian Journal of Economics and Political Science, Vol. 3, No. 3, August 1937, pp. 322-34).  
*The Victorians and the Empire*. (Canadian Historical Review, June 1938, pp. 138-53).  
Flenley, R.—*The Russian Revolution, 1917-1937*. (University of Toronto Quarterly, October, 1937, pp. 35-55).  
Glazebrook, G. P. de T.—*A history of transportation in Canada*. (The relations of Canada and the United States, Toronto, New Haven and London, 1938).  
*Transportation, 1887-1937*. (Saturday Night, January 1, 1938).  
*Transportation*. (Encyclopedia of Canada).  
(ed.) *The Hargrave Correspondence, 1821-1843*. (Champlain Society, Toronto, 1938).

## DEPARTMENT OF ITALIAN AND SPANISH

- Cano, J.—*Easy Spanish Plays*. (D. C. Heath & Co., New York, 1938, 226 pages).  
*Review: Una bibliografía de versificación española*. (Hispanic Review, Vol. VI, 1938).  
Goggio, E.—*A review of: Doyle, Henry Grattan, George Ticknor, Together with Ticknor's "Lecture on the Best Methods of Teaching the Living Languages"*. (Edited, with notes, by Henry Grattan Doyle). (The Modern Language Journal, Vol. XXII, No. 5, February, 1938).  
Shaw, J. E.—*Bibliography of American Studies in Italian*. (Italica, September and December, 1937; March and June, 1938).  
*American Bibliography for 1937: Italian*. (Publications of the Mod. Lang. Assoc. of America, vol. LII, Supplement).  
*The Lady "Philosophy" in the Convivio*. (Dante Society of Cambridge, Mass. 1938).

## DEPARTMENT OF LAW

- Auld, F. C.—*The Canadian Abridgement*. (Vol. VIII, Choses in Action to Companies; Vol. IX, Companies concluded; Vol. X, Compensation to Conspiracy; Vol. XI, Constitutional Law to Contracts; Vol. XII, Conversion to Costs; Annual Volume for 1937, Burroughs and Co. (Eastern), 1937-1938).  
*Lord Mansfield*. (2 University of Toronto Law Journal, pp. 436 ff.).  
*Sociology of Law*. (2 University of Toronto Law Journal, pp. 465 ff.).  
*Roman Law and Common Law*. (2 University of Toronto Law Journal, pp. 475 ff.).  
*Le régime démocratique et le droit civil moderne*. (2 University of Toronto Law Journal, pp. 477 ff.).  
*Der individualistische Staatsbegriff und die juristische Staatsperson*. (2 University of Toronto Law Journal, p. 495).  
*Le droit civil français*. (2 University of Toronto Law Journal, p. 498).

- Finkelman, J.—*Law of Picketing in Canada*. (2 University of Toronto Law Journal, pp. 344 ff.).  
*The Literature of Administrative Law*. (2 University of Toronto Law Journal, pp. 454 ff.).  
*Legislative Processes*. (2 University of Toronto Law Journal, pp. 468 ff.).  
*The Law of Torts*. (2 University of Toronto Law Journal, pp. 486 ff.).  
*Assessment and Rating*. (2 University of Toronto Law Journal, pp. 487 ff.).  
*Methods of Industrial Peace*. (2 University of Toronto Law Journal, pp. 509 ff.).  
*Supreme Court of the United States*. (17 International Affairs, pp. 299).  
*Interstate Commerce Commission*. (15 Canadian Bar Review, pp. 667 ff.).  
*Some Aspects of the Law Relating to Strikes*. (16 Canadian Bar Review, April, 1938).
- Gray, K. G.—*Recent Public Health Legislation in Ontario*. (Canadian Public Health Journal, August, 1937).  
*The Common Nueroses*. (Canadian Medical Association Journal, January, 1938).  
*The Roots of Criminal Evil*. (2 University of Toronto Law Journal, pp. 414 ff.).  
*Criminology*. (2 University of Toronto Law Journal, pp. 463 ff.).  
*Crime and Justice*. (2 University of Toronto Law Journal, pp. 465 ff.).
- Hancock, J. E. M.—*Principles of Contract*. (2 University of Toronto Law Journal, pp. 416 ff.).  
*Conflict of Laws*. (2 University of Toronto Law Journal, pp. 449 ff.).  
*The Law of Evidence*. (2 University of Toronto Law Journal, pp. 489 ff.).  
*The Elements of Contract*. (2 University of Toronto Law Journal, pp. 496 ff.).
- Kennedy, W. P. M.—*The Constitution of Canada: Its Development. Law and Custom*. (Clarendon Press, 1937, pp. 665).  
*The British North America Act*. (15 Canadian Bar Review, pp. 393 ff.).

- The Settlement of Canadian-American Disputes.* (3 Canadian Journal Economics, pp. 579 ff.).
- International Law.* (15 Canadian Bar Review, pp. 743 ff.).
- The Law of Peace.* (15 Canadian Bar Review, pp. 670 ff.).
- Japan in Asia.* (Saturday Night, January, 1938).
- Czecho-Slovakia.* (The Canadian Forum, December, 1937).
- Japan's Difficulties.* (Saturday Night, March, 1938).
- The City of God.* (The Canadian Forum, December, 1937).
- Transactions of the Grotius Society.* (32 American Journal of International Law, pp. 210 ff.).

## DEPARTMENT OF MATHEMATICS

- Brauer, R.—*Sur la multiplication des caractéristiques des groupes continus et semi-simples.* (Comptes rendus de l'Académie des Sciences, Paris, Vol. 204, p. 1781, 1937).
- On algebras which are connected with the semisimple continuous groups.* (Annals of Mathematics, Vol. 38, p. 857, 1937).
- On normal division algebras of index 5.* (Proceedings of the National Academy of Sciences, Washington, June, 1938).
- Coxeter, H. S. M.—*Abstract definitions for the symmetry groups of the regular polytopes, in terms of two generators: Part II.* (Proc. Camb. Phil. Soc., Vol. 33, pp. 315-324, 1937).

- Coxeter, H. S. M., Du Val, P., Flather, H. T. and Petrie, J. F.—*The fifty-nine icosahedra*. (University of Toronto Studies. Mathematical Series No. 6, pp. 1-26, 1938).
- Robinson, G. deB.—*On the fundamental region of an orthogonal representation of a finite group*. (Proc. London Math. Soc., (2), 43, 1937, pp. 289-301).

## DEPARTMENT OF MINERALOGY

- Berry, L. G.—*On the Pseudocopiapite of Unemach*. (University of Toronto Studies, Geological Series, 1938).
- Dadson, A. S.—*The Influence of Electric Potential in Ore Deposition in the Timiskaming District, Ontario*. (University of Toronto Studies, Geological Series, 1938).
- Meen, V. B.—*Cleavage Luminescence in Mica*. (University of Toronto Studies, Geological Series, 1938).
- An Unusual Cancrinite*. (University of Toronto Studies, Geological Series, 1938).
- Parsons, A. L.—*Additional Semi-Precious and Ornamental Stones of Canada*. (University of Toronto Studies, Geological Series, 1938).
- Wave Surfaces and Indices (Abstract)*. (American Mineralogist, Vol. 23, p. 176, 1938).
- Peacock, M. A.—*The Morphology and Optics of Some New Salts of Cinchona Alkaloids*. (University of Toronto Studies, Geological Series, 1938).
- The Normal Triclinic Setting: Correction*. (American Mineralogist, vol. 22, pp. 987-989, 1937).
- The relation of leightonite to polyhalite*. (American Mineralogist, vol. 23, pp. 38-45, 1938).
- Goldschmidtine, a new antimonide of silver (abstract)*. (American Mineralogist, vol. 23, pp. 176-177, 1938).
- Peacock, M. A. and Bandy, M. C.—*Ungemachite and clino-ungemachite: new minerals from Chile*. (American Mineralogist, vol. 23, pp. 314-328, 1938).
- Prince, A. T.—*A Study of Canadian Spheue*. (University of Toronto Studies, Geological Series, 1938).
- Thomson, Ellis—*Some Ore Minerals of the Denison Mine*. (University of Toronto Studies, Geological Series, 1938).
- Presidential Peregrinations to the Pacific (Abstract)*. (Proc. R.C.I., Vol. 3, 1938).

## DEPARTMENT OF PHYSICS

- Burton, E. F.—*Refractive Indexes of Helium I and II*. (Nature, 140, 1937, p. 1015, December).
- Book Review of "Low Temperature Physics" by M. and B. Ruhemann*. (Journal of Applied Physics, 9, 4, 1938, p. 273, April).
- Velocity of Sound in Liquid Helium*. (Nature, Vol. 141, p. 970, 1938).
- Haurwitz, B.—*The Norwegian Wave Theory of Cyclones*. (Bull. Amer. Meteorolog. Soc., June-July, 1937, pp. 193-201).
- Bemerkungen zur "Adjective-dynamischen Theorie der Luftdruckschwankungen und ihrer Periodizitäten."* (Gerlands Beitr. z. Geophysik 51, 4, 1937, p. 422).
- The Oscillations of the Atmosphere*. (Gerlands Beitr. z. Geophysik 51, 1937, p. 195).
- Haurwitz, B. and Noble, J. R. H.—*Maps of the Pressure Distribution in the Middle Troposphere applied to Polar Anticyclones*. (Bull. Amer. Met. Soc., 1938).
- Haurwitz, B. and Turnbull, W. E.—*Relations between Interdiurnal Pressure and Temperature Variations in Troposphere and Stratosphere over North America*. (Canadian Met. Mem. Vol. 1, No. 3, p. 67, 1938).

- Hendrick, A. C. and Burton, E. F.—*A case of Hodgkin's Disease treated with Colloidal Elemental Arsenic*. (Canadian Medical Association Journal, 36, pp. 519-520, 1937).
- Johns, Martin W.—*The Spectrum of Doubly Ionized Mercury, Hg. III*. (Canadian Journal of Research, 15 pp. 193-201, 1937).
- Johns, H. E. and Wilhelm, J. O.—*The Refractive Indices of Liquid Oxygen, Nitrogen, and Hydrogen*. (Canadian Journal of Research A, 15, pp. 101-108, 1937).
- McKinley, D. W. R.—*Application of Quartz Crystals to the Modulation of Light*. (Canadian Journal of Research, A, 16, p. 77, 1938).
- McTaggart, H. A.—*Some Measurements of the Ellipticity of Light Reflected from Thin Films of Oriented Molecules*. (Trans. Roy. Soc. Can., 3rd Ser., Sec. III, Vol. XXXI, p. 141, 1937).
- Satterly, J.—*The Recent Development of Everyday Physics and its Application to Canadian Life*. (British Association, 1937).
- Smith, H. G.—*Superconductivity*. (Science Digest, 1937, November).
- Thomson, J. M.—*Magnetic Fields in Transformers at Low Frequencies*. (Philosophical Magazine, Ser. 7, Vol. XXV, p. 242, February, 1938).
- University of Toronto Studies, Physics Series, 1936-1937, Nos. 81 to 93 inclusive. *Communications from the Low Temperature Division of the McLennan Laboratory*. (University Press).

#### DEPARTMENT OF POLITICAL SCIENCE

- Ashley, C. A.—*Some Aspects of Corporations*. (Essays in Political Economy in honour of E. J. Urwick). (University of Toronto Press).
- Sir William Ashley and the Rise of Schools of Commerce*. (Commerce Journal, 1938). (University of Toronto Commerce Club).
- Biss, Miss I. M.—*Overhead Costs, Time Problems and Prices*. (Essays in Political Economy in Honour of Professor E. J. Urwick, ed. H. A. Innis, February, 1938).
- Recent Power Legislation in Quebec*. (Canadian Journal of Economics and Political Science, Vol. III, No. 4, November, 1937).
- Water Powers*. (Encyclopaedia of Canada, Vol. VI).
- Economic Aspects of National Unity*. (Commerce Journal, University of Toronto, March, 1938).
- Bladen, V. W.—*"What is an Economic Wage" in Industrial Relations: Papers Presented at a Conference on Industrial Relations sponsored by Queen's University, the Montreal Personnel Association, and the Personnel Association of Toronto*. (Kingston, The Jackson Press, 1937).
- "Adam Smith on Value" in Essays in Political Economy in Honour of E. J. Urwick, ed. H. A. Innis*. (Toronto: The University of Toronto Press, 1938).
- The Role of Trade Associations in the Determination of Prices*. (Canadian Journal of Economics and Political Science, May, 1938, vol. 4, no. 2).
- Coe, V. F.—*Essay on "Monetary Theory and Politics" in Essays in Political Economy in Honour of E. J. Urwick*. (University of Toronto Press, 1938).
- Dated Stamp Scrip in Alberta*. (Canadian Journal of Economics and Political Science, Vol. 4, No. 1, February, 1938).
- Dawson, R. M.—*The Development of Dominion Status, 1900-1936*. (London, Oxford University Press, 1937, pp. xiv, 466).
- Ferguson, W. S.—*Bills of Exchange*. (The Canadian Banker, January, 1938).
- Commercial and Foreign Exchange Arithmetic*. (The Canadian Banker, April 1938).
- Uniformity in Company Law*. (Commerce Journal, April, 1938).
- Innis, H. A.—*"Introduction to studies on transportation Canadian-American Relations" in G. P. deT. Glazbrooks: A History of Transportation in Canada*. (Toronto, 1938, pp. VII-XXI).

- The Passing of Political Economy.* (Commerce Journal Annual Review, 1938).  
*Significant Factors in Canadian Economic Development.* (Canadian Historical Review, December, 1938).  
 "Editor's introduction" *Labor in Canadian American Relations.* (Toronto, 1937).  
 "Foreword" to *W. T. Easterbrook.* (Farm Credit in Canada. Toronto, 1938).  
*The Economics of Conservation.* (Geographical Review, January, 1938, pp. 137-139).  
*Recent Books on the Canadian Northland and the Arctic.* (Canadian Historical Review, June, 1938).  
 Jackman, W. T.—*Our Canadian Railway Problem.* (Windsor Daily Star, January 20, 1938).  
*Railway Consolidation.* (The Wharton Review, December, 1937).  
*Our Critical Railway Issue.* (The Gazette, Montreal).  
*Disposing of Arguments Against Railway Unification.* (Financial Times, Montreal, March 25, 1938).  
*Railway Coordination.* (The Labour Review, February, 1938).  
*The Canadian Railway Problem.* (The Commerce Journal, University of Toronto, 1938).  
 Plumptre, A. F. W.—*The Nature of Political and Economic Development in the British Dominions.* (The Canadian Journal of Economics and Political Science, Vol. 3, No. 4, November, 1937).  
 "The Arguments for Central Banking in the British Dominions" in *Essays on Political Economy in Honour of E. J. Urwick.* (University of Toronto Press, 1938).

## DEPARTMENT OF PSYCHOLOGY

- Bernhardt, K. D.—*Psychology in the Selling of Life Insurance.* (Canadian Insurance, Vol. 42, No. 30, July, 1937).  
*Review of P. M. Symonds' "Education and the Psychology of Thinking".* (Journal of Educational Research, Vol. 31, p. 52, 1937).  
*The Psychology of Everyday Life.* (Hardware and Metal, Vol. 50, pp. 40-41, March, 1938).  
 Bernhardt, K. S. and Herbert R.—*A Further Study of Vitamin B Deficiency and Learning with Rats.* (Journal of Comparative Psychology, Vol. 24, pp. 263-267, 1937).  
 Bernhardt, K. S. and Snygg, D.—*The Effect of Cues on the Choice of the Shorter Path.* (Journal of Comparative Psychology, Vol. 24, pp. 269-276, 1937).  
 Bernhardt, K. C. (co-author)—*An Analysis of the Social Contacts of Preschool Children with the aid of Motion Pictures.* (University of Toronto Studies, Child Development Series, No. 10, November, 1937).  
 Chant, S. N. F.—*Compensations which Affect Personality.* (Canadian Credit Institute, Bulletin 74, November, 1937).  
*Review of J. B. Rhine's Clairvoyance, Telepathy and Psychology: New Frontiers of the Mind.* (University of Toronto Quarterly, January, 1938).  
 Chant, S. N. F. (co-author)—*Emotional Episodes in the Child of School Age.* (University of Toronto Studies, Child Development Series, No. 9, November, 1937).  
 Line, W. (co-author)—*The Influence of the Form of a Presentation upon Reproduction.* (Brit. Jour. of Psychol., Vol. XXVIII, Part 2, pp. 167-189, October, 1937).  
*Are Parents the Problem?* (Understanding the Child, Vol. VI, No. 4, pp. 7-11, January, 1938).  
*The Study of Individual Differences as a Basis of Guidance.* (Understanding the Child, Vol. VI, No. 3, pp. 14-18, October, 1937).  
*Psychology and the New Course of Studies.* (The School, April, 1938).

Myers, C. R. (co-author)—*Report on Poliomyelitis in Ontario, 1937*. (Published by the Province of Ontario Department of Health, March, 1938).

#### DEPARTMENT OF SEMITICS

- Meek, T. J. (co-author)—*The Haverford Symposium on Archaeology and the Bible*. (American Schools of Oriental Research, 1938).  
*Magic Spades in Mesopotamia*. (University of Toronto Quarterly, Vol. VII, 228 ff.).  
*Lapses of Old Testament Translators*. (Journal of the American Oriental Society, Vol. LVIII, 122 ff.).  
*Oesterley's "Sacrifices in Ancient Israel"*. (Journal of Biblical Literature, Vol. LVII, 228 ff.).
- Taylor, W. R.—*The Spirit of Hebrew Literature*. (Bulletin, Canadian Society of Biblical Studies, No. 3, 1937).  
*Aramaic Gospel-Sources and Form Criticism*. (Expository Times, Vol. XLIX, No. 2, 1937).  
*Nestorian Crosses in China*. (American Journal of Semitic Languages, Vol. LV, No. 1, 1938).

#### FACULTY OF MEDICINE

##### DEPARTMENT OF ANATOMY

- Grant, J. C. B.—*A Text-book of Anatomy entitled, A Method of Anatomy, Descriptive and Deductive*. (Messrs. William Wood & Company, Baltimore, 1937).
- Ham, A. W., Tisdall, F. F. and Drake, T. G. H.—*Experimental non-calcification of callus simulating non-union*. (Journal of Bone and Joint Surgery, Vol. 20, April, 1938).
- Ham, A. W. and Elliott, H. C.—*The bone and cartilage lesions of protracted moderate scurvy*. (American Journal of Pathology, Vol. 14, May, 1938).

##### BANTING-BEST DEPARTMENT OF MEDICAL RESEARCH

- Banting, F. G. and Hall, G. E.—*Myocardial Disease*. (Trans. Assoc. Am. Physicians, 52, p. 204, 1937).
- Beveridge, J. and Lucas, C. C.—*Preliminary Report on a Chemical Investigation of Human Hair*. (Can. Physiol. Soc., May, 1938).
- Collins, H. L.—*The Effect of Aluminum and pH on the Solubility of Siliceous Dusts*. (Royal Soc. of Canada, May, 1938).
- Creech, H. J. and Franks, W. R.—*Anthranyl and 1, 2, 5, 6-Dibenzanthranyl Isoocyanates. I*. (Amer. Chem. Soc. J., 60, p. 127, 1938).  
*The Synthesis of Aromatic Isoocyanates*. (Royal Soc. of Canada, May, 1938).
- Franks, W. R. and Creech, H. J.—*Synthetic Antigens and Carcinogenesis*. (Abstract). (Can. Chem. and Process Ind., Vol. XXII, No. 4, April, 1938).  
*Chemoantigens and Carcinogenesis. I*. (Am. J. of Cancer).
- Franks, W. R., Byrnes, A. E. and Proctor, L. D.—*Glyoxalase in B<sup>1</sup> Deficient Rats*. (Can. Physiol. Soc., May, 1938).
- Goodwin, J. E.—*Bio-electric Action Potentials*. (Can. Chem. and Process Industries, 22, May, 1938).  
*A Four-Channel Amplifying System for Simultaneous Recording*. (Can. Physiol. Soc., May, 1938).
- Hall, G. E.—*Experimental Heart Disease*. (Given before American College of Physicians, New York, April 5, 1938).  
*Electrocardiographic Changes Associated with Experimental Imbalance of the Autonomic Nervous System*. (Am. J. Physiol. (Proceed.), p. 87, 1938).
- Hall, G. E. and Franks, W. R.—*Acetylcholine and Endogenous Carcinogenesis*. (Am. Assoc. for Cancer Research (Proceed.), May, 1938).  
*Physiological Carcinogenesis*. (J. Biol. Chem. (Proceed.), p. 44, 1938).

- Hall, G. E. and Cleghorn, R. A.—*Organic Lesions Produced as a Result of Parasympathetic Imbalance*. (Can. Physiol. Soc.). (Can. Med. Assoc. J., 37, p. 287, (4), 1937).
- Hall, G. E. and Banting, F. G.—*Physiological Studies in Experimental Insulin and Metrazol Shock*. (Given before American Psychiatric Assoc., San Francisco, June, 1938).
- Hearne-Creech, Miss E. M.—*Further Studies of the Action of 1, 2, 5, 6-Dibenzanthracene and Phenanthrene Choleic Acid Compounds in Tissue Culture*. (Can. Physiol. Soc., May, 1938).
- Jephcott, C. M., Gray, W. M. and Irwin, D. A.—*A Study of the Crystalline Siliceous Minerals Present in Silicotic Lungs by the X-ray Diffraction Method*. (Can. Med. Assoc. J., 38, pp. 209-215, 1938).
- Leibel, B. S. and Hall, G. E.—*Influence of Metrazol and Insulin Shock Treatment (as used in Schizophrenia) on Blood Flow*. (Can. Physiol. Soc., May, 1938).
- Lloyd, D. P. C.—*Action Potential Studies on Inferior Mesenteric Ganglia*. (Can. Physiol. Soc.). (C.M.A.J., 37, p. 287, (6), 1937).  
*The Transmission of Impulses through the Inferior Mesenteric Ganglia*. (J. Physiol. 91, p. 296, 1937).  
*Slow Potential Waves set up in the Inferior Mesenteric Ganglia by Preganglionic and Antidromic Volleys*. (Can. Physiol. Soc., May, 1938).  
*The Excitability of Inferior Mesenteric Ganglion Cells following a Preganglionic Volley*. (Am. J. Physiol. (Proceed.), p. 129, 1938).  
*The Transmission of Impulses by Ganglionic Direct Fibres*. (J. Physiology).
- Lougheed, D. W. and Hall, G. E.—*The Fate of Intravenously Injected O<sub>2</sub> and CO<sub>2</sub>*. (Can. Physiol. Soc., May, 1938).  
*Intravenous Injections of Oxygen and Carbon Dioxide*. (Can. Chem. and Process Industries, 22, May, 1938).
- Lucas, C. C.—*Human Response to Single Doses of Sulphanilamide*. (Can. Med. Assoc. J.).  
*A Biochemical Investigation of the Therapeutic Use of Sulphanilamide*. (Can. Physiol. Soc., May, 1938).
- Manning, G. W., Hall, G. E. and Banting, F. G.—*Vagus Stimulation and the Production of Myocardial Damage*. (Can. Med. Assoc. J., 37, pp. 314-318, 1937).
- Manning, G. W., Lang, J. and Hall, G. E.—*The In Vivo Effects of Eserine on the Choline-Esterase System*. (J. Pharm. and Exp. Therap., Vol. 61, December, 1937).
- Mendel, B.—*The Action of Ferricyanide on Tumour Cells*. (Am. J. Cancer, Vol. XXX, July, 1937).
- Mendel, B., Strelitz, F. and Mundell, D.—*d-Glyceric Aldehyde and Tumour Glycolysis*. (Nature, Vol. 141, p. 288, February, 1938).
- Outhouse, E. L.—*Further Studies of Amino-Ethyl Phosphoric Ester—A Compound Apparently Specific to Malignant Tumours*. (Biochem. J., Vol. XXXI, pp. 1459-1463, 1937).
- Rae, J. J.—*The Organic Phosphates of Urine*. (Biochem. J., Vol. XXXI, pp. 1622-1626, 1937).
- Sniffen, R. C.—*The Modification of Quartz Fibrosis by Silicates*. (Royal Soc. of Canada, May, 1938).
- Williams, H. and Irwin, D. A.—*An Experimental Study of the Leaching of Silicates in Tissue*. (Can. Med. Assoc. J.).

## DEPARTMENT OF BIOCHEMISTRY

- Butler, G. C. and Marrian, G. F.—*Chemical Studies on the Adreno-genital Syndrome. The isolation of 3(a)-Hydroxyetiocholane-17-one, 3(B)-Hydroxyetiocholane-17-one (isandrosterone), and a new triol from the urine of a woman with an adrenal tumor*. (J. Biol. Chem.).

- Marrian. G. F.—*The Chemistry of the Oestrogenic Hormones*. (Ergebnisse der Vitamin- und Hormonforschung, 1937).  
*The Conjugated Estrogens*. (Symposium on Quantitative Biology, Cold Spring Harbor, Vol. 5, 1937, pp. 16-24).
- Marrian. G. F. and Butler. G. C.—*The Hormones*. (Annual Review of Biochemistry, Vol. VI, 1937, pp. 303-334).
- Pett. L. B. and Wynne. A. M.—*Studies on Bacterial Phosphatases. The Phosphatases of Aerobacter aerogenes, Alcaligenes faecalis and Bacillus subtilis*. (Biochem. J., Vol. XXXII, No. 3, pp. 563-566, 1938).

## DEPARTMENT OF MEDICINE

- Armour. R. G.—*Medico-legal evidence*. (University of Toronto Med. Jour., 1937, XV, 67).
- Bates. G.—*The venereal disease problem in Canada*. (Canad. Pub. Health Jour., 1937, XXVIII, 485).
- Campbell. W. R.—*Some aspects of the Management of the diabetic patient*. (Canad. Pub. Health Jour., 1937, XXVIII, 318).  
*The uses of protamine zinc insulin*. (New York State Jour. Med., 1937, XXXVII, No. 21, 1795).
- Campbell. W. R. and Hanna. M. I.—*The determination of nitrogen by modified Kjeldahl methods*. (Jour. Biol. Chem., 1937, CXIX, 1).  
*Sulfites as protein precipitants*. (Ibid., p. 9).  
*The albumin, globulins, and fibrinogen of serum and plasma*. (Ibid., p. 15).
- Cleaver. E. E. and Maltby. E. J.—*Results in the medical treatment of gastric ulcer*. (Canad. Med. Assn. Jour., 1938, XXXVIII, 243).
- Cleghorn. R. A. (with McHenry, E. W., McVicar, G. A. and Overend W.)—*Experimental and clinical studies on adrenal insufficiency*. (Canad. Med. Assn. Jour., 1937, XXXVII, 48).
- Cleghorn. R. A. and Hyland. H. H. (with Mills. J. R. F. and Linell, E. A.)—*Hypogonadism Associated with invasion of the mid-brain and hypothalamus by a pineal tumour*. (Quart. Jour. Med., 1938, VII, 183).
- Elliott. J. H.—*Evolution of dispensary control of tuberculosis; historical aspects*. (Amer. Rev. Tubercul., 1937, XXXVI, 577).
- Farquharson. R. F.—*Anaemia in pregnancy*. (Bull. Acad. Med., Toronto, 1937, X, 255).
- Graham. Duncan—*Disease of the blood vessels (Part 2)*. (Oxford Medicine, Vol. II).
- Graham. J. W.—*The toxicity of sterile filtrate from paradontal pockets*. (Proc. Royal Soc. Med., 1937, XXX, 1165).
- Hannah. B.—*Symptomatology of anterior poliomyelitis*. (Canad. Pub. Health Jour., 1937, XXVIII, 427).
- Hepburn. J.—*Cardiac disease associated with pregnancy*. (Bull. Acad. Med., Toronto, 1937, XI, 7).
- Hepburn. J. and Rykert. H. E.—*The use of quinidine sulfate intravenously in ventricular tachycardia*. (Amer. Heart Jour., 1937, XIV, 620).
- Hyland. H. H. (with Botterell. E. H.)—*Frontal lobe tumours: a clinical and physiological study*. (Canad. Med. Assn. Jour., 1937, XXXVII, 530).
- Lougheed. G. W. (with Campbell. D. M. and Gwyn. N. B.)—*Massive latent carcinoma of the stomach*. (Canad. Med. Assn. Jour., 1937, XXXVI, 179).
- Oille. J.—*Differential diagnosis of pain in the chest*. (Canad. Med. Assn. Jour., 1937, XXXVII, 209).
- Owen. Trevor—*Psychological medicine and the psychoneuroses*. (Univ. of Toronto Med. Jour., 1938, XV, 231).
- Rykert. H. E. and Graham. Duncan—*Some problems in the diagnosis, prognosis and treatment of acute arterial occlusion*. (Amer. Heart Jour., 1938, XV, 395).
- Rykert. H. E.—*Some comments respecting digitalis therapy*. (Univ. of Toronto Med. Jour., 1938, XV, 177).

- Trow, E. J.—*Oriental sore; report of a case.* (Arch. Dermat. and Syphilol., 1937, XXXV, 455).
- Warner, W. P.—*Lung abscess.* (Canad. Med. Assn. Jour., 1938, XXXVIII, 544).

## DEPARTMENT OF OPHTHALMOLOGY

- Macdonald, A. E.—*Retinal Circulation and changes in Metabolic Disease.* (Transactions of the Ophthalmological Society of the United Kingdom).
- Etiology of Idiopathic Retinal Detachment.* (Transactions of the American Ophthalmological Society).
- Staphylococcus Toxoid in Recurrent Styes.* (Canadian Medical Journal).

## DEPARTMENT OF OTO-LARYNGOLOGY

- Ireland, P. E.—*Two Common Complications for Ear Injection.* (The Canadian Medical Journal, 37, pp. 256-260, 1937).
- McGregor, Gregor—*The Comparative Anatomy of the Tongue.* (The Annals of Otology, Rhinology, and Laryngology, March, 1938)
- Strachan, Grant—*Chronic Sinus Diseases in Children.* (The Bulletin of the Academy of Medicine).
- Sullivan, Joseph—*Newer Aspects of Bells Palsy—A Preliminary Report.* (Presented before the Oto-Laryngological Section of the Academy of Medicine, November, 1937).
- Veitch, A. H.—*Differential Diagnosis of Upper Dysphagia.* (Presented before the Joint Canadian and Ontario Medical Association Meeting, Ottawa, June, 1937).
- The Treatment of Chronic Sinusitis.* (Presented at The Oto-Laryngological Section of the Academy of Medicine, March, 1938).
- Wishart, D. E. S.—*The Problem of the Deaf Child.* (Canadian Medical Association Journal, March, 1938).
- Some Observations on Petrous Tip Suppuration with Report of Three Cases.* (Presented at the Canadian Medical Association Meeting, June, 1937).
- Colds and How to Avoid Them.* (Health, Spring Number, 1938).
- Chapter on "Vertigo".* (The Practitioners' Library of Medicine and Surgery, Vol. 11, 1937). (D. Appleton-Century Company, New York, N.Y.).

## DEPARTMENT OF PAEDIATRICS

- Brown, Alan—*Appendiceal Colic.* (Can. Med. Assoc. Jour., Vol. 38, p. 445, 1938).
- Bernhardt, K. S. and Herbert, Miss R.—*A further study of Vitamin B deficiency and learning with rats.* (Jour. Comp. Psych., Vol. 24, p. 263, October, 1937).
- Drake, T. G. H.—*The Child in Antiquity.* (Health, Vol. 6, No. 1, 1938).
- Infant Nutrition in Paris in the year 1780.* (Can. Med. Assoc. Jour., Vol. 37, p. 595, 1937).
- Ham, A. W., Tisdall, F. F. and Drake, T. G. H.—*Experimental non-calcification of callus simulating non-union.* (Jour. Bone & Joint Surgery, Vol. XX, p. 345, April, 1938).
- Hawke, W. A.—*Elevated Temperatures in Childhood due to Exercise.* (Jour. Ped., Vol. 11, p. 64, July, 1937).
- Jackson, S. H.—*Determination of Iron in Biological Material.* (Industrial and Engineering Chemistry Analytical Edition).
- Morgan, E. A.—*The value of Mapharsen in the Treatment of congenital syphilis.* (Can. Med. Assoc. Jour., Vol. 38, p. 53, 1938).
- Robertson, Mrs. E. C.—*Dietary Calcium and pH of the lower intestine.* (Proc. Soc. Exper. Biol. & Med., Vol. 37, p. 140, 1937).
- Calcium Deficiency and Intestinal Stasis.* (Jour. Nutrition, Vol. 15, January 10, 1938, p. 67).

- Low Mineral Diets and Intestinal Stasis.* (Pathology Series, University of Toronto Studies, 1933).
- Robertson, Mrs. E. C. and Doyle, Miss M. E.—*Difficulties in the use of brachycardia method of assaying Vitamin B<sub>1</sub>.* (Proc. Soc. Exper. Biol. & Med., Vol. 37, p. 139, 1937).
- Ross, J. R.—*Prolactin—Its effects on the secretion of Woman's milk.* (Endocrinology 22, p. 429, April, 1938).
- Silverthorne, N.—*Whooping Cough.* (Can. Med. Assoc. Jour., 38, p. 556, 1938).
- Experimental Infection with H. pertussis and protection tests in mice.* (Can. Pub. Health Jour., p. 233, May, 1938).
- Silverthorne, N. and Brown, Alan—*Treatment of Meningitis due to Hemolytic Streptococcus with Sulphanilamide.* (Jour. Ped., Vol. 12, p. 504, April, 1938).
- Summerfeldt, Miss P. and Brown, Alan—*Mandelic Acid in the Treatment of Pyuria.* (Can. Med. Assoc. Jour., Vol. 38, p. 352, 1938).
- Osteodystrophia Fibrosa.* (Jour. Ped.).
- Tisdall, F. F.—*Nutrition.* (Health, Vol. 6, No. 1, 1938).
- Tisdall, F. F., Brown, Alan, Defries, R. D., Ross, M. A. and Sellers, A. H.—*Zinc Sulphate Nasal Spray in the Prophylaxis of Poliomyelitis.* (Can. Pub. Health Jour., p. 523, November, 1937).
- Tisdall, F. F., Drake, T. G. H., Summerfeldt, Miss P. and Jackson, S. H.—*The comparative value of spinach and tomatoes in the child's diet.* (Jour. Ped., Vol. 11, p. 374, September, 1937).

## DEPARTMENT OF PATHOLOGICAL CHEMISTRY

- Hunter, A.—*The specificity of arginase with special reference to its action on carbamidoarginine.* (Canadian Chemistry, Vol. 21, p. 410, 1937).
- The enzymatic preparation of arginine and ornithine.* (Canadian Chemistry, Vol. 22, p. 190, 1938).
- The action of arginase upon carbamidoarginine.* (Biochemical Journal, Vol. 32, p. 326, 1938).
- Nicholson, T. F., Urquhart, R. W. I. and Selby, D. L.—*Further Observations of kidney function in experimental nephrosis.* (Canadian Chemistry, Vol. 22, p. 190, 1938).

## DEPARTMENT OF PATHOLOGY AND BACTERIOLOGY

- Boyd, W.—*On the Danger of Scrappiness.* (University of Toronto Med. J., Vol. 15, pp. 104-105, 1937).
- Text-Book of Pathology.* (Lea & Febiger, Philadelphia, 3rd. Ed., 1938).
- Campbell, H. H.—*Studies on Sulphanilamide in Experimental Tuberculosis.* (For the degree of B.Sc. (Med.)).
- Duff, G. L.—*The Production of Hyaline Arteriosclerosis and Arteriolonecrosis by Means of Proteolytic Enzymes.* (Bull. Johns Hopkins Hosp., Vol. 61, pp. 63-70, 1937).
- Greay, P. H.—*Laboratory Procedures used in the Diagnosis of Syphilis.* (University of Toronto Med. J., Vol. 15, pp. 136-139, 1938).
- Hair, H. C.—*Study on Pulmonary Infarction.* (For the degree of B.Sc. (Med.)).
- Holman, W. L.—*Sulphanilamide and Similar Compounds in Chemotherapy.* (Am. J. Med. Sc., Vol. 195, pp. 379-416, 1938).
- Common Sense and Clear Thinking among Early Investigators.* (University of Toronto Med. J., Vol. 15, pp. 293-298, 1938).
- Linell, E. A., Mills, J. F. R. and members of the Department of Medicine—*Hypogonadism Associated with Invasion of the Mid-brain and Hypothalamus by a Pineal Tumour.* (Quart. J. Med., Vol. 7, pp. 183-210, 1938).
- McKenzie, K. G.—*Cranio-cerebral Injuries.* (Parts 1 and 2). (University of Toronto Med. J., Vol. 15, pp. 126-132; 281-292, 1938).

- MacLeod, D. R. E.—*A Study of Bacterial Haemolysins*. (For the degree of B.Sc. (Med.)).
- Magner, D. E. O.—*The Effect of Protein Derivatives on the Vascular Systems of Various Animal Species*. (For the degree of B.Sc. (Med.)).
- Magner, W.—*A Textbook of Haematology*. (P. Blakiston's Son & Co., Philadelphia, 1938).
- Patterson, J. C.—*Capillary Rupture with Intimal Haemorrhage as a Causative Factor in Coronary Thrombosis*. (Arch. Path., Vol. 25, pp. 474-487, 1938).
- Plewes, B.—*Spinal Cord Injury without Evidence of Fracture or Dislocation of the Vertebral Column*. (Canadian Medical Association Journal, Vol. 38, pp. 475-477).
- Rae, Miss M. V. (from the Pathology Laboratory of the Hospital for Sick Children)—*Coronary Aneurysms with Thrombosis in Rheumatic Carditis*. (Arch. Path., Vol. 24, pp. 369-376, 1937).
- Richardson, J. C.—*Spontaneous Haematomyelia: A Short Review and a Report of Cases Illustrating Intramedullary Angioma and Syphilis of the Spinal Cord as Possible Causes*. (Brain, Vol. 61, pp. 17-36, 1938).
- Intracranial Aneurysms*. (University of Toronto Med. J., Vol. 15, pp. 304-310, 1938).
- Robertson, E. C.—*Low Mineral Diets and Intestinal Stasis*. (University of Toronto Studies, Pathological Series, No. 9, 1938).
- Solandt, O. M.—*Massive Collapse of Lung*. (Amer. J. Med. Sc., Vol. 194, pp. 428-443, 1937).

## DEPARTMENT OF PHARMACOLOGY

- V. E. Henderson and M. H. Roepke—*Drugs Affecting Parasympathetic Nerves*. (Physiol. Reviews, 17, 373, 1937).
- V. E. Henderson and S. F. MacDonald—*Anaesthesia with Cyclopropane Derivatives*. (J. Pharm. Exp. Thera. 61, 182, 1937).
- G. H. W. Lucas—*The Administration of Bismuth*. (Can. Med. Assoc. J. 38, 553, 1938).

## DEPARTMENT OF PHYSIOLOGY

- Best, C. H.—*Heparin and thrombosis*. (Can. Med. Ass. J., 1938, 38, p. 59).
- The prolongation of insulin action*. (Ohio J. Scie., 1937, 37, p. 362).
- Best, C. H. and Taylor, N. B.—*The living body. A junior text in human physiology*. (Henry Holt, N.Y., 1938).

#### (15) THE REPORT OF THE DIRECTOR OF UNIVERSITY EXTENSION AND PUBLICITY

(W. J. Dunlop, Esq., B.A., B.Paed.)

University Extension, now completing its eighteenth year of activity, has experienced a particularly good session—in many respects, its best. 6,712 is the number of adults who studied in continuous courses or classes, whether their instruction was that which leads to a degree or a diploma or was of the sort that is taken solely with the purpose of adding to the student's intellectual equipment. As usual, this number included more men than women, there being 3,562 of the former and 3,150 of the latter.

In addition, 182 Extension Lectures were delivered by members of the staff of the University in various cities, towns, and villages in Ontario. These lectures were for the most part single lectures delivered to service clubs, or literary societies, or similar organisations, though in some cases a series of six to ten was delivered by the same professor to the same audience in successive weeks. It is difficult, really impossible, to keep a record of the number of persons who listen to these lectures, but a conservative estimate would be 25,000. The Extension Lecture is generally regarded as a good, though perhaps an informal, university service because it enables thoughtful people to obtain reliable and recent information on subjects that may be of interest to them. Extension Lectures or "local lectures", as they are sometimes termed, have been available in this University since 1894. The number varies considerably from year to year, being larger in times of prosperity and smaller when economic conditions are not of the best.

Evening Tutorial Classes numbered 52 and were attended by 3,225 men and women. The subjects of instruction were: Accounting, advertising, air conditioning, camp education, chemistry, cost accounting, economics, English, French, German, gymnastics, industrial organisation, interior decoration, investments, Italian, journalism, lip reading, mercantile law, metallurgy, modern international relations, music appreciation, nutrition, parent education, psychology, public speaking, purchasing, secretarial practice, Spanish, traffic and transportation, town planning, natural history. In some of these subjects there were several classes. This is a form of extension service which might easily be extended to a greater extent throughout the Province. For these classes there are no admission requirements except mature age; there are no examinations; no certificates; degrees or diplomas. It is most gratifying that so many men and women find this type of instruction interesting and suited to their needs.

The Workers' Education Association Classes had an enrolment of 1,412. These

classes, to which only manual workers are admitted, were conducted in the following sixteen localities: Brantford, Fergus, Guelph, Hamilton, Kingston, Kitchener, London, Oshawa, Peterborough, Preston, Sault Ste. Marie, St. Catharines, Stratford, Toronto, Windsor, and Woodstock. The subjects of instruction are usually economics, psychology, public speaking, English literature and composition.

In co-operation with the Department of Social Science a short course for social workers was conducted with an enrolment of 72. It would appear that more of these courses may be required because those engaged in social service seem to be especially alert and always desirous of keeping abreast of the newest and best methods.

For the third time a week's course in Public Administration was conducted with an enrolment of 153. This course is becoming increasingly popular. The Department of Municipal Affairs of the Government of Ontario was most generous in co-operating to the utmost in providing lectures and in assisting with arrangements.

A gratifying indication of an increasing desire for education on the part of men and women engaged in business is to be seen in the fact that there were 137 students in the correspondence courses conducted for the Canadian Credit Institute; 168 in the courses conducted for the Chartered Life Underwriters' Association of Canada; and 108 in the Certified Public Accountants' Association courses. These courses constitute a valued service to the organisations which sponsor them and the arrangements are almost ideal. This department conducts the courses while the organisations mentioned conduct their own examinations and award their own diplomas.

In the correspondence courses which are prescribed as preparation for the work of the Summer Session there were 206 teachers, most of them preparing two to three subjects. In the Upper School correspondence courses there were 94 teachers, most of whom wrote their examinations in June. In the correspondence courses which are intended to assist teachers who wish to become commercial specialists there were 84 teachers. This makes a total of 797 students taking correspondence courses of some kind with this department.

In the summer courses in pedagogy, which are nominally included in our Summer Session, there were 107 teachers.

The two-year diploma courses in Occupational Therapy and in Physiotherapy are proving to be, in every respect, satisfactory. These are difficult courses, for which the admission requirements are the same as for courses in Arts, and they provide the training necessary for positions which qualified young women find interesting and remunerative. These are the only courses of the kind in Canada. They are probably unique in the fact that, according to information given me, there is not a qualified therapist, a graduate of this course, who is unemployed. Indeed, the demand for these graduates still exceeds the supply.

Every year there is something new in University Extension but one of the oldest of its activities, the Pass Course for Teachers, never fails to attract its quota of ambitious teachers and remains, throughout the years, a most substantial and enduring piece of work. In November, nine graduates of this course were awarded the degree of Bachelor of Arts and at the June Convocation there were 35. A graduating class of 44 would not be considered small in some colleges in Canada. There were 908 teachers, and others, enrolled in the Summer Session and in Teachers' Classes during the year now closing. A Teachers' Class was held in Brampton, the subject being first year economics, and the results of the examinations were particularly good. In order to make a beginning in serving teachers in that part of North-western Ontario, which has its centre at Port Arthur and Fort William, a Teachers' Class was commenced, under a special arrangement, with ten students. Many others wished to enrol but lacked some part of the admission requirements. The ten students worked so faithfully in first year pass English, under the tuition of a graduate of this University, that every one of them was successful at the May examinations, three taking (A) standing and two (B) standing in the subject. The Pass Course for Teachers offers a wonderful opportunity for study with a definite goal in view. Men and women who are not teachers may take advantage of the

facilities offered to take the instruction and to write the examinations required to obtain a B.A. degree which is of a standard exactly the same as that of the Pass Course in Arts in this University.

Each year brings, as has been said above, something new in University Extension. This year it has been the establishment by the Senate and the Board of Governors of a two-year diploma course in Aerial Navigation which was recommended by the Committee on University Extension. Like the two-year diploma courses now available for young women, this new course will provide an opportunity for young men to obtain training which should fit them for posts which are and will be numerous. This is the first course of its kind in Canada. Already nearly one hundred applications have been received but it is hoped that it may be possible to limit the first class to 25.

University publicity has been carried on as in previous years. Announcements in the newspapers from time to time (almost daily), articles written for newspapers and other periodicals, the exhibit at the Canadian National Exhibition, the placing of the university's advertising, visits to normal schools and collegiate institutes, are the principal features of this work. As always, the daily and weekly newspapers and the Canadian Press have given cordial co-operation at all times.

University extension and university publicity are so inter-locked and inter-related that one is often merely the expression of the other. The underlying principle is that the citizens of Ontario, the proprietors of this University, should know what the University offers them and should be able to take advantage of what it offers if they care to do so. Every man and woman in Ontario could study with the Department of University Extension if he or she had the inclination and were willing to engage in the type of study peculiar to the function of a university. University Extension does what it can to disseminate knowledge. Interest is the basis of education and it is gratifying to realise that so many thousands of adult men and women are anxious for a glimpse into the sphere of higher learning. To meet the needs of such men and women, to give adults who require it a "second chance", to enable others to improve their academic and professional status—such is the chief function of University Extension.

#### (16) REPORT OF THE DIRECTOR OF THE DEPARTMENT OF SOCIAL SCIENCE

*(Professor A. E. Grauer, Ph. D.)*

This year marked a change in the directorship of the Department; but the blow of Professor Urwick's retirement was softened by his willingness to continue with his previous lecture courses. Thus staff and students alike are still able to enjoy his wise counsel and inspiring words.

The Department was strengthened by the promotion of Mr. D. G. McCullagh from a part-time to a full-time member of the staff. Mr. McCullagh will act as supervisor of group work studies and his presence will mean that this rapidly developing field of social work will receive more attention in the future. In the field of medical and psychiatric treatment, Miss Emory and Miss Millman of the School of Nursing have cooperated in giving a badly needed new course on the health aspects of social treatment; and Dr. H. Cruikshank delivered a valuable series of lectures on the social problems occasioned by disease, a series which he has consented to give regularly in the future.

The Department strengthened its relations with social welfare agencies in the province by organising an evening refresher course throughout the winter months in cooperation with the Canadian Association of Social Workers and the Department of University Extension, and is continuing this policy by arranging, in cooperation with the Department of University Extension, for a short course in case work during the summer for qualified social workers under the direction of a leading American case worker. The Department feels that such activities are but a small return for the

many things that the public and private agencies do for it, especially the valuable voluntary supervision given the students in field work.

A survey of job-turnovers, age-distribution, income-distribution, and other important facts relating to the employment of social workers throughout Canada was begun in December and will be completed by the summer. This information will be of value to those intending to enter welfare work as a career, as well as to social workers in the field.

There were 64 students registered in the Department this year, divided as follows: 25 in the first year, 16 in the second year, and 23 occasionals. It is interesting to note the national character of the enrolment: 22 students were from the four western provinces, and six from those east of Ontario. Students were in attendance from every province in Canada except Prince Edward Island and New Brunswick.

### (17) REPORT OF THE DIRECTOR OF THE SCHOOL OF NURSING

(*Miss E. K. Russell*)

Five years ago the School was established for the purpose of organising an adequate training course in public health nursing and it has taken all this time to get this new work well started. A good beginning has been made and order is appearing now out of chaos, but long and patient study lie ahead if this School is to proceed satisfactorily. The nature of the work which we call public health nursing must be better understood before we can afford to be dogmatic about the education and training of the worker. Thus the School should continue quietly with the research upon which it has started. The School was given, first, a trial period of five years which is now ended, and arrangements have been made to proceed with continued financial help from the Rockefeller Foundation. Permanent endowment is required in order to get the institution properly established: it is hoped that there will be much understanding of the need for well prepared public health nurses so that this necessary support will be forthcoming. Students are enrolling in the new course in increasing numbers although registration must be restricted because of the very limited accommodation at the disposal of the School.

This new course resembles in type certain courses that are being given in several European schools but it is a type that is strange and little understood, as yet, in this country. Hitherto the prospective public health nurse has prepared herself for her task by taking a post graduate year at the end of three years of hospital training. Now this School is offering a basic training course so organised that it becomes a well-sustained preparation for public health nursing throughout the three years of its extent, while, at the same time, a thorough training in bedside nursing is interwoven with this as an essential part of the whole.

The certificate courses for graduate nurses continue to develop satisfactorily and to attract students in increasing numbers. The large enrolment in these classes is straining the small resources of the School.

The statistical report for the year is as follows:

Undergraduate course .....	33
Graduate nurses in the certificate courses .....	73
Occasional students, including undergraduates from Toronto hospitals .....	173
Enrolment in refresher courses .....	187

### (18) REPORT OF THE DIRECTOR OF THE DEPARTMENT OF MILITARY STUDIES

(*Major M. Barry Watson, B.A.Sc., C.E., M.E.*)

I have the honour to report as follows on the work carried on in this Department during the academic year, 1937-38.

Due to the fact that this subject is an option for academic credits in the pass arts course and two years of the course in medicine only, and that time table

arrangements did not permit of students in the latter course taking this option, the number of students taking Military Studies as an academic subject was small.

The enrolments in the special classes (Courses 4 to 7 in the Calendar) however, was gratifying in view of the fact that these classes are voluntary, extra to the curricula and regular time table periods. The total registrations in all classes was 136.

This voluntary enrolment is no doubt due to the realisation by a considerable proportion of the student body that Canada must carry her share of the defence burden of the Empire, as well as to the large number of professional opportunities now offered for men of university standing in the defence forces of the Empire. Students in these special classes may obtain, concurrent with their university courses, through the Canadian Officers Training Corps, and the War Office in London, qualifications for commissions in various forces throughout the Empire. The relative numbers taking this extra work also indicates that the inclusion of Military Studies as an optional subject in other courses would be well received by the male students.

Attendance has been well maintained in all classes throughout the year, and the interest displayed was most encouraging. The attendance at the various courses of lectures overtaxed the capacity of the available quarters, and rooms in the engineering building were used for this purpose.

The results of the War Office examinations held in March, 1937, for qualification for commissions in the defence forces, showed 76 per cent of the candidates being successful; which retains the position of this University as above the average of all Canada and all Great Britain. The actual number of successful candidates being exceeded only in the University of Alberta.

Due to the increasing preference for university men, especially Canadians, as officers in the Regular Army and Air Force, and the very attractive conditions offered, a number of our graduates are adopting military work as a profession.

Some changes in the curriculum in this Department are being introduced which it is expected will enhance its value. These include the substitution of more work in military history and the geography, trade and economics of the British Empire, replacing the more detailed tactical and strategical studies.

## (19) REPORT OF THE UNIVERSITY HEALTH SERVICES (MEN)

(George D. Porter, M.B., Director)

### I.

The report of the year shows that there have been

#### Examinations:—

First year students.....	858
Second " " .....	728
Senior " " .....	710
Total.....	2296

There were also fifteen re-examined by specialists.

This is the largest number so far examined due to the extra number of senior students coming in for health certificates.

The results of the examinations this year were very satisfactory. The physical conditions of a large majority of students is excellent, only nineteen being unfit for physical training. This is the best record we have ever had.

#### Results:

Those found fit for physical training.....	96 %
Those having some disability requiring corrective or light exercises.....	2½%
Those unfit for physical training.....	1½%

Nineteen students were exempted for the following causes:—

Operations .....	7	Duodenal ulcer .....	1
Infantile paralysis .....	2	Arthritis .....	1
Heart trouble .....	5	Nephritis .....	1
Spinal trouble .....	1	Osteomyelitis .....	1

The average height of our first year students is 5 ft. 9 $\frac{3}{4}$  in. and their weight 144 $\frac{1}{2}$  lbs. This makes our highest average.

It may be interesting to note that our freshmen stand first in height as compared with those of Eleven American Universities, and second in weight, and that the general upward trend in height and weight is very noticeable in the past sixteen years.

Improvement in the physical condition of the second year students is shown in the majority of cases. Twenty-eight per cent. of those below category A.I. in their first year had their rating raised during the year, while only five per cent. in all categories had their rating lowered; these latter were lowered owing to illness or accident during the year.

The great majority of senior students coming in for examination for athletics also show improvement in their physical condition. We were very fortunate in having no cases of infantile paralysis or any other serious infectious diseases during the year, and apart from the usual, but comparatively mild epidemic of influenza, the general health of the student body has been excellent.

There were 105 students enrolled in the special classes under Mr. Martin for the correction of such defects as round shoulders, flat feet, and spinal curvature, and 55 others for period of from one to six weeks on account of injuries or disabilities, and those recovering from illness which prevented their taking the regular P.T.

Dr. Charles Gossage attended a large number of students for injuries received on the campus, and in the gymnasium, as will be seen in his report to the Athletic Association.

Personal advice to many students, and lectures on personal hygiene to those in the first year taking physical training, were given by the Director of Health Service. These were well attended as they have been in previous years.

We are greatly indebted to Prof. Andrew Hunter, professor of pathological chemistry, for undertaking the supervision of the uranalysis, in connection with the physical examination of the students.

Illnesses and accidents for which temporary absence from physical training were allowed. This is the best record we have ever had regarding exemptions, and noteworthy for the absence of serious infectious diseases.

Colds .....	241	Mastoid .....	2
Influenza .....	16	Torticollis .....	1
Bronchitis .....	2	Transfusion .....	1
Pharyngitis .....	18	Lumbago .....	3
Laryngitis .....	5	Jaundice .....	3
Tonsillitis .....	3	Local Infection .....	9
Sinusitis .....	5	Ingrowing toe nail .....	2
Gastritis .....	9	Cardiac .....	1
Neuritis .....	1	Dental trouble .....	5
Appendicitis .....	4	Hernia .....	1
Migraine .....	4	Nephritis .....	1
Epistaxis .....	3	Vaccination .....	1
Otitis Media .....	4		
	315		30

### Operations

Tonsils .....	4	Foot .....	1
Nasal .....	3	Glands .....	1
	7		2

### Injuries

Fractures .....	5	Sprains .....	36
Dislocations .....	5	Cuts .....	2

	<hr/>		<hr/>
	16		2
Total.....	436.		

## (19) REPORT OF MEDICAL ADVISER OF WOMEN

*(Dr. Edith Gordon)*

## II.

I beg to submit the report of the Medical Adviser of Women for the year 1937-1938.

The work of the Medical Office began early in September, and continued through to nearly the end of June. Physical examinations of the students of the School of Nursing necessitated the early opening and late closing. Their term begins before that of the University proper, and re-examinations are made at the end of the year on all the graduate group.

Physical examinations were made on entering students in University College, Medicine, and Household Science to the number of 214. These young women are required to take physical training during the first year of their attendance. Of these, 83.2% were fit and able for the gymnasium and swimming requirements; 2% were asked to attend one or two special corrective classes weekly for a part of the whole of the year. Re-examinations were made of these students in January. Only 5.6% were exempted from physical activities of some kind, because of temporary or permanent disabilities. This group reported twice weekly to the medical office for rest periods or walks. In this way the first year students most needing it, were given the closest supervision. 306 students from the other years of University College, Medicine and Household Science, as well as from Trinity, Victoria and St. Michael's Colleges, and other faculties and departments were examined. Included in this group were 66 women of the graduating class who responded to an offer for a re-examination before leaving college. For some years the Medical Advisor of Women has been attempting to interest all the women of the graduating class in such a check over in the spring of the year. This year saw the largest response so far. Of these 62% showed some improvement over their physical condition on entrance; 14% showed no appreciable difference; and 24% were not in as good condition as on their initial examination.

Participants in the various sports are required to present to their managers a certificate of physical fitness before taking part in the games. 226 such certificates were issued after examining the would-be players.

Intercutaneous tuberculin tests were performed on all the entering students, and on those whose previous test had been negative. 43.6% gave positive reactions. These were X-rayed. The filming was done in the department of anatomy. I am indeed grateful to Dr. Grant and his staff for their cooperation in this work. Two cases of active tuberculosis were discovered. These were entering students, and both are at present in sanatoria undergoing treatment.

With the help of the five young women in the final year of the Diploma in Physical Education course, and one young woman from the fourth year of the Faculty of Medicine, a beginning was made on a study in posture using the line of gravity apparatus which was built some years ago for Dr. Cates of the department of anatomy. This work proved most interesting, but was too time-consuming to permit the attention it merited. A graduate in physical education could well give a year to investigation on this problem.

Another interesting study was provided through the courtesy of Dr. B. L. Guyatt of the department of anatomy. He arranged for a high vitamin and chlorophyll product in sufficient quantities to give to students whose haemoglobin was 70% or lower, and who were not, or did not wish to be under treatment elsewhere. More than

50 students were included in this group. Haemoglobin, red cell count and differential count were done monthly on those taking the product. The result in many cases was gratifying and in a few instances was almost spectacular.

In the spring of the year, the Medical Adviser was approached by Miss Helen McMurrich of the extension department, and Mr. Thos. Cole, the representative of the Northern Electric Co. for their hard of hearing appliances and audiometers, with the suggestion that a survey be made among the women students to discover the percentage of hard of hearing. Through the courtesy of Miss Coventry who gave over a physical training class period for this work, and Miss Russell of the School of Nursing who arranged to have the post graduate students given the opportunity for being tested, 142 were tested. 106 were undergraduates, and 36 were graduates. Of these, 27 of the undergraduates showed a distinct loss of hearing in one or both ears, and 15 of the graduate nurses were similarly affected. I am hoping to include this hearing tests in the regular entering examination next fall.

The number of students coming into the Medical Office daily for consultation re health problems, and for treatment for minor ailments continues to be large. 36 vaccinations were performed, and 160 urinalyses were made.

During the final examination period in May the Medical Office cares for students who are too ill to write their papers in the regular examination halls. 61 women students wrote papers in the medical office, and 160 papers all told were written.

Lecture courses were given to the students in the Diploma in Physical Education course. To the first year, 25 lectures in personal hygiene and first aid were given. In addition to the final tests by the Medical Adviser, this group tried the examinations of the St. John Ambulance Association, and all passed successfully. To the fourth year, 20 hours of lectures and demonstrations in the diagnosis of physical defects were given. Three health talks were given to the entering women, following the completion of their physical examinations, and based upon their findings. In March, four lectures in personal hygiene were given to the Public Health Nursing class.

It was a great disappointment to realise that the erection of the Women's Gymnasium Building had again to be postponed. The need of adequate accomodation for physical training and recreation for the women is so pressing that it can hardly be too much emphasised.

*Physical Examinations, 1937-1938:*

University College (entering students) .....	181
University College (others) .....	79
Victoria College .....	37
Trinity College .....	28
St. Michael's College .....	12
Medicine (entering students) .....	12
Household Science (entering students) .....	21
Household Science (others) .....	2

Graduate School .....	6
Optometry .....	2
Special .....	5
<b>Total</b> .....	<b>520</b>
Margaret Eaton School .....	53
<b>Grand Total</b> .....	<b>573</b>

Students required to take Physical Training: first year University College, Medicine, and Household Science .....	214
Grades A1 and A2; physically able to participate in the required gym- nastic and physical activities .....	83.2%
Grade B1; needing special corrective work .....	11.2%

Grades B2 and C; excused from physical training requirement because of some temporary or permanent disability. These students report twice weekly to the Medical Office for rest periods or walks ..... 5.6%

Senior students of University College and Household Science who were examined in the spring of 1938. Compared with their examination upon entrance to the University.

Showing improvement ..... 62. %  
 Showing no improvement ..... 14. %  
 Showing retrogression ..... 24. %  
 Total examined.....66.

(20) REPORT ON ATHLETICS AND PHYSICAL TRAINING

(*T. A. Reed, Mus.Bac., Secretary, Athletic Association*)

(1) MEN

I have the honour to submit the following report on the activities of the Department of Athletics and Physical Training for the season 1937-38.

The work has followed the usual course under the able supervision of Mr. Warren Stevens, our director of athletics. In this he has been loyally supported by the regular instructors, Messrs. W. H. Martin, J. E. McCutcheon, W. W. Winterburn and Charles Zwygard.

A most gratifying feature has been the greater interest and participation in our intramural programme initiated last year and now being developed under Mr. McCutcheon to a greater degree of efficiency and participation. The opening of the Gymnasium and Swimming Pool in the evenings has meant a greater number availing themselves of the facilities and allowing for more group competition in the indoor activities. 1555 male students or 45 percent of those eligible participated in this programme. The Committee in charge, consisting of the presidents of athletics in the faculties and colleges with W. M. Sprules (Trin. III) as Chairman, proved a most valuable advisory council to the Athletic Directorate in the administration of the intramural programme.

The imposing of an athletic fee by the Board of Governors was also attended by satisfactory results. The privileges granted the students, both men and women, were varied. Of prime importance was the opening of the Gymnasium and Swimming Pool in the evenings, the expenses being met by the Athletic Association out of receipts from that fee. This removed a grievance long felt by the senior men in the professional faculties where, due to long hours in laboratory work, they could not reach the Gymnasium before closing time. Other privileges made possible by the fee were admission to all university rugby and hockey games; to the outdoor skating rink each afternoon and two evenings a week; instruction in figure skating and golf; affiliations with a golf club and riding club for reduced fees and accommodation for skiing during the winter months.

*Physical Training*

The number of students in the first and second years taking Physical Training was slightly smaller than the previous year. In addition to the Danish gymnastics, upon which the training is based, gymnastic apparatus and mat work was included. The urging of first year students to learn to swim and qualify for the Royal Life Saving awards was reflected in the increased number joining these classes. Enrolment in our contingent of the Canadian Officers Training Corps again proved popular, their being a slight increase in the number voluntarily choosing this as an option.

*Enrolment*

Men students in the first and second years .....	1761
From third and fourth years (being deficient in previous years) .....	21
	1782

From this total must be deducted those:

(a) With credit for two years physical training but repeating academic work	206	
(b) Exempt on medical and other grounds	43	
(c) Withdrawn from college during the session or registration cancelled	23	
(d) Failed to register	13	
		285
		<u>1497</u>

These 1497 elected to take their Physical Training as follows:

In Physical Training classes	1084	
In the Canadian Officers' Training Corps	215	
In Special Classes for those physically deficient	87	
In the following Intercollegiate and Interfaculty Sports (part-time):		
Rugby	198	
Soccer	41	
Track and Harrier	98	
English Rugby	5	
Lacrosse	35	
Volleyball	99	
Boxing, Wrestling and Fencing	44	
Swimming and Water Polo	88	
Indoor Baseball	161	
Basketball	190	
Hockey	177	
Rowing	33	
Gymnastics	31	
Tennis	4	
Figure Skating	7	
Jui Jitsu	13	
	<u>1224</u>	
		2600
Less those participating in two or more activities	1103	
		<u>1497</u>

There were twenty-five class periods each week in the Gymnasium, of which the majority were conducted by Mr. Chas. Zwygard. The average class attendance was 44 although some were as high as 135. The programme consisted of Danish calisthenics, elementary apparatus, games and mat work. Mr. Martin conducted special classes for the 87 students physically unfit to take the more strenuous work in the Gymnasium. Mr. Martin also supervised the instruction in boxing, fencing and wrestling. In swimming Mr. Winterburn conducted 251 Learn-to-Swim classes or 11 per week. 185 students were taught to swim. 59 students were enrolled in the intermediate classes of which there were 3 per week and 434 in the 20 life saving classes. There were 225 awards granted by the Royal Life Saving Society. Mr. Winterburn also supervised the water polo competitions in the Interamural programme and the various swimming meets, besides acting as assistant coach of the University swimming and water polo teams.

### *Intercollegiate Athletics*

The University of Toronto was represented in all branches of intercollegiate sport. The senior championships were the track, tennis, English rugby, golf, swimming, gymnastics and the boxing and wrestling. The individual Gymnastics championship also was won by W. J. Lester, (Ap. Sc. II) of Toronto. In boxing and wrestling we again retained our own "Tom Gibson Cup" and in Track competition wrested from McGill the Tait Mackenzie Trophy after their seven years of unbeatable superiority.

During the year the Athletic Association decided it was high time to recognise the valuable services of Mr. Charles Walters who, for the past twenty years has given gratuitously of his time and talents to promote the cause of intercollegiate fencing. It was therefore decided to offer to the Canadian Intercollegiate Athletic Union a trophy for team competition in senior fencing and a smaller individual trophy for the fencer winning the highest points at the annual intercollegiate meet. Both these

trophies bear the name of Charles Walters. The individual championship was won by A. L. Garcia. (Ap. Sc. II) of Toronto and the team championship by McGill University.

Of intermediate championships we won the soccer, tennis, hockey, basketball, swimming and fencing.

In addition to our annual competition in the Canadian Intercollegiate Athletic Union, several of our senior teams continued the pleasant athletic relationships established with many U.S. Colleges. The hockey team met Harvard, Yale, Princeton and Dartmouth, as well as the two leading teams of the mid-west, University of Minnesota and University of Michigan. The heavy crew completed their season by rowing against Syracuse University. In basketball we competed with Cornell, Syracuse, Buffalo, Rochester, Assumption, Detroit, Canisius, St. Lawrence, Clarkson and Niagara. The boxing, wrestling and fencing teams met the U.S. Coast Guard Academy, Cornell, Alfred, Rochester, Buffalo, St. Lawrence and Wayne. The swimming team had a fine year meeting Rochester, Syracuse, Buffalo and Canisius. The English rugby team enjoyed a fast game with the Chicago Rugby Club and the lacrosse team ended the season by meeting Dartmouth, Syracuse and Springfield. The international fraternising was of inestimable value both as to experience and in upholding the honour of our University in contests across the border.

### *Intramural Competition*

The schedule herewith indicates the interest on the part of the students, for while 284 represented the University in intercollegiate competition, 1372 men turned out on college and faculty teams.

Series	Name of Cup	Winner	Interfaculty	
			teams	Players
Rugby.....	Sir William Mulock	Victoria	10	252
Track.....	W. L. Rowell Memorial	S.P.S.		45
Soccer.....	Arts Faculty	Victoria	10	153
Harrier.....	J. Brotherton	Wycliffe		51
Hockey.....	W. T. Jennings	Victoria	17	265
Basketball.....	Clifford Sifton	Med. III	22	314
Lacrosse.....	Dr. W. A. Dafoe	Sr. S.P.S.	9	105
Sr. Boxing, Wrest. & Fencing..	Francis Davison	S.P.S.		44
Jr. Boxing, Wrest. & Fencing..		S.P.S.		67
Indoor Baseball.....	A. G. Spalding	Dents	21	369
Sr. Swimming.....	A. M. Fitzgerald	S.P.S.		48
Jr. Swimming.....		S.P.S.		61
Water Polo.....	H. P. Eckardt	Sr. Vic.	11	149
Indoor Track.....	Toronto Cricket Club	Victoria		75
Tennis.....	F. Y. McEachren (for University champion)	W. P. Pigott (S.P.S. III)		37
Gymnastics.....	H. A. Wilson	S.P.S.		27
Volleyball.....	Victoria College Staff	Dents	18	224
Individual Swimming.....	H. Durnan	G. H. Clawson (U.C. I)		16
				2307
Less those participating in two or more sports.....				935
Number of contestants.....				1372

### *Special Awards*

The John C. H. Copp Memorial Trophy, awarded each year to the worthiest member of the senior rugby team, was won by C. C. (Cam.) Gray, Med. V, an outstanding member of last year's team. The Don Barton trophy, established in memory of our former physical director, and awarded annually to the gymnast showing the greatest improvement during the year, was awarded to L. A. Patterson (Ap. Sc. II).

In the summer of 1937 one of our most promising students and athletes, T. H. Bickle, Trinity class of '38, lost his life by unselfishly going to the assistance of some friends. During the session his parents established a Bursary to bear his name which

was, by unanimous decision awarded to M. W. Murphy (U.C. '35) of Wycliffe College, a team mate and member of the senior intercollegiate swimming team.

The Varsity Arena was again used during the summer for the Promenade Symphony Concerts which now, in the fifth year of their existence, have become established in the musical life of the community. It has afforded facilities for a great mass of people to hear symphony concerts for the small sum of 25c. There were twenty concerts given with an average attendance of 4,500 people. As the charges for the building are placed at the lowest possible figure to cover out of pocket expenses, it means that the University is continuing to contribute generously to the musical life of Toronto.

### *The Athletic Directorate*

The Athletic Directorate for 1937-38 consisted of Dr. J. A. McCollum (President), Professor T. R. Loudon, Professor S. Beatty, Dr. W. Easson Brown, Messrs. M. F. Williams (Vice-President), J. P. N. Holden, L. G. O'Connor, H. B. Shipman, T. W. Sullivan, E. B. Tovee, and *ex officio*, Dr. G. D. Porter, Medical Director; Warren Stevens, Director of Athletics and T. A. Reed, Financial Secretary.

## (20) REPORT OF THE DIRECTOR OF PHYSICAL EDUCATION FOR WOMEN STUDENTS

(Miss I. G. Coventry)

### (II) WOMEN

In the past academic year 1937-1938 there were 238 women students registered in the physical education classes and approximately 787 class periods of instruction were given by the Physical Director and her assistant Miss J. M. Forster and Mrs. M. Graham.

*Required Physical Training:* The required physical training class with an enrolment of 216 students was subdivided into 15 class periods a week. This plan, as formerly, assisted principally in accommodating the students who presented varied academic time-tables and also lessened the congestion in the one small gymnasium and the over-crowded dressing-room quarters.

The students enrolled in the regular classes were required to take the final tests in general gymnastics and corrective exercises at the end of the year. The annual report of these examinations was submitted to the Registrar of the University.

*Corrective and Remedial Classes:* Class periods of corrective and remedial gymnastics were given to the students who were medically advised to take the special course arranged for their benefit and welfare. The Physical Director personally supervised this essential part of health physical training. Frequently such good results were obtained that it enabled the students to return to the regular classes.

Number of students from	University College	192
“ “ “ “	Faculty of Medicine	15
“ “ “ “	Faculty of Household Science	6
“ “ “ “	Victoria College	3

*Swimming:* There were 212 students from all colleges, faculties and departments and over 240 periods of instruction in elementary and advanced swimming and life saving given by Miss A. Cochrane and Mr. A. L. Cochrane during the session of 7 months.

Administrative Staff		24

*Four Year Diploma Course in Physical Education* (with the Pass Arts course): There were 24 students registered in this course and approximately 722 class periods of lectures, theory and instruction were given during the college year. Periods of theory subjects numbered 272 and of practical subjects 450.

The women graduates who have been granted the diploma in physical education by the University of Toronto continue to be appointed physical directors or instructors in the Ontario schools.

## (20) REPORT ON ATHLETICS FOR WOMEN

(Miss A. E. M. Parkes)

### III.

The Women's Athletic Association is happy to report a considerable increase in participation in athletics by the women undergraduates for the year 1937-38. This is particularly noticeable in the recreational sports which do not involve organised competition. This development may be traced almost entirely to the increased facilities provided by the new athletic fee which has been welcomed by the women as well as the men. Due to the affiliations made with golf and riding clubs, it became financially possible for a large number of women to enjoy these forms of exercise. Similarly the skiing grounds and cabin were much appreciated. Class instruction in figure skating and golf was also provided and approximately twenty-five women enrolled for each course. An amount proportionate to that used to keep the athletic wing of Hart House open at night was turned over to the Women's Directorate. It was decided by that body that the major portion should be held in trust to be used for certain purchases of athletic equipment, etc., which would become necessary when a new women's athletic building is erected. With the remainder, bowling alleys were rented and made available to women students at a minimum charge. Afternoon hours only could be obtained which limited the numbers, but approximately forty students bowled for one hour a week for ten weeks under the scheme.

The regular programme of competitive sports was carried out as usual and provided great enjoyment for all participants. In the field of intercollegiate sport, championships were well divided, Western retaining the basketball, while Queen's won the tennis, with McGill providing the individual champion, and McMaster won its first intercollegiate championship of any kind in the newly-organised badminton tournament. Toronto won a sweeping victory in the swimming meet, coming first and second in all events and setting four new records.

With the University, tournaments in tennis, badminton and swimming were conducted by each college in addition to the regular intramural competition. A golf tournament was held in the fall as well as the intramural series in basketball and baseball, and the hockey series was conducted in the winter term. Students taking part in one or more of these activities or in the bowling tournament were registered in University, Victoria, Trinity and St. Michael's Colleges, the Faculty of Medicine, the School of Nursing, the Department of Household Science, Occupational and Physiotherapy and Physical Education. Several students registered in the Ontario College of Education and in the Department of Physical Education also acted as coaches. Championships were much more evenly divided than last year, with Victoria retaining the tennis and baseball University College the swimming, while St. Hilda's won the hockey and University College the badminton. The championship most generously applauded by all concerned was that won in basketball for the first time by St. Michael's College.

In the actual intramural competitions sponsored by the Association, entries were as follows: tennis, 30; basketball, 130; hockey, 53; swimming, 43; badminton, 30; baseball, 27; bowling, 40; golf, 16.

The women are indebted to the men's Directorate and to officials of the Athletic Association and the Superintendent's Office for assistance and co-operation on many occasions.

The Women's Athletic Directorate for the year 1937-38 consisted of Dr. C. C. Benson, President, Mrs. W. A. Kirkwood, Mrs. W. B. Elsley, Dr. Edith Gordon, and the Misses J. M. Forster, M. E. Best, M. J. Brownlee, M. F. Davidson, M. I. McLaughlin, K. G. Mayes, J. A. Rea, and A. E. M. Parkes, Financial Secretary.

## (21) REPORT OF THE ACTING WARDEN OF HART HOUSE

*(Mr. J. R. Gilley)*

### THE WARDEN

During the summer of 1937 Mr. J. B. Bickersteth had a recurrence of the illness from which he suffered for several years after the war and on the advice of his doctors in England did not return to Hart House last September. He was granted leave of absence for the academic year 1937-1938 and it is gratifying to know that he has now almost regained his health and will be able to resume his duties in August. For seventeen years Mr. Bickersteth has whole-heartedly flung himself into the life of Hart House. His energy and devotion to the affairs of the House are reflected in the steady growth of its various activities during this period. In view of the absence of the Warden it was inevitable that the life of the House would suffer a severe blow. This handicap, however, has been overcome to a certain extent by the willing and sincere co-operation of the various committees and all members of the staff.

### GENERAL

The opening of the University in September was postponed one week on account of the poliomyelitis epidemic which made necessary the change of date or the cancellation of various meetings and functions. The Massey Foundation continue to show keen interest in all phases of the life of the House. Realising that for some years the Faculty Union required additional accommodation, the Foundation generously provided funds for the construction of a new sitting-room on the third floor, for the much needed renovation of and new equipment for their serving room and alterations in their dining-room. These improvements are greatly appreciated by all members of the Faculty Union.

A unique gift in the form of a historical and pictorial map was formally presented to Hart House by Mr. Vincent Massey on behalf of the Massey Foundation in October, 1937. This map 6' x 5' is an excellent example of the work of the well-known artist, Mr. A. Scott Carter. Done in vivid colours it presents a complete survey of the University property and includes the heraldry of various colleges, benefactors and persons connected with the University. Another acquisition was a plaster representation of the coat of arms of Canada, with its heraldic supporter, which formed part of the decoration of the temporary building known as the annex erected at the west end of Westminster Abbey for the Coronation of Their Majesties King George VI and Queen Elizabeth on 12th May, 1937. It was presented by H. M. Office of Works to Mr. Vincent Massey and was given by him to Hart House, having now found a place in the debates room.

For several years it has been known that the accommodation in Hart House for the Students Administrative Council has been totally inadequate and steps have now been taken to enlarge these quarters by the addition of the room immediately to the west of their present location: at the same time the partition between the new room and that occupied by the General Secretary-Treasurer of the S. A. C. has been removed. This necessitated alterations to the Hall Porter's desk and the room adjoining it. The expense of these structural changes has generously been borne by the Board of Governors.

There was a slight increase in the membership of Hart House during the past year, there being 3717 undergraduates and 726 senior members with a total of 4443.

The Shop where light refreshments and sundry articles are sold had a most satisfactory year. An additional room in which students may eat their lunches was provided and it with the other two were decorated in attractive colours. As in past years many large and small functions were held during the winter including the Engineering Society Dinner, the Athletic Association Dinner, the University College Follies, School Night, Alumni Night, the Faculty of Forestry At-Home, the Trinity College Conversazione, the Commerce Club Dinner, the Law Club Dinner and the C. O. T. C. Ball. The tickets for the Graduates Ball on New Year's Eve were in good demand which showed that this annual function still retained its popularity among the senior members of the House. The first Visitors' Day of the term in October was as last year for the general public as well as for members of the House and over 1500 persons availed themselves of the opportunity to make a tour of the building. Again this year the University Settlement Party was held in the last week of the Michaelmas term when about 300 men and boys were the guests of Hart House. At the Warden's Christmas Dinner held on the first evening of the Christmas vacation approximately 70 men, all of whom would not be spending any part of their vacation at home, were in attendance.

#### ART

An exhibition of the work of Mr. A. Y. Jackson and Mr. E. H. Holgate opened the series held in the art gallery during the academic year. Other exhibitors were Professor Barker Fairley (a faculty member of the House), Mr. F. S. Panabaker, Mr. Bertram Brooker, Mr. L. F. Casey, Mr. A. J. Casson, Mr. André Bieler, Dr. Gordon Pearson and Mr. Louis Muhlstock. Among the members great interest was shown in the paintings of these artists as there was also in the photographic exhibition arranged by the Camera Committee. The exhibition in February of work done by the undergraduates included drawings and paintings together with a mural executed in the arts and crafts room under the supervision of the instructor, Mr. Carl Schaefer, and etchings, lino-cuts, wood-carving and sculpture also done there. The graduate members and members of the faculty showed their work in the gallery in March when several exhibitors, formerly unknown to the committee as artists, showed their work for the first time. Reproductions of paintings by landscape artists as well as those by Spanish, French and Modern Masters were shown in the print room. On two occasions Mr. Arthur Lismer reviewed exhibitions in the gallery—the first being that of children's work done at the Art Gallery of Toronto and the other that of the work of the undergraduates. This was the first time that the undergraduates exhibition had been reviewed and this event drew about one hundred students to the gallery to hear the criticisms of Mr. Lismer. After Christmas Mr. André Bieler and Dr. Gordon Pearson each reviewed his own pictures while on view in the gallery. Mr. H. S. Palmer again conducted the weekly art class in which nineteen members were enrolled and attended regularly. Mr. A. Y. Jackson and Mr. F. H. Brigden were re-appointed for a three year period as the Advisory Committee of Artists. On their recommendation two pictures—"Draped Head" by Jack Humphrey and "The Saw Mill" by André Bieler—were added to the Hart House collection. Through the courtesy of its Director, Mr. Eric Brown, the two sketches by Tom Thomson were repaired at the National Gallery during the past summer and at present four canvases are there for cleaning and minor repairs. It was found necessary to add a section to the bookcase in the gallery to accommodate the art library to which additions are made from time to time through gifts and as funds become available for this purpose.

#### Music

As in the past the Sunday Evening Concerts held during the year were exceedingly popular and on the occasion of each concert the Great Hall was filled to capacity. We are indebted to the following musicians for the programmes: Mrs. Wilma Stevenson Dohler, Mr. Albert Pratz and Mr. Leo Barkin, Mme. Emmy Heim, the Hart House String Quartet (on their return from an extensive European concert

tour), the Hart House Glee Club and Miss Margaret Oliver, and the Conservatory String Quartet (using viols and modern instruments) with Mr. Alberto Guerrero (playing the harpsichord). The Friday Afternoon Recitals attracted a large number of students. These informal recitals provide all members of Hart House—undergraduates, graduates and members of the faculty—with an excellent opportunity to acquaint themselves with and to enjoy chamber music in an ideal setting. During the past winter Sir Ernest McMillan, Mr. George Lambert, the Toronto Trio, Mr. Viggo Kihl, Miss Marion Copp, the Philharmonic String Quartet and Dr. Harvey Doney were among those who contributed to the success of the recitals. Under the direction of Mr. J. Campbell McInnes the Songsters had a splendid season with a most satisfactory attendance. Members are deeply grateful to Mr. Ross Workman who has so ably conducted the popular Midday Sing Songs. To the musicians of Toronto who through their generosity have made possible such outstanding musical events in the life of the House during the past academic year is owing a real debt of gratitude. Under the direction of Dr. Charles Peaker the Hart House Glee Club has developed at the same time maintaining their membership of one hundred men. Before the close of the first term the club sang carols one evening during dinner in the Great Hall and in February with Miss Margaret Oliver (pianist) they performed at a Sunday Evening Concert. In addition to these two functions they sang on several occasions outside the University.

#### DEBATES

Again five debates were held during the year when the motions before the House dealt with the influence of the rearmament of Great Britain on peace, the effect of the expansion of Japanese foreign trade on the Far East, the narrow outlook gained through the study of science, the final manifestation of a decadent civilisation as illustrated by Canada and the policies of Anthony Eden. The Hon. Visitors included Rabbi Maurice N. Eisendrath, representatives from the University of Melbourne and McGill University, Mr. J. D. Gibson (a graduate of University College, now an economist with the Bank of Nova Scotia) and Dr. H. B. Speakman. The attendance at the debates was not as large as it was hoped it would be, but those who came were very enthusiastic and showed much interest and on no occasion was the Speaker able to allow all those to speak who wished to do so.

#### STUDENT CHRISTIAN MOVEMENT

The most outstanding activity of the Movement in Hart House this year was the Wednesday noon-hour addresses in the music room on the general theme "Christianity Faces a New World." The addresses aroused considerable interest and were well attended. Among the speakers were Shoran Singha of India, Dr. W. C. Lockhart, Mr. Woo Da Ling of China, Dr. Stanley Russell, Professor T. W. Isherwood, the Rev. E. S. Lautenslager, the Rev. J. D. Parks, the Rev. W. L. Smith, the Venerable Archdeacon Fotheringham, the Rev. G. Cragg, the Very Rev., the Dean of Toronto, Dr. J. R. P. Selater, Dr. Crossley Hunter, Professor G. Wilson Knight, Dr. S. Sisco, the Rev. E. J. McCorkell and Dr. Richard Roberts. In the Chapel, which is used by a number of undergraduates for private prayer and meditation, there was an early Sunday morning celebration of Holy Communion on the second Sunday of the month. Every Tuesday during term a short midday service lasting twenty minutes took place there and on Thursday at noon a group met in Wycliffe College for prayer. Archbishop Owen spoke at the Lenten services during March which the Rev. Philip Beattie conducted. There are signs that during the past year not a few undergraduates have reached a deeper realisation of the value of prayer and meditation. The Movement played an active part in promoting the National Conference of University Students which met at Winnipeg during the Christmas vacation. The Dean of Exeter Cathedral and Professor Reinhold Niebuhr of New York were among the main leaders. The Dean visited the University on his way to Winnipeg. Among other prominent leaders the S. C. M. brought to the University during the academic year were Mr. Max Yergan, Dr. John Mackay, the Rev. W. Paton, Dr. T. Z. Koo, Mr. E. K.

Higdon, Mlle. Suzanne de Dietrich, Miss Rose Terlin and Dr. Sherwood Eddy. The S. C. M. further were largely responsible for the appeal in the University for the relief of Chinese students, \$517.16 being raised from undergraduates and members of the faculty.

#### THEATRE

This season, for the first time in the history of the theatre, there was no Director on the theatre staff. As a result no regular series of plays was presented nor was there a play entered in the Dominion Drama Festival. However, the entire technical and business staff was retained to keep the auditorium open for rental business. This was larger than in any previous year and twenty-three organisations not including university groups held productions in the theatre. For the second year in succession the University Drama Festival was held, the entries being more numerous and the entire festival more successful. The University College Dramatic Society once again won the award given by the President of the University. A series of lectures on the theatre was sponsored by the University Drama Committee. This was the first time that anything of this nature was attempted and proved to be very popular with the students. It is to be hoped that the years to come will find even more activities of a similar nature interesting the student body. This committee produced a play under the direction of Mr. Edgar Stone, the members of the cast being drawn from the various colleges and faculties in the University. The enthusiasm shown in this venture and the quality of the work would seem to guarantee its continuance. It is interesting to note that the following dramatic societies and faculties in the University made use of the theatre during the year: the University College Alumnae Association, L'Alliance Française, the Trinity College Dramatic Society, the University College French Club, the Victoria College Dramatic Society, the Medical Society, the Engineering Society, the University College Literary and Athletic Society, the Faculty of Dentistry Students' Parliament and the University Drama Committee.

#### VISITORS

Among the visitors to Hart House during the past twelve months were Miss Zoe Lavallin Puxley, Mr. Walter S. Allward, Mr. H. E. Wimperis, Miss Mary Trevelyan, Mr. R. B. Bennett (Rector of the Grammar School at Jedburgh, Scotland), Captain Griffiths Powell, Professor E. J. Dent, Professor K. H. Bailey, Dr. W. Bryden, Mr. Thomas Mann and Mr. F. Ashton-Gwatkin.

#### COMMITTEES AND STAFF

During the Warden's absence in the past year Hart House was specially fortunate in the President's appointment of Dr. H. Wasteneys as Chairman of the Board of Stewards. His long association with the House and its committees made Dr. Wasteneys the ideal choice as Chairman of the Governing Body of the House. The new House Committee which is an amalgamation of the former House and Hall Committees performed their duties in an excellent manner and there is no doubt that the joining of these two committees is amply justified. Through their wise counsel in this their second year the Glee Club Committee have fully merited their status as a Special Committee of the House. It is keenly regretted that three senior members of the committees have found it necessary to resign this year—Professor T. F. McIlwrath from the Chairmanship of the House Committee, Professor A. F. W. Plumtre as a faculty member of the Debates Committee and Mr. A. B. Ward from the Chairmanship of the Graduate Committee. To these and indeed to all senior members of the committees Hart House owes a deep debt of gratitude for their valuable assistance in its affairs year by year.

The Warden's absence necessitated the temporary appointment to the staff of Mr. J. R. Johnson, a former secretary of the House, whose wide knowledge of the

House made his services invaluable. Hart House was fortunate also in being able to retain Mr. D. L. Emond as assistant secretary for another year. This spring Mr. J. A. Bartholomew, who has been superintendent of the dining hall department since 1932, resigned and has been succeeded by Miss Muriel Ransom, a graduate in Household Science in 1934.

The Acting Warden wishes to convey his sincere thanks to the President of the University and to the staff and the members of the committees of Hart House for their whole-hearted co-operation during the past year.

## (22) REPORT OF THE DIRECTOR OF CONNAUGHT LABORATORIES

*(J. G. FitzGerald, M.D., LL.D.)*

This is the twenty-fourth annual report of the Director of Connaught Laboratories. It is a review of the work carried on during the year 1st July, 1937, to 30th June, 1938.

During a part of this time, in the absence of the Director, his responsibilities devolved upon Professor R. D. Defries and Professor C. H. Best, and grateful appreciation is here extended to them for generously assuming additional burdens and duties.

It has been a year of further progress and development. It is a fine tribute to my colleagues and associates that, despite a slight reduction in the numbers of the scientific staff, research and investigation have been prosecuted on a more extensive scale than in any previous year.

The fundamental purposes for which the Laboratories exist, namely, extension of the boundaries of knowledge in the broad field of preventive medicine, co-operation with public health agencies throughout the Dominion of Canada, the production and distribution of biological products, and the support and encouragement of postgraduate teaching in public health, have always been kept in view.

Reference has already been made in earlier reports to the Connaught Laboratories Fellowships in Public Health, made available each year to a certain number of medical graduates in the various provinces. Perhaps no other aspect of the work of the Laboratories has been more generally commended or widely appreciated than this. As a result of co-operation with federal and provincial public health authorities, the Laboratories continue to occupy an important place in the public health organisation of this country. Further consolidation of the mutually helpful and profitable co-operation with the University of British Columbia has been maintained. The Western Division under the guidance of Dr. C. E. Dolman has been most active in the prosecution of research. A review in greater detail of the work of the various sections of the Laboratories appears later in this report.

### Staff Changes

During the year Dr. Geoffrey Rake resigned his position to take up an appointment in the United States.

Dr. J. S. Kitching resigned from the staff in February to undertake new duties in the Metropolitan Health Board of Vancouver. During the three years in which Dr. Kitching was a member of the staff he made substantial contributions in his special field of work and discharged his routine duties in a most satisfactory fashion.

Dr. F. O. Wishart, for several years past a research fellow working with Dr. James Craigie, has resigned to assume the duties of lecturer in hygiene and preventive medicine in this University.

Dr. M. Doreen Smith, a research assistant in Professor Moloney's section since the autumn of 1931, is leaving this year. It is a pleasure to record the high opinion in which Dr. Smith is held as a hard-working and conscientious investigator, and her services to Connaught Laboratories are gratefully acknowledged.

Dr. R. J. Gibbons, research assistant in Western Division, resigned to enter the

service of the Department of Pensions and National Health as a Bacteriologist. Dr. Gibbons' services were warmly appreciated and are here acknowledged with gratitude.

Dr. K. K. Kay, first research assistant in industrial hygiene and more recently an assistant in the office of the Comptroller, has resigned to accept a fellowship in the Harvard School of Public Health.

During this period there have been many changes in the personnel of the Farm Section. These are set out hereunder.

John Fulton, resident engineer for seven and a half years, returned to Ireland in 1937. His position has been filled most satisfactorily by his first assistant, John Follansbee.

Gavin Martin, a most valuable technician, who had served in that capacity for six years, resigned in September, 1937, to enter the course in mechanical engineering in the Faculty of Applied Science and Engineering in the University of Toronto.

Edward Perkins, another most reliable technician, after eight years' service resigned to enter upon other activities.

Thomas Perry and Richard Aldom, who had a much shorter association with this institution, returned to their university courses which were interrupted during the depression.

Dr. Donald Heard, who had charge of oestrin research, resigned and accepted a position on the staff of the department of biochemistry, Dalhousie University, Halifax.

Dr. Arthur Charles transferred from the University to the Farm Section in the laboratory vacated by Dr. Heard in September, 1937, since when he has carried on his investigation in the production and purification of heparin.

The tragic death of Christopher Smith, one of the earliest members of the laboratory staff at the Farm, was deeply regretted by all who knew him. He had been employed for twenty-one years, and was accidentally killed while coming to work on the morning of 12th July, 1937.

### Appointments

The appointment of Dr. Kenneth F. Brandon as a research assistant (part-time) in Western Division was made on 1st June. A former member of the staff of the School of Hygiene and for the past year a member of the staff of the Metropolitan Health Board of Vancouver, Dr. Brandon's appointment is a further step in the development of even closer relations with the University of British Columbia. In his new position he will also be a member of the staff of the University of British Columbia, and it is confidently believed that in addition he will find a useful field of service in epidemiology in the Metropolitan Health Board of Vancouver.

### Section of Bacteriology and Immunology

In the section of bacteriology and immunology, under the general direction of Professor Donald Fraser, studies previously reported have been extended and new projects initiated. The study of the duration of antitoxic immunity in response to three doses of diphtheria toxoid in children has been in progress for a number of years. This research has been time-consuming and has entailed the co-ordination of efforts of Dr. Alan Young in the field as well as our own in the laboratory. It has been abundantly shown that for the purpose of this study the Schick test is inadequate, since the results so obtained are not quantitative and thus fail to reveal the changes in antitoxin level in the children subsequent to immunisation. In addition, the Shick test itself acts as an antigenic stimulus, which fact alone precludes its use when spontaneous changes in antitoxin levels are being followed. Our results obtained subsequent to publication in 1937 indicate that of 107 children, given three doses of diphtheria toxoid two years previously, virtually all have shown a drop in antitoxin level from that attained at three or six months after immunisation: nine had less than 1/100 units; none however have completely lost their antitoxin. Of the total of 211 children whose blood has been titrated at any interval of time sub-

sequent to immunisation, three only have shown no detectable antitoxin ( $<1/500$  unit) following three doses of toxoid. It is anticipated that when the group of children tested at the four-year interval is completed, more will have lost their antitoxic immunity.

Dr. FitzGerald carried out a study to determine the effect of repeated Schick tests on persons with no demonstrable antitoxin ( $<1/1000$  unit) in their blood serum. The Schick test, with an antitoxin titration previous to performing the test, has been done at four-week intervals. In all six Schick tests and seven titrations have been done on each person. There has been no evidence of antitoxic response. One additional individual, in contrast with the above group, with an initial titre of  $>1/1000 <1/500$  unit, showed an increase in antitoxin one month after the Schick test alone. The antitoxic response to this small antigenic stimulus was strikingly great, namely three-quarters of a unit.

With the co-operation of Dr. Beverley Hannah of the Riverdale Isolation Hospital, diphtheria antitoxin assays have been carried out on sera from persons admitted as diphtheria cases, carriers and suspected diphtheria. Cultures from those persons have also been examined, and correlated with the antitoxin titre of the serum. In some instances the results have been of assistance in arriving at the final diagnosis.

In co-operation with Dr. Grant Fleming, McGill University, Montreal, titrations have been done on the sera of children who have been immunised some years previously. Blood samples were obtained at the time of Schick testing. Serum samples from 49 originally Schick positive children, drawn three months after the administration of alum precipitated toxoid, were titrated. The numbers in each group were small, but the results indicated that two doses of 0.5 cc. amounts were better than one dose of 0.5 cc. or of 1 cc. alum precipitated toxoid.

Dr. Ruth Dow, Alexandra Hospital, Montreal, has been co-operating by sending sera from patients diagnosed as diphtheria and from carriers. Titrations have been compared with the results of examination.

The diphtheria carrier survey of school children in Toronto has been continued in co-operation with the Department of Public Health, City of Toronto. Of approximately 1400 cultures taken in 1938 none were found to be virulent. Routine cultures have been isolated from cases and carriers from the Riverdale Isolation Hospital and from the Hospital for Sick Children. They have been tested for virulence and carbohydrate reactions and dried and added to the collection of diphtheria cultures.

Dr. Brown has carried out an investigation on the use of the Tuberculin Patch Test. In the preliminary trials it is evident that the test is specific. Thus of 382 persons positive to tuberculin as shown by the intracutaneous (Mantoux) test a reaction was not noted with the patch test in any person who failed to react to a Mantoux test. It appears that the patch test is as sensitive as 0.01 mg. of old tuberculin intracutaneously administered and only slightly less sensitive than 0.05 mg. Various modifications of the patch test are being tried in order to obtain data on the most suitable form of application. Dr. Brown is continuing his studies of the pneumococcus with particular reference to the production of rabbit serum for clinical use and the typing of strains. The study of seven groups of the typhoid bacillus as delimited by Dr. James Craigie with bacteriophage has recently been undertaken. The keeping qualities of typhoid vaccine under varying conditions is being followed. The typing of 500 strains of the tubercle bacillus isolated by Dr. A. L. MacNabb of the Department of Health, Ontario, has shown that the incidence of bovine tuberculosis in man is low in this province. The investigation and typing of salmonella strains isolated in Canada is being continued.

Dr. Frieda Fraser and Dr. D. L. MacLean have investigated the use of the tannic acid precipitate of scarlet fever toxin kindly furnished by Dr. M. V. Veldee of the National Institute of Health, Washington. The investigation of the virulence and immunity against different strains of haemolytic streptococci in certain laboratory animals is being continued. Dr. Helen Plummer has compared a strain of haemolytic

streptococcus with the well-known N.Y. 5 strain to determine whether the former may advantageously be substituted for the latter in the routine production of antitoxin. Of 161 stoxigenic strains of haemolytic streptococci, 87 per cent. were distributed throughout 22 agglutinative types. Of approximately 500 strains of Group A haemolytic streptococci 93 per cent. have been placed in one or other of 22 types by Griffith's slide agglutination test. It is suggested that this test is of practical use in epidemiological investigations. Dr. Plummer has been pursuing the investigation of certain of the anaerobes.

Dr. Ronald Hare, with the assistance of Dr. C. H. Yen of Peiping, has made a detailed study of three of the eight strains of influenza virus isolated in 1937 in Toronto. These three strains were the only ones which were successfully adapted to mice. Based upon preliminary investigation it would seem that, upon antigenic analysis, the Toronto strains are alike and closely resemble the New York strains whereas there is an apparent difference between the Toronto strains and those isolated in 1933 in London and in 1934 in Porto Rico. The response in complement fixing and virus neutralizing antibodies in human beings have been studied during an epidemic in cases and contacts. Active immunization of mice has been successful with both living and formalin killed cultures and studies are directed to determine the antigenic value of different strains, living and inactivated virus, and the best methods of inactivation and preservation of the vaccines. Experimental infection in mice has been treated with convalescent serum from ferrets, also from other experimental animals and man whose sera possess a high titre in neutralizing the experimental infection in mice. In collaboration with Dr. Hurst Brown and Dr. Feasby of the Western Hospital 100 nurses are being kept under close clinical supervision and all cases of respiratory tract infection are being investigated clinically and bacteriologically in an attempt to establish methods of accurate diagnosis of these conditions.

During the year the investigation of meningococcus carrier rates in contact and non-contact groups of individuals has been continued by Dr. Silverthorne. The strains of meningococcus isolated from these groups have been studied in respect of their virulence and type distribution. All of the contact carrier strains have been shown to possess fairly high degrees of virulence for mice in contrast to the majority of non-contact carrier strains which are avirulent. The strains from both groups have been found to be largely Type II. Clinical studies of meningococcal meningitis have been pursued and the bactericidal properties of serum investigated.

The production of a dried bactericidal guinea-pig serum using freshly isolated meningeal strains of *H. influenzae* has been continued. This serum which is high in complement value, has been used with anti-influenzal horse serum in the treatment of cases of influenzal meningitis with a few gratifying results. Strains of *H. influenzae* isolated from the spinal fluid of cases of meningitis have been subjected to bacteriological investigation. The typing and virulence tests on these strains have revealed that they are a homologous series and that for the most part are virulent in mice.

The studies on whooping cough by Dr. Silverthorne have been extended. The use of duplicate cough plate cultures in the bacteriological diagnosis of the disease in its early stages has been found to be most reliable. Our studies on active immunization of children using a freshly isolated strain pertussis vaccine have shown that children may be successfully immunized, as compared with an unvaccinated group of controls. The results are promising and the trial is being continued and extended. During the past year a satisfactory lethal test has been developed by producing a fatal septicaemia with *H. pertussis* in a high percentage of mice. Pertussis vaccines used in the prevention and treatment of whooping cough have been tested for their protective value by inoculating previously vaccinated mice with freshly isolated strains of *H. pertussis* suspended in mucin. This test would seem to be of practical value in the laboratory control of the antigenicity of pertussis vaccines.

Dr. J. S. Kitching and Dr. Leone Farrell have contributed two papers (published

in the Journal of Immunology) dealing with the stability, antigenicity of staphylococcus toxoid and with alum toxoid respectively. Other studies in this field dealt with the rate of absorption and excretion of staphylococcus antitoxin; changes in antitoxin following infection in animals and in collaboration with Dr. Wm. Keith, Hospital for Sick Children, in children; staphylococcus antitoxin content of age groups; toxigenicity of strains of staphylococcus and an analysis of their toxins. Mr. R. J. Wilson has investigated a number of strains of staphylococcus from a food-poisoning outbreak. He was able to show the identity of cultures obtained from cases, from food handlers in a bakery and from the incriminated food.

### Section of Chemistry in Relation to Hygiene

Under the direction of Dr. P. J. Moloney the routine production of diphtheria toxoid and Schick test toxin has been carried on as in previous years. Certain changes have been made in the procedure of assaying the toxoid for antigenicity and toxicity. This work has been concentrated in a period of the year in which experience has shown that there is the least likelihood of failure in satisfactorily completing the requisite test of the product.

Investigations carried on by Professor Moloney and Mr. M. D. Orr have been concerned with the following:—

#### 1. The stability of purified diphtheria toxoid.

Very interesting results have already been obtained in the study of the stability of purified diphtheria toxoid, but there would not seem to be at the present time sufficient evidence to warrant the adoption of a method to purify toxoid for general distribution.

#### 2. Further studies of the use of amine precipitated toxoid.

Inconsistencies have been encountered in the antigenicity of amine precipitated toxoid but thus far the precise reasons for them have not been discovered.

#### 3. The reactivity for various diphtheria prophylactics.

This study has been carried to the point where a publication of results seems desirable. A brief summary of the report indicates that "of all the diphtheria prophylactics only toxoid-antitoxin floccules and certain of our amine precipitated toxoids show a lowered reactivity, as judged by either skin reaction or anaphylaxis on guinea pigs highly sensitized to diphtheria toxoid. Moreover, it was shown clearly for toxoid-antitoxin floccules that the lowered reactivity was not due to purity of the toxoid associated with the floccules, but was more likely due to insolubility or slow dissociation of the floccules in the body fluids."

#### 4. The purification of tetanus toxoid: its stability and the possible use of amine precipitated tetanus toxoid.

Dr. Edith M. Taylor has during the year investigated methods for the removal of iron in hogs' stomach autolysate-maltose medium which is used for the production of diphtheria toxin. It would appear that iron occurs naturally in both the autolysate and the maltose. Dr. Taylor's results may be summarised as follows:—

1. Broth for diphtheria toxin production prepared from hogs' stomachs may be sterilised by autoclaving rather than by Seitz filtration without impairing toxin production. It is now apparent that failure to reduce the iron content of the autolysate to suitable concentration prior to autoclaving has been responsible heretofore for the difference in results obtained by the two methods of sterilisation.

2. In order to produce toxin of high potency, iron must be removed from the broth. This has been accomplished by treatment of the broth with infusorial earth.

3. Maltose suitable for diphtheria toxin production has been prepared by a simple and inexpensive method from corn starch.

Dr. M. Doreen Smith, in collaboration with Dr. Joseph Daly and Professor Moloney, has completed a study of the detoxifying action of human bile on diphtheria toxin. It was found that certain samples of human bile possess a heat-labile detoxifying activity similar to that of ox bile, and that the activity is not due to diphtheria antitoxin. Further it was shown that the heat-labile component of this detoxifying system may be replaced by the heat-labile component of ox bile, which alone is inactive. Dr. Smith has also succeeded in improving the method of separating the labile components of the detoxifying system and similarly has effected an improvement in the method of testing bile.

#### Section of Filterable Viruses, Epidemiology, and Biometrics

In the section of filterable viruses, epidemiology, and biometrics a series of interesting studies in virus diseases has been conducted under the direction of Professor R. D. Defries.

Dr. James Craigie and Dr. F. O. Wishart have continued their study of the serology and immunology of vaccine and smallpox viruses. The lability of the immunising fraction of the complex antigen of vaccine virus has been further demonstrated by an examination of the ability of the virus or soluble antigens to combine with neutralising antibody. It has been confirmed that a gross and variable multiple of the amount of virus required to absorb specific agglutinins and precipitins is required to remove neutralising antibody from vaccine-immune serum. The amount of virus required to absorb a given quantity of neutralizing antibody varies from 1,000 to 100,000th of the amount of virus neutralised by the same quantity of neutralising antibody. Further studies are in progress to elucidate this apparent paradox. The investigation has been facilitated by technical advances in the preparation of the large quantities of pure suspensions of vaccine virus necessary for absorption tests. It has been found possible to obtain yields of  $10^{11}$  virus particles from a single rabbit under favourable circumstances. Further improvements in the application of *in vitro* serological tests to the study of vaccine virus have been effected as a result of the study of the influence of the concentration of various electrolytes and of pH on the agglutination and precipitin reactions. For example, the optimal concentration of NaCl for these reactions with vaccine virus has been found to be 1/10 to 1/20 that generally employed in serological reactions. Following a study of vaccinia-infected cells by dark-field observation, ultraviolet photography, and fluorescent microscopy, Dr. Craigie has evolved a staining method whereby the virus of the infected process can be studied in fixed tissue sections. This method permits a much more rapid and extensive examination of infected tissue than has hitherto been possible.

Dr. Craigie has carried out a special study of human blood samples obtained in the pre-paralytic stage of poliomyelitis. These samples were fractionated to exclude the possibility of the making of circulating virus by neutralising antibody. The negative results obtained even after fractionation of the blood confirm the observations of others that the virus of poliomyelitis does not occur in the blood in any significant amount.

Dr. Craigie and Dr. C. H. Yen have continued their investigation of phages whose range of activity is limited to the V or virulent form of *B. typhosus*. They have made a special study of Type II typhoid phage which they had previously found to exhibit a high specificity for the type of strain of *B. typhosus* on which it was propagated. The reactions of some 500 strains of *B. typhosus* to various Type II phage preparations have been studied by special methods elaborated for this purpose. It has been found that by "phage typing" V form strains of *B. typhosus* can be classified into seven main groups and that the results thus obtained show remarkable correlation with epidemiological data. Although surpassing in sensitivity the usual fermentative and serological tests, and permitting a differentiation of strains of *B. typhosus* unobtainable by these methods, the phage-typing method yields results of absolute consistency. The types of *B. typhosus* thus determined appear to

remain fixed on human or mouse transfer. The examination of strains obtained from England show that the same seven types occur in England as well as in various parts of Canada. The type of *B. typhosus* isolated from a case or carrier has been found to be identical with the type occurring in the individual whom he has infected. Outbreaks and epidemics due to each of the seven types of *B. typhosus* have been observed and all, with one exception, have been single-type epidemics. This exception was one in which two different types were recognised in samples of suspected water. The methods which have been elaborated in this study not only provide a new and useful tool for the epidemiological study of typhoid fever but also provide a basis for a serological re-investigation of *B. typhosus* and the possible development of improvements in the specific prophylaxis and treatment of this disease. Another aspect of this study deals with problems concerning the nature and behaviour of typhoid phages as problems in the virus field. Concerning the behaviour of Type II phage, the only satisfactory hypothesis which can be put forward to explain the observed phenomenon is that Type II phage exhibits a regular "mutation" rate and that the various "mutants" of this type of phage are capable of attacking only one of the observed types of *B. typhosus*. The subjects of mutation and cell specificity of viruses are both significant problems in the field of virus research and the investigation is being continued in this direction.

Dr. Defries has continued his studies of rabies virus, confirming the observation that rabbits which have received rabies vaccine by intraperitoneal injection become highly resistant to rabies, even when the virus is inoculated intracerebrally. These studies have shown that a similar immunity can be developed if large doses of vaccine are administered intramuscularly. Practical use has been made of these observations in providing a method to determine the protective value of various preparations of rabies vaccine. It has permitted also the obtaining of definite information concerning the deterioration of vaccine when stored, the effect of temperatures, and the action of various chemicals.

In studying rabies virus, several methods of tissue culture have been studied and observations made of several strains of virus. Successful cultivation of the virus according to the method of Webster has been conducted and one strain has been carried through 28 culture-passages. The successful cultivation of the virus permits of study of its antigens and affords the possibility of an improved type of rabies vaccine. For the past two years rabies vaccine for veterinary use has been supplied to the Government of Trinidad for use in controlling a serious outbreak of rabies among cattle. The supplying of the vaccine has permitted the obtaining of interesting data and the study of a strain of virus from Trinidad.

The occurrence of a severe outbreak of poliomyelitis in certain sections of Ontario, including Toronto, afforded the department the opportunity to conduct several studies. Data were obtained by Dr. J. S. Kitching concerning 500 children, examined at the clinics and not considered to be suffering from poliomyelitis. Subsequent inquiry concerning 335 of these children showed that in only two instances had paralytic symptoms developed. Reference has also been made to the study of Dr. Craigie of blood samples from suspected and known cases of poliomyelitis. An investigation of cerebrospinal fluid from early cases was made by Dr. N. E. McKinnon, with negative findings. The virus of lymphocytic choriomeningitis, also, was not found.

Through funds made available by the Department of Health, Ontario, a field study was conducted to determine the possible value of a prophylactic nasal spray, consisting of one per cent. zinc sulphate, one per cent. pontocaine, and one-half per cent. of sodium chloride. The observations were made possible through the co-operation of the Hospital for Sick Children and the Department of Public Health of the City of Toronto. A total of 4,713 children received two sprayings, an interval of ten days elapsing between the sprayings. A statistical analysis of the results, with the study of a suitable control group, indicated that the nasal spraying, as conducted, had no protective value and further that it could not be considered a practical public health procedure.

Dr. Mary Ross made a detailed analysis of the data concerning a survey of Schick testing conducted in Toronto by Dr. Alan Young and Dr. D. T. Fraser, involving the study of 7,668 Schick tests. A similar analysis was made by Dr. Ross for Dr. Grant Fleming and Dr. B. Benjamin, of Montreal, concerning a group of 1,536 Schick tests. The Department has continued to collaborate with the Department of Public Health of Toronto in the analysis of data concerning children receiving diphtheria toxoid in Toronto. A study was made of the records for the year 1935-6-7, as relating to 40,000 children who received three doses of toxoid. Records are now available concerning more than 150,000 children who have received diphtheria toxoid in Toronto, thus making possible observations of great value in the determination of the effectiveness of diphtheria toxoid in the prevention of diphtheria. Of this number, 119,443 received three doses. Dr. McKinnon has continued his investigation with Dr. Ross of the trends of the mortality from heart disease and cancer. Through the co-operation of a group of representative hospitals, Dr. A. H. Sellers has obtained records of foetal deaths in which autopsies had been made. As a result of this study, recommendations of a suitable classification of the causes of stillbirths have been published. Dr. Defries and Dr. Sellers have prepared a revision of the classification of the causes of morbidity for use in Canada. This work was undertaken in collaboration with the Department of Pensions and National Health, and the Dominion Bureau of Statistics.

Section relating to Hormones, Vitamins, and other Physiological Substances  
(under the direction of Professor C. H. Best)

The effect of heparin on thrombosis of the coronary arteries produced in dogs by the injection of sodium ricinoleate into the lumen of the vessel has been studied by Dr. Best and Dr. Solandt. In the animals which did not receive heparin, thrombosis of the main artery or its branches was consistently observed. In the heparinised animals the incidence of thrombus formation was greatly reduced. Dr. D. L. MacLean carried out the extensive histological studies which formed an important part of this investigation. Mr. L. Jaques in cooperation with Dr. Best has extended the researches on the methods of administration of heparin. Dr. William Thalheimer of New York and Dr. Solandt and Dr. Best have studied the effect of the so-called "exchange transfusions" on the nitrogen retention of nephrectomised dogs. Using a special pump with which 16 litres of blood per hour may be exchanged in each direction between the normal and nephrectomised animals, it has been found that the excess urea may be rapidly excreted by the kidneys of the normal animal.

One phase of the work utilising deuterium-containing fats has been completed by Dr. H. M. Barrett, Miss Ridout and Dr. Best. The sources of the excess fat accumulating in the liver under many different conditions have been determined. Miss Ridout and Dr. Best have continued their work on choline and liver fat. Papers on "Undernutrition and Liver Fat" and "The Relative Potency of Various Factors Affecting Deposition of Fat in the Liver" are in press.

During the past year much of Dr. Scott and Dr. Fisher's time has been spent on new arrangements for the extraction, purification and testing of insulin. Recently the Connaught Laboratories have made regular use of frozen as well as fresh pancreas for the extraction of the hormone. Investigations on the various stages of the purification of this hormone have been continued and these have resulted in the development of a process which is more economical in time and materials than that formerly employed. As a result of the year's work four papers are now ready for publication, namely, "Studies on the Pancreas and Liver of Normal and Zinc-Fed Cats," "The Ash Content of Nickel-Insulin Crystals", "The Insulin and the Zinc Content of Normal and Diabetic Pancreas" and "The Preparation of Insulin". Steps have been taken to prepare a quantity of zinc-insulin crystals and make a solution of these available for general clinical trial.

A new process for the preparation of a purified concentrated solution for

intramuscular injection has been developed by Dr. E. W. McHenry. The procedure eliminates 90 per cent. of the impurities present in extracts prepared by former procedures and gives a solution effective in small dosage. Clinical testing has been made possible by the very helpful co-operation of members of the staffs of the Toronto General and Western Hospitals. During the development of the new procedure a study has been made of the properties of the anti-anaemic factor. Mr. D. W. Overend has determined the free amino-acids present in an active liver fraction. Sufficient information is now available to characterise the factor as a protease.

Dr. G. A. McVicar has examined several tissues for the possible presence of the cortical hormone and has found it to be absent from foetal adrenal tissue, adult kidneys and ovaries. He is continuing an investigation of the rôle of histamine in adrenal insufficiency.

In connection with a study of food consumption by low-income families, Dr. McHenry and several members of his laboratory are co-operating with the committee in charge of the survey. Miss Gavin and Miss Barber have been responsible for the laborious calculations of food values.

Dr. McHenry and Miss Gavin began last fall an investigation of the relation of several of the B-vitamins to fat metabolism. They have secured evidence in rats and in pigeons that vitamin B<sup>1</sup> causes fat synthesis from carbohydrate. This vitamin, riboflavin, and vitamin B<sup>6</sup> have complementary effects upon body weight in young rats; the increase in weight is partially due to an increase in body fat presumably synthesised from carbohydrate.

Mr. E. J. Reedman continued his study of vitamin C under Dr. McHenry's direction until January 1 when he left to accept a position in the United States. He has secured evidence of the existence of a protein-ascorbic acid complex in certain tissues. Repetition of the work of Szent-Györgyi on vitamin P gave inconclusive results although there is some evidence that such a factor exists. In paired feeding experiments Mr. Reedman found that ascorbic acid caused the weight of guinea-pigs to be greater than in the control, deficient group. Since Mr. Reedman's departure, the work on vitamin C has been continued by Miss Margaret Sheppard. She has amply confirmed the effect of ascorbic acid in paired feeding experiments and, in collaboration with Dr. Fidler of the Department of Physiology, has shown that the difference in weight is due to alterations in metabolism. The oxygen consumption of C-deficient guinea-pigs is markedly greater than that of animals receiving the vitamin with the same amount of food. Using the paired feeding technique, Miss Sheppard and Dr. McHenry are studying various effects previously attributed to vitamin C deficiency to determine whether these are caused by vitamin deficiency or by inanition. Indebtedness is gratefully expressed to the Banting Research Foundation for generous grants to Mr. Reedman and Miss Sheppard.

Mr. Philip Bouthillier of the University of Montreal was a guest in the department from April 4 to May 19. In collaboration with Dr. McHenry and Miss Sheppard he studied the estimation of ascorbic acid in urine.

Dr. McHenry's expert collaboration with members of the Scientific Advisory Committee on Nutrition in the construction of a Canadian dietary standard and a report on methods for dietary surveys has been of great assistance in these projects.

The results of an investigation of the radiation factor in the heating of Canadian homes has been published by Dr. Partridge and Dr. MacLean. In this study information regarding all the factors—temperature, air movement, humidity, and radiation—was obtained from dwellings in Toronto and in the rural area. The findings were expressed in terms of effective temperature, equivalent temperature and equivalent warmth. The data for Canadian homes were compared with the values for comfort in English dwellings. The amount of heat loss of a subject by radiation and convection under the ventilation conditions which apply in Canadian houses had been calculated.

Dr. Partridge has continued to use the high gain amplifier to study the function of the various fibres of the vagus nerve and has shown that cardiac depressor fibres

may be identified in certain pulmonary branches of the vagus and that these fibres may act to hasten breathing. Dr. Partridge has another series of experiments in progress which are designed to study the effect on cats of a diet deficient in vitamin B<sup>1</sup>. The study has particular reference to the cardiac changes and the effect of this diet on the nerves of the heart. Amplified records are being made to show the effect of vitamin B<sup>1</sup> deficiency on nerve impulses which have been discovered in a pressor branch of the vagus arising in the right auricle.

In the section of industrial hygiene, Dr. Barrett, in collaboration with Dr. MacLean and Dr. McHenry, secured data which confirmed Forbes, Neale and Scherer's observations of the protective action of xanthine in carbon tetrachloride poisoning.

Dr. Barrett and Mr. J. H. Johnston have continued the work on the fate of trichlorethylene in the body. It has been shown definitely that trichlorethylene conjugates in the body in such a way that the steam distillate of urine from animals that have been exposed to trichlorethylene vapour contains chloroform. Some progress has been made in isolating the conjugated material.

A new reaction for the identification of carbon tetrachloride has been discovered. The reaction is being used in developing a method for the quantitative determination of carbon tetrachloride in air.

#### Farm Section (under the direction of Dr. N. E. McKinnon)

As in previous years the Farm Section has been responsible for the production of various biological products, namely, diphtheria, tetanus, scarlet fever, perfringens and staphylococcus antitoxins, anti-meningococcus and anti-pneumococcus sera, diphtheria toxoid, smallpox vaccine and rabies vaccine. In addition certain experimental sera, including anti-dysentery, anti-B. influenzae and anti-influenza virus, have been prepared.

Distinct improvements in the production of anti-pneumococcus serum have been effected. During the past year very considerable quantities of rabbit anti-pneumococcus sera (types I, II, V, VII, VIII) have been prepared. Therapeutic trials of certain of these sera have been made under the direction of Professor Duncan Graham at the Toronto General Hospital, and in certain other medical clinics. The results thus far obtained suggest that rabbit anti-pneumococcus serum as presently prepared can be given to patients without producing any immediate reaction.

The flocculation test is now used for the preliminary testing of the titre of scarlet fever antitoxin with satisfactory results. The large-scale production of rabies vaccine has been continued. The preparation of heparin is now being carried on under the direction of Dr. Arthur Charles. Greatly improved yields of the material are now being obtained. There is at present great interest in the use of heparin clinically. The recovery of volatile solvents has been carried on, on an even greater scale than in previous years, in the special laboratory constructed for the purpose.

The guinea-pig, rat, mouse and ferret colonies have been maintained most satisfactorily. A very marked increase in the size of the guinea-pig, rat and mouse shipments has been recorded for the present year.

Investigation of various problems closely related to production has been undertaken in the past year.

Dr. Cameron has overcome some of the difficulties encountered in his earlier attempts to repeat Ranc's work on the flocculation of scarlet fever toxin and antitoxin; this procedure is now used to titrate "trial bleeds" and toxin.

Dr. Siebenmann has continued his study of the discoloration of silver foil in the cultures of certain bacteria. He has given considerable attention to investigation of meningococci, their virulence, the lethal potentialities of culture filtrates and their anti-genicity, the titration of anti-meningococcus serum, and the extraction of specific fractions of meningococci. His observations so far show that the filtrate from prolonged culture of meningococci in liquid medium is highly toxic and lethal for

animals, including horses, when administered cisternally or intravenously, that it serves as an efficient antigen for the bacterial antibody but that it does not elicit any antibody which will protect against itself. This work is being carried further. Dr. Siebenmann has made a full chemical investigation of the new well water, its iron content and removal, its aggressiveness, etc., and has now undertaken a more complete chemical investigation of the problems associated with diphtheria toxin production.

Dr. French has studied certain aspects of the nature of antitoxin and toxin-antitoxin union. His observations fail to substantiate the suggestion that refinement of antitoxin by peptic digestion yields antitoxin in purer state or in a smaller molecule than that achieved by other forms of purification. He has studied the fractionation and concentration of the pneumococcus protective antibody in both horse and rabbit immune serum. The complete solubility of the rabbit pneumococcus antibody in distilled water or in low salt concentrations is in marked contrast to the complete insolubility of the horse pneumococcus antibody. This offers the possibility of obtaining very high potency material, in other words a large dose in very small volume, from rabbit serum: an investigation of this possibility is under way. The results of various methods of concentration will be published in the near future. They show that a combination of sodium chloride and ammonium sulphate is superior to other agents.

### The Library

Connaught Laboratories library, which each year is being added to, is accessible not only to members of the staff of the Laboratories but also to graduate and undergraduate students in the School of Hygiene, Faculty of Medicine, School of Nursing and other faculties and departments. Each year Miss Olga Somerville, the Librarian, has recorded an increased attendance of those desirous of availing themselves of the facilities of the library. The files of bound periodicals now numbering 2,425, and the collection of reprints and pamphlets, are particularly valuable for research workers and others interested in the original publications of many of the classical contributions in the fields of bacteriology, immunology, public health, vital statistics, physiology, biochemistry and epidemiology.

During the past year the library fortunately came into possession of a number of especially valuable reprints of early articles by Robert Koch. For these the Laboratories are indebted to the "Robert Koch Institute for Infectious Diseases" in Berlin. As in previous years the library is under obligation to the Canadian Public Health Journal for a number of current periodicals received in exchange by the Journal. Volume IX of the Studies from Connaught Laboratories appeared in February. It consisted of no less than fifty reprints of articles published during the year by members of the staff of the Laboratories.

The translation service carried on by Miss Pichler has been of great assistance to many members of the staff. The collection of translations has been catalogued according to the subjects for reprints, and many translations of earlier and much used papers have been revised and retyped. The bi-weekly indexes have been continued and are most helpful. Current periodicals are sent to the Farm section for the use of the staff, they remain there a brief period and are then replaced by the current numbers of the journals. In this way the library serves as a valuable unifying influence between the University and Farm sections of the Laboratories.

The products made available by the Laboratories were:—diphtheria, antitoxin, tetanus antitoxin, perfringens antitoxin, scarlet fever antitoxin, staphylococcus antitoxin, anti-meningococcus serum, anti-pneumococcus sera, antianthrax serum, diphtheria toxoid, staphylococcus toxoid, Schick-testing preparations, scarlet fever toxins, typhoid vaccines, pertussis vaccines, vaccine virus, rabies vaccines, old tuberculin, pneumococcus typing-sera, preparations of heparin, liver extracts, Insulin, Protamine Zinc Insulin, adrenal cortical extract, pituitary extract (posterior lobe), and epinephrine hydrochloride solutions.

Connaught Laboratories have been happy to receive, during the year, visitors from the following countries:—Canada (Alberta, British Columbia, Manitoba, Nova

Scotia, Ontario, Quebec and Saskatchewan): U.S.A. (California, Idaho, Illinois, Massachusetts, Missouri, New Jersey, New York and Tennessee): Belgium; Ceylon; China; England; France; India; Hungary; Jamaica; Japan; Korea; Panama; Roumania; Scotland; South Africa; Sweden; Yugoslavia.

Western Division (under the direction of Dr. C. E. Dolman)

On October 1st, 1938, the Western Division of Connaught Laboratories will have completed three years of operation, with quarters borrowed from the department of bacteriology and preventive medicine in the Science Building of the University of British Columbia. In this period it has created for itself a position of unique importance in the life of the University, of the medical profession, and of the public health services, of the Province. This position has been attained through rigid adherence to the pursuit of useful but disinterested researches in bacteriology, immunology, and epidemiology; through consultative advice freely given to practising physicians and surgeons, to the honorary medical staffs of hospitals, and to public health organisations; and through the prestige which undoubtedly accrues to the Western Division from its close affiliation with the University, and with the Provincial Board of Health, of British Columbia.

*Staff.*—The staff numbered five, as in previous years. Dr. C. E. Dolman, as research member of Connaught Laboratories, continued to give one-third of his time to supervising, and taking part in, the work of Western Division. In December, 1937, Dr. R. J. Gibbons accepted an appointment as chief bacteriologist to the Laboratory of Hygiene, Department of Pensions and National Health, Ottawa, and commenced his new duties on January 1st, 1938. This loss of so loyal and industrious a colleague was tempered by the satisfaction of knowing that his appointment to this important post was in no way hindered by the period of over two years spent as research assistant in the Western Division. In place of Dr. Gibbons, Dr. K. F. Brandon was appointed, commencing June 1st, 1938, as research assistant in Connaught Laboratories, attached to Western Division. Dr. Brandon will devote two-thirds of his time to research in bacteriology, immunology, and epidemiology, under Western Division auspices. For the remaining one-third of his time, Dr. Brandon will carry certain administrative duties as Epidemiologist to the Greater Vancouver Health Committee, and will also act as Director of the University of British Columbia Health Service.

The laboratory technicians, J. Polglase and V. Bjarnason, continued to give invaluable assistance throughout the year; while the other technician, M. McClellan, who left in May to join the Royal Canadian Air Force, after two years of most satisfactory service with us, has lately been replaced by F. Jefferies.

*Research Work.*—Dr. Dolman has now completed the seventh year of research, under Connaught Laboratories' auspices, into the complex pathogenic and antigenic properties of staphylococcus toxins. During the year under review, the kitten test for staphylococcus enterotoxin, first developed in Western Division, appears to have achieved general recognition as the best available method for detecting this substance. In collaboration with Mr. R. J. Wilson, who held tenure until September 30th, 1937, of a much-appreciated grant from the Banting Research Foundation, Dr. Dolman published the results of further work on the enterotoxin. Evidence bearing on the specific antigenic nature of the enterotoxin was presented, based upon animal experiments, and also upon flocculation reactions in which absorbed reagents were used.

Considerable work has been done upon the mechanism underlying the hot-cold lysis of sheep cells by certain staphylococcus filtrates, a phenomenon which has been attributed to the *B* toxin of staphylococci. Some highly interesting observations have been made regarding the action upon both rabbit and sheep red cell suspensions of staphylococcal filtrates containing a mixture of the *a* and *B* toxins. The important fact appears to have emerged that sheep erythrocytes which have been acted upon by the *B* toxin are rendered to some extent resistant to the action of *a* toxin, and vice versa. The bearing of these findings upon the haemolytic effects which develop

around certain strains of staphylococci growing on blood agar plates has been investigated. The results of this work on the haemolysins, as well as of the work on the enterotoxin, were presented in preliminary form at the Christmas meeting of the Laboratory Section of the Canadian Public Health Association in Toronto. Arising out of these presentations, requests have been received from centres all over the world for strains of staphylococci having characteristics therein described.

*Staphylococcus antitoxin* and toxoid continue to be used in the Province with marked success under appropriate circumstances. The close contact and happy relations which Dr. Dolman has been able to maintain with doctors in charge of cases of severe staphylococcal infection at both the large hospitals has led to some remarkable recoveries from staphylococcal blood stream infection, which it is hoped may later be published in collaboration with the doctors concerned. Dr. J. R. Naden in particular, of the Vancouver General Hospital visiting staff, has demonstrated a keen appreciation of the principles involved in staphylococcus antitoxin therapy. In three or four instances, over a million units of staphylococcus antitoxin have been administered by the intramuscular route. In one recent case, a young girl desperately ill with a septicaemia received about four million units of staphylococcus antitoxin, and eventually made a recovery which could not possibly have been anticipated in the absence of serum therapy. Dr. Naden has gallantly supported the cost of such treatment entailed to the hospital concerned, by the irrefutable argument that the value of a human life saved cannot be measured in terms of dollars spent upon a specific biological product.

In addition to the work on staphylococcus, Dr. Dolman has been very much concerned during the past year with the problem of *Brucella abortus* infection. In collaboration with the staff of the Provincial Board of Health Laboratories, and with graduate students of the department of bacteriology and preventive medicine, important facts bearing upon the Brucellosis situation in and around Vancouver have been discovered. These findings were also presented, in collaboration with Miss V. Hudson, at the Laboratory Section meeting of the Canadian Public Health Association, and have since been published in the "Journal." These findings have lent great weight to the campaign which we have continued to press for the compulsory pasteurisation of all milk sold in Vancouver.

Prior to his resignation from the staff of Connaught Laboratories, Dr. Gibbons completed a valuable trial of the relative merits of the old microscopic smear method and of the new cultural method of determining residual or doubtful gonococcal infection. His findings, which were presented at the Annual Meeting of the Canadian Public Health Association in Ottawa in June, 1937, were published in the "Journal" during the year under review. As a result of his work, the Provincial Board of Health Laboratories decided to make facilities available to the Division of Venereal Disease Control of the Provincial Board of Health for gonococcus culture in suitably selected cases. The technique has proved a most valuable addition to public health diagnostic laboratory methods. This fittingly illustrates what has been pointed out in previous reports—the practical advantages of coordinated activities in the broad field of preventive medicine to all the participating organisations.

Since commencing duties in Western Division, Dr. Brandon has started promising researches into two main fields; first, the epidemiology and bacteriology of typhoid fever, with special reference to the applicability of Dr. Craigie's method of grouping by use of specific Vi phages; and secondly, the epidemiology, bacteriology, and immunology of scarlet fever. This latter disease is always present in Vancouver. The specific biological agents available for its treatment and prophylaxis have not been properly and adequately used by local physicians and institutions, and there are many controversial points in the field of public health administration which have arisen around the problem of the control of scarlet fever. It is believed that useful results, both direct and indirect, would accrue from Dr. Brandon's researches in this field. His position as City Epidemiologist will, of course, facilitate his tracing of the clinical aspects of the problem which he pursues to conclusion in the laboratory,

while the Provincial Laboratories will prove a valuable source of strains of typhoid bacilli and of haemolytic streptococci for his investigations.

In conclusion, it may be pointed out that the Western Division, as it exists at present, is still gravely handicapped through lack of accommodation, while any possibility of future expansion of its activities must be contingent upon more space becoming available. The prestige which Connaught Laboratories holds in the eyes of the University of British Columbia authorities, of public health officials, and of the medical profession in this Province, was never higher, and has unquestionably been enhanced since the establishment of the Western Division. If the opinion of any representative of the foregoing groups were asked, there could be no doubt of their emphatic endorsement of the establishment of the Western Division, and of their desire that it should prosper and expand.

The Director is indebted to the members of the Connaught Laboratories Committee of the Board of Governors for continued support throughout the year; and to his colleagues and to the members of the staff of the Laboratories generally, he is greatly indebted for their collaboration and assistance.

### (23) STATEMENT REGARDING THE MUSEUM OF ARCHAEOLOGY

*(Professor C. T. Currelly)*

During the year 1937-38, the steady growth of the Museum collections continued.

Ninety-one donors presented a large number of objects. Many of these were of very considerable artistic and monetary value; others, while lacking intrinsic value, had distinct importance in relation to objects already in the Museum collections.

Perhaps the most outstanding acquisitions were in the field of European sculpture. Following the 13th century Spanish Madonna and Child reported last year, we obtained three other extremely important pieces, one 12th century Spanish, one 13th to 14th century French, the third 16th century French. One of the interesting Nottingham alabaster carvings of the 14th century, a "Coronation of the Virgin," was also received. Another addition of the highest importance was a carved oak reredos, Flemish work of the 16th century. A masterly piece of carving, it embodies all the chief features of late Gothic art, and is therefore a marvellous teaching piece.

The Egypt Exploration Society as usual sent us some of its finds of the previous season's excavations, in recognition of Sir Sesebi Mond's contribution to its work; these consisted of thirty-nine objects from Sesebi, Nubia. University College, London, also presented over a hundred Egyptian weights, through the kindness of Professor S. R. K. Glanville.

A few pieces of metalwork were obtained, the best of which were a French-Canadian silver chalice of the early 19th century, a Sheffield plate dish-ring, and three pieces of pewter. A church desk of fine design and workmanship and a comb-back Windsor chair were added to the French-Canadian room.

In the department of European ceramics, especially interesting accessions were a beautiful 17th century pottery plate made at Nevers and an early Sevres soft-paste cup and saucer. A dozen pieces of English porcelain included Worcester, Spode, Rockingham and Swansea wares.

Great good fortune attended the glass collection. During the preceding year we had been offered a rare opportunity to acquire a large collection of the finest Irish and English glass of the 18th and 19th centuries. When this collection, nearly three hundred pieces, was put on view, Mrs. R. Y. Eaton very generously paid for it. Through the gift of Lieut. Col. S. R. Heakes, nine more pieces of English and Irish glass of equally high quality were received.

Gifts to the textile department included several 19th and early 20th century dresses and hats, a lace-trimmed linen nightgown and pair of silk stockings worn by Queen Victoria, four pieces of lace, a late 18th century cope of French brocade, and two important Stuart needlework pictures in petit point and other stitches, presented through the kindness of Mrs. H. J. Cody.

One of the most exciting events of the year was our acquisition of a Japanese sutra printed about the year 770. By order of the Empress, a million of these charms were printed, encased in a million tiny wooden pagodas, and presented to a number of the temples. They are the earliest piece of printing known, and though numbers of them survive in Japanese temples, only half-a-dozen are in the possession of European and American museums. Other additions in the department of printing and the book were a work on anatomy from the press of Christopher Plantin, 1566, bound in beautifully tooled leather in 1567, a gift from the late Mr. T. D. M. Burnside; an illuminated manuscript on parchment; a leaf from a French 14th century antiphony, with a beautifully illuminated miniature painting of the Resurrection; thirteen prints by contemporary Canadian and American artists; the copper-plate for the mezzotint portrait of General James Wolfe by R. Houston after Hervey Smith, the gift of Sir Robert Mond. The Post Office Department continued to deposit in the museum a specimen of each new issue of Canadian postage stamps; and a large number of stamps was received through the enthusiasm and energy of Mr. Paul Hahn.

An early bronze libation cup, a "Tammoku" pottery jar, a small iron-rust porcelain vase, and a number of lithographs were the only additions to the Chinese collection. Outstanding in the Japanese department was the acquisition of sixty drawings by Hokusai. Other additions of special interest were twenty-two handsome brocades of the 18th and 19th centuries, seven silver vessels and seventeen pottery tea bowls and jars.

The Near Eastern collections were augmented by two 13th century Persian pottery bowls and three fine Persian miniatures. An interesting Indian miniature was also obtained; and a valued gift was a small plaster head from Afghanistan, illustrating the Graeco-Buddhist sculpture of the 2nd century.

In the ethnological department, a few pieces were acquired by purchase and a large number through the usual steady stream of gifts. The following stand out as specially important: an effigy stone pipe from Ontario; a red obsidian spearpoint from Saskatchewan; six masks and an exquisitely woven cedar basket from British Columbia; Eskimo material from King William Land and Victoria Land; a Nasca pot; a collection of Indo-Chinese material from Laos; a number of S'ora artifacts; and a collection of Central Australian material.

The work of the Museum carpenter shop was concentrated as much as possible on the making of mounts for the ethnological collections and the cabinets of pull-out drawers for the Northern American Indian Study Room, where many thousands of specimens have been arranged geographically. A good start was also made on the storage cupboards, for which the making of gallery cases and mounts had left no time since the reopening of the Museum.

Beside the regular cleaning and preservation of specimens, the preparator's department was able to carry out the special task of cleaning our hundred Paul Kane paintings, which seem to be used more each year in connection with the study of the Indians of Ontario and the West a century ago. A great deal of mounting was also carried out, mainly for the ethnological department.

Satisfactory progress was made in the printing of permanent labels, and in the accession catalogue and the pen-and-ink drawings for the scientific catalogues. Thanks to two new part-time appointments, we were able to give more help to Miss Home in the teaching of the constantly increasing number of groups of schoolchildren and adults who came to the Museum for instruction.

Publication of the Bulletin was resumed after a lapse of five years due to shortage of funds. No. 12 appeared in July, containing Dr. White's description of one of our great Chinese temple frescoes. The other two frescoes will be published in succeeding Bulletins.

Two exhibits of two cases each were arranged to take part in the Royal Ontario Museum's travelling loan exhibits. In the spring we again loaned a gallery for the annual exhibition of the Canadian Guild of Potters.

The two great highlights of the year were connected with the East Asiatic department. One was the opening of the Sigmund Samuel Gallery, housing the great Professor H. H. Mu Library of Chinese books. The other was the Rockefeller Foundation's presentation of a grant, to be paid over a five year period, for the development of teaching and research in Far Eastern subjects. Under the first year's grant, we have been singularly fortunate in securing the services of the Rev. J. M. Menzies, without a peer in his knowledge of early periods of Chinese archaeology.

A hope of many years has been realised in our start at scientific excavation. During the spring it became feasible to plan for two months' work on an Ontario Indian site; and at the beginning of July, a small group under the leadership of Dr. Nash will leave for Aylmer, where a promising site on the farm of Mr. John Pound has been kindly placed at our disposal. I trust that next year's report will announce finds of sufficient scientific interest to have made an auspicious start at what I hope may become a regular part of our year's work.

## (21) STATEMENT REGARDING THE ROYAL ONTARIO MUSEUM OF ZOOLOGY

(*Professor J. R. Dymond*)

A new series of exhibits illustrating various biological principles constitute the most outstanding addition to our gallery during the year. The first three of these illustrate the role of the predator, pyramid of numbers and periodic fluctuations. The exhibit illustrating the economic value of Canada's fisheries has been reconstructed and made much more attractive. A series of enlarged models of small animals including house fly, grasshopper, spider and wood louse should prove of interest. Additions have also been made to the systematic collection of mammals, birds, reptiles, fish, etc.

Additions to the mammals mounted under the Reuben Wells Leonard bequest include grizzly bear, Stone's mountain (black) sheep and four outstanding specimens of the following breeds of dogs.—Saluki, beagle, and Kerry blue terrier.

During the year several temporary exhibits were arranged including work of Technical School are students done in the Museum, Australian shells, nature projects by children, wild-life photographs, aquarium show and tropical butterflies and moths.

The scientific collections shown steady growth as a result of field work, donations and incidental purchases to fill gaps in material obtained by other means. The number of specimens of the more important groups added during the year were as follows: mammals 1217, birds 2322, reptiles 100, amphibians 258, fish (lots) 1286, insects and spiders 11,530, molluses and other invertebrates (lots) 4585.

Accessions to the library were 210 books and 3410 pamphlets. The library now contains 2204 books and 15,615 pamphlets.

Some of the more outstanding donations received during the year were:

Australian Museum, Sydney, Australia (through Miss H. Bain). Collection of 10 species of Australian shells.

Boggs, C. D., International Petroleum Company, Negritos, Peru. Collection of 234 bird skins and 4 sets of eggs from Peru.

Chant, Professor C. A., Richmond Hill, Ontario. Collection of 267 shells, representing 110 species collected in Australia and 1 shell rescued from the university fire of 1890.

Cook, Marshall A., Toronto, Ontario. Mounted sailfish.

Coventry, Professor A. F., Toronto, Ontario. Collection of 73 small mammals, 15 fish, 3 birds' nests and 2 snakes.

Hahn, Paul, Toronto, Ontario. Passenger Pigeon.

Kerr, Charles J., Hamilton, Ontario. 18 journals of his father and brother, John W. and Fred Kerr, Fisheries Inspectors of Hamilton, 1864-1898; 39 early reports of the Fisheries Department at Ottawa, 14 other government reports and 5 books.

- Marsh, Rev. D. B., Eskimo Point, N.W.T. Skin, skull and antlers of a barren ground caribou, 9 fish, 10 birds and 115 insects.
- MacGillivray, G. A., Toronto, Ontario. Diary of Chas. Fothergill.
- Mellwraith, Estate of the late T. F., Hamilton, Ontario. 12 mounted birds including Passenger Pigeon, Mississippi Kite, and Eskimo Curlew.
- National Parks Bureau, Ottawa, Ontario. One Grizzly Bear and skeleton.
- Quentin, Rev. A. P., Toronto, Ontario. 130 skins of birds from West China.
- Toronto Parks Department, Toronto, Ontario. 10 birds, 11 mammals, 9 reptiles, including 2 South American alligators, 2 gila monsters and black and green iguanas.

The Museum study of the fauna of Ontario is being continued through summer surveys in various parts of the province. Our area is in a particularly strategic position so far as certain zoogeographic problems are concerned.

The loan of material to other institutions for use in connection with their researches is increasing year by year. During the past year material has been loaned to the following: Carnegie Museum, Pittsburgh; Philadelphia Zoological Society; Philadelphia Academy of Natural Sciences; University of Minnesota; United States Bureau of Biological Survey; California Academy of Sciences; Dr. H. C. Oberholser.

The Museum is being called on more and more for the identification of material by a great variety of organisations and individuals. Following are some of those for whom material has been identified during the past year; Entomological Branch, Department of Agriculture, Ottawa; Fisheries Department, Ottawa; Dr. C. H. D. Clarke, National Parks Bureau, Ottawa; Dr. D. S. Rawson, University of Saskatchewan; R. A. McKenzies, Biological Board of Canada; Museum of Zoology, University of Michigan.

Through the cooperation of naturalists, sportsmen and other correspondents, the Museum is keeping an annual record of changes in the numbers of many kinds of animals. Such a record will be of increasing value in the future, in researches on animal population. During the past year 369 correspondents supplied such information. Of these 312 came from Ontario.

For the past two years various nature projects with children have been carried out at the Museum. Such projects are especially suited to the new Public School curriculum which emphasises activity on the part of the pupils. Exhibits of the results of these projects which have been held in our gallery have created much interest in this type of work and it is probable as a result that such natural history project work will find its way into the schools.

The number of persons seeking information is steadily increasing as is also the demand for the loan of lantern slides, and other forms of service offered by the Museum.

## (25) STATEMENT REGARDING THE ROYAL ONTARIO MUSEUM OF GEOLOGY

(Professor E. S. Moore)

In addition to the regular work of the Museum, the staff participated in a number of public activities during the year. Three lectures were provided for the Tuesday afternoon series of lectures on Natural History: *The Origin and Decay of Mountains*, by the director, *The Romance of Silver*, by the assistant director, and *The History of the Porcupine Gold Camp*, by Professor G. B. Langford of the university staff. The Museum joined with the Museum of Mineralogy in providing an exhibit which has been displayed in some of the Ontario towns and cities. Several hundred young people, from various centres in the province, have been provided with instruction in geology in connection with excursions to Toronto.

The following additions have been made to the collections:

Donations: Mica from Pontiac country, Quebec, by Dr. E. W. Shaw. Tourmaline from an Ontario locality, by Mr. John Jacob.  
 Striated boulders of unusual type from Ohio, by Mr. K. R. Taylor.  
 Ripple marked sandstone from the Don Valley, by Dr. V. J. Okulitch.

Exchanges: One hundred typical British rocks, from City of Liverpool Free Public Museums, Dr. D. A. Allan, Director.

Purchases: Ores, concretions, petrified wood, meteorite, ornamental stones, and other specimens from eleven states in the United States, and from Mexico, Brazil, Bolivia, England, Germany, Czechoslovakia, Roumania, Siberia, Australia, New Zealand and South Africa.  
 Books for the Museum library.

Collections: Collections of rocks and ores were made by the Director in western Ontario and Haliburton county, and a specimen of folded iron formation by the Assistant Director, in the Kenora district, Ontario.

A very interesting and instructive geological relief model, showing the Lake Iroquois shore line, the topography and the geology in the Toronto-Hamilton-Niagara area, was constructed in the Museum and placed on exhibit.

## (26) STATEMENT REGARDING THE ROYAL ONTARIO MUSEUM OF MINERALOGY

(*Professor A. L. Parsons*)

It is with great regret that the retirement of Professor T. L. Walker as director of this museum is here recorded. His work from the founding of the Museum has been a work of love. During the academic year all his time that could be spared from his university work was devoted to the service of the Museum, and most of his summer holidays were given up to collecting abundantly from Canadian mineral localities. He was ever the first on hand and the last to leave and was a continual source of inspiration to his colleagues in their work.

His work in the past twenty-five years has augmented a good university collection of minerals and rocks, until the Museum has now not only one of the finest gallery displays in America but also a collection which in point of completeness is excelled by few museums in the world. When the history of the Museum, which is now in contemplation, is written, the extent of his services can be better set out. As director *emeritus*, it is hoped that we may have the benefit of his judgment and advice for many years.

Dr. V. Ben Meen devoted the months of July and August to a collecting trip in Northern Ontario and Quebec, securing some striking exhibition specimens which have been put on display and a large quantity of material which is to be used in our exchanges with other institutions.

In addition, our collections have been further enriched by purchase, exchange and donations by friends. Further additions of fine specimens of gem stones have been made from the money provided by the bequest of the late Reuben Wells Leonard, Esq. Additional semi-precious stones from Canada have been added by donations from Dr. J. Satterly and J. C. Rogers, Esq., as well as by purchase from H. L. Richardson, Esq.

The collections have been enriched in new species by a continuing exchange with Harvard University. An exceptionally fine series of minerals from the cryolite deposit at Ivigtut, Greenland, has been received from the Philadelphia Commercial Museum following an expedition of the director, C. R. Toothaker, Esq. Our most extensive exchange has been with the New York State Museum from whom we receive

about two tons of calcite crystals from Sterlingbush, New York, to be used in the reconstruction of a calcite cave. The largest of these crystals weighs 476 pounds. At present most of the crystals have a white or grey coating which must be removed before the final reconstruction of the cave. After the removal of this coating the crystals are bluish purple in reflected light and a beautiful pink in transmitted light. It is expected that the installation of this exhibit may be completed in about a year.

At the request of the Department of Trade and Commerce, the Museum loaned a collection of Canadian semi-precious stones to be incorporated in the Canadian exhibit at the Paris Exposition. A similar lot was displayed in the Museum's exhibit at the Canadian National Exhibition. In collaboration with the Royal Ontario Museum of Geology a collection of minerals, rocks and ores was exhibited at Kitchener and Stratford as a part of the Museum's policy of encouraging loan exhibits in other parts of Ontario.

The automatic balopticon with its series of pictures relating to the mineral industry continues to be an attraction to young and old alike. The exhibit of fluorescent minerals is a never-failing attraction where thousands can see the different effect of ordinary light and ultra-violet light in producing colour in certain minerals. An ever increasing number of students are making use of the systematic collections of minerals and rocks and the paragenetic collections, with most gratifying results.

During the past year several special excursions of school children from other centres in Ontario have come to the museum on Saturdays. This involves extra work by members of the staff of the museum to give instruction to groups in the gallery. Arrangements are being made to continue this extremely important phase of the museum's work during the coming year, which may possibly involve the employment of assistants for the work.

The growth of the educational activities of the Museum as a whole has necessitated the giving up of a portion of our storage space so as to provide room for a children's museum and office quarters for the teaching staff. If the present policy of the Museum is to be continued it will be necessary in the near future to provide additional safe storage for duplicate material.

The routine work of the Museum has been well carried on by the two paid non-scientific assistants, and the part-time scientific assistant curator, Dr. V. Ben Meen, has completed an investigation of an unusual type of cancrinite from Bancroft, Ontario. By special leave he was able to take advantage of the gracious permission of the Assistant Secretary of the United States National Museum to work under the direction of Dr. W. F. Foshag during the month of May and part of June, in improving his knowledge of museum technique and mineral analysis. In the best interests of the Museum it is desirable that this scientific work should be augmented by the assistance of a qualified man who should devote his entire time during the winter months to the service of the Museum.

#### (27) STATEMENT REGARDING THE ROYAL ONTARIO MUSEUM OF PALAEOLOGY

(*Madeleine A. Fritz*)

Considerable attention has been focused on this Museum during the past year owing to the installation in the galleries of invertebrate palaeontology of a magnificent series of mural paintings, the work of the eminent Canadian artist Mr. G. A. Reid. These murals, which are being provided from the funds of the Reuben Wells Leonard bequest, depict in a most striking manner the history of the world from its misty beginnings to the more or less well ordered world as we know it to-day.

Other outstanding exhibits place in the galleries during the past year include:

- (1) A Pleistocene mammal group from the asphaltic deposits near Los Angeles. This group consists of a sabre tooth tiger, two extinct wolves, and a giant sloth. It is accompanied by a painting which greatly aids the imagination

in reconstructing a scene in California characteristic of the time when the skeletons, here displayed, were parts of living animals.

- (2) The skull of a carnivorous dinosaur from the Cretaceous of Alberta.
- (3) Two cases in which Jurassic and Cretaceous sea life may be seen diagrammatically illustrated by a series of life-like models.
- (4) A case showing calcareous structures thought to be formed through the agency of algae that lived during various geological periods. Accompanying the specimens are photographs illustrating extensive limestone formations built up almost entirely of these structures, as well as a map of North America indicating their geological distribution.

In connection with the Museum's general educational program, members of the palaeontological staff have taken care of twenty-one lectures and demonstrations to children from out of town schools, in addition to four Saturday morning lectures to groups of over four hundred Toronto children.

In the series of popular public lectures sponsored by the Committee of Directors the Museum of Palaeontology contributed two.

The following lists indicate the chief acquisitions to the Museum during the past year:

*By exchange*

- Specimen of the extinct Dodo for an unprepared skull of dinosaur (*Anchiceratops*)—Dr. T. Barbour, Harvard University.
- Collection of Australian sponges for a skull of fossil rhinoceros (*Coenopus*) and the skull of an oreodont (*Merycooidon*)—R. Bedford, Esq., Kyancutta Museum, South Australia.
- Collection of Permian brachiopods from India for a set of Ontario brachiopods—Dr. Charles Schuchert, Yale University, New Haven.
- A series of Southern Methodist University publications for collection of publications by Dr. W. A. Parks and others—Dr. C. C. Albritton, Southern Methodist University, Dallas, Texas.

*By donation*

- Two specimens of Devonian fish—Mr. R. G. Stewart, 54 Wychwood Park, Toronto.
- Two coral specimens from Pembroke, Ontario—Dr. V. J. Okulitch, Royal Ontario Museum.
- Algal structure—Mr. M. Frank, Jarvis Street, Toronto.
- Fine specimen of trilobite, *Calymene niagarensis*—Mr. C. E. H. Dowler, 9 Prince Arthur Ave., Toronto.
- Six blastoid specimens from Mt. Coleman, Alberta—Professor A. P. Coleman, Royal Ontario Museum, Toronto.

*By purchase*

- Large collection of invertebrate fossils—Mr. J. E. Narraway, Ottawa, Ontario.
- Large collection of calcareous algae—Dr. C. L. Fenton, West Liberty, Iowa.

*By collection*

- Collection of Humber fossils—Fourth year students.

(28) STATEMENT REGARDING THE EDUCATIONAL WORK OF THE  
ROYAL ONTARIO MUSEUM

(*Helen Reynar, Secretary-Treasurer*)

Owing to the poliomyelitis epidemic last autumn the educational programme planned for the year was considerably upset. Notwithstanding the delay of six weeks in commencing school classes at the Museum, reports on the year's work show a decided increase in attendance over last year.

#### *Out-of-town-Groups*

67 groups of school children (6,131 in all) visited the Museum from towns and cities outside of Toronto: Woodstock, Preston, Ridgeway, Elmira, Uxbridge, St. Catharines, Welland, Oshawa, Collingwood, Sudbury, Peterboro, among others. Included in this number were five large parties from Paris and Brantford, Trinity College School, Port Hope, London, Guelph, and Hastings County who enjoyed one of the popular "Museum Days" inaugurated last year. Assisting on these occasions were members of the Boy Scout Association who gave excellent service in conducting groups from one lecture to another.

#### *Saturday morning lectures and movies*

The Saturday morning illustrated lectures for children were carried on successfully, with a total attendance of 7,269. To prevent overcrowding, a plan was devised whereby the schools of the city were divided into three groups to come to the Museum on the first three Saturdays of the month, the fourth Saturday being reserved for separate and private schools of the city and for schools in the suburbs. Talks followed by moving pictures were given by members of the staff on the exhibits in the museum: "Fishing in the Prehistoric Past"—movie: "The Lost World; This Changing World"—movie: "Volcanoes, Glaciers, etc."; "Life in Egypt"—Movie: "Daily Life of the Egyptians"; "The Beaver"—Movie: "Grey Owl films".

#### *Open Evenings*

Six "Open Evenings" were held during the season, with an attendance of 998. The first Wednesday evening of the fall and winter months is reserved for clubs and societies who arrange in advance for special lectures in the galleries, one floor being open each evening. Among the groups were the following: The Runnymede Dramatic Reading Club, University Chapter of Royal Arch Masonry, Workers Educational Association, Boy Scout Leaders, Ontario Hunters and Game Protectors Association, the Zonta and Soroptomist clubs.

#### *Travelling Exhibits*

Special selected exhibits have been sent on loan to Kitchener and Stratford in rotation for display in the public libraries. In connection with a zoology exhibit, Mr. Lester L. Snyder lectured in both cities on "The Effects of Civilization on North American Bird Life"; Professor Ellis Thomson spoke on "Gems" and Dr. V. Ben Meen on "Minerals as a Hobby" the former at Kitchener, the later at Stratford when the mineralogy exhibit was opened; in connection with the "Arms and Textiles" exhibit, Dr. Currelly lectured at Kitchener on "The Romance of your own Job", and in Stratford, with the Egyptian exhibit, on "Egyptian Tombs". At present there is a representative collection of Chinese objects in Kitchener. These loan exhibits are creating a great deal of interest and are attracting many visitors, as well as serving as excellent illustrative material for the schools.

#### *Pay Courses*

Following her usual practice, Miss Ruth M. Home arranged two pay lecture courses, one on Pottery and Porcelain" with a registration of 62; the other on "The Modern House" with 35 in attendance.

In order to assist the teachers of Grade IV in new work required under the New Curriculum, a special course of 12 lectures was arranged for Thursday afternoons, with Professor T. F. McIlwraith and Miss Home in charge. 72 teachers availed themselves of this opportunity to gain information about "The African Negro", "Peoples of the Pacific", "The Eskimo", "Men of the Old and New Stone Age", "The Coming of Metal", "Communication", "Invention of Writing", etc.

#### Tuesday public lectures

For the fifth consecutive season the popular Tuesday afternoon lectures were continued under the auspices of the Committee of Directors, a series of seven archaeological lectures before Christmas, followed by ten on natural history subjects after Christmas. There was an attendance of approximately 3,500 at these lectures.

#### Miss Payne's public school classes

During the school year Miss Lilian J. Payne, teacher at the Museum under the Board of Education, lectured to 22,885 children in 601 classes. Four classes from the VII and VIII Grades visit the Museum daily. The pupils of other Grades are taken care of by Miss Home and Mr. F. A. Urquhart.

To meet the steadily increasing demands for lectures especially from the lower grades of the public schools and schools from out of town, the Board of Trustees appointed Miss Sylvia Hahn and Mrs. Stella Gould for part-time service during the busy months, and for the coming year Miss Ella Martin, M.A., Oxon. has been added to the staff as full-time assistant to Miss Home.

Steadily increasing use of the Museum is being made in connection with undergraduate university classes and by students in the School of Graduate Studies. This applies in particular to the students registered in Fine Arts.

The total attendance at the Museum during the year ending 30th June, 1938, was 268,872.

### (29) REPORT OF THE DIRECTOR OF THE DAVID DUNLAP OBSERVATORY

*(Professor R. K. Young)*

During the year 1937-38 the 74-inch telescope as constructed by the Sir Howard Grub Parsons & Co. has continued to operate efficiently. At the time of its construction no facilities were available for coating the large mirror with the newly discovered aluminum or chromo-aluminum coating. Since the opening of the observatory we have used the chemical method of a silver deposit on glass. Apart from the labour involved in the latter process which has to be repeated two or three times per year the aluminum is a much superior reflector and lasts for several years. At least one company in the United States is now prepared to handle disks as large as 76 inches and we hope to be able to coat the mirror with aluminum in the not too distant future. If time is available a suitable apparatus of doing the secondary mirrors will be constructed in our own workshops.

As mentioned in the report of last year the need is felt of subsidiary pieces of apparatus. During the year we have put the 19-inch telescope into operation and made the upper end of the tube rotative. A self-recording microphotometer has been constructed in the workshops and the temperature control of the Hilgerspectrograph is being converted to the Wheatstone bridge method.

The number of clear working hours was about the same as last year, 1275 and during this time 1216 plates were secured. During the year there were 2730 visitors to the observatory.

Accessions to the library number 207 as follows: gifts 68, purchase 38, exchange 11, from R.A.S.C. 37. There are now 3296 volumes in the library of which 1702 are on loan from the Royal Astronomical Society of Canada.

On the afternoon of Tuesday, April 25th, four oak trees were planted in front of the observatory. The ceremony was informal. Trees were planted by Mrs. Jessie Donalda Dunlap, the donor of the observatory, Sir William Mulock, Mr. Moffat Dunlap and Professor Chant. This forms an auspicious start to the eventual reforesting of the large observatory grounds.

A bi-weekly seminar has been inaugurated by members of the staff to facilitate covering recent astronomical literature.

### (30) REPORT OF THE OFFICER COMMANDING THE U.O.T. C.O.T.C.

(*Lt.-Col. H. H. Madill, V.D.*)

I have the honour to report on the activities of the University of Toronto Contingent of the Canadian Officers Training Corps for the academic year 1937-38 as follows:

The membership in the contingent, which showed a slight increase over the previous year, was distributed as follows:

Headquarters .....	7
"A" Coy (University College) .....	45
"B" Coy (Medicine & Dentistry) .....	75
"C" Coy (App. Science & Forestry) .....	94
"D" Coy (Arts other than U.C.) .....	70
Attached from other units for instruction .....	15
Attached from other units for duty .....	3
	309

Enlistment in the corps is voluntary and the primary object of the training is to prepare candidates for War Office Examinations for Certificates "A" (lieutenant) and "B" (captain) in the various Arms of the Service. This training is obtained with the least possible interference with a civil career and in case of a national emergency holders of these specialised qualifications may perform the service for which they are best suited and which would be of the greatest benefit to the country, while their liability for service is no greater than that of any other Canadian citizen.

The examination consist of Part I, practical, and Part II, written, and cannot be taken before the second year of service. In 1937, seventy-six per cent. of the U. of T. candidates were successful in obtaining certificates. The 1938 results are not yet available, but 62 candidates took the Part II examinations and the following were successful in the practical examinations:

"A", Artillery .....	8	"A", Infantry .....	21
"B", Artillery .....	5	"B", Infantry .....	10
"A", Arty Survey .....	1	"B", Machine Gun .....	1
"A", Engineers .....	4	"A", Medical .....	6
"A", Signals .....	3	"B", Medical .....	1

Other qualifications obtained were,—

Signals—Visual Telegraphy .....	8	Line Telegraphy .....	12
Wireless " .....	2		
Canadian Small Arms School—"A" Wing .....	1		

The parades were held by companies twice a week of one hour duration and a battalion parade in uniform was held once a month at the University Avenue Armouries.

The course in rifle shooting was conducted for all ranks on the miniature range in Hart House and three prizes presented in each company and one to the best shot in the contingent.

The Contingent was honoured in having Sergeant G. H. Elms selected as a member of the Canadian Contingent which took part in the ceremonies in London at the

Coronation of Their Majesties, King George VI and Queen Elizabeth on 12th May, 1937.

The Annual Inspection was held on Friday, 13th March, by Brigadier W. H. P. Elkins, C.B.E., D.S.O., and his staff who, after the ceremonial parade, inspected the members of the corps while conducting their work in the various arms. Brigadier Elkins presented the prizes for shooting and expressed himself as well pleased with the work which is being conducted.

### (31) REPORT ON THE ACTIVITIES OF THE STUDENTS' ADMINISTRATIVE COUNCIL

(*E. A. Macdonald, B.A., Secretary-Treasurer*)

Provision was made in the University Act of 1906 for the Students Administrative Council to act as the representative body of the students of the University of Toronto and to afford a recognised means of communication between the university authorities and the student body. Since that date the scope of its activities has greatly increased.

The Students' Administrative Council is composed of the presidents or the elected heads of every official undergraduate body, both men and women, of every college and faculty which go to make up the University of Toronto. It is, therefore, a thoroughly representative university organisation and is a powerful unifying force in the University. In addition, there are two members of the staff appointed by the President as his representatives on the Council, Professor S. N. F. Chant, and Professor J. R. Cockburn; there is also the president who must be a graduate of not more than five years standing, the general secretary-treasurer and the associate secretary.

The work of the Council is carried on by five important sub-committees, the Publications Committee, the Finance Committee, the Debates Committee, the Sporting Activities Committee and the Loan Committee. The committees meet previous to each meeting of the Council and present their reports to the Council for their approval.

The publications of the Council include the *Students' Handbook*, which is given free of charge to every undergraduate on registration in the fall. This book contains much valuable information about the University having the names, addresses and telephone numbers of every officer of every undergraduate society and organisation of every faculty and college in the University. The advertising which the book contains covers the cost of the book and allows as well a small profit on the book. A hundred issues of the *Varsity* are published throughout the term, five days per week. Approximately 6,000 copies are printed per day. A staff of 125 students is responsible for the news and feature writing and the technical work of producing the paper which is supervised by the Publications Committee of the Council. The editor of the *Varsity* and the associate editors, heads of departments, are paid salaries by the Students Administrative Council. *Torontonensis*, the annual year book, is produced each year, 1,350 copies being printed. Each member of the graduating class receives a book which is a very important historical record of undergraduate activities of the University. It contains the photograph and biography of every member of the graduating class, messages from the President and from the Deans of Faculties and Heads of Colleges, a photograph of every undergraduate organisation in the University as well as every athletic team in the University. It is a book very dear to every student in the graduating class. Both the *Varsity* and *Torontonensis* are great unifying forces in the University as students from every college and faculty in the University are on the staff of both these publications.

The Council again this year paid for one half the cost of printing the university directory of staff and students amounting to \$756. Financial aid was given to the University Drama Committee and a contribution was made to the Student Conference in Winnipeg, in December. The Council holds membership in the National Federation of Canadian University Students and is, by far, the largest financial contributor to this organisation. The Debates Committee was responsible for arranging debates with other Universities. A debating team from the University of Melbourne, Australia, visited the University of Toronto in the fall, a contribution to their expenses being made by the Students' Administrative Council and they were entertained by the Council while visiting the University of Toronto. In co-operation with the Osgoode Hall Legal and Literary Society, the Council financed and made arrangements for a debate with two representatives from Laval University. This Debate was held in the Trinity College Library. The Council sent two representatives to McGill University to take part in an intercollegiate debate there. The Committee on Sporting Activities looked after the organisation and administration of the University of Toronto band. New uniforms were provided for the band at a cost of \$1500 during the past year. The band has a membership of 55 students and is also a representative university organisation as students from every part of the University are members of the band. The Council sent the band to the out of town games with the football team and arranged for special excursions for students to these games as well. The band played at all the home games. The cheerleaders and the skits at half time at the Rugby games come directly under this Committee. In consultation with the men's and women's athletic directorates, the Students' Administrative Council recommended that a three dollar fee be imposed on all students which would cover their admission to football and hockey games to the stadium rink on certain days, the opening of Hart House athletic facilities at night and those of a women's building should such become available, as well as affiliations with outside clubs for certain sports for which the University lacks facilities. The undergraduate body voted by a great majority in favour of the plan and upon the request of the Council the Board of Governors imposed a fee for the 1937-38 session.

To train students in the field of symphonic music, the Students' Administrative Council organised the University of Toronto Symphony Orchestra, and purchased for this orchestra a valuable musical library to which additions are made each year. The orchestra is conducted by an undergraduate in the University and has more than 75 members at the present time, who like the members of the University band are selected from every constituent part of the University. The orchestra gives a concert, free of charge, for the student body in Convocation Hall each year.

The Council was host to a party of students from Finland comprising the Helsinki University Chorus in January. These students were welcomed by the President in the Senate Chamber and were given tea in Hart House by the Council. It was also host to a party of German Exchange students who visited the University in April.

The Loan Committee of the Council is composed of a member of the Board of Governors, Mr. J. J. Gibson, and the permanent officers of the Council. Mr. Gibson acts as chairman of the Committee. A total appropriation of \$8500 has been made from the surplus funds of the Council for the purposes of loans. This has been of the greatest help to a large number of students making it possible for them to complete their university course and graduate. That this assistance has been greatly appreciated is shown by the fact that students make these loans a first charge on their earnings after they have become established, and repayments have been so satisfactory that to date it has been possible to loan \$18000. The Council wishes to record the great debt it owes Mr. Gibson and to express its sincere thanks to him for his help in the administration of this fund. He has given freely of his time in interviewing students who apply for loans, and his judgment and wide experience are responsible more than any other single factor for the successful operation of this fund.

In addition to this loan fund a number of services have been carried on in the office of the Students' Administrative Council which have been of great value to the student body. The housing service is proving a great benefit to a large number of students. Rooms in boarding houses adjacent to the University are given a most rigid inspection during the summer months and the information is recorded on a card index in the Council office. As the Council is responsible to the owners of the houses for the students whom they send to them it is possible to get a much lower rate than the individual student could obtain. Each year, during the inspection a number of homes are recorded as not being proper places in which the students should live. Parents, of the first year students particularly, rely to a very great extent on the Students' Administrative Council to get the proper accommodation for their sons and daughters. One result of this activity has been that each year a number of homes are obtained who will provide free board and room in exchange for services about the house and this is of the greatest help to students who are in difficult financial circumstances. This was made possible for fifty-six students attending the University during the past year.

Recognising the need for some vocational guidance and employment service for students in the University, in 1933 an Employment Bureau was established. Contacts with employers were made first through the advertisers in the Council's publications. This year the employment bureau has become well known amongst employers owing to the fact that the persons sent to fill the various positions available were selected with care of proved satisfactory. The employment bureau is becoming one of the most important activities of the Students' Administrative Council. Many students rely to a great extent on this service to finance their university course. The bureau is chiefly concerned with providing summer, Christmas and part-time work, but in the past few years a number of permanent positions covering a wide field have been obtained for students when they graduate. During the past academic year, 1486 students were referred to positions and this year the number will be even larger. It is proposed next year to establish a permanent committee of the Council on Student Employment and Assistance.

The employment bureau, the loan fund and the housing service have made possible a large number of students continuing their university course, finally graduating and becoming established in a profession which otherwise would not have been possible. So much have these services been appreciated by certain students, that, entirely unsolicited, this year a sum of money amounting to \$900 was given to the Secretary-Treasurer of the Students' Administrative Council, without condition, to help worthy students who require assistance. The Council wishes to record its most grateful thanks to the donors of this money.

The activities of the Council so greatly increased that the office space in Hart House was not adequate to cope with the large number of students using the facilities of the Council. Consequently the Board of Governors provided increased accommodation in Hart House, and the Council now enjoys larger rooms which are satisfactory in every particular. The Council would like to record here its grateful appreciation to the President of the University for his whole-hearted and kindly interest in its affairs which is responsible in no small degree to larger space being provided. They also wish to record their appreciation and their sincere thanks to the Board of Governors of the University who provided the accommodation and to the acting Warden of Hart House, Mr. J. R. Gilley, and the Board of Stewards of Hart House for their interest and their co-operation in this matter.

At the opening of term in October the members of the Council were guests of the President and Mrs. Cody at dinner. Members of the Council representing the student body took part in the service of remembrance at the Hart House tower on November 11th.

Dr. W. Bryden, Warden of the Students' Union of the University of Melbourne, Australia, visited the Council and attended a meeting in December. Dr. Hannah of

the Associated Medical Services also attended a meeting of the Council and explained to them the work of his department.

The Council this year were again hosts at the Garden Parties given on June 9th and 10th following the conferring of degrees. The President and Mrs. Cody, President of the Council, the Vice-Presidents of the Council, the President of the Engineering Society, the President of the Medical Society, and the President of the Dental Parliament received the guests at the Thursday Garden Party. At the Friday Garden Party, the President and Mrs. Cody, and the President and Vice-President of the Students' Council received the guests. Through the co-operation of the Council, the graduation ball was again held in Hart House on Friday, June 10th. This was again by far the largest social event of the year. 2,693 guests attended it. The arrangement for this function was carried out in the Council office.

A second hand Book Exchange is operated in the women's office for the benefit of all women students and many hundreds of books are brought in and resold each year.

## APPENDIX B

## REPORT OF THE REGISTRAR

(*A. B. Fennell, Esq., M.A.*)

I beg to submit the following statistics for the year ending June 30th, 1938:—

- (a) Distribution of the staff of the University and University College (furnished by the Bursar).
- (b) Distribution of the staffs of the federated Arts Colleges (furnished by the Registrars of the colleges).
- (c) Registration of students by faculties and years.
- (d) Enrolment in the Arts Colleges (furnished by the Registrars of the colleges).
- (e) Enrolment in the university department in Arts (furnished by the departments).
- (f) Registration in courses in the Faculty of Arts.
- (g) Registration in courses in the School of Graduate Studies (furnished by the Secretary of the School).
- (h) Results of annual examinations (furnished by the Secretaries of the faculties).
- (i) Admission to degrees.
- (j) Admission to diplomas and certificates.
- (k) Geographical distribution of students (furnished by the Secretaries of the faculties).

**(a) Distribution of the Staff of the University and University College:**

Instructors .....	4	..	13
Fellows .....	5	2	..
Readers .....	1	2	..

**(c) Registration of Students by Faculties and Years:**

The number of students registered in the university, in colleges and faculties, in the session 1937-38 was 7,232, distributed as follows:

	Men	Women	Total
Faculty of Arts .....	2,239	1,724	3,963
University of Toronto .....	733	516	1,249
University College .....	610	502	1,112
Victoria College .....	416	453	869
Trinity College .....	227	136	363
St. Michael's College .....	253	117	370
Faculty of Medicine .....	771	72	843
Faculty of Applied Science and Engineering .....	832	1	833
Faculty of Household Science .....	...	41	41
Ontario College of Education .....	379	330	709
Faculty of Forestry .....	31	...	31
Faculty of Music .....	28	21	49
School of Graduate Studies .....	432	151	583
Faculty of Dentistry .....	190	22	212
Registered twice .....	22	10	32
	4,880	2,352	7,232

In departments there were registered 628, distributed as follows:

	Men	Women	Total
Department of Social Science .....	9	55	64
School of Nursing .....	...	466	466
Physical Education for Women .....	...	24	24
University Extension (Occupational Therapy) .....	...	40	40
University Extension (Physiotherapy) .....	...	34	34
	9	619	628

The grand total of registration for the whole university was 7,861, of whom 4,889 were men and 2,952 were women.

In addition there were 5,801 persons registered in the Department of University Extension in courses and at provincial centres which are referred to in detail in Appendix A (14).

The figures may be further analysed as follows:

**Faculty of Arts***University of Toronto*

	Men	Women	Total
Teachers' Classes and Summer Session .....	447	478	925

**(e) Enrolment in the University Departments in Arts:**

The following tables exhibit the numbers attending lectures in the university departments in the Faculty of Arts, together with the number of those taking the practical work in the laboratories:

## Department of Anthropology

	Pass	Pass and Honour	Honour
Faculty of Arts—			
First Year .....	137	80	24
Second Year .....	..	7	23
Third Year .....	..	1	16
Fourth Year .....	..	38	14
School of Graduate Studies .....	..	..	12
Department of Social Science—			
First Year .....	..	..	13
Totals .....	137	126	102

## Department of Applied Mathematics

	Pass	Pass and Honour	Honour
Faculty of Arts—			
First Year .....	8	..	..
Second Year .....	5	..	30
Third Year .....	..	..	27
Fourth Year .....	..	..	17
Occasional Students .....	..	..	1
Faculty of Applied Science and Engineering—			
Second Year .....	..	35	..
Third Year .....	..	6	..
Fourth Year .....	..	6	..
School of Graduate Studies .....	..	..	17
Totals .....	13	47	92

## Department of Archaeology

	Lecture Courses	
	1 or 2 or 3 hours	
	Honour	
Faculty of Arts—		
First Year .....		10
Second Year .....		17
Third Year .....		7
Fourth Year .....		16
Totals .....		50

## Department of Astronomy

	Pass	Pass and Honour	Honour	Laboratory
Faculty of Arts—				
First Year .....	12	..	..	12
Second Year .....	7	35	..	7
Third Year .....	5	..	16	21
Fourth Year .....	..	..	8	1
Faculty of Applied Science and Engineering—				
Second Year .....	..	..	14	..
Totals .....	42	35	38	41

## Department of Biology

	Lecture Courses			Laboratory Courses	
	1 or 2 or 3 hours		4 or 5 or 6 hours	Pass	Honour
	Pass	Honour	Honour	Pass	Honour
Faculty of Arts—					
First Year .....	208	113	..	97	113
Second Year .....	72	93	..	72	93
Third Year .....	57	32	9	57	24
Fourth Year .....	..	12	2	..	15
Occasional Students .....	..	2	..	..	2
Faculty of Medicine—					
First Year .....	..	145	..	..	145
Third Year .....	..	7	..	..	1
Faculty of Household Science—					
First Year .....	..	8	..	..	8
Faculty of Forestry—					
First Year .....	..	8	..	..	8
Fourth Year .....	..	6	..	..	6
School of Graduate Studies.....	..	..	..	..	38
Faculty of Dentistry—					
First Year .....	..	31	..	..	31
School of Nursing.....	15	..	..	15	..
College of Optometry of Canada.....	..	34	..	..	34
Totals .....	352	491	11	241	518

## Department of Botany

	Lecture Courses		Laboratory Courses	
	1 or 2 or 3 hours		Pass	Honour
	Pass	Honour	Pass	Honour
Faculty of Arts—				
First Year .....	9	122	9	122
Second Year .....	14	14	14	14
Third Year .....	13	5	13	5
Fourth Year .....	..	5	..	5
Occasional Students .....	2	7	..	7
Faculty of Applied Science and Engineering				
First Year .....	..	..	68	..
Faculty of Household Science—				
First Year .....	7	..	7	..
Faculty of Forestry—				
First Year .....	..	8	..	8
Fourth Year .....	..	..	..	6
School of Graduate Studies.....	..	21	..	..
Ontario Agricultural College.....	..	2	..	..
Ontario College of Pharmacy				
First Year .....	121	..	121	..
Second Year .....	104	..	104	..
Totals .....	270	184	336	167

## Department of Chemistry

	Pass	Pass and Honour	Honour	Laboratory
Faculty of Arts—				
First Year .....	195	..	167	253
Second Year .....	56	..	93	121
Third Year .....	37	..	26	56
Fourth Year .....	1	..	15	15
Occasional Students .....	..	..	7	1
Faculty of Medicine—				
First Year .....	..	150	..	150
Second Year .....	..	126	..	104
Faculty of Applied Science and Engineering—				
First Year .....	..	83	..	83
Second Year .....	..	87	..	86
Third Year .....	..	125	..	123
Fourth Year .....	..	11	..	11
Faculty of Household Science—				
First Year .....	..	6	..	6
Second Year .....	..	4	..	..
Faculty of Forestry—				
First Year .....	8	..	..	8
Second Year .....	11	..	..	3
School of Graduate Studies .....	..	..	64	26
Faculty of Dentistry—				
First Year .....	..	31	..	31
Second Year .....	..	47	..	47
Third Year .....	..	39	..	39
Ontario College of Pharmacy—				
First Year .....	122	..	..	122
Second Year .....	104	..	..	104
Totals .....	534	709	372	1,389

## Department of Fine Art

	Pass	Pass and Honour	Honour
Faculty of Arts—			
First Year .....	26	..	8
Second Year .....	33	17	6
Third Year .....	31	22	..
Fourth Year .....	..	24	..
Occasional Students .....	5	..	..
School of Graduate Studies .....	5	..	..
Totals .....	100	63	14

Department of Food Chemistry  
(Faculty of Household Science)

	Pass	Pass and Honour	Honour	Laboratory
Faculty of Arts—				
Second Year .....	31	..	..	31
Third Year .....	14	..	..	14
Fourth Year .....	..	..	28	28
Faculty of Household Science—				
Second Year .....	..	5	..	5
Third Year .....	18	..	..	18
Fourth Year .....	..	..	4	4
School of Graduate Studies .....	..	..	4	4
Totals .....	63	5	36	104

Department of Geography

	Pass	Pass and Honour	Honour	Laboratory
Faculty of Arts—				
First Year .....	..	170	..	170
Second Year .....	..	75	..	75
Teachers' Classes .....	..	125	..	125
Ontario College of Education .....	250	..	..	..
School of Graduate Studies .....	..	..	1	..
Totals .....	250	370	1	370

Department of Geology and Palaeontology

	Lecture Courses						Laboratory Courses	
	1 or 2 or 3 hours		4 or 5 or 6 hours		7 or more hours			
	Pass	Honour	Pass	Honour	Honour	Pass	Honour	
Faculty of Arts—								
First Year .....	128	57	..	..	..	..	..	
Second Year .....	45	23	..	..	..	24	23	
Third Year .....	9	..	..	12	..	9	12	
Fourth Year .....	..	..	..	5	4	..	10	
Teachers' Classes .....	117	..	..	..	..	117	..	
Occasional Students .....	2	..	..	..	..	..	..	
Faculty of Applied Science and Engineering—								
Second Year .....	92	..	..	..	..	34	..	
Third Year .....	50	..	2	..	..	32	..	
Fourth Year .....	32	..	..	..	..	32	..	
Faculty of Forestry—								
Second Year .....	12	..	..	..	..	..	..	
Third Year .....	5	..	..	..	..	..	..	
School of Graduate Studies .....	..	..	..	8	10	..	19	
Totals .....	492	80	2	25	14	248	64	

## Department of History

	Lecture Courses			
	1 or 2 or 3 hours		4 or 5 or 6 hours	7 or more hours
	Pass	Honour	Honour	Honour
Faculty of Arts—				
First Year .....	117	140	..	..
Second Year .....	120	26	55	..
Third Year .....	80	..	79	10
Fourth Year .....	2	..	39	5
Teachers' Classes .....	56	..	..	..
Occasional Students .....	2	1	2	..
School of Graduate Studies .....	..	10	22	..
Department of University Extension Evening Classes .....	50	..	..	..
Totals .....	427	177	197	15

Department of Household Science  
(Faculty of Household Science)

	Pass	Pass and Honour		Laboratory
		Honour	Honour	
Faculty of Arts—				
First Year .....	..	..	56	..
Second Year .....	16	..	33	49
Third Year .....	9	3	30	42

	Passed	Conditioned	Failed
First Year .....	22	9	..
Second Year .....	38	11	..
Third Year .....	25	13	1
Fourth Year .....	32	4	..
Fifth Year .....	31	2	1
Dental Nurses .....	18	1	..
Total.....	166	40	2

### Departments

The numbers examined in the different departments of the University, including those persons granted standing for military service, were as follows:

Arts:	
Fourth Year .....	336
Third Year .....	708
Second Year .....	792
First Year .....	959
Pass Course for Teachers .....	1,060
Graduates (Specialist Standing) .....	54
	3,909
Medicine:	
Sixth Year .....	113
Fifth Year .....	135
Fourth Year .....	137
Third Year .....	127
Second Year .....	120
First Year .....	140
Candidates for Degree of B.Sc. (Med.) .....	6
Candidates for Diploma in Public Health .....	18
	796
Applied Science and Engineering:	
Fifth Year .....	8
Fourth Year .....	147
Third Year .....	171
Second Year .....	220
First Year .....	269
	815
Household Science .....	38
Education .....	628
Forestry .....	31
Music .....	57
Graduate Studies .....	500
Dentistry .....	208
Social Science .....	61
School of Nursing .....	106
Physical Education for Women .....	24
University Extension:	
Occupational Therapy .....	40
Physiotherapy .....	34
Law .....	7
Pharmacy .....	248
Agriculture .....	117
Veterinary Science .....	54
Local Examinations in Music .....	13,482

UNIVERSITY OF TORONTO  
SUPERINTENDENT'S OFFICE

---

SUPERINTENDENT'S REPORT  
1937-38

---

NEW CONSTRUCTION

There has been no new construction of a major nature started during the year, but additions to the Royal Ontario Museum, the Hygiene Building, and at the Connaught Laboratories Farm bring the expenditure under this item to approximately \$60,000.00.

BUILDINGS (MAINTENANCE)

The expenditure for Repairs and Renewals on University buildings and the Royal Ontario Museum amounted to approximately \$83,000.00, which is less than one-half of one percent. of the value of the buildings. Until such time as this amount, which is used largely in maintaining the fabric and mechanical services, can be increased, such items as lighting and decoration cannot be kept up to the desired standards.

The regular yearly practice of testing all fire hose has been followed, and the necessary replacements made. Chemical extinguishers have all been inspected and special extinguishers provided for unusual hazards. I wish to acknowledge the co-operation of the Toronto Fire Department in dealing with our problems.

In addition to the 58 buildings directly supervised by my office, heat and electricity are supplied to Victoria University, Wycliffe College and Knox College, and a small amount of power to Trinity College.

The expenditure for fuel was approximately \$105,000.00. The consumption of electricity continues to increase. Due to the lack of funds and the inadequacy of our generating and distribution systems, this growth is checked as much as possible, even to the extent of lagging behind accepted practice. Funds are being made available next year which will enable us to increase the voltage on some of our system, where low voltage due to overload has made the lighting very poor.

EMPLOYEES AND WORKSHOPS

The average number of employees working for the office, exclusive of contracts, was 274, tradesmen accounting for 80 of this number. The merchandise distributed through the Superintendent's Stores amounted to approximately \$101,000.00. The salary and wage items amounted to approximately \$324,000.00. This figure includes

services rendered through my office to Connaught Laboratories, Hart House, the Athletic Association, etc., the Royal Ontario Museum, and the colleges.

#### PURCHASING

During the year, 9,509 departmental orders and 7,293 Superintendent's Stores and work orders, a total of 16,802, were sent out, and in consequence 23,265 accounts were passed for payment. These purchases involved the passing of 1,336 customs entries handled within the office. In addition, 6,381 accounts for work done for separate financial entities were sent out for payment. Accounts are passed promptly for payment, so that all possible discounts are obtained. Every effort is made to obtain the benefits to which the University is properly entitled under the Customs, Sales and Excise Acts.

#### POST OFFICE

During the year, the turnover in the branch Post Office in the University amounted to approximately \$36,600.00, of which the sale of postage stamps amounted to approximately \$23,800.00. The University derived a revenue of \$1,158.95 from this office.

#### POLICE AND WATCHMEN

Again the Police Force has been successful in handling the problems created by the public, and its relationship with the student body has been cordial and effective at the same time. The watchmen's service has been carefully supervised and daily reports are carefully checked.

I wish also to acknowledge our continued indebtedness to the City Police for their willing co-operation at all times.

#### CENTRAL PLANT

Each year the inadequacy of our present plant, built in 1911, and the necessity for a new plant, becomes more apparent. With inadequate generating and distribution capacity for both steam and electricity, we have had to provide separate units and services with consequently increased operating costs. We see no solution except a major expenditure for a new plant.

The amount of radiation heated from the Central Plant, exclusive of high pressure service, was 351,359 square feet, as against 348,140 square feet for the previous year. The total cost of operation was \$144,385.35, as against \$134,894.94 for the previous year. The total unit cost for heat and light was 41.0 cents per square foot of radiation, as against 38.7 cents for the previous year. The amount of 41.0 cents was made up of 23.4 cents for heat and 17.6 cents for light and power. The average temperature, October to May inclusive, was 3.1 degrees above the average, against 3.3 degrees above the average for the same period in the previous year. The increased cost is accounted for by the higher price of coal and increased demands for electrical energy.

Comparative tables, showing the operation of the Central Plant and the distribution of charges for 1936-37 and 1937-38, are attached.

A. D. LEPAN,  
*Superintendent.*

October 28th, 1938.

## POWER HOUSE

## AUDITOR'S CERTIFICATE

Toronto, 25th November, 1938.

To the Governors of the University of Toronto:

GENTLEMEN:

I have verified the attached Balance Sheet of the University dated 30th June, 1938, and Schedules 1 to 10, and report that all the transactions of the year upon the Revenue and Capital Accounts have been duly audited and found correct.

The securities representing your investments are held in safekeeping by your bankers. The Canadian Bank of Commerce, and were produced for my examination on 30th June, 1938, and also at another time during the year and found to be in agreement with the records kept by the Bursar. Your securities consist largely of bonds issued or guaranteed by the Dominion of Canada and by the Province of Ontario and bonds of Ontario municipalities, and also certain corporation and other securities received as bequests. Their approximate market value as at 30th June, 1938, was greater than their book value by \$875,432.56.

Bonds of the following municipalities which are included in your investments are in arrears of interest from one to six years or interest payments are being received at reduced rates:

	Par Value	Book Value
Town of Mimico		
5½% 1942-1945 .....	\$21,000.00	\$21,919.25
Essex Border Utilities		
5½% 1945-1947 .....	19,047.60	19,802.72
Town of Weston		
5% 1936-1953 .....	51,041.94	50,519.25
Town of Bridgeburg		
5½% 1936-1946 .....	23,104.01	23,746.75
Township of East York		
5% 1944-1946 .....	30,000.00	29,829.76
Township of York		
5% 1935-1936 .....	16,000.00	15,942.20
Township of Scarborough		
5% 1943 1957 .....	73,697.27	74,765.96

I also report that no income was received from certain non-trustee securities which came to you from the Wallberg and Whitney bequests.

The Bursar's records are well kept and all Endowment and Trust Funds properly accounted for.

Yours faithfully,

G. T. CLARKSON, F. C. A.,

*Auditor.*

## FINANCIAL STATEMENT

## SCHEDULE 1

## GENERAL ENDOWMENT

Additions for 1937-38:

Annuity debentures:

Portion of 1937-38 instalments reducing principal:

Twenty-ninth instalment, issue of July, 1909.....	\$ 15,777	34
Twenty-seventh instalment, issue of January, 1911....	3,790	00
Twenty-seventh instalment, issue of January, 1911....	8,746	00
Twenty-third instalment, issue of April, 1915.....	2,705	48
Fourteenth instalment, issue of July, 1924.....	7,106	80
Ninth instalment, issue of January, 1929.....	35,744	08
	<u>\$ 73,869</u>	<u>70</u>

Convocation Hall Advance:

Restoration from proceeds of Wild Lands Sales, thirty first instalment ..... 91 37

Land and building, No. 104 St. George Street, purchased from Miles Vokes, area 12,885 sq. feet, at net cost (Schedule 7)..... 22,498 27

Hygiene and Public Health Building, increase in valuation after construction of addition at South-east corner (Schedule 7)..... 25,817 06

Library proper:

Additions for year less depreciation (Schedule 7)..... 29,506 93

\$ 151,783 33

## CONTRA

Reduction in valuation hitherto carried for Scott Street property (Schedule 9)..... 30,000 00

\$ 121,783 33

Return of 30th June, 1937..... 13,127,008 28

Return of 30th June, 1938..... \$13,248,791 61

## SCHEDULE 2

## SPECIFIC ENDOWMENTS

(Scholarships, Prizes, etc.)

A. A. A. S. Scholarship (Physics, etc.).....	\$2,350	00
Aggett, Harvey, Memorial (Applied Science).....	1,650	25
Aikens (English Literature).....	5,305	20
Alexander Lectureship (English Literature).....	14,777	17

## I. ADMINISTRATION

## I. SALARIES

(All salaries, except where otherwise stated, are for 12 months to 30 June, 1938.)

<i>President's Office</i>		
Hon. H. J. Cody, LL.D., President.....	\$15,000 00	
Miss A. W. Patterson, President's Secretary (paid also \$250 as Secretary, Faculty of Music).....	2,500 00	\$17,500 00
<i>Bursar's Office</i>		
F. A. Mouré, Bursar (on leave of absence 1937-38).....	\$6,500 00	
C. E. Higginbottom, Accountant and Acting Bursar.....	4,200 00	
Accounts Branch:		
J. A. Gair, Assistant.....	2,000 00	
Miss E. Long, Appropriations Ledger Clerk.....	1,600 00	
Miss R. Mahood, Assistant Appropriations Ledger Clerk.....	1,050 00	
Clerks:		
Miss J. Branton.....	1,350 00	
J. R. Prince.....	1,000 00	
Miss E. Crookshanks.....	1,000 00	
Miss F. M. Quinlivan.....	850 00	
Miss V. Whitehead.....	850 00	
Fees Branch:		
Miss E. B. Goodwin, Chief Clerk.....	2,100 00	
Gordon M. Grant, Cashier.....	1,500 00	
Record Clerks:		
Mrs. Edith M. Hardy.....	1,100 00	
Miss F. J. Rorke.....	900 00	
Secretarial Branch:		
Miss A. M. Gall, Chief Clerk.....	2,050 00	
Miss M. Burns, Assistant.....	1,650 00	
Miss M. Austin, Pensions Clerk.....	1,550 00	
Clerk:		
Miss H. Malone, to 31 January. \$612.50; 2 month's salary upon resignation, \$175.....	787 50	
Miss D. W. Haggart, 3 January to 30 June @ \$16 per week (see also University Extension Dept.).....	410 67	
Honoraria for extra services during the Bursar's absence:		
C. E. Higginbottom.....	500 00	
J. A. Gair.....	150 00	
Miss A. M. Gall.....	100 00	
Miss E. B. Goodwin.....	100 00	
Miss E. Long.....	50 00	
Miss M. Burns.....	50 00	
Miss E. Crookshanks.....	50 00	
	\$33,448 17	
Less charged to clerical assistance.....	1,000 00	\$32,448 17
<i>Registrar's Office</i>		
A. B. Fennell, Registrar.....	\$5,000 00	
A. T. Laidlaw, Assistant Registrar.....	4,100 00	
Assistants:		
Miss A. MacGillivray.....	2,000 00	
Miss E. Hargreaves.....	1,900 00	
Miss I. E. Fraser.....	1,300 00	
Graduates' Register:		
Clerks:		
Miss B. G. Van Allen.....	1,450 00	
Miss M. F. Thompson.....	1,450 00	
Miss Ruth D. Wythe (on leave of absence without salary from 1 Jan. to 30 June).....	475 00	
Miss A. I. Firth, 3 Jan. to 30 June @ \$18 per week (substitute).....	462 00	
Miss J. L. Stephens.....	950 00	
Miss Margaret E. Smith.....	750 00	
Clerks:		
Miss A. S. Meen.....	1,700 00	
Miss M. M. Lavell.....	1,100 00	
Miss E. M. Sharpe, Secretary to Registrar.....	1,650 00	

Stenographers:		
Miss E. M. Fasken.....	1,450	00
Miss Dorothy Woods.....	950	00
Wm. Calladine, Filing Clerk.....	750	00
		<u>\$27,437 00</u>

*Superintendent's Office*

A. D. LePan, Superintendent of Buildings and Grounds.....	\$6,500	00
W. H. Bonus, Assistant Superintendent.....	4,500	00
Assistants:		
G. D. Maxwell.....	3,500	00
E. G. Moogk.....	2,500	00
J. Shortreed.....	2,400	00
W. L. D. Carnie, Chief Clerk.....	2,350	00
Miss M. D. Chisholm, Stenographer.....	1,350	00
Clerks:		
Miss A. K. Wynn.....	1,350	00
Miss E. Nicklin.....	1,350	00
Miss R. E. Cannon.....	1,000	00
Miss R. M. Rankin.....	950	00
Miss M. E. Lee.....	900	00
Miss M. R. LeGrow.....	800	00
		<u>\$29,450 00</u>

*Miscellaneous*

J. B. Bickersteth, Warden, Hart House (with living valued @ \$675; on sick leave from 1 October).....	\$4,500	00
J. R. Gilley, Acting Warden during absence on sick leave of Warden Bickersteth (salary paid by Hart House as Comptroller).....		
J. R. Johnston, Assistant to Acting Warden from 1 October to 30 March, \$1,200, plus bonus, \$150.....	1,350	00
Leonard Smith, Bedel, also Attendant and Messenger, President's Office.....	1,100	00
		<u>\$6,950 00</u>
		<u>\$113,785 17</u>

2. PENSIONS AND RETIRING ALLOWANCES

University's contribution to Pension Funds for the year ending 30 June, 1938:

Remitted to Teachers' Insurance and Annuity Association, New York, for credit of retiring allowances funded there (original contributory plan).....	\$31,673	01
Less returned.....	442	64
		<u>\$31,230 37</u>
Credited to Fund No. 2 (Academic, formerly non-contributory plan)	32,000	00
Credited to Fund No. 3 (Administrative and Clerical Employees) ..	26,993	71
Sundry annual allowances (voted separately and not chargeable to above funds) paid as detailed below:		
Sir Robert Falconer (\$10,000 less amount charged to Pension Fund No. 2).....	\$7,600	00
J. T. Fotheringham.....	500	00
H. H. Langton.....	400	00
D. J. Clark.....	250	00
A. Wilson, 6 mos. to 31 December.....	362	50
Mrs. A. C. Jones, 1 month to 31 July.....	50	00
Widow's allowances:		
Mrs. M. Hope Gillespie.....	900	00
Mrs. Christian Lynn.....	375	00
Mrs. Ellen L. Sinclair.....	350	00
		<u>10,787 50</u>
		<u>\$101,011 58</u>

3. PRESIDENT'S OFFICE

Office supplies, postage, printing and incidentals:		
President H. J. Cody, sundry disbursements.....	\$23	89
Postage.....	81	00
University Associates of Canada, encyclopaedia.....	12	00
University Press, printing and stationery.....	713	50
Accounts under \$10 (3).....	17	89
		<u>\$848 28</u>

## 4. BURSAR'S OFFICE

Office supplies, postage, printing and incidentals (\$2,867.77):		
Bostitch Ltd., stapler and staples.....	\$14	00
Burroughs Adding Machine Co., maintenance service.....	55	28
Canadian Photo Copy Co., charts.....	20	56
Grand & Toy, cheques, etc.....	248	50
Might Directories, Ltd.....	32	40
Office Specialty Mfg. Co., steel cabinet, transfer cases, guides, etc...	249	55
Postage .....	525	00
Robbins & Townsend, typewriter inspection.....	54	80

## APPORTIONMENT

	Remuneration to Examiner	Presiding Officer	Attendance	Totals
Arts	\$952 57	\$1,152 00	\$876 00	\$2,980 57
Medicine	3,103 90	183 00	166 50	3,453 40
Applied Science	462 25	498 00	322 50	1,282 75
Dentistry	578 00	87 00	58 50	723 50
Household Science	5 50	12 00		17 50
Forestry	27 75	54 00		81 75
Music	277 99	54 00		331 99
School of Graduate Studies	46 74			46 74
School of Nursing	5 00	30 00	16 50	51 50
Social Science		39 00	3 00	42 00
University Extension	46 50			46 50
Pedagogy		24 00		24 00
Pharmacy	263 00	66 00	33 00	362 00
Agriculture	521 75	183 00		704 75
Veterinary Science	172 00	27 00		199 00
Law	45 50			45 50
	\$6,508 45	\$2,409 00	\$1,476 00	\$10,393 45

Remuneration to examiners (as detailed above).....	\$6,508 45
Presiding and attendance (as detailed above).....	3,885 00
Honoraria for special services as a Revising Committee: Prof. W. J. McAndrew, \$100; Prof. H. Bennett, \$100; Prof. J. N. Woodcock, \$100; Rev. B. F. Sullivan, \$100.....	400 00
Examination supplies and sundries (\$2,541.80): Engrossing diplomas, etc.; S. Harrod, \$293; G. B. Pritchard, \$408..	\$701 00
University Press, Pseudonym books, etc.....	1,756 15
Accounts under \$10 (2).....	5 20
Superintendent's Dept., labour, \$78.18; material, \$1.27.....	79 45
	2,541 80
Printing examination papers and class lists: University Press.....	5,835 85
	\$19,171 10
Less credit for sale of examination books, etc.....	245 43
	\$18,925 67

## VI. FACULTY OF ARTS

## 22. SALARIES

(1) Departments in University of Toronto (\$590,302.80)

*Dean's Office*

S. Beatty, Dean (paid also \$5,500 as Professor).....	\$1,000 00	
		\$1,000 00

*Mathematics*

Professors:		
S. Beatty (see also above).....	\$5,500 00	
I. R. Pounder (paid also \$376 for Extension Work).....	4,500 00	
Associate Professors:		
W. J. Webber.....	4,000 00	
N. E. Sheppard.....	3,800 00	
Assistant Professors:		
D. A. F. Robinson.....	3,400 00	
J. D. Burk.....	2,700 00	
G. deB. Robinson.....	2,700 00	
Richard Brauer (paid also \$300 for Extension Work).....	2,700 00	
H. S. M. Coxeter.....	2,700 00	
Lecturers (Sessional):		
Miss C. Krieger (paid also \$28 for Extension Work).....	2,100 00	
Miss M. E. G. Waddell (paid also \$420 for Extension Work).....	2,000 00	
D. B. DeLury.....	1,800 00	
Fellows (Sessional):		
DeLury Barber (paid also \$46.80 for clerical assistance).....	700 00	
R. H. Bruck.....	700 00	
S. A. Jennings.....	700 00	
J. M. Kingston.....	700 00	
J. Carson Mark.....	700 00	
W. J. Mayne, 1 month.....	87 50	
		\$41,487 50

*Applied Mathematics*

J. L. Synge, Professor.....	\$6,000 00	
A. F. C. Stevenson, Associate Professor.....	3,700 00	
B. A. Griffith, Lecturer (Sessional).....	2,050 00	
Fellows (Sessional):		
W. D. Rannie.....	700 00	
P. R. Wallace.....	700 00	
		\$13,150 00

*Physics*

Professors:		
E. F. Burton, also Director of Laboratory.....	\$5,500 00	
J. Satterly.....	5,000 00	
L. Gilchrist.....	4,350 00	
Associate Professors:		
H. A. McTaggart.....	4,300 00	
D. S. Ainslie (paid also \$535 for Extension Work).....	3,200 00	
H. J. C. Ireton.....	3,200 00	

Assistant Professors:	
H. Grayson Smith.....	3,100 00
J. O. Wilhelm (paid also \$41.50 for Extension Work).....	2,900 00
C. Barnes.....	2,700 00
M. F. Crawford.....	2,500 00
A. Pitt (paid also \$170 for Extension Work).....	2,350 00
Miss E. J. Allin, Lecturer (Sessional).....	2,100 00
Miss F. M. Quinlan, Lecturer and Demonstrator (Sessional).....	1,600 00
Special Lecturers (Sessional):	
W. H. Kohl.....	200 00
A. B. McLay.....	200 00
D. C. Archibald.....	.....
A. F. Chisholm.....	.....
Bernhard Haurwitz.....	without salary .....
W. E. K. Middleton.....	.....
John Patterson.....	.....
Andrew Thomson.....	.....
A. A. Brant, Lindsley Fellow, Geophysics (paid \$1,200 from Special Fund) .....	.....
Bernhard Haurwitz, Carnegie Fellow (paid \$600 from Special Fund).....	.....
Demonstrators (Sessional):	
Miss K. M. Crossley.....	1,600 00
J. M. Anderson (paid also \$300 for Extension Work).....	1,200 00
R. Richmond (paid also \$75 for Extension Work).....	1,200 00
H. L. Welsh.....	1,200 00
A. H. Woodcock (paid also \$20 for Extension Work—resigned 31 December) .....	375 00
S. Bateson (resigned 31 December).....	300 00
Assistant Demonstrators (Sessional):	
A. R. Clark.....	600 00
H. M. Bryant.....	500 00
O. A. Gilmore.....	500 00
W. M. Grav (paid also \$100 for laboratory assistance and \$75 in Medical Research—Banting).....	500 00
J. Hillier (paid also \$100 for laboratory assistance and \$31 for Extension Work).....	500 00
D. W. R. McKinley.....	500 00
F. A. O. Banks.....	350 00
Miss E. Cohen.....	350 00
E. H. Vestine, 4 mos.....	250 00
Class Assistants (Sessional—Easter Term):	
C. K. Cheng.....	125 00
A. B. Rotenberg.....	100 00
L. H. Turl (paid also \$47.25 for laboratory assistance).....	100 00
A. W. Love.....	80 00
P. J. Sandiford.....	80 00
G. W. C. Tait.....	80 00
Miss A. T. Reed, Secretary and Class Assistant.....	2,000 00
Miss B. M. Savage, Clerical Assistant (resigned).....	1,500 00
B. Clark, Mechanician.....	2,100 00
Assistant Mechanicians:	
J. Anderson.....	1,900 00
J. Ward.....	1,900 00
G. T. Woodward.....	1,900 00
F. M. Shepherd (paid also \$25 in Medical Research—Banting).....	1,500 00
Albert Owen (paid also \$37 for Extension Work).....	960 00
R. H. Chappell, Glass-blower.....	2,700 00
P. Blackman, Laboratory and Lecture Assistant.....	1,600 00
	\$71,750 00

*Astronomy*

R. K. Young, Professor, also Director of David Dunlap Observatory.....	\$4,500 00
F. S. Hogg, Assistant Professor (paid also \$210 for Extension Work).....	2,850 00
Lecturers (Sessional):	
P. M. Millman.....	2,050 00
J. F. Heard (paid also \$210 for Extension Work).....	1,800 00
Computers:	
Miss R. I. Northcott.....	1,150 00
Miss F. S. Patterson (paid also \$150 for Extension Work).....	1,100 00
D. A. MacRae, Assistant).....	1,000 00

Mrs. Helen S. Hogg, Research Assistant, 8 mos.....	300 00	
Miss E. M. Fuller, Secretary-Librarian.....	1,150 00	
G. F. Longworth, Night Assistant and Machinist.....	1,300 00	
		\$17,200 00

*Geology*

Professors:		
E. S. Moore (paid also \$100 for Summer Field Work).....	\$5,500 00	
G. B. Langford, Mining Geology.....	4,800 00	
A. MacLean.....	4,200 00	
Assistant Professors:		
I. S. Russell (paid also \$160 for Extension Work).....	2,500 00	
Dr. Madeleine A. Fritz (part time—paid also in Royal Ontario Museum).....	850 00	
J. Slatterly, Lecturer (Sessional—paid also \$200 for Extension Work).....	1,800 00	
V. J. Okulitch, Instructor (Sessional—paid also \$50 for Summer Field Work and \$200 for Extension Work).....	1,500 00	
Class Assistants (Sessional):		
M. W. Bartley.....	250 00	
J. W. Britton.....	250 00	
W. P. Corking.....	250 00	
G. P. Crombie.....	250 00	
M. C. Gardiner.....	250 00	
V. K. Prest.....	250 00	
R. M. Sternberg.....	250 00	
D. Monteith, Laboratory Attendant, 9 mos.....	675 00	
		\$23,575 00

*Mineralogy*

Professors:		
A. L. Parsons.....	\$4,700 00	
J. Ellis Thomson (paid also \$100 for Extension Work).....	4,100 00	
M. A. Peacock, Associate Professor.....	4,000 00	
V. B. Meen, Lecturer (Sessional—paid also in Royal Ontario Museum and \$50 for Extension Work).....	1,600 00	
Assistants (part time—Sessional):		
L. G. Berry (paid also \$100 for Extension Work).....	400 00	
A. T. Prince.....	400 00	
Wm. Wightman, Laboratory Attendant, 8 mos. (paid also \$40 for Extension Work).....	800 00	
		\$16,000 00

*Chemistry*

Professors:		
F. B. Kenrick.....	\$5,500 00	
Hermann Fischer, Research—Organic Chemistry (paid \$5,000 from Special Fund).....		
J. T. Burt-Gerrans, Electro-Chemistry.....	4,500 00	
L. J. Rogers.....	4,500 00	
Associate Professors:		
J. B. Ferguson.....	4,400 00	
W. S. Funnell.....	4,200 00	
W. H. Martin (on leave of absence for Michaelmas Term).....	4,200 00	
A. R. Gordon.....	4,200 00	
F. R. Lorriman.....	3,600 00	
F. E. Beamish, Assistant Professor.....	2,900 00	
Special Lecturers (Sessional):		
G. F. Wright.....	3,000 00	
J. J. Rae (paid also \$200 in Medical Research—Banting).....	2,100 00	
Lecturers (Sessional):		
Dr. Helen Stantial, Micro-Analysis.....	2,600 00	
F. E. W. Wetmore.....	2,100 00	
S. O. Thomson, temporary Assistant to Professor Beamish.....	300 00	
Assistants (Sessional):		
Miss E. V. Eastcott.....	1,800 00	
R. C. Romans.....	1,295 00	
H. J. Bernstein.....	799 00	
L. F. King, 3 weeks (vice H. J. Bernstein on sick leave).....	70 00	
M. Cohen.....	799 00	
W. H. Brown.....	725 00	
J. Seath.....	725 00	
L. D. Finlayson.....	724 00	

R. N. Meals.....	724 00
Miss C. J. Sanderson (paid also \$66.67 from Special Fund).....	724 00
S. Shankman.....	724 00
G. A. Stewart.....	724 00
E. A. Hollingshead.....	650 00
F. L. McKim.....	650 00
J. H. Michell.....	650 00
W. M. Orchard.....	650 00
W. A. Patterson.....	650 00
G. W. Rogers.....	650 00
Miss J. C. Romeyn.....	650 00
C. E. Willey.....	650 00
C. Marchant (paid also \$466.66 from Special Fund and \$100 for Extension Work).....	324 00
M. Wayman (paid also \$466.67 from Special Fund).....	324 00
W. G. Hines (paid also as Demonstrator).....	75 00
D. J. LeRoy (paid also as Demonstrator).....	75 00
Demonstrators, Electro-Chemistry (Sessional):	
W. A. James.....	824 00
D. J. LeRoy.....	824 00
W. G. Hines..... } see also above	750 00
Laboratory Assistants:	
R. Fortescue (with rooms, heat and light valued @ \$420 as caretaker of building).....	1,200 00
W. Banton (paid also \$20 for Extension Work) \$1,450; Lecture Assistant, \$200.....	1,650 00
Laboratory Attendants @ \$10 to \$14 per week:	
H. Renwick, 52 weeks, 1 day.....	730 34
H. Davis, 40 weeks, 4 days.....	488 00
A. Van Winkel, 40 weeks, 4 days.....	406 66
P. Rowley, 8 weeks, 4 days.....	104 73
F. H. Twigg, 146 hours @ 42c to 44c per hour.....	65 39

 \$70,974 12

### *Biology*

Professors:	
E. M. Walker, Invertebrate Zoology.....	\$5,500 00
W. H. Pierson, Histology and Embryology, @ \$5,100 of which half charged to Anatomy.....	2,550 00
A. G. Huntsman, Marine Biology (without salary).....	.....
Associate Professors:	
A. F. Coventry, Vertebrate Embryology.....	3,950 00
J. R. Dymond, Systematic Zoology (paid also \$10 for Extension Work).....	4,100 00
W. H. T. Baillie, Mammalian Anatomy.....	3,950 00
J. W. MacArthur, Genetics.....	3,950 00
E. H. Craigie, Comparative Anatomy and Neurology.....	3,600 00
Assistant Professors:	
W. J. K. Harkness, Limnobiology.....	3,550 00
Dr. Norma H. C. Ford, Human Biology.....	3,000 00
K. C. Fisher, Experimental Biology.....	2,800 00
F. P. Ide, Lecturer.....	2,300 00
Demonstrators (Sessional):	
C. W. J. Armstrong (paid also \$166.66 in Medicine).....	900 00
Miss V. Engelbert.....	900 00
F. E. J. Fry (paid also \$1,100 in Special Research).....	900 00
R. R. Langford (paid also \$1,100 in Special Research).....	900 00
Assistants (Sessional):	
P. Elson.....	550 00
A. A. Blair.....	450 00
H. M. Rogers.....	450 00
Miss R. D. C. Martin.....	400 00
G. E. Bucher.....	300 00
K. Graham.....	300 00
Miss G. Workman.....	300 00
D. A. McLulich.....	300 00
Dr. Kathleen M. Bartley.....	200 00
Miss A. M. Ironside.....	160 00
S. H. Chambers.....	150 00
Miss M. M. Macdonald.....	100 00
Miss L. E. M. Roddy.....	90 00

J. M. Speirs.....	50 00
J. Spizizen.....	40 00
W. M. Sprules.....	40 00
W. R. Martin (paid also \$200 in Special Research).....	30 00
V. E. F. Solman (paid also \$200 in Special Research).....	30 00
Technical Assistants:	
A. Quantrill.....	1,200 00
S. Clare.....	900 00
Thos. Stovell.....	900 00
Miss A. H. Bell, 10 mos. (paid also in Royal Ontario Museum).....	750 00
Miss M. Sewell, 9 mos. (half time).....	360 00
E. C. Cross, Secretary (paid also in Royal Ontario Museum).....	1,750 00
W. J. LeRay, Curator of Vivarium.....	1,700 00
D. C. LeRay, Assistant in Vivarium (paid also \$50 in Psychology).....	520 00
A. Wilson, Chief Laboratory Assistant.....	1,000 00
Wm. Smith, Laboratory Attendant and Stores Assistant.....	600 00
A. Prince, Laboratory Assistant, 33-1/3 weeks @ \$9.....	300 00
Secretarial Assistants:	
Mrs. Helen Jackson (paid also \$9.50 in Geology).....	1,150 00
Miss E. Caesar, 9 mos.....	675 00
Miss P. Foreman, Stenographer and Librarian.....	1,000 00

---

 \$59,595 00

### *Botany*

Professors:	
R. B. Thomson, Plant Morphology.....	\$5,500 00
H. S. Jackson, Mycology.....	5,200 00
Associate Professors:	
D. L. Bailey, Plant Pathology (2/3rds time).....	3,500 00
G. H. Duff, Plant Physiology.....	4,100 00
H. B. Sifton, Plant Morphology and OEcology.....	4,100 00
Assistant Professors:	
Dr. J. Gertrude Wright.....	3,000 00
T. M. C. Taylor (on leave of absence, Easter Term — paid also \$440 for Extension Work).....	2,800 00
W. R. Haddow, Special Lecturer (Sessional — without salary).....	.....
A. J. V. Lehmann, Senior Demonstrator (paid also \$140 in Special Research).....	1,600 00
Class Assistants (Sessional):	
Miss D. F. Forward (paid also \$80 in Special Research).....	900 00
D. F. Putnam (paid also \$175 in Special Research and \$260 for Extension Work).....	650 00
M. W. Bannan (paid also \$60 in Special Research).....	600 00
D. H. Hamly (paid also \$450 in Applied Physics and \$265 in Special Research).....	575 00
D. C. McPherson (paid also \$150 in Special Research).....	550 00
Miss A. B. Brodie (paid also \$60 in Special Research).....	500 00
P. G. Newell.....	500 00
K. Clendenning.....	450 00
L. T. Richardson.....	450 00
S. A. Simmons (paid also \$150 in Special Research).....	450 00
A. J. Skolko (paid also \$150 in Special Research).....	450 00
W. R. Watson (paid also \$120 in Special Research).....	450 00
C. N. Haldenby (paid also \$150 in Special Research).....	425 00
G. W. Hope.....	425 00
Miss G. S. Taylor (paid also \$175 as Clerical Assistant, Botanic Garden, and \$150 in Special Research).....	425 00
Technical Assistants:	
Miss M. B. Givens.....	1,800 00
Miss C. B. Ross.....	1,400 00
R. F. Cain.....	1,650 00
Mrs. Marion A. Lent, 2 mos.....	150 00
A. Simpson, Horticulturist (with living quarters valued @ \$360).....	2,200 00
L. Van Cleemput, Gardener.....	1,450 00
J. Van Beek, Assistant Gardener.....	1,400 00
Clerical Assistants:	
Miss L. Alward.....	1,400 00
Miss Hilda Lent (resigned 18 June).....	1,150 00
Dr. Kathleen L. Hull, Librarian.....	1,200 00
P. Krotkov, Herbarium Assistant.....	1,800 00

Laboratory Attendants:			
R. Lynn.....	1,150 00		
S. G. Smith.....	1,000 00		
			\$55,350 00
<i>History</i>			
Professors:			
Chester Martin (paid also \$3 from University Press).....	\$5,500 00		
R. Flenley (paid also \$30 from University Press).....	4,700 00		
F. H. Underhill (paid also \$10 from University Press).....	4,700 00		
C. W. Brown (paid also \$342 for Extension Work and \$375 from University Press).....	4,500 00		
G. deT. Glazebrook, Associate Professor (paid also \$262.75 for Extension Work).....	3,600 00		
Assistant Professors:			
D. G. Creighton (paid also \$75 for Extension Work and \$29 from University Press).....	2,700 00		
Edgar McInnis (paid also \$820 for Extension Work and \$3.50 from University Press).....	2,600 00		
D. J. McDougall (paid also \$360 for Extension Work).....	2,600 00		
Lecturers (Sessional):			
R. M. Saunders (paid also \$378 for Extension Work and \$1.50 from University Press).....	2,350 00		
R. A. Preston (paid also \$285 for Extension Work).....	2,000 00		
Miss M. MacLaren, Reader (Sessional).....	250 00		
R. G. Riddell, Tutorial Assistant (Sessional—without salary).....			
			\$35,500 00
<i>Anthropology</i>			
T. F. McIlwraith, Professor (paid also \$12 from University Press).....	\$4,500 00		
C. W. M. Hart, Assistant Professor, also Supervisor of Studies for Course in Sociology (paid also \$200 for Extension Work).....	2,900 00		
P. Nash, Lecturer (Sessional).....	2,000 00		
J. Franz, Instructor, Sociology (Sessional).....	1,000 00		
			\$10,400 00
<i>Archaeology</i>			
C. T. Currelly, Professor (part time—paid also in Royal Ontario Museum).....	\$4,500 00		
Rt. Rev. W. C. White, Associate Professor, Chinese Archaeology (paid also in Royal Ontario Museum).....	2,500 00		
Homer A. Thompson, Assistant Professor, Classical Archaeology (half time).....	1,700 00		
Rev. Jas. M. Menzies, Research Assistant, Chinese Archaeology (Sessional—without salary).....			
			\$8,700 00
<i>Fine Art</i>			
John Alford, Professor (paid \$5,000 from Special Fund).....			
Lecturers:			
Peter Brieger (paid \$2,400 from Special Fund).....			
F. S. Haines, Lecturer (part time—Sessional; without salary).....			
Peter Haworth, Instructor (Sessional).....	600 00		
			\$600 00
<i>Music</i>			
Instructors in musical subjects in Honour Courses:			
Healey Willan (paid also \$250 in Faculty of Music).....	\$420 00		
Leo Smith (paid also \$250 in Faculty of Music).....	\$420 00		
Toronto Conservatory of Music.....	160 00		
			\$1,000 00
<i>Geography</i>			
Griffith Taylor, Professor (paid also \$2,500 in Ontario College of Education and \$300 for Extension Work).....	\$4,000 00		
Demonstrators (Sessional):			
A. H. Clark (paid also \$120 for Extension Work).....	1,200 00		
Miss E. K. M. Sims (paid also \$386 for Extension Work and \$1 from the University Press).....	1,200 00		
Miss M. Brookstone (paid also \$240 for Extension Work).....	1,000 00		
Student Demonstrators (Sessional):			
F. Auburn.....	150 00		
N. B. McElheran.....	150 00		
			\$7,700 00

*Political Economy*

Professors:		
H. A. Innis (paid also \$10 from University Press).....	\$4,500	00
W. T. Jackman, Transportation.....	4,900	00
Associate Professors:		
V. W. Bladen, also Supervisor of Studies in Political Economy (paid also \$75 for Extension Work and \$400 from University Press)....	4,100	00
H. R. Kemp.....	4,100	00
A. Brady (on leave of absence, Easter Term — paid also \$75 from University Press).....	3,800	00
R. M. Dawson (paid also \$10 from University Press).....	3,600	00
Assistant Professors:		
Lorne T. Morgan (paid also \$200 for Extension Work).....	3,700	00
J. F. Parkinson (paid also \$420 for Extension Work).....	2,600	00
Miss I. M. Biss (paid also \$8 from University Press — resigned 30 June).....	2,600	00
Donald C. McGregor (on leave of absence from 1 February to 30 June without salary).....	1,516	67
A. F. W. Plumtre (paid also \$225 for Extension Work and \$19 from University Press).....	2,600	00
Lecturers (Sessional):		
V. F. Coe (paid also \$247.50 for Extension Work and \$32 from University Press).....	2,400	00
C. B. Macpherson (paid also \$50 for Extension Work and \$13 from University Press).....	2,000	00
F. J. Westcott, Special Lecturer (Sessional — paid also \$662 for Extension Work and \$10 from University Press).....	1,800	00
J. G. Perold, Instructor (Sessional — paid also \$170 for Extension Work).....	1,500	00
W. T. Easterbrook, Assistant (Sessional).....	1,000	00
Junior Assistants (Sessional):		
R. H. Fleming.....	500	00
Miss I. Wilson (resigned 31 December).....	187	50
I. McDonald.....	156	25
W. J. McPherson.....	156	25
Special Lecturers (including expenses):		
A. P. Usher.....	57	30
J. M. Clark.....	52	45
R. M. MacIver.....	50	00
Jacob Viner.....	48	36
Kenneth Boulding.....	22	35
W. A. Mackintosh.....	15	35
H. A. Logan.....	8	70
Accounting:		
W. S. Ferguson, Professor (part time — paid also \$20 for Extension Work).....	2,550	00
C. A. Ashley, Associate Professor, \$3,250; Supervisor of Studies in Commerce and Finance, \$600.....	3,850	00

K. C. Gray, Honorary Lecturer (Sessional — without salary).....	..	..
		\$18,400 00

*Philosophy*

Professors:		
G. S. Brett, \$6,000, of which \$1,000 paid in Ethics (paid also \$1,000 as Dean of Graduate Studies; \$30 in Ontario College of Education, and \$7.50 from University Press).....	\$5,000	00
F. H. Anderson.....	4,600	00
Associate Professors:		
H. R. MacCallum (paid also \$30 from University Press).....	4,200	00
E. W. Macdonald (paid also \$400 for Extension Work).....	3,300	00

W. Jarvis McCurdy, Assistant Professor (paid also \$620 for Extension Work) .....	2,900 00	
J. K. Inomas, Assistant (Sessional) .....	1,500 00	
		\$21,500 00
<i>Psychology</i>		
Professors:		
E. A. Bott, also Director of Laboratory .....	\$5,000 00	
W. E. Blatz (part time — paid also \$2,500 from St. George's School and \$50 for Extension Work) .....	2,500 00	
Associate Professors:		
S. N. F. Chant (paid also \$400 for Extension Work) .....	3,900 00	
Wm. Liew (paid also \$300 for Extension Work) .....	3,600 00	
Assistant Professors:		
J. D. Ketchum (paid also \$10 for Extension Work) .....	2,700 00	
G. P. Cosgrave (paid also \$422 for Extension Work) .....	2,600 00	
K. S. Bernhardt (paid also \$450 from St. George's School; \$200 for Instruction to Optometry students, and \$520 for Extension Work) .....	2,350 00	
C. R. Myers (paid also \$720 for Extension Work) .....	2,050 00	
K. H. Rogers, Special Lecturer (Sessional — paid also \$100 for Extension Work) .....	300 00	
Instructors (Sessional):		
H. C. H. Miller (paid also \$200 for Extension Work) .....	600 00	
G. W. Anderson (paid also \$150 in Psychiatry) .....	100 00	
Miss D. D. Hearn, Class Assistant (paid also \$550 as Laboratory Attendant) .....	600 00	
Class Assistants (Sessional):		
Miss M. Northway (paid also \$200 for Extension Work) .....	400 00	
Miss M. D. Salter (paid also \$100 for Extension Work) .....	400 00	
G. H. Turner (paid also \$350 for Extension Work) .....	400 00	
D. C. Williams (paid also \$400 for Extension Work) .....	400 00	
Miss N. Loeb .....	300 00	
Miss D. Millichamp (paid also \$1,300 from St. George's School) ..	300 00	
Miss A. M. Benson .....	200 00	
J. D. M. Griffin .....	200 00	
J. H. Sunley .....	200 00	
Miss N. Bailey .....	100 00	
Readers:		
E. L. Jacobs .....	200 00	
Miss M. Mason .....	200 00	
Instruction for Optometry students:		
K. S. Bernhardt, Special Lecturer (see above) .....	200 00	
Miss D. F. Rintoul, Class Assistant .....	200 00	
C. C. Cooper, Technician .....	2,300 00	
	\$32,300 00	
Less paid by School of Nursing .....	300 00	
		\$32,000 00

*Italian and Spanish*

Professors:		
M. A. Buchanan .....	\$6,000 00	
J. E. Shaw .....	6,000 00	
Emilio Goggio (paid also \$200 for Extension Work) .....	4,400 00	
Associate Professors:		
G. C. Patterson .....	3,600 00	
Juan Cano (paid also \$200 for Extension Work) .....	3,600 00	
Instructors (Sessional):		
Miss F. M. Haygarth .....	1,500 00	
J. H. Parker .....	1,500 00	
		\$26,600 00

(2) Departments in University College (\$160,550)

*Classics*

Gilbert Norwood, Professor, also Director of Classical Studies (paid also \$10 from University Press) .....	\$6,250 00
(a) Greek:	
E. T. Owen, Professor .....	4,700 00
Associate Professors:	
D. E. Hamilton .....	4,200 00
M. D. C. Tait (paid also \$470 for Extension Work) .....	3,600 00

(b) Latin:		
Professors:		
G. Oswald Smith (paid also \$150 for Extension Work) . . . . .	5,000 00	
E. A. Dale (on leave of absence, Easter Term) . . . . .	1,500 00	
Louis A. MacKay, Assistant Professor (paid also \$430 for Extension Work) . . . . .	3,100 00	
(c) Greek and Roman History:		
C. N. Cochrane, Professor (also Dean of Residence with free house-heat and light valued @ \$300) . . . . .	4,500 00	
Miss Mary C. Neeller, Assistant Professor . . . . .	2,700 00	
B. R. English, Instructor (Sessional—paid also \$150 for Extension Work) . . . . .	1,500 00	
		\$40,050 00

*English*

Professors:		
M. W. Wallace (paid also \$1,500 as Principal of University College) . . . . .	\$6,000 00	
R. S. Knox (paid also \$15 from University Press) . . . . .	4,700 00	
J. F. Macdonald (paid also \$150 in Ontario College of Education and \$580 for Extension Work) . . . . .	4,500 00	
Associate Professors:		
W. H. Clawson (paid also \$560 for Extension Work) . . . . .	3,900 00	
A. S. P. Woodhouse (paid also \$320 from University Press) . . . . .	3,700 00	
E. K. Brown (paid also \$300 for Extension Work and \$300 from University Press) . . . . .	3,700 00	
Assistant Professors:		
N. J. Endicott (paid also \$452 for Extension Work) . . . . .	2,800 00	
J. R. MacGillivray (paid also \$404 for Extension Work) . . . . .	2,700 00	
A. E. Birney, Lecturer (Sessional—paid also \$300 for Extension Work and \$20 from University Press) . . . . .	2,000 00	
D. V. LePan, Reader . . . . .	750 00	
		\$34,750 00

*French*

Professors:		
F. C. A. Jeanneret . . . . .	\$5,500 00	
J. S. Will . . . . .	5,000 00	
St. E. de Champ (paid also \$200 for Extension Work) . . . . .	4,500 00	
Associate Professors:		
W. J. McAndrew (paid also \$800 as Registrar of University College) . . . . .	3,700 00	
H. L. Humphreys (paid also \$420 for Extension Work) . . . . .	3,600 00	
Assistant Professors:		
J. C. Andison (paid also \$426 for Extension Work) . . . . .	3,300 00	
R. D. C. Finch (on leave of absence, Easter Term) . . . . .	3,100 00	
C. D. Rouillard . . . . .	3,000 00	
Lecturers (Sessional):		
Miss A. C. Cole (paid also \$308 for Extension Work) . . . . .	2,350 00	
Jean A. Houpert (paid also \$300 for Extension Work) . . . . .	2,000 00	
G. L. Assie (paid also \$320 for Extension Work) . . . . .	1,900 00	
Miss I. Balthazard . . . . .	1,800 00	
Miss M. D. Macdonald (paid also \$200 for Extension Work) . . . . .	1,800 00	
		\$41,550 00

*German*

Barker Fairley, Professor . . . . .	\$6,000 00	
Thure Hedman, Associate Professor . . . . .	4,000 00	
Assistant Professors:		
G. E. Holt . . . . .	3,450 00	
H. Boeschstein (paid also \$500 for Extension Work) . . . . .	2,700 00	
Victor Lange, Lecturer (paid also \$30 in Ontario College of Education and \$200 for Extension Work—resigned 30 June) . . . . .	2,000 00	
		\$18,150 00

*Semitics*

Professors:		
W. R. Taylor . . . . .	\$5,500 00	
T. J. Meek (paid also \$30 from University Press) . . . . .	5,350 00	
F. V. Winnett, Assistant Professor . . . . .	2,800 00	
W. S. McCullough, Lecturer (Sessional) . . . . .	2,400 00	
M. T. Newby, Fellow (Sessional) . . . . .	500 00	
		\$16,550 00

<i>Ethics</i>		
G. S. Brett, Professor (see also Philosophy) .....	\$1.000 00	
		\$1.000 00
<i>University College General</i>		
M. W. Wallace, Principal (see also English) .....	\$1.500 00	
Miss Marion B. Ferguson, Dean of Women (with living valued @ \$400)	2.500 00	
W. J. McAndrew, Registrar (see also French) .....	800 00	
Miss R. Gregory, Registrar's Assistant .....	1.000 00	
Miss C. Tocque, Stenographer in University College .....	1.400 00	
Miss M. Blackburn, Secretary in Registrar's Office .....	1.300 00	
		\$8.500 00
		\$750.852 80

## 23. MATHEMATICS

Class room supplies (\$100.32):		
American Mathematical Society, dues .....	\$25 28	
Photographic Service, slides .....	6 55	
University Extension, paper and stencils .....	40 91	
University Press, printing and stationery .....	27 58	
Clerical assistance (\$83.40):		
de Lury Barber, 78 hrs. @ 60c (see also salaries) .....	46 80	
University Extension, making stencils .....	36 60	
		\$183 72

## 24. APPLIED MATHEMATICS

Class room supplies (\$278.01):		
Hirschwaldsche Buchhandlung, text books .....	\$31 74	
Murdoch Stationery, paper .....	27 00	
Office Specialty Mfg. Co., cabinet and guides .....	38 10	
Postage .....	15 00	
Romeo Co. of Canada, stencils, ink and paper .....	46 35	
Waverly Press, reprints .....	13 76	
University Press, printing and stationery .....	53 03	
Accounts under \$10 (11) .....	51 62	
Superintendent's Dept., freight, 36c; labour, \$1.05 .....	1 41	
Clerical assistance:		
Donald W. Robertson, 41-2/3 weeks @ \$12 .....	500 00	
		\$778 01

## 25. PHYSICS

Laboratory and workshop supplies (\$5,694.31):		
Geo. Adams, screws, nuts, etc. ....	\$29 35	
Aikenhead Hardware Ltd., hardware .....	117 95	
Allen Mfg. Co., laundry .....	37 22	
American Hard Rubber Co., rubber .....	13 94	
Anaconda American Brass, Ltd., rod .....	196 58	
Baird & Tatlock, terminals, etc. ....	50 75	
Bakelite Corporation, bakelite .....	10 15	
Baker Platinum Co., lead and tin wire .....	49 75	
Bausch & Lomb Optical Co., prisms .....	11 27	
Charles Besby & Co., tubing .....	16 17	
W. E. Booth, lantern and photo plates .....	105 99	
Brown Engineering Corporation, grinding babbits .....	15 00	
Cambosco Scientific Co., polaroid discs .....	35 22	
Cambridge Instruments Co., repairing thermometers .....	56 58	
Canada Metal Co., castings and tubing .....	104 62	
Canada Wire & Cable Co., wire .....	26 09	
Canadian General Electric Co., lamps and resistors .....	133 97	
Canadian Kodak Co., chemicals and plates .....	23 79	
Canadian Laboratory Supplies, glassware and chemicals .....	81 52	
Canadian Liquid Air Co., testing cylinders .....	13 88	
Canadian National Carbon Co., carbons and batteries .....	50 42	
C. P. R. Telegraphs .....	14 33	
Walter A. Carveth, quartz wedge .....	19 00	
Central Scientific Co., glassware, tubing, etc. ....	442 12	
Corning Glass Works, tubing .....	19 69	
Crane Ltd., safety valve .....	23 89	
F. C. Dannat, repairing cell .....	13 54

Telephone:		
Bell Telephone Co., service.....	55 00	
Superintendent's Dept., labour, \$725.55; material, \$133.55.....	859 10	
Caretaker, T. McKenzie, 12 mos. (with quarters valued @ \$180) (and overtime, \$37.50).....	780 00	
	\$3,717 27	
Less credits: Heat, light and water (Prof. Chant) \$72.75; share of pump repairs (paid from Insurance) \$51.25; cleaning, \$1.....	125 00	
		\$3,592 27
		<u>\$858,216 82</u>

## VII. FACULTY OF MEDICINE

## 56. SALARIES

*Administration*

W. E. Gallie, Dean (paid also \$10,000 as Professor of Surgery).....	\$1,000 00	
E. S. Ryerson, Assistant Dean and Secretary of Faculty and Assistant Professor of Surgery (paid also \$400 in Dentistry and \$10 for Post Graduate Courses).....	5,000 00	
Assistants:		
Miss M. W. Jones.....	1,850 00	
Miss O. Russell.....	1,800 00	
Miss A. Perry.....	1,550 00	
H. Saunders, Messenger.....	850 00	
Hospital Theatre, Toronto General Hospital:		
C. Hart, Attendant.....	1,550 00	
R. Murray, Attendant in Cloak Room.....	500 00	
		\$14,100 00

*Anatomy*

Professors:	
J. C. B. Grant.....	\$7,000 00
W. H. Piersol, Histology and Embryology, <i>at</i> \$5,100, of which half charged to Biology.....	2,550 00
J. C. Watt.....	4,800 00
Associate Professors:	
A. W. Ham.....	3,850 00
H. A. Cates.....	4,050 00
R. K. George, Assistant Professor.....	3,100 00
G. C. Smith, Lecturer (Sessional).....	2,000 00
Demonstrators (Sessional):	
Miss K. L. McMurrich (paid also \$150 in Athletics and Physical Training — Women) .....	700 00
M. C. Watson.....	500 00
C. P. McCormick (paid also \$400 in Physiology).....	350 00
M. J. Wilson (paid also \$400 from Medical Research — Best Fund).....	400 00
H. D. Ball (paid also \$150 in Athletics and Physical Training — Women, and \$150 for Extension Work).....	500 00
H. C. Elliott.....	500 00
F. P. Dewar (paid also \$250 from Medical Research — Best Fund).....	250 00
M. W. Hicks (paid also \$200 from Medical Research — Best Fund).....	200 00
R. H. Flett.....	175 00
I. D. Kitchen.....	175 00
A. N. McKillop.....	175 00
R. G. MacKenzie (paid also as Prosector).....	125 00
Miss E. H. Britton.....	150 00
F. L. Lawson.....	55 00
W. E. L. Sparks (paid also \$100 in Health Service).....	55 00
A. E. Montgomery, Dental Anatomy.....	300 00
Prosectors (Sessional):	
Brock R. Brown.....	150 00
Freda Richardson.....	75 00
R. G. McKenzie (see also above).....	75 00
H. E. LeMasurier, Senior Technical Assistant (paid also \$125 for X-Ray work) .....	1,800 00
H. F. Whittaker, Technical Assistant (paid also \$120 in Dentistry).....	750 00
G. A. L. Ross, Animal Caretaker.....	700 00
Miss G. Dowsley, Clerical Assistant.....	1,300 00
Laboratory Assistants:	
H. McCormick (paid also \$15 in Post Graduate Courses).....	1,700 00
S. George (paid also \$5 in Post Graduate Courses).....	1,500 00
B. L. Guyatt, Museum Curator (part time).....	1,000 00
Chas. E. Storton, Laboratory Boy.....	650 00
	<hr/>
	\$41,660 00
Less paid by School of Nursing.....	200 00
	<hr/>
	\$41,460 00

*Pathology and Bacteriology*

Professors:	
Wm. Boyd.....	\$8,000 00
W. L. Holman, Bacteriology, also Associate Director of Applied Bacteriology .....	5,000 00
W. L. Robinson, Pathology, also Associate Director of Applied Pathology .....	2,200 00
Assistant Professors:	
C. Shanks, Pathology.....	250 00
G. Lyman Duff.....	2,250 00
W. Magner, Special Lecturer, Pathology (Sessional).....	750 00
Lecturer (Sessional):	
I. H. Erb, Pathology.....	200 00
P. H. Greay, Bacteriology.....	1,800 00
R. Margarite Price, Bacteriology and Serology.....	3,000 00
Fellows (Sessional):	
M. O. Klotz.....	1,200 00
E. O. Magner.....	1,000 00
D. R. E. Macleod.....	1,000 00
L. M. Gray, Museum, 11 mos.....	1,000 00

Demonstrators (Sessional):		
H. C. Hare, Pathology.....	500 00	
Bacteriology:		
E. J. Clifford.....	100 00	
J. D. Balfour (without salary).....		
Marion Ross (without salary).....		
Assistants in Laboratory:		
Miss N. W. Simpson, Pathology.....	1,500 00	
Miss H. M. Boyd, Bacteriology.....	1,020 00	
Technician:		
Miss M. G. Hein, to 31 August (transferred to Neuropathology Division from 1 September).....	190 00	
Miss C. M. Westlake (vice Miss Hein).....	780 00	
Miss A. Alvey, Special Technician.....	1,100 00	
Laboratory attendants for preparing Media:		
Miss E. A. Gordon, 11 mos.....	1,200 00	
Miss M. Jackson.....	840 00	
A. Vowles.....	600 00	
Miss G. K. R. Boyd, Secretary.....	1,260 00	
Miss H. M. Hammond, Librarian and Assistant Secretary.....	1,020 00	
Miss V. L. McKinnon, Museum Stenographer.....	1,260 00	
J. F. Payne, Preparator.....	1,800 00	
Miss Erna Eck, Junior Attendant in Museum.....	600 00	
Miss Margaret Wightman, Autopsy Recorder.....	960 00	
Miss G. F. Johnston, Autopsy Technician.....	960 00	
		\$43,340 00
Division of Neuropathology:		
E. A. Linell, Professor.....	4,500 00	
Dr. Mary I. Tom, Lecturer (Sessional).....	1,950 00	
J. C. Richardson, Fellow (Sessional).....	1,000 00	
Technician:		
Miss H. P. Tett (resigned 1 September).....	183 34	
Miss M. G. Hein (vice Miss Tett — see also above).....	950 00	
Technician, Medicine and Surgery:		
Miss K. Howitt (resigned 14 April).....	807 50	
Miss H. Rogers (vice Miss Howitt).....	140 00	
Miss C. A. Bell, Secretary.....	1,160 00	
		\$53,970 84

*Pathological Chemistry*

Andrew Hunter, Professor (paid also by Connaught Laboratories).....	\$6,000 00	
T. F. Nicholson, Associate Professor.....	3,450 00	
R. W. I. Urquhart, Lecturer (Sessional).....	1,000 00	
Demonstrators (Sessional):		
D. L. Selby.....	600 00	
D. H. Boddington.....	500 00	
J. Stuart Wilson.....	250 00	
G. P. Hamblin, Assistant (part time — Sessional).....	250 00	
Fellows (Sessional):		
F. H. Lawford (paid also \$270 from Medical Research — Banting Fund — resigned 31 January).....	550 00	
H. E. Woodward (vice F. H. Lawford).....	600 00	
A. G. Gornall.....	800 00	
C. E. Downs, Technician.....	1,500 00	
Harrison Downs, Laboratory Assistant.....	1,100 00	
Laboratory Attendants:		
Mrs. J. Faulds.....	750 00	
Mrs. C. McCallum (paid also \$155.52 from Medical Research — Banting Fund).....	350 00	
Miss C. A. Shannon, Secretary.....	1,200 00	
		\$18,900 00

*Pharmacy and Pharmacology*

V. E. Henderson, Professor.....	\$6,000 00
G. H. W. Lucas, Associate Professor.....	3,800 00
Fellows (Sessional):	
D. D. Bonnycastle.....	1,500 00
H. V. Rice.....	1,500 00
A. Brock, Technical Assistant.....	2,100 00

Chester Godner, Laboratory Attendant.....	1.160 00	
A. C. Morrison, Cleaner.....	750 00	
Miss D. Caldecott, Clerical Assistant.....	550 00	
		\$17,360 00

*Bio-Chemistry*

Professors:		
H. Wasteneys.....	\$6,000 00	
G. F. Marian.....	5,000 00	
A. M. Wynne, Associate Professor.....	3,800 00	
B. E. Crocker, Lecturer.....	1,800 00	
Fellows (Sessional):		
G. C. Butler (paid also \$200 in Special Research).....	1,000 00	
A. D. Odell.....	900 00	
W. H. Fishman (paid also \$200 in Special Research).....	850 00	
Paul Hamilton (paid also \$200 in Special Research).....	850 00	
Miss E. A. McPherson.....	800 00	
Miss M. Delamere, Secretarial Assistant.....	1,350 00	
Technicians:		
J. W. Fletcher, Senior.....	1,650 00	
L. Sloan.....	1,650 00	
J. H. McClary.....	1,100 00	
Miss D. I. Skill.....	1,050 00	
Laboratory Assistants:		
G. Lombard.....	1,050 00	
W. Clough.....	1,050 00	
Mrs. Ethel Wilkie, Laboratory Attendant.....	750 00	
		\$30,650 00

*Physiology*

Professors:		
C. H. Best (paid also by Connaught Laboratories and \$2,500 from Medical Research — Best Fund).....	\$6,000 00	
N. B. Taylor.....	4,500 00	
Assistant Professors:		
D. Y. Solandt (paid also \$150 in Athletics and Physical Training — Women).....	3,500 00	
E. T. Waters (paid also \$350 for Extension Work).....	2,900 00	
E. H. Botterell, Lecturer, Neuro-physiology (paid also \$1,500 in Surgery and \$20 for Extension Work).....	1,500 00	
E. Fidler, Lecturer and Research Associate.....	1,500 00	
C. K. Gunn, Demonstrator (Sessional — resigned 31 July).....	133 33	
R. E. Haist, Research Assistant (Sessional — vice C. K. Gunn; paid also \$100 from Medical Research — Best Fund).....	1,465 67	
Fellows (Sessional):		
L. B. Jaques.....	1,000 00	
J. W. Scott.....	600 00	
C. P. McCormick (part time).....	400 00	
Miss Mabel Cory, Departmental Librarian.....	1,250 00	
Miss Doris Secord, Secretarial Assistant.....	1,250 00	
A. Elliott, Mechanician.....	1,800 00	
F. L. Robinson, Technical Assistant and Glass-blower (paid also \$500 from Medical Research — Best Fund).....	2,000 00	
J. D. Brown, Technical Assistant, Biophysics.....	1,500 00	
W. Huntley, Laboratory Assistant for Teaching Laboratories (resigned 23 May).....	1,298 00	
G. L. Robinson, Animal Caretaker.....	1,250 00	
A. D. Crouch, Assistant Animal Caretaker.....	950 00	
		\$34,798 00

*Hygiene and Preventive Medicine*

Professors (paid also by Connaught Laboratories):		
J. G. FitzGerald (part time — see also School of Hygiene).....		
R. D. Defries, Hygiene and Epidemiology (part time — paid also \$2,500 in School of Hygiene).....	1,000 00	
D. T. Fraser.....	4,500 00	
P. J. Moloney, Associate Professor (see also School of Hygiene).....		
Assistant Professors (paid also by Connaught Laboratories):		
M. H. Brown.....	1,000 00	
Frieda H. Fraser.....	1,000 00	

Demonstrators (Sessional):		
F. O. Wishart (paid also by Connaught Laboratories).....	1,400 00	
J. M. Corkill (resigned 15 April).....	1,137 50	
A. M. Fallis.....	400 00	
J. S. Kitching.....	217 85	
Miss H. C. Plummer (paid also by Connaught Laboratories).....	500 00	
R. Hare (paid also by Connaught Laboratories).....	300 00	
E. B. Struthers, Special Instructor (Sessional).....	100 00	
Fellows (Easter Term):		
L. Laberge.....	500 00	
R. J. Wilson.....	500 00	
Class Assistants (Sessional):		
Miss M. E. Collins.....	720 00	
Miss E. M. Parr.....	720 00	
A. J. Bishop, Technician (paid also by Connaught Laboratories).....	300 00	
Miss E. Barr, Secretarial Assistant.....	1,150 00	
		\$15,445 35
<i>Medicine and Clinical Medicine</i>		
Duncan Graham, Professor.....	10,000 00	
Assistant Professors:		
Part-time:		
H. K. Detweiler.....	300 00	
G. W. Howland (paid also \$10 for Post Graduate Courses and \$60 for Extension Work).....	300 00	
J. D. Loudon.....	300 00	
J. A. Oille (paid also \$82 for Post Graduate Courses and \$20 in Health Service).....	300 00	
E. J. Trow (in charge of Dermatology).....	300 00	
R. F. Farquharson @ \$3,000, of which \$1,000 charged to Therapeutics.....	2,000 00	
W. F. McPhedran (half time).....	500 00	
Associates:		
W. R. Campbell.....	2,500 00	
Part-time:		
R. G. Armour (paid also \$10 in Health Service and \$40 for Extension Work).....	250 00	
J. H. Elliott (paid also \$700 as Professor of History of Medicine; \$40 in School of Nursing, and \$30 for Extension Work).....	250 00	
A. A. Fletcher (paid also \$10 for Post Graduate Courses and \$20 for Extension Work).....	250 00	
Beverly Hannah (paid also \$210 in School of Nursing and by Connaught Laboratories).....	250 00	
J. Hepburn (paid also \$91 for Post Graduate Courses).....	250 00	
A. G. McPhedran (paid also \$200 in Health Service).....	250 00	
H. C. Parsons.....	250 00	
F. W. Rolph.....	250 00	
T. Owen (half time).....	500 00	
Senior Demonstrators (Sessional):		
Part-time:		
Gordon Bates (paid also \$20 in School of Nursing).....	200 00	
G. F. Boyer.....	200 00	
A. H. W. Caulfeild (paid also \$10 in Health Service).....	200 00	
E. E. Cleaver.....	200 00	
H. A. Dixon.....	200 00	
A. J. McKenzie.....	200 00	
J. H. McPhedran.....	200 00	
W. E. Ogden.....	200 00	
Half-time:		
W. P. Warner.....	1,000 00	
G. W. Loughheed.....	500 00	
Junior Demonstrators (Sessional):		
Part-time:		
E. F. Brooks.....	150 00	
E. A. Broughton.....	150 00	
W. Hurst Brown.....	150 00	
J. Gilbert Falconer (paid also \$50 for Extension Work).....	150 00	
A. C. Hagerman.....	150 00	
F. C. Hamilton (paid also \$55 for Post Graduate Courses).....	150 00	
Lawrence M. Murray.....	150 00	
D'Arcy J. Prendergast.....	150 00	

Half-time:		
H. H. Hyland (paid also \$10 for Post Graduate Courses).....	1,000	00
Ian Macdonald.....	1,000	00
N. M. Wrong.....	1,000	00
E. J. Maltby.....	1,000	00
Harris M. Gray, Clinical Microscopy.....	250	00
Full-time:		
R. A. Cleghorn.....	3,000	00
J. A. Dauphinee, also Senior Demonstrator, Clinical Microscopy.....	2,500	00
H. E. Rykert (paid also \$92 for Post Graduate Courses).....	2,500	00
J. W. Graham.....	1,800	00
Fellows (Sessional):		
C. W. J. Armstrong (paid also \$900 in Biology—resigned 31 August).....	166	66
D. C. Austen (vice C. W. J. Armstrong).....	810	00
F. C. Heal.....	1,000	00
R. C. Dickson (paid \$1,000 from Special Fund).....	.....	.....
Research Assistants:		
Miss M. I. Hanna.....	1,380	00
N. W. Simmons.....	1,200	00
Miss S. H. Clutton, Secretarial Assistant.....	1,440	00
Miss B. M. Calvin, Assistant Secretary.....	385	00
Miss N. R. Hearn, Technician, Applied Physiology.....	1,320	00
R. H. Wilson, Laboratory Attendant.....	500	00
	—	—
		\$45,551 66
<i>Paediatrics</i>		
Alan Brown, Professor—part time (paid also \$160 in School of Nursing)	\$350	00
Associates:		
F. F. Tisdall, also Director of Paediatric Research Laboratories.....	2,000	00
Part-time:		
A. W. Canfield.....	250	00
E. A. Morgan.....	250	00
G. R. Pirie.....	250	00
Senior Demonstrators (Sessional):		
T. G. H. Drake.....	2,000	00
Part-time:		
Gladys L. Boyd.....	500	00
A. P. Hart.....	200	00
G. E. Smith.....	200	00
Junior Demonstrators (Sessional):		
Pearl Summerfeldt.....	500	00
Part-time:		
L. N. Silverthorne (paid also by Connaught Laboratories).....	300	00
C. E. Snelling.....	300	00
W. A. Hawke.....	200	00
J. R. Ross.....	200	00
W. W. Barraclough.....	150	00
J. D. Griffin (without salary).....	.....	.....
E. Chant Robertson, Research Fellow (Sessional—part time; paid also \$200 for Extension Work).....	200	00
S. H. Jackson, Research Assistant (Sessional—part time).....	200	00
Technicians (part time):		
Miss M. E. Doyle.....	200	00
Miss E. McNamara.....	200	00
Miss R. M. Herbert.....	200	00
Miss M. L. Cassidy, Secretarial Assistant (part time).....	500	00
	—	—
		\$9,150 00
<i>Surgery and Clinical Surgery</i>		
W. E. Gallie, Professor (paid also as Dean).....	\$10,000	00
Assistant Professors:		
W. W. Jones.....	300	00
T. A. J. Duff (paid also \$25 for Post Graduate Courses).....	300	00
R. R. Graham.....	300	00

F. I. Lewis (paid also \$70 for Post Graduate Courses and \$20 for Extension Work).....	150 00
J. A. McFarlane (paid also \$25 for Post Graduate Courses and \$200 in Health Service).....	150 00
D. R. Mitchell.....	150 00
D. W. G. Murray (paid also \$25 for Post Graduate Courses).....	150 00
D. W. Pratt (paid also \$25 for Post Graduate Courses).....	150 00
E. E. Shouldice.....	150 00
R. M. Wansbrough (paid also \$10 in School of Nursing).....	150 00
C. H. Watson.....	150 00
A. W. M. White.....	150 00

## Fellows (part time):

F. C. Kergin.....	1,800 00
R. C. Laird (paid also \$25 for Post Graduate Courses).....	1,500 00
E. H. Botterell (see also Physiology).....	1,500 00
W. K. Welsh.....	900 00
W. S. Keith (paid also \$40 for Post Graduate Courses).....	720 00
S. D. Gordon (paid also \$70 for Post Graduate Courses).....	600 00

## Fellows (Resident — Sessional):

W. D. Smith (paid also \$10 for Post Graduate Courses).....	400 00
B. W. Stevens.....	400 00
S. A. Thomson (paid also \$25 for Post Graduate Courses).....	400 00

## Assistant Fellows (Resident — Sessional):

W. S. Anderson (resigned 1 May).....	262 50
F. L. Shipp (vice W. S. Anderson).....	75 00
Jessie Gray.....	300 00
A. D. McLachlin.....	300 00
J. R. F. Mills.....	300 00
T. S. Perrett.....	300 00
J. F. Roberts.....	300 00
T. M. Steele.....	300 00
F. H. Wigmore.....	300 00

G. F. Pringle, Laboratory Technician.....	1,080 00
Miss T. W. MacLaren, Secretary.....	1,410 00

---

 \$31,277 50
*Obstetrics and Gynaecology*

William A. Scott, Professor.....	\$5,000 00
Assistant Professors:	
N. D. Frawley.....	300 00
H. B. VanWyck (paid also \$115 in School of Nursing).....	300 00
R. W. Wesley.....	300 00
J. A. Kinnear, Associate, Obstetrics.....	250 00

Senior Demonstrators (Sessional):		
W. G. Cosbie.....	200 00	
W. W. Lailey.....	200 00	
D. M. Low.....	200 00	
S. J. N. Magwood (paid also \$100 in Health Service).....	200 00	
Junior Demonstrators (Sessional):		
L. T. Armstrong.....	150 00	
W. A. Daffoe.....	150 00	
J. C. Goodwin.....	150 00	
H. W. Johnston.....	150 00	
John Mann.....	150 00	
H. K. Manning.....	150 00	
W. T. Noonan.....	150 00	
F. J. O'Leary.....	150 00	
G. L. Watt.....	150 00	
W. H. Murby (without salary).....	.....	
A. D. T. Purdy (without salary).....	.....	
Fellows:		
J. R. McArthur.....	1,500 00	
D. N. Henderson.....	1,000 00	
Miss M. Bonham, Laboratory Technician.....	1,100 00	
Miss H. Carson, Secretary.....	900 00	
	-----	\$12,800 00

*Ophthalmology*

W. H. Lowry, Professor.....	\$700 00	
Associates:		
F. A. Aylesworth.....	200 00	
C. E. Hill.....	200 00	
Mortimer Lyon.....	200 00	
W. W. Wright.....	200 00	
A. E. MacDonald (part time).....	1,200 00	
Assistants (Sessional):		
J. F. A. Johnston.....	800 00	
L. J. Sebert (without salary).....	.....	
Junior Demonstrators (Sessional):		
H. M. Maerae.....	200 00	
A. L. Morgan.....	200 00	
Miss Mary Gray, Secretarial Assistant, @ \$1,000, of which half charged to Oto-Laryngology.....	500 00	
	-----	\$4,400 00

*Oto-Laryngology*

Perry Goldsmith, Professor.....	\$700 00	
G. M. Biggs, Associate Professor.....	350 00	
A. A. Campbell, Associate.....	250 00	
Senior Demonstrators (Sessional):		
C. A. Rae.....	200 00	
D. E. S. Wisbart.....	200 00	
A. H. Veitch (without salary).....	.....	
Junior Demonstrators (Sessional):		
H. W. D. McCart.....	150 00	
Gregor McGregor.....	150 00	
Angus M. McLeod.....	150 00	
C. E. Snell.....	150 00	
W. B. Stark.....	150 00	
J. G. Strachan.....	150 00	
J. A. Sullivan.....	150 00	
P. E. Ireland (full time).....	1,900 00	
H. H. Burnham, Senior Demonstrator (Sessional).....	700 00	
Miss Mary Gray, Technician (see also Ophthalmology).....	500 00	
	-----	\$5,850 00

*Therapeutics*

R. F. Farquharson, Assistant Professor (see also Department of Medicine).....	\$1,000 00
H. J. Shields, Associate in charge of Anaesthesia.....	250 00
W. J. Gardiner, Associate in charge of Physical Therapy.....	250 00
C. E. Cooper Cole, Senior Demonstrator, Therapeutics (Sessional).....	200 00

Junior Demonstrators, Anaesthesia (Sessional):

W. Easson Brown.....	150 00
S. M. Campbell.....	150 00
S. J. Evelyn.....	150 00
K. E. Hollis.....	150 00
C. H. Robson.....	150 00

Assistants, Anaesthesia (without salary):

G. R. Balfour.....	.....
C. G. Bryan.....	.....
N. S. Clark.....	.....
R. Hargrave.....	.....
K. M. Heard.....	.....
A. R. Wilkins.....	.....

Assistants, Therapeutics (Sessional):

Irwin Hilliard.....	50 00
A. M. Large.....	50 00
N. B. McGillivray.....	50 00

A. H. Squires, Research Fellow, 3 mos..... 800 00

\$3,400 00

*Psychiatry*

C. B. Farrar, Professor (paid also \$15 for Post Graduate Courses and \$100 in Health Service)..... \$5,000 00

E. P. Lewis, Assistant Professor..... 1,900 00

Demonstrators (Sessional):

G. W. Anderson.....	150 00
Ruth M. Franks (paid also \$200 for Extension Work).....	150 00
Mary V. Jackson.....	150 00
B. T. McGhie.....	150 00
C. G. Stogdill.....	150 00
C. H. McCulaig (without salary).....	.....

S. G. Chalk, Junior Demonstrator (Sessional)..... 150 00

Fellows (Sessional):

K. G. Gray, Forensic Psychiatry (without salary).....	.....
J. A. Hannah, Neuropathology (without salary).....	.....

Miss A. F. Abbott, Secretarial Assistant (without salary).....

\$7,800 00

*Medical Jurisprudence*

Lecturers (Sessional):

K. G. Gray (see also Psychiatry).....	125 00
W. L. Robinson (see also Pathology and Bacteriology).....	125 00

\$250 00

*Radiology*

G. E. Richards, Professor..... 250 00

A. C. Singleton, Associate..... 250 00

Senior Demonstrators (Sessional):

M. R. Hall.....	200 00
A. H. Rolph.....	200 00

A. W. Blair, Junior Demonstrator (Sessional)..... 100 00

J. Somers, Assistant (Sessional — part time)..... 500 00

\$1,500 00

*Research Professor*

Sir Frederick Banting (paid \$5,000 in Special Research).....

*Special Lectures*

Professor J. H. Elliott, History of Medicine (see also Department of Medicine and School of Nursing)..... \$700 00

Special Lecturers (Sessional):

E. J. Pratt, English (paid also \$360 in Dentistry and \$30 in Ontario College of Education)..... 400 00

D. M. Tanner, Dentistry (see also Faculty of Dentistry)..... 100 00

Science and Civilization:

A. F. Coventry (paid in Biology).....	} without	.....
H. Wasteneys (paid in Bio-Chemistry).....		.....
J. G. Falconer, Life Insurance.....	} salary	.....
G. S. Young, Medical Ethics and Economics.....		.....

\$1,200 00

## 63. HYGIENE AND PREVENTIVE MEDICINE

## Supplies and apparatus (\$2,923.27):

Art Metropole, micrometers, etc.....	\$62 87
Canadian Office and School Furniture Ltd., stools.....	56 00
Walter A. Carveth, microscope stages, repairs and clips.....	154 00
Central Scientific Co., scissors, forceps, etc.....	64 23
Connaught Laboratories, vaccine, glass-ware and maintenance of animals.....	1,192 87
General Biological Supply House, slides and specimens.....	28 65
Grand & Toy, shelves.....	39 00
Gray Coach Lines, hire of coaches to Connaught Laboratories Farms	120 00
J. F. Hartz Co., cover glasses.....	18 00
Lockhart's Camera Exchange, film packs.....	11 70
Mimeograph Co., ink, paper and stencils.....	81 37
Office Specialty Mfg. Co., filing cabinet.....	45 95
Ontario Laundry Co.....	27 25
Postage.....	16 00
Harry H. Sparks, field-work reports.....	74 01
Wilson Scientific Co., incubator.....	156 80
University Press, printing and stationery.....	579 32
Accounts under \$10 (8).....	24 68
Sundry disbursements by department.....	10 00
Superintendent's Dept., freight, \$1.84; labour, \$102.27; material, \$56.46.....	160 57
Cleaner, Mrs. Ada Hall, 223½ days.....	558 75
	<hr/>
	\$3,432 02
Less credit from laboratory deposits.....	104 00
	<hr/>
	\$3,328 02

\$3,378 02

## 64. MEDICINE

Supplies and chemicals (\$2,293.39):		
Academy of Medicine, reprints.....	815	00
Acme-Farmers' Dairy, milk.....	45	56
Allen Mfg. Co., laundry.....	41	71
Beckett & Conroy, laboratory coats.....	29	29
R. F. Breux, frogs.....	20	00
British Drug Houses, casein and chemicals.....	38	92
Canadian Laboratory Supplies, chemicals and filter paper.....	95	28
Canadian Medical Association, reprints.....	25	00
Canadian Public Health Association, reprints.....	15	14
T. Eaton Co., chair pads, uniforms, and food supplies.....	24	54
Hoffman-La Roche Ltd., chemicals.....	68	89
Ingram & Bell, chemicals, cotton, etc.....	147	96
Journal of Biological Chemistry, reprints.....	11	27
Journal of Medicine, reprints.....	31	06
Medical Research Dept., animals and maintenance.....	241	00
C. V. Mosby Co., reprints.....	29	43
Nichols Chemical Co., acids.....	22	79
Postage.....	40	12
W. Lloyd Wood Ltd., serum.....	31	50
University Press, printing and stationery.....	135	21
Accounts under \$10 (11).....	48	25
Sundry disbursements by department:		
Food supplies, \$8.46; stationery, etc., \$11.35; sundries, \$10.19.....	30	00
Superintendent's Dept., freight, \$16.28; labour, \$10; material, \$87.63.....	113	96
Apparatus (\$676.04):		
Baker Platinum Ltd., crucibles.....	17	46
Canadian Laboratory Supplies, glass-ware, filter paper, etc.....	153	72
Central Scientific Co., cups, glass-ware, etc.....	27	32
Eastman Photographic Stores, kodaflector, kodachrome, etc.....	27	22
Harvard Apparatus Co., clamps and boards.....	11	38
Ingram & Bell, slides, instruments, etc.....	72	37
Klen Mfg. Co., colorimeter and plunges.....	153	75
Office Specialty Co., cabinet.....	44	00
C. F. Palmer Ltd., paper.....	15	22
Robbins & Town-end, typewriter inspection.....	10	20
Wilson Scientific Co., glass-ware, etc.....	17	68
Accounts under \$10 (7).....	31	02
Superintendent's Dept., labour, \$56.61; material, \$28.09.....	84	70
Books and periodicals (\$699.72):		
Canadian Medical Association, reprints.....	29	00
J. B. Lippincott Co., book.....	16	00
McAinsh & Co., book and subscription.....	33	25
Thos. Nelson & Sons, renewal papers.....	15	17
Photographic Service, slides and prints.....	27	95
University Press, printing and stationery.....	565	85
Accounts under \$10 (3).....	7	50
Laboratory cleaning:		
Miss E. Bailey, 52 weeks.....	323	65
(Charged to Eaton Endowment).....	82,997	80

## 65. PAEDIATRICS

Supplies and chemicals (\$999.14):		
Association International, reprints.....	816	06
Bausch & Lomb Optical Co., hemoglobinometer repairs.....	13	23
Borden & Co., powdered cream.....	12	56
British Drug Houses, chemicals.....	116	68
Canadian Laboratory Supplies, chemicals, filter paper, etc.....	220	21
Canadian Medical Association, reprints.....	24	50
Ditto of Canada Ltd., carbon, etc.....	18	37
Mead, Johnson & Co., yeast powder.....	31	85
C. V. Mosby Co., reprints.....	22	91
Postage.....	80	28
Quinte Milk Products, casein.....	80	45
Society for Experimental Biology and Medicine, reprints.....	12	11
Wistar Institute of Anatomy and Biology, reprints.....	11	91
University Press, printing and stationery.....	134	06
Accounts under \$10 (9).....	49	96

Sundry disbursements by department:	
Stationery, postage, etc., \$7.39; food supplies, \$6.42; sundries, \$6.19 .....	20 00
Superintendent's Dept., freight, \$19.02; material, \$114.98.....	134 00
Apparatus (\$498.02):	
Canadian Laboratory Supplies, glassware, etc.....	119 94
Central Scientific Co., glassware and crucibles.....	37 15
Superintendent's Dept., labour, \$200.57; material, \$140.36.....	340 93
	<hr/>
	\$1,497 16
Less credit for sale of reprints.....	5 22
	<hr/>
(Charged to Eaton Endowment).....	\$1,491 94 .....

## 66. SURGERY

Supplies and apparatus (\$1,381.93):	
Allen Mfg. Co., laundry.....	\$22 02
Art Service, art material.....	14 90
Beckett & Conroy, laboratory coats.....	10 44
Burke Electric & X-Ray Co., remodelling apparatus.....	22 00
Connaught Laboratories, reprints.....	14 73
Corbett-Cowley Ltd., laboratory coats.....	49 10
Dale Display Fixtures Ltd., models.....	13 61
T. Eaton Co., chemicals, films, etc.....	42 57
Robert D. Falconer, making instruments.....	199 50
Grand & Toy, stationery.....	20 05
Home Cinema Supplies Co., lighting unit.....	12 85
Hospital for Sick Children, surgical supplies.....	25 00
International Books Ltd., subscription.....	20 00
J. B. Lippincott Co., reprints.....	18 51
Lockhart's Camera Exchange.....	158 92
Medical Research Dept., animals.....	135 50
Mimeograph Co., paper.....	11 53
C. V. Mosby Co., subscription.....	10 73
Postage .....	50 16
St. Michael's Hospital, surgical supplies.....	73 20
Stephens Sales Ltd., stencils and paper.....	32 24
Surgical Publishing Co. of Chicago, subscription.....	12 16
Williams Gold Refining Co., latex.....	10 58
Surgical demonstration:	
Dr. R. C. McKenzie, expenses in connection with bringing patient from Chatham.....	37 70
Myers-Elliott, ambulance service.....	12 00
Dr. G. E. Richards and Dr. A. C. Singleton, X-ray slides and prints .....	34 20
M. J. Shepherd, caretaker's extra services.....	10 00
Toronto General Hospital, instruments and expenses in connection with patient.....	207 90
University Press, printing and stationery.....	10 05
Accounts under \$10 (9).....	46 06
Sundry disbursements by department:	
Stationery, telegrams, etc., \$20.27; sundries, \$14.73.....	35 00
Superintendent's Dept., labour, \$3.30; material, \$5.42.....	8 72
Museum of Applied Anatomy (\$244.79):	
T. Eaton Co., films, bulbs, etc.....	125 10
Lockhart's Camera Exchange, filters, plates, etc.....	119 69
	<hr/>
	\$1,626 72

## 67. OBSTETRICS AND GYNAECOLOGY

Supplies and apparatus:	
Corbett-Cowley Ltd., laboratory coats.....	\$17 72
Ingram & Bell, slide boxes, etc.....	19 53
Photographic Service, slides.....	19 80
University Press, stationery and supplies.....	12 91
Accounts under \$10 (7).....	31 00
	<hr/>
	\$100 96

## 68. OPHTHALMOLOGY

Supplies and apparatus:	
Pathology Dept., steel shelving.....	\$7 00
Photographic Service, prints, etc.....	37 30
Superintendent's Dept., labour, \$4.50; material, \$2.....	6 50
	<hr/>
	\$50 80

## 69. OTO-LARYNGOLOGY

Supplies and apparatus:		
McAinsh & Co., text books.....	\$12	15
University Press, printing and stationery.....	21	88
Accounts under \$10 (2).....	10	54
Superintendent's Dept., labour, \$28.23; material, \$11.85.....	40	08
		\$84 65

## 70. THERAPEUTICS

Supplies and apparatus:		
Aycarst, McKenna & Harrison, drugs and chemicals.....	\$88	65
British Drug Houses, drugs.....	17	00
Office Specialty Mfg. Co., coat hanger.....	11	50
Photographic Service, slides and prints.....	13	20
Secmor Selmor System Ltd., show case.....	30	00
University Press, stationery.....	28	08
Accounts under \$10 (2).....	2	65
Sundry disbursements by department.....	10	00
		\$201 08

## 71. PSYCHIATRY

Supplies and apparatus:		
University Press, stationery.....		\$5 67

## 72. MEDICAL JURISPRUDENCE

(Nothing spent)

## 73. RADIOLOGY

Supplies and apparatus:		
Seaman Laboratory, one half of cost of spectrograph (balance paid by Physics).....	\$402	18
Dr. G. E. Richards and Dr. A. C. Singleton, X-ray films, plates, etc.....	343	40
Toronto General Hospital, X-ray supplies, etc.....	253	82
		\$999 40

## 74. ART SERVICE

(a) Salaries:		
Miss M. T. Wishart, Director.....	\$2,500	00
Miss D. Foster, Assistant Artist.....	1,350	00
(b) Expenses:		
Part time assistance (\$94.50):		
Miss E. Blackstock, 121 hours.....	81	25
Sundry persons (2).....	13	25
Supplies (\$218.27):		
Art Metropole, brush.....	38	50
Bark & Mortimer, insurance on exhibit at Royal York Hotel.....	10	00
University Press, stationery.....	14	47
Accounts under \$10 (7).....	30	42
Sundry disbursements by department:		
Laundry, \$10.01; stationery and art supplies, \$25.65; sundries, \$12.34.....	49	00
Superintendent's Dept., freight, \$1.75; labour, \$1.10; material, \$70.03.....	75	88
	\$4,162	77
Less sundry credits.....	24	60
		\$4,138 17

## 75. GENERAL EXPENSES

Sundry expenses of the Dean:		
Luncheons, teas and dinners in connection with visiting lecturers, etc.....	\$183	80
Office supplies, stationery, printing, etc. (\$2,823.96):		
Association of American Medical Colleges, aptitude tests.....	145	24
"Globe and Mail," subscription.....	12	00
Lowe-Martin Co., cards.....	41	58
Office Specialty Mfg. Co., cabinet, stool and file.....	97	70
Photographic Service, prints, slides and lantern service.....	85	60
Postage.....	426	40
Geo. C. Renneker Co., reprints.....	41	23
Robbins & Townsend, typewriter inspection.....	33	05
Simmons & Sons, funeral wreaths.....	20	00
Underwood-Elliott-Fisher Ltd., copy holder and typewriter stand, etc.....	68	25

Window Shades & Fittings, shades.....	45 36	
University Press, printing and stationery.....	1,291 51	
Accounts under \$10 (18).....	63 28	
Sundry disbursements by Secretary:		
Carefare and postage, \$9.42; telegrams, etc., \$14.75; sundries, \$10.83 .....	35 00	
Superintendent's Dept., freight, \$2.32; labour, \$23.57; material, \$21.04 .....	46 93	
Clerical assistance:		
Miss D. Waugh, 8 weeks, 4 days (paid also \$95 from Medical Research) .....	216 65	
Mrs. T. P. Lloyd.....	3 50	
H. McClary, messenger service, 2 weeks.....	20 00	
Lockers for students:		
Denisteel Corporation.....	130 68	
Publications, Calendar, Dean's Report, Medical Bulletin, Lister Lecture (\$670.51):		
Postage .....	102 54	
University Press, printing and stationery.....	567 97	
Maintenance and equipment of Lecture Theatre (\$97.40):		
Art Metropole, balopticon.....	43 74	
Bausch & Lomb Optical Co.....	1 47	
Office Specialty Mfg. Co., lockers.....	13 90	
Superintendent's Dept., labour, \$16.07; material, \$22.22.....	38 29	
Medals (\$43.52):		
Birks, Ellis, Ryrie Ltd., engraving.....	6 93	
John Pinches, medals.....	36 59	
Association of American Colleges:		
Membership fees.....	150 00	
Alterations to Secretary's Office:		
Superintendent's Dept., labour, \$224.60; material, \$275.40.....	500 00	
		\$4,469 19

## 76. MEDICAL BUILDING

Heat and light.....	\$4,431 40	
Gas, water and occasional fuel (\$1,517.79):		
Gas, \$629.28; water, \$826.72.....	1,456 00	
Central Coal Co.....	29 25	
Conger Lehigh Coal Co.....	32 04	
Superintendent's Dept., labour.....	50	
Caretaker's supplies:		
Superintendent's Dept., material.....	126 44	
Cleaning (\$1,997.70):		
Advance Window Cleaning Co.....	\$49 00	
Allen Mfg. Co., laundry.....	21 12	
Superintendent's Dept., labour.....	1,927 58	
Repairs and renewals (\$2,839.34):		
Italian Mosaic & Tile Co., tiling.....	21 08	
Kennedy Mfg. Co., sprayer.....	127 47	
Routery Bros., plaster repairs.....	23 00	
Accounts under \$10 (5).....	26 57	
Superintendent's Dept., labour, \$1,818.87; material, \$817.35.....	2,636 22	
Caretaker, F. P. Mottram, 12 mos. (and overtime \$3).....	1,400 00	
		\$12,315 67
Less heat and light charged to Central Power Plant...	4,434 40	
Credit for cleaning.....	34 00	
		4,468 40
		\$7,847 27

## 77. BANTING INSTITUTE

Heat, Dept. of Public Works, Province of Ontario.....	\$6,000 00
Gas, \$974.54; electric current, \$4,324.28; water, \$591.53.....	5,890 35
Caretaker's supplies (\$569.54):	
Electrolux Ltd., machine and parts.....	78 17
Superintendent's Dept., material.....	491 37
Cleaning (\$5,427.40):	
Advance Window Cleaning Co.....	63 70
Allen Mfg. Co., laundry.....	60 12
Superintendent's Dept., labour.....	5,303 58

Repairs and renewals (\$3,135.38):		
City Treasurer, elevator license.....	15	00
Compressed Air Equipment Ltd., rental.....	20	62
Robt. Simpson Co., curtain.....	15	20
Accounts under \$10 (2).....	10	19
Superintendent's Dept., labour, \$2,031.20; material, \$1,043.17.....	3,074	37
Caretaker, H. L. Vickery, 12 mos.....	1,500	00
	\$22,522	67
Less credit for cleaning, etc.....	88	35
		\$22,434 32

## 78. ANATOMICAL BUILDING

Heat and light.....	\$2,373	54
Gas, \$20.48; water, \$37.14.....	57	62
Caretaker's supplies:		
Superintendent's Dept., material.....	258	67
Cleaning (\$1,876.12):		
Advance Window Cleaning Co.....	34	30
Allen Mfg. Co., laundry.....	21	84
Superintendent's Dept., labour.....	1,819	98
Repairs and renewals (\$534.75):		
Wm. Bartlett & Son, shades.....	13	69
City Treasurer, elevator license.....	10	00
Johnson Temperature Regulating Co., repairs to heating system.....	15	98
Roofers' Supply Co., blackboards.....	10	31
Superintendent's Dept., labour, \$356.34; material, \$128.43.....	484	77
Caretaker, M. J. Shepherd, 12 mos. (paid also \$10 in Surgery Dept.)....	1,400	00
	\$6,500	70
Less heat and light charged to Central Power Plant...	\$2,373	54
Credit for cleaning.....	5	00
	2,378	54
		\$4,122 16

## 79. HYGIENE BUILDING

Heat and light.....	\$14,288	43
Gas, \$1,299.23; water, \$2,614.46.....	3,913	69
Caretaker's supplies:		
Superintendent's Dept., material.....	766	84
Cleaning (\$7,790.69):		
Advance Window Cleaning Co.....	63	70
Allen Mfg. Co., laundry.....	72	48
Superintendent's Dept., labour.....	7,654	51
Repairs and renewals (\$2,311.18):		
Wm. Bartlett & Son, shades repaired.....	11	50
City Treasurer, elevator license.....	20	00
Italian Mosaic & Tile Co., tiling.....	1	03
Johnson Temperature Regulating Co., repairs to heating system.....	44	28
Routery Bros., plaster repairs.....	49	55
Superintendent's Dept., labour, \$1,716.01; material, \$468.81.....	2,184	82
Caretaker, James Irwin, 12 mos. (and overtime \$1).....	1,400	00
	\$30,470	83
Less heat and light charged to Central Power Plant...	\$14,288	43
Credits for cleaning, and for share of gas, water and electric current, etc.....	6,126	70
	20,415	13
		\$10,055 70
Charged to Revenue, 1937-38.....	\$357,826	47
Charged to Eaton and Rockefeller Funds.....	83,597	50
	\$441,423	97

University Press, printing and stationery.....	118 58	
Accounts under §10 (3).....	17 99	
(2) Epidemiology and Biometrics (\$284.40):		
Canadian Public Health Association, reprints.....	20 09	
Mimeograph Co., stencils, paper, etc.....	79 66	
Postage.....	33 00	
University Press, printing and stationery.....	114 85	
Accounts under §10 (3).....	17 05	
Sundry disbursements by department.....	19 75	
(3) Physiological Hygiene (\$407.47):		
Connaught Laboratories, maintenance of animals, laboratory coats, filter paper, etc.....	362 81	
Hoffman-La Roche Ltd., chemicals.....	17 94	
Matthews, McCutcheon & Co., kodachrome.....	10 25	
New York Academy of Medicine, photostats.....	5 88	
Superintendent's Dept., material.....	10 59	
(4) Chemistry in Relation to Hygiene (\$270.30):		
British Drug Houses, chemicals.....	23 17	
Canadian Laboratory Supplies, chemicals and glassware.....	155 41	
E. Hookway Glass Works, glassware.....	41 50	
Wilson Scientific Co., chemicals and glassware.....	25 16	
Accounts under §10 (4).....	14 46	
Sundry disbursements by department.....	10 00	
Superintendent's Dept., freight.....	60	
	<hr/>	
	\$1,490 34	
Less paid by School of Nursing.....	400 00	
	<hr/>	
		\$1,090 34
(Charged to Rockefeller Fund, Hygiene).....		<hr/>
		\$34,955 79

## IX. FACULTY OF APPLIED SCIENCE

## 82. SALARIES

*Dean's Office*

C. H. Mitchell, Dean.....	\$6,000 00	
	<hr/>	\$6,000 00
<i>Electrical Engineering</i>		
H. W. Price, Professor.....	\$5,500 00	
A. R. Zimmer, Associate Professor (paid also \$10 for Extension Work) ..	4,200 00	
Assistant Professors:		
V. G. Smith.....	3,500 00	
B. deF. Bayly.....	3,000 00	
Lecturers (Sessional):		
R. J. Brown.....	2,100 00	
J. E. Reid.....	1,600 00	
L. S. Lanchland, Instructor (Sessional).....	1,400 00	
Demonstrators (Sessional):		
E. A. Ricker.....	1,125 00	
C. J. Bridgland.....	1,100 00	
S. H. Galloway.....	1,025 00	
A. U. Houle.....	1,025 00	
W. B. Morrison.....	1,025 00	
R. C. Anthes.....	1,000 00	
G. L. Hood.....	1,000 00	
L. G. Macdougall.....	1,000 00	
C. H. Salvadge, 2 mos.....	100 00	
J. W. Lawson, Mechanician.....	2,000 00	
W. R. McKee, Electrician.....	2,000 00	
W. L. Bakewell, Assistant Electrician.....	1,100 00	
Miss H. L. Redmond, Office Assistant and Librarian, <i>at</i> \$1,000, of which half charged to Civil Engineering: Municipal and Structural.....	500 00	
	<hr/>	
		\$35,300 00

*Mechanical Engineering*

Professors:	
R. W. Angus.....	\$6,000 00
E. A. Allcut (paid also \$200 for Extension Work).....	4,500 00
Ross Taylor, Associate Professor.....	3,600 00
W. G. McIntosh, Assistant Professor.....	3,400 00
Lecturers (Sessional):	
G. R. Lord.....	2,500 00
T. C. Graham (resigned 31 December).....	975 00
R. C. Wren.....	1,900 00
G. H. Hally.....	1,900 00
Demonstrators, Thermodynamics (Sessional):	
R. J. Birss (paid also \$330 in Special Research).....	1,100 00
C. E. Beynon.....	1,000 00
A. S. Foreman.....	1,000 00
Demonstrators, Hydraulics (Sessional):	
J. W. Fry.....	1,000 00
Wm. D. Smith.....	857 15
Demonstrators, Machine Design (Easter Term):	
J. B. Treloar.....	660 00
W. E. B. Parker.....	580 00
W. A. Higgins (from 19 January).....	435 00
F. Hickey, Engineer and Machinist.....	2,000 00
Arthur Savage, Assistant Machinist, 1,574 hours @ 70c.....	1,108 80
Earl Burt, Fireman, 1,540 hours @ 50c.....	770 00
W. Odd, Laboratory Attendant (resigned 30 June).....	1,200 00
Miss M. Burt, Office Assistant and Librarian.....	1,150 00
	\$37,635 95

*Civil Engineering: Municipal and Structural*

Professors:	
C. R. Young, Civil Engineering.....	\$5,500 00
T. R. Loudon, Applied Mechanics.....	5,000 00
Assistant Professors:	
C. F. Morrison.....	2,600 00
W. L. Sagar.....	2,600 00
M. J. C. Lazier, Lecturer, Applied Mechanics (Sessional).....	2,400 00
Special Lecturers (Sessional — part time):	
A. E. Berry (paid also \$500 in School of Hygiene).....	1,000 00
J. N. Goodier.....	800 00
Demonstrators (Sessional):	
C. E. Helwig, Civil Engineering (paid also \$300 in Special Research).....	1,250 00
I. M. Hamer, Applied Mechanics.....	800 00
W. Kubbinga, Mechanician.....	1,100 00
J. Brown, Laboratory Assistant.....	1,100 00
Miss H. L. Redmond, Office Assistant and Librarian (see also Electrical Engineering).....	500 00
	\$24,650 00

*Civil Engineering: Surveying and Geodesy*

W. M. Treadgold, Professor (paid also \$562.50 for Summer Camp).....	\$4,500 00
Associate Professors:	
S. R. Crerar (paid also \$500 for Summer Camp).....	4,000 00
E. W. Banting (paid also \$475 for Summer Camp).....	3,800 00
J. W. Melson (paid also \$450 for Summer Camp).....	3,600 00
T. L. Rowe, Instructor (Sessional — paid also \$125 for Summer Camp).....	1,450 00
S. A. J. Hopper, Demonstrator (Sessional).....	375 00
C. T. Harding, Mechanician. @ \$925, of which \$500 charged to Applied Physics (paid also \$120 in Special Research).....	425 00
Miss R. Cave, Office Assistant and Librarian, @ \$1,225, of which \$500 charged to Applied Physics and \$100 to Photographic Service.....	625 00
	\$18,775 00

*Mining Engineering*

H. E. T. Haultain, Professor.....	\$6,000 00
Associate Professors:	
F. C. Dyer.....	4,100 00
J. T. King.....	4,100 00
S. E. Wolfe, Lecturer, Assaying (Sessional).....	2,000 00

## Demonstrators (Sessional):

T. A. Frankish.....	1,100 00
W. A. M. Hewer.....	1,100 00
R. H. Junker.....	1,100 00
W. T. Turrall (paid also \$611.10 as Nipissing Research Fellow and \$65 from Medical Research — Banting Fund).....	1,100 00
E. Tozer, Laboratory Assistant and Mechanician.....	1,500 00
C. Waybrant, Laboratory Attendant, Assaying.....	1,250 00
H. J. Reilly, Assistant Mechanician (Sessional — part time).....	960 00
Laboratory Helpers @ \$14.28 per week:	
D. Edwards, 28 weeks.....	400 00
C. Rickard, 28 weeks.....	400 00
Miss J. Bradshaw, Office Assistant and Librarian.....	1,100 00

---

 \$26,210 00
*Metallurgical Engineering*

G. A. Guess, Professor.....	\$5,700 00
Associate Professors:	
J. A. Newcombe (paid also \$340 for Extension Work).....	3,700 00
R. J. Montgomery, Ceramics.....	3,600 00
J. E. Toomer, Assistant Professor.....	3,450 00
Hector Ross, Laboratory Attendant (Sessional — paid also \$40 for messenger service).....	700 00
Office Assistant and Librarian:	
Miss A. Hay, \$25, of which 3/5ths charged to Secretary's Office)....	10 00
Miss V. N. Rigler, from 27 September @ \$61 per month, of which 3/5ths charged to Secretary's Office.....	157 30

---

 \$17,317 30
*Chemical Engineering and Applied Chemistry*

## Professors:

J. Watson Bain, Chemical Engineering.....	\$5,500 00
M. C. Boswell, Organic Chemistry.....	4,900 00
E. G. R. Ardagh, Applied Chemistry.....	4,500 00

## Assistant Professors:

E. A. Smith, Chemical Engineering.....	3,300 00
R. R. McLaughlin, Applied Chemistry.....	3,000 00

## Instructors (Sessional):

A. M. Fitzgerald.....	1,600 00
G. P. Beal (paid also \$325 in Special Research).....	1,300 00
J. G. Breckenridge.....	1,300 00
H. Boeschstein, Technical German (without salary).....	.....

## Demonstrators (Sessional):

W. C. Macdonald (paid also \$220 in Special Research).....	1,200 00
W. H. Rapson (paid also \$450 in Special Research and \$100 for Extension Work).....	1,150 00
N. R. Fasken (paid also \$250 in Special Research).....	1,050 00
D. F. Fraser (resigned 31 October).....	150 00
M. Adelman.....	1,000 00
A. S. Weatherburn (paid also \$75 in Special Research).....	1,000 00
B. Marks (vice D. F. Fraser — paid also \$250 in Special Research).....	855 00
A. S. Hunt, Lecture Assistant and Glass-blower.....	1,700 00
F. Westhead, Laboratory Assistant.....	1,200 00
M. L. Hammond, Lecture Assistant.....	1,000 00
Laboratory Attendants @ \$10 to \$17 per week:	
T. Storton, 52 weeks, 1 day.....	900 00
W. Bolton, 42 weeks.....	420 00
A. Duggan, 35 weeks.....	350 00
H. Neill, 34 weeks.....	340 00
E. W. Patterson, 28 weeks.....	280 00
T. Linsey Crossley, Special Lecturer, Pulp and Paper (Sessional).....	100 00
Miss D. Birkett, Office Assistant and Librarian, @ \$1,250, of which \$200 charged to Secretary's Office.....	1,050 00

---

 \$39,145 00
*School of Architecture*

## Professors:

H. H. Madill.....	\$4,500 00
E. R. Arthur, Architectural Design.....	4,400 00
H. J. Burden, Assistant Professor.....	3,100 00
W. E. Carwell, Lecturer (Sessional).....	2,450 00
Miss J. C. Laing, Librarian and Instructor, Architectural History and French.....	1,850 00

## Instructors (Sessional — part time):

C. W. Jefferys, Painting.....	1,500 00
F. Coates, Modelling (paid also \$75 for Extension Work).....	950 00
Mackenzie Waters, Special Instructor, Architectural Design, 6 mos.....	1,000 00
Special Lecturers (Sessional — part time):	
A. S. Mathers, 7 mos.....	900 00
W. S. Wilson, Architectural Economics (see also Secretary's Office)	250 00
H. Carver, Town Planning.....	200 00
H. B. Dunnington-Grubb, Landscape Architecture.....	100 00
A. Wardell, Heating and Ventilating (without salary — see also Engineering Drawing).....	.....
G. A. Arksey, Attendant in Drafting Room (Sessional)	800 00
Miss E. W. Dyer, Office Assistant, @ \$840 for 9 mos., of which \$340 charged to Engineering Drawing).....	500 00

---

 \$22,500 00
*Engineering Drawing*

J. R. Cockburn, Professor, Descriptive Geometry.....	\$5,000 00
Associate Professors:	
W. J. Smither, Structural Engineering.....	4,100 00
W. J. T. Wright (paid also \$300 as Special Lecturer, Technical English).....	3,900 00
Assistant Professors:	
W. B. Dunbar.....	2,750 00
A. Wardell.....	2,700 00
Lecturers (Sessional):	
P. V. Jermyn.....	2,400 00
J. J. Spence.....	2,000 00
Instructors (Sessional):	
R. M. Clark.....	1,500 00
G. R. Edwards.....	1,500 00
Demonstrators (Sessional):	
J. M. Carswell.....	1,400 00
H. H. Cook.....	1,000 00
W. E. Ewens.....	1,000 00
C. J. Woodley (part time).....	700 00
D. C. McNeven, from 27 November.....	600 00
G. Brown, Attendant in Drafting Rooms, 9 mos.....	1,100 00
Miss E. W. Dyer, Office Assistant (see also School of Architecture).....	340 00

---

 \$31,990 00
*Applied Physics*

K. B. Jackson, Assistant Professor.....	\$3,400 00
Instructors (Sessional):	
V. L. Henderson.....	1,750 00
W. J. Jackson.....	1,550 00
Demonstrators (Sessional):	
L. E. Jones (paid also \$525 in Special Research).....	1,300 00
W. A. Mohun.....	450 00
D. H. Hamly (see also Botany and Special Research).....	450 00
Miss R. Cave, Office Assistant and Librarian (see also Civil Engineering: Surveying and Geodesy).....	500 00
C. T. Harding, Mechanician (see also Civil Engineering: Surveying and Geodesy).....	500 00

---

 \$9,900 00
*Special Lectures*

Special Lecturers (Sessional):	
R. E. Laidlaw, Engineering Law.....	\$500 00
R. R. Grant, Accountancy and Business (paid also \$200 for Extension Work).....	300 00
W. J. T. Wright, Technical Drawing (see also Engineering Drawing)	300 00
F. H. Kirkpatrick, Public Speaking (paid also \$400 for Extension Work).....	250 00

---

 \$1,350 00
*Secretary's Office*

W. S. Wilson, Secretary (paid also \$250 in School of Architecture).....	\$3,200 00
Miss E. Birkett, Assistant Secretary.....	1,650 00
Miss M. Fenton, Assistant.....	1,150 00

## Stenographers:

Miss D. Birkett (see also Chemical Engineering).....	200 00	
Miss A. Hay (see also Metallurgical Engineering).....	15 00	
Miss V. N. Rigler (resigned 9 April) (see also Metallurgical Engineering) .....	236 00	
		\$6,451 00
		\$277,224 25

## 83. ELECTRICAL ENGINEERING

## Supplies (\$2,251.26):

Aikenhead Hardware Ltd., hardware.....	\$190 24
Canadian Durex Abrasives Ltd., cloth.....	29 91
Canadian General Electric Co., cement, varnish and lamps.....	52 62
Canadian Johns-Manville Co., asbestos panels.....	14 86
Canadian National Carbon Co., batteries, etc.....	83 32
Canadian Westinghouse Co., sockets and tubes.....	35 34
Canadian Wire & Cable Co., wire.....	10 31
W. A. Carveth & Co., objectives, eye pieces, etc.....	65 50
Central Scientific Co., magnets.....	15 68
Diamond State Fibre Co., tubing.....	35 37
Driver, Harris Co., wire.....	30 91
T. Eaton Co., brushes, gasoline and stain.....	13 77
General Radio Co., radio parts.....	452 31
D. Gestetner Ltd., stencils, ink and paper.....	123 79
George Gorton Machine Co., cutters.....	24 64
Grand & Toy, holders.....	12 00
Leeds & Northrup Co., scales.....	20 18
Mitchell, Rand Insulation Co., tubing.....	18 77
Photographic Service, slides and prints.....	28 52
Postage.....	40 00
Pratt, Whitney Co., hardware.....	58 26
G. W. Sadler Co., belting.....	15 75
Weston Electric Instrument Co., washers, coils and springs.....	47 71
Wholesale Radio Co., radio supplies.....	195 59
Worr Foundry Co., castings.....	17 57
University Press, printing and stationery.....	105 65
Accounts under \$10 (18).....	114 89
Sundry disbursements by department:	
Hardware, \$24.55; stationery, etc., \$15.55; sundries, \$9.84.....	49 94
Superintendent's Dept., freight, \$69.21; labour, \$136.33; material, \$142.22 .....	347 76

## Apparatus (\$1,055):

Aikenhead Hardware Ltd., hardware.....	42 09
Canadian General Electric Co., rectifier.....	51 10
Eppley Laboratory Inc., cells.....	42 00
General Radio Co., radio parts.....	577 49
E. Hoffman Machinery Supply Co., motor.....	15 00
Kenffel & Esser Co., slide rules.....	32 16
Robbins & Myers Co., fan.....	56 25
Weston Electrical Instrument Corporation, meters.....	238 91

## Furniture, printing and incidentals:

University Press.....	59 51
	\$3,365 77
Less credits: Laboratory deposits, \$46.25; material returned, \$7.35.....	54 10

\$3,311 67

## 84. MECHANICAL ENGINEERING

## Supplies (\$810.33):

Aikenhead Hardware Ltd., hardware.....	\$95 06
Canadian Laboratory Supplies, chemicals, etc.....	31 09
Dominion Bridge Co., metal plate.....	16 50
Arthur S. Leitch, cocks.....	15 36
McColl-Frontenac Oil Co., oil and grease.....	74 46
Postage.....	24 00
Robbins & Townsend, typewriter inspection.....	13 00
Seythes & Co., waste.....	19 76
Taylor Instrument Co., thermometers.....	11 46
Worr Foundry Co., grate bars.....	27 22
Accounts under \$10 (14).....	27 20
Sundry disbursements by department.....	15 00

Superintendent's Dept., freight, \$2.31; labour, \$142.43; material, \$295.48 .....	440 22	
Apparatus — Thermodynamics and Aerodynamics (\$9,951.35):		
Crane Ltd., steel.....	14 21	
Dominion Bridge Co., metal plate.....	12 00	
Laurie & Lamb, compression ignition engine and hydraulic dynamometer .....	2,975 82	
Leyland Motors Ltd., muffler, etc.....	27 75	
Tinius Olsen Testing Machine Co., balancing machine.....	3,404 31	
Storey Pump & Equipment, gasoline engine.....	463 99	
Veedor-Root Ltd., counters.....	7 40	
Wankesha Motor Co., compressor.....	2,519 61	
Superintendent's Dept., freight, \$242.54; labour, \$178.08; material, \$105.64 .....	526 26	
Apparatus — Hydraulics (\$233.95):		
Aikenhead Hardware Ltd., hardware.....	25 27	
Coulter Copper & Brass Co., brass.....	21 28	
Dominion Wheel Foundries, engine support.....	29 00	
Arthur H. Leitch, indicators, etc.....	24 50	
McGregor-McIntyre Iron Works, angles.....	16 00	
Monarch Belting Co., belting.....	15 25	
Superintendent's Dept., labour, \$41.57; material, \$61.08.....	102 65	
Proportion of fuel for Experimental Plant:		
W. H. Cox Coal Co.....	543 43	
Furniture, printing and incidentals (\$252.74):		
Bernard Cairns, stamp pad.....	4 56	
Keuffel & Esser, slide rules.....	24 54	
Photographic Service, slides and prints.....	42 29	
University Press, printing and stationery.....	174 16	
Superintendent's Dept., freight, 45c; labour, \$6.35; material, 39c....	7 19	
		\$11,791 80
Less credit from sale of material.....	88 90	
		\$11,702 90

## 85. CIVIL ENGINEERING: MUNICIPAL AND STRUCTURAL

Supplies (\$569.51):		
Aikenhead Hardware Ltd., hardware.....	\$89 45	
Baines & David, steel.....	78 88	
British Xylonite Co., xylonite.....	14 85	
Dunlop Tire & Rubber Co., cushions.....	13 23	
McBain Foundry, castings.....	16 78	
Photographic Service, prints and slides.....	32 72	
Postage .....	42 00	
E. E. Verbeck, tables.....	44 10	
University Press, printing and stationery.....	83 54	
Accounts under \$10 (8).....	34 45	
Superintendent's Dept., freight, \$4.21; labour, \$32.33; material, \$82.97 .....	119 51	
Apparatus (\$373.25):		
B. C. Ames & Co., gauges.....	75 29	
Canadian Liquid Air Co., torch, parts, etc.....	71 81	
C. A. Hogentogler, plasticity needle.....	54 63	
Office Specialty Mfg. Co., filling cabinet.....	35 25	
Radio Supply Co., robot key.....	19 90	
Sprague & Henwood, sampler, etc.....	70 32	
W. S. Tyler Co., sieves and scales.....	36 80	
Accounts under \$10 (2).....	9 25	
		942 76
Less credit from sale of manuals.....	33 25	
		\$909 51

## 86. CIVIL ENGINEERING: SURVEYING AND GEODESY

Supplies (\$469.95):		
Aikenhead Hardware Ltd., hardware.....	\$18 25	
Art Metropole, taper and refills.....	70 50	
D. Gestetner Ltd., stencils and ink.....	16 38	
Langmuir Mfg. Co., drawing boards.....	27 65	
Photographic Service, blue-prints and rectigraphs.....	12 07	
Thos. Pocklington Co., transit repairs.....	105 50	

University of Toronto Engineering Society, field books and supplies	112 75
University Press, printing and stationery	64 11
Accounts under \$10 (5)	22 73
Sundry disbursements by department	10 00
Superintendent's Dept., labour, \$7.37; material, \$2.64	10 01
Apparatus:	
Instruments Ltd., stereo-cope, \$1,092.50; less \$342.50 to be paid in 1938-39	750 00
Summer Survey Camp — Maintenance (\$6,039.34):	
Instructional Staff (\$2,510.80):	
W. M. Treadgold, services, \$562.50; living expenses, \$67.50; travelling expenses, \$20; supplies, \$2.20	652 20
S. R. Crerar, services, \$500; living expenses, \$51.25; travelling expenses, \$20; supplies, \$2.35	573 60
E. W. Banting, services, \$475; living expenses, \$67.50; travelling expenses, \$20	562 50
J. W. Melson, services, \$450; living expenses, \$67.50; travelling expenses, \$20	537 50
T. L. Rowe, services, \$125; living expenses, \$50; travelling expenses, \$10	185 00
Sundry expenses (\$2,697.44):	
Britnell's Bakeries, bread	56 35
T. E. Campbell, firewood	74 50
Coleman Lamp & Stove Co., mantels and generators	22 49
Currie Products Ltd., roofing	149 64
Easton's Meat Market, meat	39 03
T. Eaton Co., utensils and crockery	106 51
A. Fisher, vegetables	57 45
Geology Dept., notebooks and supplies	39 00
Gurney Foundry Co., stove	25 09
Hewitt Bros., cartage	94 07
G. W. Hudson, drafting tables	80 00
Kawartha Lumber Co., lumber	44 37
Kermath Mfg. Co., rebuilding marine engine	150 00
A. Langdon, stakes, etc.	21 25
W. A. Lindop, gasoline and oil	71 33
Loblaw Groceries, provisions	1,002 72
Mrs. J. Minto, milk and eggs	45 20
A. R. Moss, lumber	32 64
T. L. Rowe, cartage	25 00
C. Trumbell, milk	180 20
S. W. Welch, hardware, etc.	240 51
Accounts under \$10 (3)	7 45
Superintendent's Dept., freight, \$1.28; labour, \$20.13; material, \$111.23	132 64
Payments to Help (\$831.10):	
J. E. Minto, caretaker, 12 mos., \$240; building and boat repairs, \$85.60; ice supply, \$35; cutting wood, \$48.50	409 10
Mrs. J. E. Minto, cook	395 00
D. Campbell, hauling	27 00
	87,259 29
Less credits: Board at Summer Camp, \$2,657.25; laboratory deposits, \$297.60	2,954 85

\$4,304 44

## 87. MINING ENGINEERING

Supplies (\$2,170.77):	
Aikenhead Hardware Ltd., hardware	\$79 55
Canadian Laboratory Supplies, chemicals, glassware, etc.	234 97
Central Scientific Co., chemicals and glassware	213 47
Denver Fire Clay Co., crucibles, etc.	252 26
T. Eaton Co., stools, utensils, etc.	105 57
A. S. Hunt, glassblowing	39 95
Imperial Oil Ltd., fuel oil	44 70
Ingram & Bell, forceps and cotton	10 95
McBain Foundry, castings	10 06
Nichols Chemical Co., acids	17 21
Ontario Rubber Co., tubing, etc.	25 10
Postage	20 00
Safety Supply Co., respirators	12 30

T. S. Simms Co., varnish.....	59 92	
Sturtevant Mill Co., grinding discs.....	18 40	
W. S. Tyler Co., sieves.....	78 65	
University Press, printing and stationery.....	360 80	
Accounts under \$10 (20).....	98 64	
Sundry disbursements by department.....	17 70	
Superintendent's Dept., freight, \$93.93; labour, \$144.86; material, \$231.78 .....	470 57	
Apparatus (\$1,569.57):		
Jas. G. Biddle Co., rheostat.....	17 99	
Canadian Laboratory Supplies, stop watch and thimbles.....	16 47	
Walter A. Carveth & Co., microscope parts and stage.....	176 32	
C. F. Casella Co., precipitator equipment.....	281 24	
Corning Glass Works.....	39 40	
Grand & Toy, cabinet.....	10 80	
W. R. McKee, electrical repairs.....	73 70	
Morgan Crucibles Co., scorifiers.....	78 98	
Office Specialty Mfg. Co., shelving.....	44 40	
J. W. Ritchie, motors.....	36 00	
Fletcher Russell Co., furnace parts.....	123 27	
Weitlaufer Machinery Co., crusher.....	137 80	
Accounts under \$10 (5).....	20 40	
Superintendent's Dept., cable, \$2.13; freight, 48c; labour, \$314.94; material, \$195.25.....	512 80	
		\$3,740 34
Less credits: Laboratory deposits, \$203.90; breakages, \$40.13.....	244 03	
		\$3,496 31

## 88. METALLURGICAL ENGINEERING

Supplies (\$435.75):		
Canada Metal Co., lead, tin, etc.....	\$15 11	
Canadian Atlas Steels Ltd., metal bars.....	11 69	
Canadian Laboratory Supplies, chemicals, glassware, etc.....	192 88	
Canadian Liquid Air Co., cylinder rental.....	11 00	
Denver Fire Clay Co., fire clay, etc.....	27 88	
Eastman Photographic Stores, plates and paper.....	86 86	
Fisher Scientific Co., emery paper.....	29 40	
University Press, printing and stationery.....	11 39	
Accounts under \$10 (6).....	31 40	
Superintendent's Dept., freight, 09c; material, \$18.05.....	18 14	
Apparatus (\$512.35):		
Canadian Laboratory Supplies, hot plates, etc.....	60 27	
Bausch & Lomb Optical Co., plate holders, etc.....	15 98	
Central Scientific Co., heating unit.....	54 49	
T. Eaton Co., utensils.....	10 35	
Fletcher, Russell & Co., furnace parts.....	168 65	
W. H. Kubbinga, machine work.....	2 60	
W. R. McKee, meter repairs.....	14 10	
Weston Electrical Instrument Co., meters.....	62 62	
Williams & Watson, bricks.....	14 85	
Superintendent's Dept., freight, \$22.54; labour, \$53.56; material, \$32.34 .....	108 44	
		\$948 10
Less credit for material returned.....	14 65	
		\$933 45

## 89. CHEMICAL ENGINEERING AND APPLIED CHEMISTRY

Supplies (\$7,682.31):		
Armstrong Cork & Insulation Co., corks.....	\$58 03	
British Drug Houses, chemicals, etc.....	132 16	
Canada Packers Ltd., oil.....	35 29	
Canadian Industries Ltd., acids, etc.....	39 16	
Canadian Kodak Co., chemicals.....	28 13	
Canadian Laboratory Supplies, electrometer, thermometers, chemicals and glassware.....	2,198 92	
Canadian Liquid Air Co., rental of cylinders and gas.....	124 19	
Central Scientific Co., glassware, etc.....	821 36	
Consumers' Gas Co., meter rent.....	10 00	
Consumers' Glass Co., glassware.....	33 60	

Dominion Oxygen Co., gas.....	53 01
Eister Electric Corporation, electrodes.....	18 55
Fidea & Co., watch repairs.....	18 00
A. Gallenkamp, freight charges.....	13 20
General Steel Wares Ltd., parts.....	61 15
B. Greening Wire Co., wire.....	16 21
O. W. Herzberg, chemicals.....	110 86
Ingram & Bell, glycerine, cotton, etc.....	12 69
Lake Simcoe Ice & Fuel Ltd., ice.....	46 59
Liquid Carbonic Canadian Corporation, gas.....	12 00
Lorie Ltd., gold plating.....	126 75
McIntyre & Taylor, tripods, etc.....	18 24
W. R. McKee, electrical repairs.....	54 45
Mallinckrodt Chemical Works, chemicals.....	40 94
Merek & Co., chemicals.....	267 43
Jas. Morrison Brass Co., gauges repaired.....	42 05
Nichols Chemical Co., chemicals and containers.....	580 88
Photographic Service, slides and prints.....	34 73
Thos. Pocklington Co., balance repairs, etc.....	123 50
Robbins & Townsend, typewriter inspection.....	17 90
Textile Products, towels.....	187 05
Twisswire Brushes Ltd., brushes.....	26 40
University Library, Books replaced.....	36 41
Weston Electrical Instrument Co., cell.....	20 80
Wilson Scientific Co., glassware, etc.....	186 72
F. W. Wodsworth Co., tools.....	14 63
University Press, printing and stationery.....	327 11
Accounts under \$10 (25).....	127 99
Sundry disbursements by department:	
Hardware, \$11.91; stationery, postage, etc., \$28.20; sundries, \$19.74.....	59 85
Superintendent's Dept., freight, \$53.96; labour, \$854.32; material, \$637.10.....	1,545 38
Apparatus (\$2,511.85):	
Canadian Laboratory Supplies, colorimeters, weights, viscosimeter, etc.....	1,435 28
Central Scientific Co., pump.....	166 60
Foster, Wheeler Ltd., packing, etc.....	15 52
A. Gallenkamp & Co., furnace.....	63 01
Italian Mosaic & Tile Co., tiling.....	92 00
Leeds & Northrup Co., electrodes, meters, etc.....	170 35
Alex. Wright & Co., saturating tower.....	54 61
Superintendent's Dept., labour, \$333.79; material, \$180.69.....	514 48
	\$10,194 16
Less credits: Laboratory deposits, \$1,223.35; sale of material, \$25.50.....	1,248 85
	<hr/> \$8,945 31

## 90. SCHOOL OF ARCHITECTURE

Supplies (\$492.71):	
Aikenhead Hardware Ltd., hardware.....	\$12 66
Art Metropole, prints and brushes.....	10 34
Beaux Arts Institute of Design, programme service.....	25 18
Wm. Dawson Subscription Service.....	25 50
Photographic Service, slides and prints.....	99 72
Postage.....	28 00
Robbins & Townsend, typewriter inspection.....	20 20
C. L. Todd, subscriptions.....	11 00
University Library, replacing books lost.....	15 74
University of Toronto Engineering Society, drawing supplies.....	11 80
University Press, printing and stationery.....	82 78
Accounts under \$10 (12).....	61 03
Superintendent's Dept., freight, \$1.67; labour, \$37.04; material, \$50.05.....	88 76
Apparatus (\$195.14):	
Artists' Supply Co., canvasses.....	54 00
T. Eaton Co., chair.....	18 00
Laidlaw Lumber Co., models.....	24 30
Accounts under \$10 (3).....	19 21
Superintendent's Dept., labour, \$55.87; material, \$23.76.....	79 63

## Models for life Class:

Prof. H. H. Madill, reimbursement for payments made.....	24 00
Staff expenses — outdoor sketching classes:	
Prof. H. H. Madill, expenses (three members of staff).....	96 48
	\$808 33
Less credit from laboratory deposits.....	6 40

\$801 93

## 91. ENGINEERING DRAWING

## Supplies (\$312.70):

Blackie & Son, text books.....	\$10 00
D. Gestetner Ltd., stencils and paper.....	20 53
Photographic Service, prints and slides.....	31 31
J. Frank Raw & Co., drawing instruments.....	54 00
University Press, printing and stationery.....	46 34
Accounts under \$10 (9).....	37 65
Superintendent's Dept., labour, \$87.77; material, \$25.10.....	112 87

## Apparatus:

Robbins & Townsend, rebuilt typewriter, desk and chair.....	120 00
---	--------

## Printing Instruction Sheets (\$147.75):

D. Gestetner Ltd., stencils, ink and paper.....	60 54
University Press.....	87 21

\$580 45

Less credit from laboratory deposits.....	15 60
---	-------

\$564 85

## 92. APPLIED PHYSICS

## Supplies (\$687.69):

Aikenhead Hardware Ltd., hardware.....	\$53 15
F. Baker, caretaker's overtime services.....	11 00
British Aluminum Co.....	10 64
Brown Bros., paper.....	12 72
Walter A. Carveth & Co., slides, masks and binding.....	31 35
Coulter Copper & Brass Co., metal.....	17 25
T. Eaton Co., chemicals, films, etc.....	10 65
Exide Batteries of Canada, battery.....	10 00
D. Gestetner Ltd., ink and stencils.....	11 76
Office Specialty Mfg. Co., guides and folders.....	14 50
Photographic Service, chemicals, prints, etc.....	139 72
Radio Trade Supply Co., radio supplies.....	16 96
Geo. Rathbone Lumber Co., masonite, etc.....	15 53
University of Toronto Engineering Society, tracing paper and re-prints.....	17 28
Wholesale Radio Co., radio supplies.....	17 05
University Press, printing and stationery.....	58 91
Accounts under \$10 (21).....	58 95

## Sundry disbursements by department:

Stationery, \$5.75; postage, \$5.34; sundries, \$11.91.....	23 00
---	-------

Superintendent's Dept., freight, \$23.97; labour, \$22.05; material, \$111.25.....	157 27
--	--------

## Apparatus (\$1,268.24):

American Hard Rubber Co., rod.....	10 98
American Instrument Co., regulator.....	10 68
American Transformer Co., transformers.....	48 97
Beck Bros., rheostats, etc.....	30 40
Canadian General Electric Co., oscillograph, lamps, projector, etc.,	119 82
Walter A. Carveth & Co., projector.....	46 75
Exide Batteries of Canada, cells.....	283 80
G. M. Laboratories, rheostats.....	43 35
Howard Furnace Co., furnace parts.....	98 10
International Resistance Co., resistors.....	42 46
Leeds & Northrup Ltd., resistors.....	152 25
Northern Electric Co., transmitter, etc.....	56 45
Office Specialty Mfg. Co., cabinets.....	47 75
Robt. Simpson Co., tripod.....	22 50
Struthers & Dunn, relay.....	10 17
University of Toronto Engineering Society, graph paper.....	12 37
Weston Electrical Instrument Co., motor and voltmeter.....	46 47

Accounts under \$10 (11).....	57 39	
Superintendent's Dept., labour, \$78.15; material, \$49.43.....	127 58	
		\$1,955 93
Less credits: Laboratory deposits, \$200.75; sale of material, etc., \$11.10 .....	211 85	
		\$1,744 08

## 93. GENERAL EXPENSES

Stationery, printing, Calendar, office supplies and incidentals- (\$1,905.87):		
Canadian National Telegraphs.....	\$17 98	
Chemical Engineering Dept., used typewriter.....	20 00	
D. Gestetner Ltd., stencils.....	34 00	
Photographic Service, slides and prints.....	227 47	
Postage .....	196 00	
Thomas & Corney Typewriters, Ltd., typewriter repairs.....	18 00	
University Press, printing and stationery.....	1,303 10	
Accounts under \$10 (5).....	23 65	
Sundry disbursements by Secretary.....	15 00	
Superintendent's Dept., labour, \$48.18; material, \$2.49.....	50 67	
Furniture, fixtures, books, etc. (\$216.50):		
T. Eaton Co., linoleum.....	185 00	
Grand & Toy, chair.....	25 50	
Office Specialty Mfg. Co., stools.....	6 00	
Clerical Assistance (\$151.70):		
Miss P. E. McLaughlin, 3 weeks.....	54 00	
Mrs. N. Nixon, 5 6 weeks.....	16 70	
Miss W. Talman, 4½ weeks.....	81 00	
Messenger service (\$822.50):		
A. C. Dykeman, 52 weeks, 1 day.....	782 50	
H. Ross, 4 weeks (paid also as Laboratory Attendant in Metallurgical Engineering) .....	40 00	
		\$3,096 57
Less credit from laboratory deposits.....	37 40	
		\$3,059 17

## 94. PHOTOGRAPHIC SERVICE

(a) Salaries:		
Professor G. R. Anderson, Manager (without remuneration).....		
Photographers:		
C. Crowther (and overtime \$5).....	\$1,450 00	
Mrs. Muriel Milne.....	1,200 00	
Frank Stark, 10 mos.....	1,000 00	
W. Vance.....	950 00	
Mrs. R. E. Morley, Bookkeeper.....	1,150 00	
Miss R. Cave, Office Assistant (see also Civil Engineering: Surveying and Geodesy).....	100 00	
Fred Sayer, Messenger and Studio Assistant (and overtime \$6).....	650 00	
		\$6,500 00
(b) Expenses:		
Supplies:		
W. E. Booth Co., chemicals, films and paper.....	134 88	
Canadian General Electric Co., projector, lamp, etc.....	34 78	
Eastman Photographic Stores, paper, plates, etc.....	435 96	
T. Eaton Co., camera repairs, carriers, etc.....	40 17	
Favor, Ruhl & Co., colours.....	10 22	
Gevaert Co., chemicals, plates, etc.....	317 06	
Instruments Ltd., blue-print paper, etc.....	70 17	
J. Frank Raw Co., paper, etc.....	39 34	
Rectigraph Co., paper.....	205 80	
University Press, printing and stationery.....	132 36	
Accounts under \$10 (4).....	12 27	
Superintendent's Dept., freight, \$5.50; labour, \$6.75; material, \$9.41 .....	21 66	
		\$1,454 67
		\$7,954 67

NOTE: Receipts for photographic work done for various departments (including Accounts Receivable, \$182.84) amounted to \$1,837.36.

## 95. MINING BUILDING (INCLUDING MILL BUILDING)

Heat and light.....	\$7,962 69	
Gas, \$1,115.83; water, \$313.13.....	1,428 96	
Caretaker's supplies:		
Superintendent's Dept., material.....	254 58	
Cleaning (\$3,721.67):		
Allen Mfg. Co., laundry.....	37 08	
New York Window Cleaning Co.....	35 00	
Superintendent's Dept., labour.....	3,649 59	
Repairs and renewals (\$3,274.88):		
Wm. Bartlett & Son, shades, lantern screen, etc.....	57 94	
City Treasurer, elevator license.....	15 00	
T. Eaton Co., cleaning and filling linoleum.....	10 00	
Johnson Temperature Regulating Co., heating system repairs.....	50 21	
Accounts under \$10 (2).....	7 08	
Superintendent's Dept., labour, \$1,890.06; material, \$1,244.59.....	3,134 65	
Alterations to Room 84:		
Superintendent's Dept., labour, \$462.73; material, \$237.27.....	700 00	
Caretaker, A. Clarke, 12 mos. (and overtime \$152).....	1,450 00	
		\$18,792 78
Less heat and light charged to Central Power Plant..	\$7,962 69	
Credit for cleaning, etc.....	22 00	
		7,984 69
		\$10,808 09

## 96. ENGINEERING BUILDING

Heat and light.....	\$3,401 58	
Gas, \$33.42; water, \$201.48.....	234 90	
Caretaker's supplies:		
Superintendent's Dept., material.....	187 67	
Cleaning (\$1,782.83):		
Allen Mfg. Co., laundry.....	17 40	
New York Window Cleaning Co.....	44 50	
Superintendent's Dept., labour.....	1,720 93	
Repairs and renewals (\$2,290.51):		
Wm. Bartlett & Son, shades.....	19 69	
Robt. Simpson Co., linoleum.....	79 07	
Superintendent's Dept., labour, \$1,553.91; material, \$637.84.....	2,191 75	
Caretaker, F. Baker, 12 mos. (and overtime \$153).....	1,400 00	
		\$9,297 49
Less heat and light charged to Central Power Plant...	\$3,401 58	
Credit for cleaning, etc.....	193 41	
		3,594 99
		\$5,702 50

97. ELECTRICAL BUILDING (INCLUDING MECHANICAL BUILDING  
AND WIND TUNNEL)

Heat and light.....	\$4,458 16	
Fuel for Experimental Plant (\$1,088.47):		
W. H. Cox Coal Co.....	1,087 72	
Superintendent's Dept., labour.....	75	
Gas, \$86.34; water, \$412.08.....	498 42	
Caretaker's supplies:		
Superintendent's Dept., material.....	113 07	
Cleaning (\$2,013.68):		
Allen Mfg. Co., laundry.....	22 88	
New York Window Cleaning Co.....	66 50	
Toronto Window Cleaning Co.....	20 00	
Superintendent's Dept., labour.....	1,904 30	
Repairs and renewals (\$1,491.92):		
Wm. Bartlett & Son, shades.....	24 64	
Canadian Powers Regulating Co., repairs to controls, etc.....	9 87	
City Treasurer, elevator license.....	10 00	
Homes Welded Metals Co., hot-water tank.....	17 50	
Superintendent's Dept., labour, \$878.17; material, \$551.74.....	1,429 91	
Caretaker, F. F. Hitchcock, 12 mos.....	1,450 00	
		\$11,113 72

Less heat and light charged to Central Power Plant...	\$1,458 16	
Credit for cleaning.....	21 00	
		4,479 16
		<u>\$6,634 56</u>
98. GEODETIC OBSERVATORY BUILDING		
Heat and light.....	\$294 71	
Water.....	16 20	
Caretaker's supplies:		
Superintendent's Dept., material.....	18 56	
Cleaning (\$124.91):		
Advance Window Cleaning Co.....	4 41	
Superintendent's Dept., labour.....	120 50	
Repairs and renewals:		
Superintendent's Dept., labour, \$70.54; material, \$3.17.....	73 71	
		<u>\$528 09</u>
Less heat and light charged to Central Power Plant.....	294 71	
		<u>\$233 38</u>
		<u>\$328,331 07</u>
Charged to Revenue, 1937-38.....		20,000 00
Charged to Wallberg Fund.....		<u>\$348,331 07</u>

## X. FACULTY OF DENTISTRY

## 99. SALARIES

(a) *Regular Staff*

A. D. A. Mason, Dean (paid also as Professor).....	\$1,000 00
Professors:	
A. D. A. Mason, Operative Dentistry (paid also \$45 for Extra Mural Lectures).....	5,000 00
F. M. Lott, Prosthetic Dentistry (paid also \$30 for Extra Mural Lectures).....	5,000 00
T. Cowling, Dental Technology and Metallurgy.....	2,000 00
G. C. Cameron, Dental Pathology and Bacteriology.....	3,000 00
C. A. Corrigan, Orthodontia (paid also \$40 for Extra Mural Lectures).....	2,500 00
E. W. Paul, Dental Surgery and Anaesthesia (also Librarian from 1 September).....	840 00
F. J. Conboy, Dental Praxis.....	400 00
S. S. Crouch, Dental Anatomy (paid also \$600 as Lecturer, Orthodontia).....	250 00
I. H. Ante, Crown and Bridge Prosthesis (without salary — paid \$75 for Extra Mural Lectures and \$320 for Post Graduate Courses).....	
Associate Professors:	
Dentistry:	
W. G. Switzer.....	4,000 00
H. A. Hoskin.....	4,000 00
R. J. Godfrey.....	3,800 00
R. G. Ellis (paid also \$30 for Extra Mural Lectures).....	3,800 00
F. A. Clarkson, Medicine.....	360 00
Fulton E. Risdon, Oral Surgery.....	180 00
L. A. Kilburn, Dental Praxis.....	150 00
E. S. Ryerson, Assistant Professor, Surgery (see also Faculty of Medicine).....	400 00
Associates:	
Dentistry:	
S. M. Richardson.....	3,300 00
L. F. Krueger (paid also \$160 for Extra Mural Lectures).....	1,500 00
G. H. Coram.....	1,400 00
H. A. Ross.....	500 00
G. D. Beierl.....	750 00
F. L. Cole (paid also \$60 for Extra Mural Lectures).....	670 00
J. H. Duff (paid also \$25 for Extra Mural Lectures).....	705 00
W. T. Holmes.....	1,000 00
W. L. Hugill.....	560 00
F. Martin (paid also \$60 for Extra Mural Lectures).....	630 00

G. V. Morton (paid also \$50 for Extra Mural Lectures).....	670 00	
J. M. Sheldon.....	670 00	
R. R. Walker.....	670 00	
R. S. Woollatt.....	670 00	
R. L. Twible.....	540 00	
D. M. Tanner (paid also \$292 as Demonstrator and \$100 in Faculty of Medicine).....	50 00	
G. Vernon Fisk, Orthodontia (paid also \$150 in St. George's School)	200 00	
Miss W. C. Riddle, Histology, Bacteriology and Pathology.....	2,160 00	
G. W. Spinks, Dental Anatomy.....	700 00	
Preventive Dentistry:		
J. Kreutzer, also Demonstrator in Operative Dentistry (Ses- sional) .....	1,100 00	
M. A. Cox.....	600 00	
J. H. Johnson, Dental Surgery and Anaesthesia (paid also \$15 for Extra Mural Lectures).....	3,400 00	
C. H. M. Williams, Periodontia (half time).....	1,208 00	
Demonstrators, Assistants, etc. (Sessional):		
Demonstrators:		
P. G. Anderson.....	495 00	
J. H. G. Harwood (part time).....	240 00	
D. M. Tanner, Peridontology (see also above).....	292 00	
Miss D. F. J. Berry, Preventive Assistant.....	1,300 00	
Lecturers:		
C. C. Rous, Applied Chemistry and Metallurgy (see also Office Staff) .....	300 00	
W. D. Cavanagh, Dentistry.....	540 00	
S. S. Crouch, Orthodontia (see also above).....	600 00	
E. J. Pratt, Special Lecturer, English (see also Faculty of Medicine and Ontario College of Education).....	260 00	
Instructors:		
E. M. Rigsby, Dental Technology.....	240 00	
R. S. Hosking, English Expression (paid also \$200 for Extension Work) .....	100 00	
Laboratory Assistants:		
Technicians:		
W. V. Byrne, Dentistry, 10 mos.....	1,900 00	
Miss I. A. Bumby, Bacteriology and Pathology.....	1,100 00	
H. F. Whittaker (see also Anatomy).....	120 00	
Mrs. M. Gratton, Histology (part time) 34 weeks.....	306 00	
H. Aylward, Infirmary (paid also \$33 for overtime).....	1,250 00	
		\$69,476 00
(b) <i>Infirmary Staff (including Nurses)</i>		
Nurses:		
Miss L. A. Cameron, Supervisor, Dental Nurses in Training, 10 mos.....	\$1,300 00	
Miss L. E. Tutt, 10 mos.....	900 00	
Miss A. H. Rose, 9 mos.....	840 00	
Miss F. G. Whitehead, 8 mos.....	800 00	
Miss A. E. Phipps, 10 mos.....	800 00	
Miss G. Kyle, 10 mos.....	700 00	
Miss E. G. Singer, 10 mos.....	700 00	
Miss M. M. Brown, 10 mos.....	700 00	
R. M. Turner, Instructor in Typewriting for Dental Nurses.....	100 00	
Mrs. L. Barraclough, Laundress, 42 weeks @ \$16.45.....	691 00	
		\$7,531 00
(c) OFFICE STAFF		
C. C. Rous, Secretary (see also above).....	\$3,000 00	
Miss F. A. Cook, Secretary to the Dean.....	1,700 00	
Miss R. C. Hopkins, Assistant to Secretary (resigned 31 August).....	216 66	
Miss E. B. Mimms, Assistant in Library.....	1,100 00	
Fraser Mimms, Assistant in Library (Sessional - part time).....	140 00	
Miss L. Park, Cashier in Infirmary, 10 mos.....	1,100 00	
Miss F. Ward, Stenographer, 2 mos. to 31 August @ \$1,100 per annum; Assistant to Secretary @ \$1,200 from 1 September (vice Miss Hopkins).....	1,183 34	
Miss M. D. Hill, Clerk in Secretary's Office from 1 September (vice Miss Ward, promoted).....	833 34	
		\$9,273 34
		\$86,280 34

## 99a. POST GRADUATE COURSE

Dr. I. H. Ante, honorarium as Instructor.....	\$320 00
Allan & Rollaston, vulcanizing dentures.....	12 00
Photographic Service, slides, etc.....	2 70
University Press, printing.....	22 01
Sundry expenses.....	25 00

\$381 71

## 100. LABORATORY AND INFIRMARY SUPPLIES

Aikenhead Hardware Ltd., hardware.....	57 41
Ash Temple Co., dental supplies.....	1,189 31
Wm. Bartlett & Son, shade and lantern screen.....	15 21
Bausch & Lomb, microscope repairs.....	20 92
W. E. Booth & Co., film filters.....	26 32
Burke Electric & X-Ray Co., films.....	26 46
Bernard Cairns, tags.....	11 76
Canadian Hanson & Van Winkle Co., pumice.....	19 80
Canadian Laboratory Supplies, slide boxes, etc.....	54 03
Canadian Laundry Machinery Co., ironer.....	193 30
Canadian Tumbler Co., glasses.....	14 40
Canadian Westinghouse Ltd., refrigerator unit.....	369 77
L. D. Caulk Co., dental compound.....	75 55
Central Scientific Co., glassware, chemicals, etc.....	121 85
Chemistry Dept., laboratory and sundry supplies.....	313 85
Columbia Dentoform Corporation, dental supplies.....	66 78
Columbus Dental & X-Ray Corporation, dental supplies.....	21 70
Denco Ltd., gold.....	920 78
Dental Co., heater.....	27 11
Dental Products Corporation.....	10 75
DeVelbess Mfg. Co., cut offs, with tubing.....	203 84
H. S. Dodd, furnace alterations.....	25 00
Dominion Dental Co., dental supplies.....	347 79
Eastman Photographic Stores, films, chemicals, etc.....	493 15
T. Eaton Co., mattress, chairs, cleaning supplies, etc.....	136 87
Florentine Co., models.....	43 90
Ed. Green Dental Supplies, dental supplies.....	66 84
Hall Mfg. Co., dental forms and masks.....	49 04
J. F. Hartz Co., needles, cat gut, gloves, etc.....	129 31
Interlake Tissue Mills, paper napkins.....	90 00
Andrew Jergens Co., soap.....	11 33
Johnson & Johnson, absorbent cotton, etc.....	247 93
Johnson, Matthey & Co., gold.....	1,751 58
Kelley Feed & Seed Co., feed.....	13 10
Mrs. C. A. Kennedy, model trimmer.....	12 50
Leiman Bros., polishing outfit.....	225 33
Medico Co., syringes.....	35 48
Melton Hardware, dental plaster.....	89 18
Metal Craft Co., stools.....	180 00
Might Directories Ltd., city directory.....	32 40
Minneapolis-Honeywell Regulator Co., electrical controls, etc.....	18 72
National Drug & Chemical Co., chemicals.....	2,078 60
National Refining Co., gold, furnace castings, porcelain, etc.....	3,178 02
Office Specialty Mfg. Co., guides, desk, etc.....	78 13
Photographic Service, slides and prints.....	180 79
Physics Dept., laboratory supplies.....	34 15
Geo. P. Pilling & Son Co., electrical pointer.....	10 24
E. L. Platt, oxygen machine, repairs, gas, etc.....	31 10
Thos. Pocklington & Co., chart paper.....	16 00
Prophylactic Brush Co., tooth brushes.....	18 04
Alfred Quantrell, cut-off repairs.....	15 00
Reeves & Sons, pictures framed.....	11 25
Richard- Glass Co., bottles.....	10 33
Miss M. Sewell, charts.....	35 00
W. R. Sherrick, installing cables, etc., for inter-phone system.....	175 00
Robt. Simpson Co., curtains and fittings.....	207 59
Ella Skinner, uniforms.....	494 26
Wallace C. Sproule, lettering labels and signs.....	24 75
Stanley Mfg. Co., name plates.....	17 10
Stevens Companies, sterilizers, drums, instrument tables, etc.....	1,565 46
Toronto Dental Dealers, dental supplies.....	346 64
United Business School, typewriter rental.....	15 00

University of Toronto Engineering Society, pads, pencils, paper, etc.....	64 45	
S. S. White Co., electric engine, furnace, and dental supplies.....	1,377 91	
White X-Ray Surgical Supply Co., mounts.....	49 00	
Whitex Surgical Supply Co., mounts.....	37 00	
Williams Gold Refining Co., castings, wire, bars, etc.....	981 09	
G. H. Wood & Co., drinking cups.....	61 50	
University Press, nurses' kits and bulletins.....	197 89	
Accounts under \$10 (35).....	155 03	
Sundry disbursements by Secretary:		
Laundry, \$136.55; sundry supplies, \$55.19.....	191 74	
Superintendent's Dept., freight, \$51.71; labour, \$2,998.88; material, \$1,881.03 .....	4,931 62	
		\$24,380 08
Less credits: Laboratory deposits, \$1,375.97; gold sweepings, \$58.20; sale of material, \$20.99.....	1,455 16	
		\$22,924 92

## 101. GENERAL EXPENSES

Stationery, printing, Calendar, office supplies and incidentals (\$1,899.95):		
C. P. R. Telegraphs.....	\$32 87	
Postage .....	145 50	
Robbins & Townsend, typewriter inspection.....	60 75	
Waller Multigraphing Letter Co., multigraphing.....	10 00	
University Press, printing and stationery.....	1,618 63	
Accounts under \$10 (3).....	17 00	
Sundry disbursements by Secretary.....	15 20	
Extra-Mural Lectures (\$650):		
I. H. Ante.....	75 00	
F. L. Cole.....	60 00	
C. A. Corrigan.....	40 00	
J. H. Duff.....	25 00	
R. G. Ellis.....	30 00	
J. H. Johnson.....	15 00	
L. F. Krueger.....	160 00	
F. M. Lott.....	55 00	
F. Martin.....	95 00	
A. D. A. Mason.....	45 00	
G. V. Morton.....	50 00	
American Association of Dental Schools, dues.....	75 00	
		\$2,624 95
Less received from Royal College of Dental Surgeons, account extra- mural lectures.....	350 00

Dr. H. J. Weigand.....	43 17
Catering on sundry occasions (\$721.55):	
Coles Ltd., Cordell Hull convocation.....	26 00
Hart House, President's teas and luncheons, \$261; sundry guests, \$38	299 00
Royal Ontario Museum, teas: Federation of University Women,	
\$43.75; American Association of Teachers of Physics and Physical	
Society, \$60.....	103 75
York Club, luncheons; Cordell Hull, \$174.05; Sir Howard d'Egville,	
\$53.45.....	232 50
University College Women's Union: President's dinner for Students'	
Administrative Council.....	41 25
Accounts under \$10 (4).....	19 05
	<hr/>
	\$1,134 11

## 138. CONVOCATION EXPENSES

Hoods, gowns, printing programmes, invitations, etc.:	
Harcourt's Ltd., hood.....	\$22 50
S. Harrod, engrossing.....	17 05
G. B. Pritchard, engrossing.....	3 10
Walter & Son, hoods and gowns.....	260 50
University Press, printing and stationery.....	236 85
	<hr/>
	\$540 00

## 139. AID TO PUBLICATIONS AND SOCIETIES

Alumni Federation.....	\$2,500 00
Royal Astronomical Society.....	150 00
Royal Society of Canada.....	400 00
Universities Bureau of the British Empire.....	299 76
British School of Archaeology, Jerusalem.....	100 00
American School at Athens.....	200 00
American School of Oriental Research, Jerusalem.....	100 00
American School of Oriental Research, Bagdad.....	100 00
Association of American Universities.....	50 00
Society for Promotion of Engineering Education.....	15 16
Students' Administrative Council (re student lodgings).....	100 00
	<hr/>
	\$4,014 92

## 140. SENATE ELECTIONS

(nothing spent)

## 141. BURSARIES

Awards to sundry students:	
Faculty of Arts.....	\$7,270 00
Faculty of Medicine.....	3,175 00
Faculty of Dentistry.....	100 00
	<hr/>
	\$10,545 00
Less portion charged to donation:	
Medical Society.....	600 00
	<hr/>
	\$9,945 00

## 142. CONTINGENCIES

Canadian Bank of Commerce, charge re registration of securities.....	\$82 90
Chartered Trust & Executor Co., commission on collection of postponed	
fees of students.....	10 69
Geo. Coles Ltd., catering re Ontario Education Association Convention..	157 50
Hart House, catering re Social Science Convention.....	37 50
Dunlop's Ltd., flowers for funerals.....	46 00
Wm. James, damages to car caused by fire hose.....	10 50
Klotz Library Fund, purchase of library of the late Professor Klotz.....	1,500 00

Manufacturer's Life Insurance Co., interest on mortgage, No. 104 St. George St.....	27 80	
Provincial Treasurer, portion of cost of printing University Report.....	129 43	
Remembrance Day Committee, wreath for Tower Memorial Service.....	12 50	
Charles H. Riches & Sons, Canadian and United States Patents:		
Respirator, Dr. Hall and B. S. Leibel.....	\$219 00	
Bellows Oscillating Means.....	363 00	
		\$582 00
Accounts under \$10 (3).....		17 70
Workmen's Compensation:		
Workmen's Compensation Board, to cover allowances paid to employees, etc.....		336 62
Medical services for injured employees, etc.:		
Toronto General Hospital.....	53 00	
Dr. Roy H. Thomas.....	52 50	
Sundry doctors (6).....	35 50	
		\$3,092 14
		<u>\$107,885 71</u>

## XXII. 143. CAPITAL ACCOUNT CHARGES

Accountant, Supreme Court of Ontario, twenty-ninth annual payment on debenture issue of 1909.....	\$25,260 00	
Less portion charged to Ontario College of Education.....	10,000 00	
		\$15,260 00
Accountant, Supreme Court of Ontario, twenty-third annual payment on debenture issue of 1915 re Hart House.....		5,975 00
Accountant, Supreme Court of Ontario, fourteenth annual payment on debenture issue of 1924 re Forestry Building.....		10,000 00
Toronto General Hospital, twenty-seventh annual payment on debenture issue of 1911 re grant to Toronto General Hospital.....		15,157 00
Toronto General Hospital, twenty-seventh annual payment on debenture issue of 1911 re old Pathological Building.....		6,568 00
University of Toronto (Rockefeller Endowment—Medicine) ninth annual payment on debenture issue of 1929 re Banting Institute.....		64,193 00
Royal College of Dental Surgeons, interest on liability of \$50,000.....		2,500 00
		<u>\$119,653 00</u>

## XXIII. SPECIAL RESEARCH

## 144. DEPARTMENTAL APPROPRIATIONS

## (a) Arts:

## Biology:

## Research Assistants:

A. Wilkes, 8 mos.....	\$650 00
L. Butler, 11 mos.....	600 00
C. J. Kerswill, 8 mos.....	400 00
K. H. Doan, 8 mos. (paid also \$200 in Fisheries Research)	300 00
Miss A. M. Ironside (paid also \$160 in department).....	300 00
H. H. I. Nesbitt, 8 mos.....	300 00
H. B. Wressell, 8 mos.....	300 00
Assistant in Vivarium, W. Whitehead, 1 July to 31 August.....	72 00

## Expenses (\$535.21):

Agfa Ansco Ltd., acetals.....	10 38
S. Bane, scale.....	10 00
Central Scientific Co., chemicals and glassware.....	32 16
Crabtree-Gravure, reprints.....	38 88
Human Biology, reprints.....	16 17
Dr. W. E. Hurlburt, labour and material for sparrow aviary	21 55
Kelley Feed & Seed Co., feed.....	30 70
Lake Simcoe Ice & Fuel Co., ice.....	10 00
R. Laidlaw Lumber Co., sawdust.....	18 00
H. E. LeMasurier, prints.....	11 20
Maple Leaf Milling Co., feed.....	61 06
Photographic Service, prints.....	15 00
Arthur H. Thomas Co., dishes, powder, etc.....	28 11
University Press, printing and stationery.....	24 41
Accounts under \$10 (17).....	76 52

Sundry disbursements by department:			
Food supplies, \$30.93; hardware, etc., \$12.29; drugs,			
\$8.16; sundries, \$23.57.....		74	95
Superintendent's Dept., labour, \$40.22; material, \$15.90....		56	12
		<hr/>	
		\$3,457	21
Less credits: Sale of material, \$76.78; material returned, 93c		77	71
		<hr/>	
Fisheries Research:		\$3,379	50
Research Assistants:			
F. E. J. Fry, 12 mos. (paid also \$900 in department)...		\$1,100	00
R. R. Langford, 12 mos. (paid also \$900 in department)		1,100	00
W. A. Kennedy, 3 mos.....		300	00
K. H. Doan, 3 mos. (see also above).....		200	00
W. R. Martin, 3 mos. (paid also \$30 in department)...		200	00
V. E. F. Solman, 3 mos. (paid also \$30 in department)		200	00
Expenses (\$1,197.08):			
W. J. K. Harkness, disbursements:			
Provisions, \$368.27; travelling and hotel expenses,			
\$146.56; car and boat service, \$121.30; gas and			
oil, \$217.99; hardware and lumber, \$203.54;			
sundries, \$42.58.....		1,100	24
Borden Co., milk powder.....		30	87
Postage.....		26	26
University Press, printing and stationery.....		19	80
Accounts under \$10 (4).....		12	69
Superintendent's Dept., material.....		7	22
		<hr/>	
		\$7,675	58
Botany:			
Research Associate, L. C. Coleman, 12 mos.....		\$2,000	00
Research Assistants:			
B. B. Hillary, 3 mos.....		210	00
D. F. Putnam, 3 mos.....		175	00
D. C. McPherson, 3 mos.....		150	00
S. A. Simmons, 3 mos... }	paid also in	150	00
A. J. Skolko, 3 mos..... }	department	150	00
Miss G. S. Taylor, 3 mos. }		150	00
C. N. Haldenby, 3 mos... }		150	00
A. J. V. Lehmann, 3 mos. }		140	00
W. R. Watson, 2 mos..... }		120	00
D. H. Hamly, 2 mos. (paid also in Departments of			
Applied Physics and Botany, and Special Research,			
Applied Physics).....		90	00
N. W. Radforth, 2 mos. (paid also \$150 for Extension			
Work).....		90	00
Miss D. F. Forward, 2 mos. }		80	00
Miss A. B. Brodie, 1 month. }	paid also in department	60	00
M. W. Bannan, 1 month..... }		60	00
Expenses (\$209.87):			
Canadian Liquid Air Co., rental of cylinders and gas...		18	76
R. H. Chappell, glass-blowing.....		11	00
Prof. H. S. Jackson, expenses re trip to Cambridge for			
research work on Fungi.....		65	12
Lancaster Press, reprints.....		47	04
National Research Council of Canada, reprints.....		16	15
Accounts under \$10 (4).....		17	93
Superintendent's Dept., material.....		33	87
		<hr/>	
		\$3,984	87
(b) Medicine:			
Organic Chemistry:			
Erich Baer, Assistant Professor, Research in Organic Chemistry,			
12 mos.....		\$3,000	00
		<hr/>	
		\$3,000	00
Bio-Chemistry:			
Research Assistants:			
G. C. Butler, 2 mos..... }		\$200	00
W. H. Fishman, 2 mos. }	paid also in department	200	00
Paul Hamilton, 2 mos. }		200	00
		<hr/>	
		600	00

## Experimental Medical Research:

Chief Technical Assistant, W. Cowan, 12 mos.....		\$1,700 00
Head of Animal Quarters, J. Minshull, 12 mos.....		600 00
Assistants in Animal Quarters:		
C. Lee, 12 mos.....		660 00
L. Hughes, 12 mos.....		595 32
Expenses (\$2,795.64):		
Allen Mfg. Co., laundry.....		120 27
Corbett-Cowley Ltd., uniforms.....		49 19
E. Cullen, animals.....		707 60
Francis, Hankin & Co., incinerator bars.....		11 00
Ingram & Bell, chemicals, needles, drugs, etc.....		543 32
Kelley Feed & Seed Co., straw and feed.....		80 51
Langley, Harris Co., dog biscuits.....		50 00
John McGillian, carrots.....		61 20
Mallinckrodt Chemical Works, ether.....		68 82
Maple Leaf Milling Co., feed.....		328 50
Ralston, Purina Co., feed.....		473 23
West Disinfecting Co., disinfectant.....		25 06
Accounts under \$10 (5).....		15 38
Superintendent's Dept., labour, \$87.70; material, \$173.86...		261 56
		\$6,950 96
Less credits: Anonymous donation.....	\$125 00	
Sale of animals and feed.....	967 95	
		1,092 95
		\$5,858 01
Charged to Dunlap Bequest.....	\$3,975 00	
Charged to Reeve Bequest.....	1,883 01	
		5,858 01

## (c) Applied Science:

## Applied Physics:

## Research Assistants:

L. E. Jones, 3 mos. (paid also \$1,300 in department).....		\$525 00
D. H. Hamly, 1 month (see also department).....		175 00
Machinist, C. T. Harding, 4 weeks (see also Department of Civil Engineering: Surveying and Geodesy).....		120 00
Expenses (\$79.88):		
W. E. Booth, film.....		3 12
Superintendent's Dept., labour, \$36.60; material, \$40.16...		76 76

## Architecture:

## Expenses:

Clerical Assistant, J. F. Brennan.....		25 00
Draughting assistance:		
S. B. Barclay.....		15 00
F. P. Meschino.....		15 00
Cripps Studio, prints.....		6 00
Photographic Service, prints.....		25 97
A. S. Whyte, photographs.....		10 00

## Chemical Engineering:

## Research Assistants:

W. H. Rapson, 3 mos. (paid also \$1,150 in department)....		450 00
G. T. Eaton, 3 mos.....		412 50
L. J. Rubin, 3 mos.....		375 00
G. P. Beal, 2 mos.....	} Paid also in dept.	325 00
N. R. Fasken, 2 mos.....		250 00
B. Marks, 2 mos.....		250 00
W. C. Macdonald, 3 mos.....		220 00
A. S. Weatherburn, 1 month.....		75 00

## Expenses:

Canadian Laboratory Supplies, acids.....		6 37
--	--	------

## Civil Engineering:

## Research Assistants:

C. E. Helwig, 2 mos. (paid also \$1,250 in department).....		300 00
R. D. Hiscocks, 2 mos., 2½ weeks.....		195 00

## Expenses:

Photographic Service, prints.....		39 00
-----------------------------------	--	-------

## Electrical Engineering:

## Expenses:

Art Metropole, achromatic objective, etc.....	72 77
Baker & Co., spool, etc.....	8 22
British Drug Houses, chemicals.....	12 50
Walter A. Carveth Co., microscopes, etc.....	228 50
J. W. Fecker, lens.....	15 30
Robbins & Townsend, motor.....	30 00
Spencer Lens Co., magnifier.....	14 32

## Mechanical Engineering:

## Research Assistants:

F. G. Ewens, 2 mos.....	350 00
G. Gung, 5 mos.....	350 00
R. J. Birss, 2 mos. (paid also \$1,100 in department).....	330 00

## Expenses (\$116.43):

American Society for Mechanical Engineers, publications..	4 75
Keuffel & Esser, tracing cloth.....	23 35
McGregor-McIntyre Iron Works, infiltration apparatus....	42 00
W. R. McKee, potentiometer repairs.....	12 75
University Press, printing and stationery.....	10 70
Superintendent's Dept., labour, \$18.52; material, \$4.36.....	22 88

## Printing Bulletins, etc.:

Wm. Clowes & Sons, reprints.....	29 07
Grand & Toy, book.....	8 70
National Research Club of Canada, reprints.....	13 75
Postage.....	10 00
University Press, printing and stationery.....	423 98

\$5,914 26

Charged to Wallberg Bequest..... 5,864 26

\$50 00

## (d) Dentistry:

Professor of Periodontology, H. K. Box, 12 mos. (half time).....	\$3,000 00
Laboratory Technician, A. F. Fenton.....	1,500 00

\$4,500 00

\$19,211 45

## 145. BANTING AND BEST RESEARCH

## (a) Banting Research:

Professor of Research in Medicine, Sir Frederick Banting, 12 mos....	\$5,000 00
Associate Professors, each 12 mos.:	
W. R. Franks.....	3,600 00
D. A. Irwin.....	3,600 00
G. E. Hall.....	3,500 00
C. C. Lucas, Assistant Professor, 12 mos.....	3,200 00
Research Associates, each 12 mos.:	
Miss S. Gairns.....	2,160 00
J. M. Grosheintz.....	2,040 00
Research Assistants:	
J. E. Goodwin, 12 mos.....	1,800 00
H. L. Collins, 12 mos.....	1,680 00
Miss J. M. Lang, 12 mos.....	1,400 00
D. P. C. Lloyd, 12 mos.....	1,380 00
Dr. E. Marie Hearne, 12 mos.....	1,200 00
Miss M. M. Shaw, 12 mos.....	1,200 00
Dr. Sheila M. Gordon, 10 mos.....	1,000 00
R. C. Sniffen, 10 mos.....	1,000 00
Miss H. E. Williams, 12 mos.....	900 00
Bernard Leibel, 12 mos.....	900 00
Miss H. E. Ball, 11 mos.....	825 00
J. M. R. Beveridge, 10 mos.....	750 00
M. O'Sullivan, 10 mos.....	750 00
Miss M. Wheatley, 10 mos.....	750 00
Miss D. B. Mundell, 15 September to 30 June.....	712 50
D. W. Loughheed, 9 mos.....	675 00
G. W. Manning, 4½ mos.....	450 00
F. L. Lawson, 4½ mos.....	360 00
F. B. Thomson, 4 mos.....	300 00
A. E. Byrnes, 4 mos. (resigned 31 December).....	300 00
G. A. Meek, 4 mos.....	300 00

H. Miller, 18 weeks.....	288 00
F. H. Lawford, 3 mos. (paid also \$550 in Department of Pathological Chemistry).....	270 00
M. L. Allan, 3 mos.....	180 00
W. K. Kerr, 1½ mos.....	112 50
R. C. Smith, 1 month.....	75 00
Miss S. Brydon, 1 month.....	75 00
G. J. Millar, 1 month.....	50 00
Research Fellows:	
H. J. Creech, 12 mos.....	1,200 00
L. B. Macpherson, 10 mos.....	800 00
Lorne D. Proctor, 3 mos.....	360 00
J. J. Rae, 2 mos.....	200 00
W. M. Gray, 1 month (paid also \$500 in Department of Physics)	75 00
Chemical Assistants:	
Raymond MacDougall, 15 November to 30 June.....	448 83
H. N. MacFarland, 1 month, 14 weeks.....	235 00
D. Barton, 12 weeks.....	150 00
Technicians:	
L. C. Brock, 12 mos.....	1,380 00
H. M. Douglas, 12 mos.....	1,200 00
J. Conboy, 12 mos.....	1,140 00
T. Walker, 12 mos.....	1,140 00
C. Lott, 11 mos.....	825 00
G. Parkes, 12 mos.....	780 00
D. Snow, 12 mos.....	720 00
Miss N. H. Davy, 12 mos.....	660 00
W. J. Watson, 12 mos.....	593 33
Miss G. Mulholland, 2 mos.....	130 00
Technical Assistant, G. Johnston, 6 2/3 weeks.....	93 33
Secretarial Assistants:	
Miss M. J. Millar, 12 mos.....	1,080 00
Miss D. Waugh, 1 week (paid also \$70 from Medical Research — Best Fund).....	25 00
Assistants in Animal Quarters:	
K. Sims, 7½ mos.....	375 16
F. Simpson, 4½ mos.....	247 50
S. Smith, 12 mos.....	660 00
A. Stello, 12 mos.....	605 00
Laboratory Attendant, Mrs. C. McCallum, 484 hours (paid also \$350 in Pathological Chemistry).....	155 52
Cleaner, Mrs. Allison Moffatt, 12 mos.....	640 00
	\$58,641 67
Expenses (\$18,812.69):	
Abbott Laboratories, powder.....	35 73
Aikenhead Hardware Ltd., hardware.....	18 21
Allen Mfg. Co., laundry.....	330 36
Aluminum Co., sheet aluminum.....	17 28
American Journal of Cancer, subscription.....	31 48
Bausch & Lomb Optical Co., condenser.....	11 27
B. A. Bayley, stimulator.....	35 00
Borden & Co., milk powder.....	10 31
British Aluminum Co., aluminum.....	52 04
British Drug Houses, acids.....	39 23
Fred Broom, meat.....	183 96
Burger's Battery Co., batteries.....	61 71
Prof. E. F. Burton, analyses of aerial dusts.....	35 00
Cambridge Instrument Co., lamp.....	13 11
Cambridge University Press, reprints.....	27 42
Canadian General Electric Co., radiotrons.....	23 63
Canadian Industries Ltd., acids.....	19 77
Canadian Kodak Co., chemicals.....	140 55
Canadian Medical Association, reprints.....	77 33
Canadian Westinghouse Co., radio parts.....	145 43
Carswell Co., books.....	32 36
Central Scientific Co., chemicals, glassware, etc.....	1,840 02
R. H. Chappell, glass-blowing.....	54 50
Connaught Laboratories, animals.....	15 00
Corbett-Cowley Ltd., uniforms.....	100 96

A. C. Cossor, tubes.....	68 36
Coulter Copper & Brass Co., still repairs.....	26 00
E. Cullen, animals.....	1,478 26
Culling Ltd., paper.....	29 50
Eastman Photographic Stores, slides and prints.....	77 67
T. Eaton Co., pans, scalers and trays.....	12 76
Fisher Scientific Co., chemical apparatus.....	71 12
A. Gallenkamp Co., spatules.....	33 44
General Motors Sales Corporation, refrigerator repairs.....	62 22
Gevaert Co., lantern plates.....	60 49
Albert M. Grass, oscillograph.....	450 91
B. L. Guyatt, animals.....	27 90
Hammond Mfg. Co., transformer chokes.....	51 70
Francis Henker Co., incinerator repairs.....	75 50
J. F. Hartz Co., slides.....	75 00
Hoffman-La Roche Ltd., chemicals.....	93 37
E. Hooking Glass Works, glass-ware.....	32 63
A. S. Hunt, glass-blowing.....	13 75
Ingram & Bell, chemicals, tubing, needles, etc.....	631 70
Instruments Ltd., thermometer.....	15 50
International Resistance Co., resistors, etc.....	172 75
Roscoe B. Jackson Memorial Laboratories, animals.....	437 61
Jackson, Howe, Brooks Co., tubing.....	12 00
Janetto Mfg. Co., wave filter.....	108 90
Frank Jennings, sawdust.....	48 00
Journal of Biological Chemistry.....	16 12
L. Light & Co., chemicals.....	21 68
Lockhart's Camera Exchange, prints and plates.....	45 81
Lowe-Martin Co., transfer cases.....	19 20
John McGillian, carrots.....	40 80
W. R. McKee, galvanometer, etc.....	67 10
Mallinckrodt Chemical Co., ether.....	23 27
Mead, Johnson Co., yeast powder.....	12 75
C. V. Mosby Co., reprints.....	20 00
National Grocers Co., salmon.....	13 60
Naylor & Naylor, insulators and respirators.....	105 00
Northern Electric Co., condensers, etc.....	116 21
Office Specialty Mfg. Co., folders and cards.....	13 63
Ontario College of Agriculture, eggs and poultry.....	442 35
Ontario Rubber Co., tubing.....	11 66
Physics Dept., X-Ray examination of mine dust.....	10 00
Philco Products Ltd., wire kit.....	19 95
Postage.....	55 16
Radio Equipment Ltd., radio parts.....	88 45
Ralston Purina Co., feed.....	731 49
Risebrough & Jackson, feed.....	616 18
Robbins & Townsend, typewriter inspection.....	28 00
Rogers Radio Tubes Ltd., radio parts.....	25 00
Schering Ltd., glycerine aldehyde.....	105 42
Arthur H. Thomas Co., glass-ware, etc.....	79 23
E. Tozer, crushing ore.....	26 50
W. T. Turrall, services in connection with adapting infra-sizer..	65 00

## (b) Best Research:

Research Associate, C. H. Best, 12 mos. (see also Department of Physiology).....	2,500 00
Physiology:	
Research Associate, J. Markowitz (sessional).....	100 00
Research Assistants (Sessional):	
R. E. Haist, 1 month (paid also \$1,466.67 in department).....	100 00
M. J. Wilson, 4 mos. (part time — paid also \$400 in Department of Anatomy).....	400 00
Mrs. Jean P. Fletcher, 12 mos.....	900 00
Demonstrators (Sessional — part time):	
C. E. Walker, 6 mos.....	500 00
F. P. Dewar (paid also \$250 in Anatomy).....	250 00
M. W. Hicks, 4 mos. (paid also \$200 in Anatomy).....	200 00
Fellow, B. H. B. Hallam, 3 mos. (part time).....	240 00

Technical Assistants:	
E. L. Robinson, Head of Technical Staff, 12 mos. (share of salary charged to Research—see also department).....	500 00
Miss G. I. Harpell, 12 mos.....	1,000 00
G. Scattergood, 12 mos.....	1,000 00
L. V. Hodgins, 10 mos., 3 weeks.....	831 25
Charles Scattergood, 12 mos.....	720 00
Mrs. J. M. D. Williamson, 12 mos.....	720 00
Miss M. L. Palmer, 2 mos.....	200 00
S. McCracken, 7 weeks.....	138 00
Secretarial Assistants:	
Miss Doris Secord, 3 mos. (paid also \$1,250 in department)	100 00
Miss Dorothy Waugh, 3 weeks (see also Medical Research—Banting) .....	70 00
Physiological Hygiene:	
Research Associates, each 12 mos.:	
Miss J. H. Ridout.....	2,200 00
Mrs. Ruth C. Partridge (see also School of Hygiene).....	1,100 00
Research Assistants, each 12 mos.:	
Miss E. F. Dudley Martin.....	1,250 00
J. Campbell, Jr.....	1,600 00
Technical Assistants:	
C. R. Cowan, Senior (share of salary charged to Research—see also School of Hygiene).....	500 00
J. Scattergood, 12 mos.....	1,000 00
Miss M. Luxton, 12 mos.....	850 00
Miss M. E. Hocking, 12 mos.....	800 00
J. G. Truax, 12 mos.....	800 00
Miss A. Jaffray, 12 mos.....	750 00
Miss L. C. Barber, 1 month.....	70 83
Kenneth Roseblade, ½ month (see also School of Hygiene)	30 41
Technician, C. L. Skelding, 1 month (see also School of Hygiene) .....	20 00
	\$21,440 49
Expenses (\$15,912.78):	
Aikenhead Hardware Ltd., hardware.....	93 96
American Medical Association, reprints.....	12 87
Art Metropole, lamps, etc.....	57 81
Ayerst, McKenna & Harrison, cod liver oil.....	26 08
Booth Canadian Films Ltd., developing.....	10 64
Borden Co., casein, etc.....	138 46
British Drug Houses, drugs and chemicals.....	125 31
F. J. Burns Co., frogs.....	62 34
Cambridge University Press, reprints.....	15 19
Canada Packers, meat.....	181 88
Canadian Kodak Co., chemicals.....	386 81
Canadian National Carbon Co., batteries.....	24 99
Canadian Office & School Furniture Ltd., table and cupboards..	329 00
Canadian Tire Corporation, tubes, resistors, sockets, etc.....	25 85
Walter A. Carveth & Co., microscope repairs .....	61 50
Central Scientific Co., chemicals, glassware, thermometers, etc.,	400 22
R. H. Chappell, glass-blowing.....	175 75
Chicago Wheel & Mfg. Co., grinder.....	24 04
Warren E. Collins Inc., soda lime.....	40 28
Connaught Laboratories, reprints, alcohol, heparin solution and maintenance of animals.....	1,261 83
Joseph Cooper, meat.....	729 21
Corbett-Cowley Ltd., uniforms.....	28 51
E. Cullen, animals.....	1,081 90
C. Emmett, animals.....	16 80
F. W. Fisher, filing boxes.....	48 60
J. A. Fontaine, frogs.....	35 00
General Radio Co., condensers and potentiometer.....	133 00
General Steel Wares, instrument cabinet.....	32 93
Ingram & Bell, chemicals, sutures, needles, etc.....	77 97
Johnson-Matthey Co., gold chloride.....	23 00
Stephen Jones, films.....	62 50
Kennedy Mfg. Co., sprayer.....	31 68

Langley, Harris & Co., dog biscuits.....	100 00
Mallinckrodt Chemical Works, ether.....	21 78
Matthews, McCutcheon & Co., pans, films, etc.....	62 20
Merck & Co., chemicals.....	201 28
James Morrison Brass Mfg. Co., floats.....	17 20
New Standard Foundry Co., castings.....	13 93
Office Specialty Mfg. Co., cabinets and guides.....	100 20
Pfanstiehl Chemical Co., chemicals.....	24 63
Photographic Service, slides and prints.....	79 55
Queen City Brass Foundry, castings.....	20 79
Rainbow Lantern Slide Co., slides.....	32 45
Frank Read, iron blocks.....	10 00

Charged to Insulin Committee Grants.....	34,853 27
	\$2,500 00
	\$10,000 00
	\$29,211 45

APPENDIX III  
UNIVERSITY PRESS

Ledger Balances (net) as at 30 June, 1937.....	\$52,851 58
Transferred to General University Revenue, appropriation by Board of Governors for 1937-38.....	30,000 00
	\$22,851 58
Transactions for the year ending 30 June, 1938.	
Receipts, including \$190.83 outstanding and receivable on 30 June, 1938.....	247,534 35
	\$270,385 93
Expenditures:	
Salaries, wages and ordinary operating expenses.....	\$244,257 77
Additions to plant and equipment.....	15,000 00
Alterations to building.....	1,304 36
Accumulated appropriations for School of Engineering Research written back to general revenue.....	1,723 39
Interest on debit balances.....	854 33
	\$263,139 85
Net Balance at credit 30 June, 1938.....	\$7,246 08

## NOTE

The above figures cover the accounts passing through the Bursar's Office. Supplementary thereto the Manager of the Press reports on hand, inventories, etc. (including work in progress) \$34,715.92; accounts receivable (less reserve) \$12,058.01; office furniture, etc., \$661; less sundry liabilities (net) \$1,316.68; making with the above cash balance of \$7,246.03, a total surplus over liabilities of \$53,364.33.

## DETAILS OF EXPENDITURE

Salaries and wages (\$90,528.15):	
A. Gordon Burns, Acting Manager, 12 mos.....	\$3,600 00
Miss E. M. Walker, Secretary, 12 mos.....	1,950 00
Miss E. Baguley, Cashier, 12 mos.....	1,350 00
Miss I. E. McTaggart, Chief Clerk, Book Department, 12 mos.....	1,350 00
Clerks, each 12 mos.:	
Miss W. Hills.....	1,140 00
Mrs. Florence Friendship.....	1,092 00
Miss I. Westwood.....	1,050 00
Miss M. Storey.....	1,000 00
Miss R. Buchan.....	936 00
Miss M. D. Carter.....	884 00
Miss A. Muldowney.....	884 00
Miss I. Potter.....	850 00
Miss M. Beattie, 7 mos. @ \$112.50; 4 mos. @ \$56.25.....	1,012 50
Geo. Edwards, Caretaker, 12 mos.....	1,550 00
A. Bigwood, Messenger, 7 mos.....	393 75
Pay lists, wages of employees.....	71,485 90
Editorial Services (\$5,150.00):	
Miss Alison Ewart, General Editor, 12 mos.....	1,900 00
Miss Mary L. Thompson, Assistant to General Editor, 12 mos.....	1,200 00
G. W. Brown.....	500 00
A. S. P. Woodhouse.....	400 00
V. W. Bladen.....	400 00
E. K. Brown.....	400 00
W. P. M. Kennedy.....	250 00
A. Brady.....	100 00
Payments to contributors to publications.....	1,622 50
Payments of royalties and returns from sales.....	7,082 02
Supplies and general operating expenses (\$139,875.10):	
Aikenhead Hardware Ltd., hardware.....	45 13
Alexander & Cable, lithographing diplomas.....	119 00

## APPENDIX A.

## ONTARIO COLLEGE OF EDUCATION

Balance on hand 30 June, 1937.....	\$43,857 62
Receipts, 1937-38:	
Legislative Grant.....	201,675 00
Fees of Students.....	64,323 64
Aura Lee Grounds.....	600 00
	\$310,456 26
Expenditure for salaries and maintenance for the year ending 30 June, 1938.....	275,590 78
Balance on hand 30 June, 1938.....	\$34,865 48

*Salaries*

J. G. Althouse, Dean (paid also \$350 for Extension Work).....	\$6,000 00
Professors:	
P. Sandiford, Educational Psychology, and Director of Educational Research (paid also \$140 for Extension Work).....	5,700 00
F. E. Coombs, Methods in Elementary Subjects (paid also \$350 for Extension Work).....	4,700 00
G. A. Cornish, Methods in Science.....	4,700 00
W. C. Ferguson, Methods in Modern Languages (resigned 31 August).....	783 34
G. M. Jones, Methods in English and History.....	4,700 00
J. O. Carlisle, Methods in Classics, also Supervisor of Practice-Teaching.....	5,000 00
W. J. Lougheed, Methods in Mathematics (paid also \$66 for Extension Work).....	4,400 00
Associate Professors:	
Miss W. G. Barnstead, also Director of Library School (paid also \$80 for Summer Session and Graduate Work).....	4,000 00
Miss L. L. Ockley, Household Science.....	4,200 00
W. G. Bennett, Methods in Commercial Subjects (paid also \$162.50 for Extension Work).....	4,200 00
B. C. Diltz, Methods in English and History.....	3,950 00
Assistant Professors:	
Miss Bertha Bassam, Library Science in Library School (paid also \$80 for Summer Session and Graduate Work).....	2,800 00
Miss Helen B. St. John, Modern Languages.....	3,800 00
J. A. Long, Educational Psychology (paid also \$210 for Extension Work and \$30 in School of Nursing).....	3,600 00
Lecturers, also Instructors in University Schools:	
Miss A. Marsh, Art.....	3,125 00
G. N. Bramfitt, Music.....	4,000 00
F. Halbus, Physical Training.....	3,625 00
A. T. McLachlan, Shopwork (paid also \$300 for Extension Work).....	3,200 00
Miss H. L. Bryans, Physical Training, @ \$3,300 (on leave of absence at half salary from 1 October to 31 January).....	2,750 00
Mrs. Norma B. Laing, Physical Instructor, 4 mos. from 1 October (substitute for Miss Bryans).....	500 00
Miss A. E. Robertson, Lecturer, Household Science.....	3,300 00
Miss Sally A. Ballard, Reviser and Instructor in Library Science, Library School.....	1,500 00
Instructors in University Schools:	
A. C. Lewis, Headmaster.....	4,600 00
R. F. S. Baird, Teacher-Librarian.....	3,400 00
G. A. Cline, @ \$4,000 (on leave of absence without pay from 1 November).....	1,333 33
A. G. Croal (paid also \$27 for Extension Work).....	3,600 00
E. L. Danhier.....	4,000 00
J. L. Gill.....	3,800 00
H. A. Grainger (paid also \$75 for Extension Work).....	4,000 00
J. A. Irwin.....	4,000 00
H. McGuire.....	3,200 00
Norman McLeod.....	3,900 00
J. H. Mills (paid also \$63 for Extension Work).....	4,000 00
N. L. Murch (paid also \$114 for Extension Work).....	4,000 00

L. H. Newell.....	2,600 00	
P. A. Petrie.....	3,950 00

REPORT  
RELATING TO THE REGISTRATION OF  
BIRTHS, MARRIAGES AND DEATHS  
IN THE  
PROVINCE OF ONTARIO  
FOR THE  
YEAR ENDING 31st DECEMBER

1938

(BEING THE SIXTY-NINTH ANNUAL REPORT)

---

---

PRINTED BY ORDER OF  
THE LEGISLATIVE ASSEMBLY OF ONTARIO  
SESSIONAL PAPER No. 13, 1939

ONTARIO

TORONTO  
Printed and Published by T. E. Bowman, Printer to the King's Most Excellent Majesty  
1940

SIR:

I have the honour to submit for your approval the Sixty-Ninth Annual Report made in conformity with and under the provisions of the Act respecting the Registration of Births, Marriages and Deaths in the Province of Ontario, for the year ending December 31st, 1938.

I have the honour to be, Sir,

Your obedient servant,

F. V. JOHNS,

*Deputy Registrar-General.*

TO THE HON. H. C. NIXON,

*Registrar-General of Ontario.*

TO HIS HONOUR THE LIEUTENANT-GOVERNOR OF THE PROVINCE OF ONTARIO

MAY IT PLEASE YOUR HONOUR:

I herewith beg to present for your consideration the Sixty-Ninth Annual Report of the Registrar-General, relating to the Registration of Births, Marriages and Deaths in the Province of Ontario during the year 1938.

Respectfully submitted,

H. C. NIXON,  
*Registrar-General of Ontario.*

# CONTENTS

The population is distributed as follows:—

Cities, Towns and Villages of 10,000 population and over 1,661,188. Towns and Villages of 5,000 to 10,000 population 192,238. Rural (including all other municipalities) 1,877,574.

## BIRTHS

There were registered 65,564 living births during the year 1938, being a rate of 17.6 per 1,000 of population. This being a numerical increase of 3,919.

## BIRTHS

There were 33,605 boys, or 51.2% of the total number; and 31,959 girls, or 48.7% which represents 95.1 male to 100 female births.

In the case of illegitimate births 74.8% of the mothers were under 25 years of age and of the total 3,061 such births, 1,583 or 51.7% were boys and 1,478 or 48.2% girls.

## MULTIPLE BIRTHS

There were 682 cases of twin births. Of these 703 were males and 661 females.

There were 6 cases of triplets, 6 boys and 12 girls.

Table 15 will give a detailed explanation of the multiple births.

## CONFINEMENTS

Multiple births.....	688
Single living births.....	64,269
Single still births.....	1,928

66,885

Other tables dealing with births will be found from Table No. 1 to Table No. 15.

CANCER

The following Table shows how deaths and the death rate from Cancer have increased in the last half century:

1888.....	635—	30.9
1898.....	975—	45.1
1908.....	1,597—	65.0
1918.....	2,103—	74.9
1928.....	3,441—	106.5
1938.....	4,472—	119.8

## SUICIDES

In 1938 there were 360 suicides. The rate per 100,000 of population was 9.6, just 0.2 less than for 1937.

Of these, 274 or 76.11 were males and 86 or 23.88 females.

	Total		Under 20		20-39		40-59		60 and over	
	No.	%	No.	%	No.	%	No.	%	No.	%
Males. . . .	274	100	8	2.91	84	30.65	127	46.34	55	20.07
